## What is this product?

**Type** The Company is an open-ended umbrella investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 373807.

### Objectives

**Product objectives** The Fund's objective is to achieve capital appreciation through investment in a portfolio of equity securities.

**Investment approach** The Fund will invest in equities issued by US companies listed or traded on Recognised Markets in the United States such as the NASDAQ, the New York Stock Exchange, the American Stock Exchange, the Chicago Mercantile Exchange and the Chicago Board of Trade across all market capitalisations. The Fund seeks to invest in companies that have the potential to change or entirely displace large segments of the healthcare economy. These investments entail innovative technologies that are driving the obsolescence of legacy products and practices. The Fund may invest up to a maximum of 20% of the Net Asset Value in non-US companies including up to 10% of its assets in securities of emerging market issuers. These investments are generally made in American Depositary Receipts ("ADRs"), which are depositary receipts for foreign securities denominated in US dollars and traded on US securities markets or available through a US broker or dealer. The Fund may invest in open-ended and closed-ended collective investment schemes provided such investments are eligible for investment by UCITS and such investments will not exceed in aggregate 10% of the Net Asset Value of the Fund.

**Benchmark** The Fund's benchmark is the MSCI World Health Care Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities. In addition, the investment performance and volatility of the Fund's portfolio will be measured against the Solactive Developed Markets Healthcare Mid & Small Cap Index NTR (the "Index"). The Index intends to track the performance of mid & small cap companies involved in the healthcare economy from the developed markets.

**Redemption policy** Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

**Distribution policy** Accumulating shares do not pay dividends. The annual result is capitalized (or reinvested). Income shares pay a dividend, insofar as the performance of the fund allows.

**Exchange policy** Subject to the conditions set down in the Prospectus, you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the Company. Please refer to the Prospectus for further information on how to switch.

**Asset segregation** The Fund is a sub-fund of the Company, an umbrella fund with segregated liability between sub-funds. You can find out more information about the umbrella fund in the Prospectus.

**SFDR Article 8**

**Derivatives policy** The Fund will not invest in financial derivative instruments ("FDIs") for investment purposes. However, the Fund may use forward foreign currency exchange contracts for hedging purposes.

**Intended retail investor** The Fund is suitable for investors seeking capital growth over a 5 to 10 year time horizon with a high level of volatility commensurate with United States equities.

**Term** The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. Waystone Management Company (IE) is not entitled to terminate the product unilaterally.

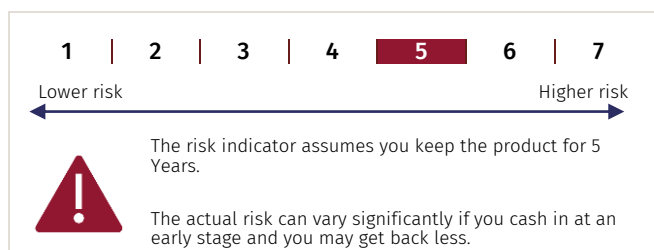

### Practical information

**Depository** HSBC Continental Europe.

**Further information** The Net Asset Value of the Share Class is calculated in USD and is available on Bloomberg, Morningstar and Reuters. The Prospectus and periodic reports are prepared in the name of the Company. Copies of the Prospectus and the latest annual and half-yearly report are available in English and free of charge from <https://www.newcapital.com/>>

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

For other materially relevant risks not included in the summary risk indicator, please refer to the Prospectus for the descriptions: Sustainability

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period		5 Years	
Example Investment		USD 10 000	
Scenarios		If you exit after 1 Year	If you exit after 5 Years (Recommended Holding Period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	<b>What you might get back after costs</b>	<b>2 810 USD</b>	<b>1 560 USD</b>
	Average return each year	-71.89%	-31.02%
Unfavourable	<b>What you might get back after costs</b>	<b>6 850 USD</b>	<b>8 050 USD</b>
	<b>Average return each year</b>	<b>-31.49%</b>	<b>-4.25%</b>
Moderate	<b>What you might get back after costs</b>	<b>10 780 USD</b>	<b>13 350 USD</b>
	Average return each year	7.83%	5.95%
Favourable	<b>What you might get back after costs</b>	<b>13 710 USD</b>	<b>20 350 USD</b>
	Average return each year	37.09%	15.27%

**Unfavourable Scenario:** This type of scenario occurred for an investment between (08/2021 - 01/2024).

**Moderate Scenario:** This type of scenario occurred for an investment between (11/2014 - 11/2019).

**Favourable Scenario:** This type of scenario occurred for an investment between (10/2016 - 10/2021).

The before-mentioned calculations were performed using benchmark MSCI World Health Care Index

#### What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

#### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

Investment USD 10 000		
Scenarios	If you exit after 1 Year	If you exit after 5 Years (Recommended Holding Period)
<b>Total Costs</b>	119 USD	818 USD
<b>Annual costs impact (*)</b>	1.2%	1.3% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.22% before costs and 5.95% after costs.

#### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	0.0% of the amount you pay in when entering this investment. This is the most you will be charged.	<b>Up to 0 USD</b>
