

NOMURA

Japan Strategic Value Fund

Objectives and investment policy

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

**Typically higher rewards,
higher risk**

- The Fund is classified in the category above because of the past behaviour of the share price. Where no share price history is available for any part of the last five years, the history of an appropriate benchmark or share class has been used in its place.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases and that the fund is not guaranteed to always stay in the same category.
- The indicator does not take into account the following material risks of investing in this Fund:
 - Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
 - Currency hedged share classes aim to deliver a return that is as close as possible to the base currency performance of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, these techniques may not be fully effective in completely removing the exchange rate risk.
- By focusing its investments in Japan, the fund will have greater exposure to the market, political and economic risks of that country than if it was more diversified across a number of countries.
- A full list of risks that may be applicable to this Fund can be found in the Prospectus.
