

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Nordea 1 – Stable Return Fund, AP-NOK Share Class

ISIN-Code: LU0255639485

The fund is managed by Nordea Investment Funds S.A., a company of the group Nordea Bank AB.

Objectives and investment policy

The sub-fund aims to preserve Shareholders' capital and provide a stable growth to them. Investments are made globally in equities, bonds (including bonds convertible in equity shares) and money market instruments denominated in various currencies in anticipation of up and down movements.

Assets will typically consist of Equity Related Securities and Debt Securities.

The sub-fund may use financial derivative instruments* mainly to:

- protect itself against the depreciation of foreign currencies in its portfolio;
- mitigate the negative effect related to the default of the issuer(s) of debt instruments in its portfolio;
- take additional credit risks against the regular receipt of premium payments from the counterpart who benefits from the protection;
- extend or reduce its duration; or
- replace a direct investment in securities.

* These are financial contracts the value of which depends on the market price of a reference item.

Some of these derivatives' strategies may significantly increase risks.

Nordea's Policy for Responsible Investment aims to create Returns with Responsibility. The policy is actively executed in portfolio management throughout environmental, social and governance analysis; norm based screening and active ownership activities.

The sub-fund may take part in a securities lending program.

Any investor may redeem its shares in the sub-fund on demand, on a daily basis. This sub-fund may not be appropriate for investors who plan to withdraw their money within a period of 3 years.

The sub-fund does not compare its performance against any reference index. It may freely select the securities that it will invest in.

This share class may pay out distributions once a year after the annual general meeting of the shareholders.

The sub-fund is denominated in EUR. Investments in this share class settle in NOK. EUR/NOK fluctuations may lead the performance in NOK of the share class to significantly deviate from the sub-fund performance in EUR.

Risk and reward profile

The indicator measures the risk of price fluctuations in the sub-fund certificates based on the last 5 years volatility and places the sub-fund in category 4. This means that the purchase of units in the sub-fund is connected to **medium risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **Counterparty risk:** A counterpart may fail paying the proceeds related to the sale of securities by the sub-fund or may fail delivering the securities purchased by the sub-fund. A counterpart of the sub-fund in an OTC derivative may fail satisfying its obligations towards the sub-fund at any event of the OTC derivative agreement.
- **Credit risk:** The default of the issuer of a debt instrument held by the sub-fund.
- **Derivatives risk:** Derivatives are used to increase, lower or maintain the risk level of the sub-fund. The strategy followed by the sub-fund may fail resulting in significant losses for the sub-fund.
- **Event risk:** Unforeseeable events such as devaluations, political events, etc.
- **Liquidity risk:** Securities in the sub-fund may be sold below their valuation due to insufficient liquidity in the market.
- **Operational risk:** Failures or delays in operational processes may negatively affect the sub-fund.

Key Investor Information

Nordea 1 – Stable Return Fund, AP-NOK

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	Up to 5.00%
Exit charge	Up to 1.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.92%
Charges taken from the fund under certain specific conditions	
Performance fee	The share class is not subject to any performance fee.

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial advisor or distributor.

The ongoing charges figure is based on the last year's expenses, for the year ending December 2014, and this figure may vary from year to year. It excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

For more information about charges, please see section 18 of the fund's prospectus, which is available at www.nordea.lu.

Past performance

- Such historical performance is only indicative and may not be met in the future.
- The past performance of the share class is calculated NAV to NAV (gross income reinvested) excluding initial and exit charges.
- The sub-fund was launched in 2005 and the share class in 2006.
- Performances are shown in NOK.
- The sub-fund does not compare its performance against any reference index.

Practical information
