ISIN: LU2033393567

A sub-fund (hereafter referred to as the fund) of NN (L)

This fund is managed by NN Investment Partners B.V.

Objectives and Investment Policy

The fund invests in stocks of companies producing materials worldwide. This includes companies carrying out their activities in the following industries: chemicals, construction materials, containers & packaging, metals & mining, paper and forest products. The portfolio is diversified across different countries. Measured a period of several years we aim to beat the performance of the benchmark MSCI World Materials NR. We aim to add

value to the fund by a systematic bottom-up stock selection approach. This will include both fundamental and behavioural alpha sources. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund aims at providing you with a regular dividend.

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 6 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with

stocks and/or financial instruments used to reach the investment objective is considered high. Stocks and other financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The SubFund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment.
