

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

NN (L) Global High Yield - I Cap PLN (hedged iii)

ISIN: LU0546922856

A sub-fund (hereafter referred to as the fund) of NN (L)

This fund is managed by NN Investment Partners B.V.

Objectives and Investment Policy

The fund primarily invests in a diversified portfolio of worldwide corporate bonds with a higher risk and therefore with a higher interest rate (so called high yield bonds, with a quality rating lower than BBB). In the fund we combine our analysis on specific issuers of corporate bonds with a broader market analysis to construct the optimal portfolio. We aim to exploit differences in returns of these issuers within sectors and differences in returns between regions, sectors and different quality segments (ratings). The differences in high yield returns within a sector can be significant; we therefore believe that a strong focus on issuer selection and issuer diversification needs to be a crucial part of the high yield investment process. Unhedged we aim to beat the performance of the benchmark 70% Bloomberg Barclays US High Yield, 30% Bloomberg Barclays Pan-European High Yield, 2% issuers capped ex financial subordinates. There is no

benchmark for this specific hedged share class as we apply a currency hedging strategy. By hedging our currencies we aim to avoid currency risks for Polish Zloty (PLN) investors. We hedge all currency risks in the benchmark of the sub-fund to the reference currency of this share class (PLN). The risks of exchange rate fluctuations against the PLN, related to over- and underweight positions in the portfolio versus the benchmark of the sub-fund, remain in this share class. A currency hedge consists of taking an offsetting position in another currency. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Risk and Reward Profile

Lower risk - Typically lower rewards			Higher risk - Typically Higher rewards			
1	2	3	4	5	6	7

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 3 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with bonds used to reach the investment objective is considered high. These financial instruments are impacted by various factors. These include, but are

not limited to, the development of the financial market, the economic development of issuers of these instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The fund's liquidity risk is set to high. Liquidity risks arise when a specific underlying investment is difficult to sell, causing possible difficulty to redeem your investment from the fund. Moreover, currency fluctuation may impact highly the fund's performance. Investments in a specific theme (like the one described in this fund's Objectives and Investment Policy) are more concentrated than investments in various themes. No guarantee is provided as to the recovery of your initial investment. Hedging share classes, a method to try to manage specific currency risk, may lead to additional credit risk and to residual market risk depending on the effectiveness of the hedging performed.

Charges

All charges paid by the investor are used to pay the running costs of the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:

Entry charge	2%
Exit charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge	0.92%
----------------	-------

Charges taken from the fund under certain specific conditions:

Performance fee	0%
-----------------	----

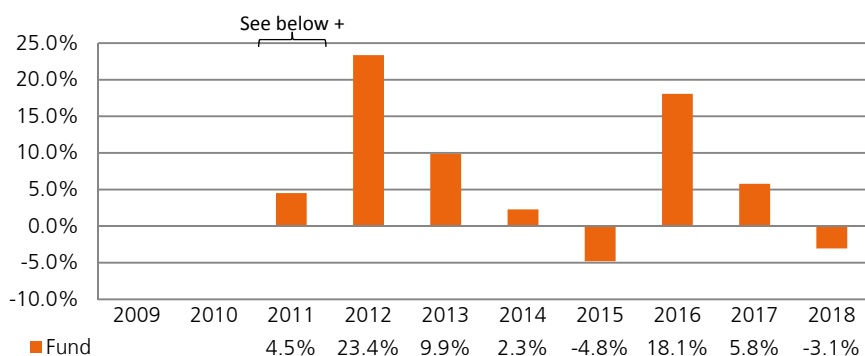

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser. The ongoing charges figure is based on expenses for the year ending 12/2018. This figure may vary from year to year.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the funds when buying or selling units in another collective investment undertaking

You can find more detail about the charges in the chapter "Subscriptions, redemptions and conversions" and "Fees, expenses and taxation" of the prospectus which is available on our website <https://www.nnip.com/library>.

Past Performance

- Performance in the past is not a reliable indicator of future results.
- The past performance shown here takes account of all charges and costs, excluding entry and exit costs and fund switching costs.
- This sub-fund was launched in 2011.
- This share class was launched in 2011.
- The past performance is calculated in PLN.

+ Performance prior to the launch date has been simulated on the basis of the past performance of another similar fund that applied higher or comparable charges.
