

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Nordea 1 – Balanced Income Fund, E-EUR Share Class

ISIN-Code: LU0637308312

The fund is managed by Nordea Investment Funds S.A., a company of the Nordea Group.

Objectives and investment policy

The sub-fund's objective is to preserve and steadily grow the shareholders' capital over a full investment cycle. The investment process is based on active asset allocation, both tactical and strategic, robust diversification across mainly fixed income asset classes using leveraged exposure, and active currency management. The investment manager aims to find return drivers using both long and short positions in a wide range of fixed income instruments. Additionally, the investment manager aims, for a smaller portion of the sub-fund, to invest in equity instruments.

The sub-fund will implement its investment strategy by taking positions in a broad range of fixed income and equity asset classes, sub-asset classes and currencies globally by investing directly into securities or indirectly via the use of derivatives and to a limited extent into funds. Asset classes and sub-classes refer to a group of assets of common sectors, geographic areas, ratings, security type, or any other criteria relevant for the construction of each investment strategy.

The sub-fund may invest up to 20% of its net assets in mortgage and asset backed securities.

The sub-fund may be exposed to other currencies than the base currency through investments and/or cash holdings. The sub-fund will use the currency exposure actively in the investment strategy.

The sub-fund may use derivatives to achieve an efficient portfolio management or with the aim of reducing risk and/or generating additional capital or income. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivatives is not cost or risk-free.

The sub-fund may be highly leveraged, which means that the exposure to underlying markets and/or securities generated by the instruments in the sub-fund's portfolio may be much larger than 100%. Leverage techniques may amplify the effects of adverse market movements or weaken the effects of favourable market movements.

The sub-fund may take part in a securities lending program.

Any investor may redeem its shares in the sub-fund on demand, on a daily basis. This sub-fund may not be appropriate for investors who plan to withdraw their money within a period of 3 years.

The sub-fund does not compare its performance against any reference index. It may freely select the securities that it will invest in.

This share class is not distributing dividends. Income from investments is reinvested.

The sub-fund is denominated in EUR. Investments in this share class settle as well in EUR.

Risk and reward profile

The indicator measures the risk of price fluctuations in the sub-fund certificates based on the last 5 years volatility and places the sub-fund in category 3. This means that the purchase of units in the sub-fund is connected to **medium risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **Counterparty risk:** A counterparty (i.e. any institution providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments) may become insolvent and may fail fulfilling its obligations to the sub-fund.
- **Credit risk:** Risk of loss resulting from a debt instrument issuer that may default and fails paying the coupons and the principal to the sub-fund.
- **Derivatives risk:** Derivatives are used to increase, lower or maintain the risk level of the sub-fund. These financial instruments depend on the value of an underlying asset. A small change in the price of the underlying asset may lead to large price change of the derivatives and significant losses.
- **Event risk:** Unforeseeable events such as devaluations, drops in interest rates, political events, etc., may negatively affect the sub-fund.
- **Liquidity risk:** Some assets may become difficult to sell at a reasonable price in certain circumstances and therefore may be sold below their valuation.

For more information on risks the sub-fund is exposed to, please refer to the section "Special Risk Considerations" of the Prospectus.

Key Investor Information

Nordea 1 – Balanced Income Fund, E-EUR

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	2.23%
Charges taken from the fund under certain specific conditions	
Performance fee	The share class is not subject to any performance fee.

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find the exact charges which will apply to your investment by contacting your financial adviser or distributor.

The ongoing charges figure is based on the last year's expenses, for the year ending December 2018, and this figure may vary from year to year. It excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

For more information about charges, please see section 16 of the fund's prospectus, which is available at www.nordea.lu.
