ODDO BHF Active Small Cap

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

ISIN: CN-EUR units - FR0013106739 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

This Fund is classified as follows: International equities

The Fund's investment objective is to outperform the MSCI Europe Small Caps index, hedged in EUR and calculated with net dividends reinvested, over a minimum investment horizon of five years.

The management strategy implemented is a discretionary investment strategy based on stock-picking and a rigorous procedure for selecting European growth stocks. It favours companies whose income growth is above the market average and is careful not to pay too much for these growth stocks (Growth at a Reasonable Price).

The Fund may invest:

- between 75% and 100% in shares of companies of all market capitalisations with at least 75% in small and mid caps issued by SMEs (small and medium-sized enterprises) or intermediate-sized enterprises (ETI) headquartered in the European Union or in the European Economic Area. No business sector will be targeted in particular. These issuing companies will meet the criteria established for companies to be eligible for the PEA-PME French equity savings plan. 25% of the Fund's net assets may be exposed:
 - to shares of companies headquartered outside of the European Union, including emerging countries (up to 10% of assets), and
 - to the currencies of countries that are not members of the European Union, in connection with investments in the securities of companies headquartered outside of the European Union, including emerging countries (up to a maximum of 10%).
- between 0% and 25% in money market instruments as part of cash management. This portfolio component shall consist of debt securities such as transferable debt securities, money market instruments and short-term bonds rated Investment Grade, i.e. between AAA and BBB- (by Standard & Poor's or deemed equivalent by the Management Company or using the Management Company's internal rating), which are denominated in euro and from issuers headquartered in the European Union or United Kingdom. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund is managed actively with reference to its benchmark. The Fund's composition may deviate significantly from that of the benchmark index.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Fund placed in category 6?

The Fund presents a high level of risk due to its strategy of investing at least 75% of its assets in equities issued by European SMEs or intermediate-sized enterprises (ETI).

Material risks to the Fund that are not taken into account in the indicator:

Counterparty risk: the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

Liquidity risk: the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

If one of these risks were to materialise, the Fund's net asset value may fall.
