# ODDO BHF Active Small Cap

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

#### ISIN: CR-EUR units - FR0011606268 - EUR - Accumulation

#### **OBJECTIVES AND INVESTMENT POLICY**

This Fund is classified as follows: International equities

The Fund's investment objective is to outperform the MSCI Europe Small Caps index, hedged in EUR and calculated with net dividends reinvested, over a minimum investment horizon of five years.

The management strategy implemented is a discretionary investment strategy based on stock-picking and a rigorous procedure for selecting European growth stocks. It favours companies whose income growth is above the market average and is careful not to pay too much for these growth stocks (Growth at a Reasonable Price).

#### The Fund may invest:

- between 75% and 100% in shares of companies of all market capitalisations with at least 75% in small and mid caps issued by SMEs (small and medium-sized enterprises) or intermediate-sized enterprises (ETI) headquartered in the European Únion or in the European Economic Area. No business sector will be targeted in particular. These issuing companies will meet the criteria established for companies to be eligible for the PEA-PME French equity savings plan.

25% of the Fund's net assets may be exposed:

- to shares of companies headquartered outside of the European Union, including emerging countries (up to 10% of assets), and

- to the currencies of countries that are not members of the European Union, in connection with investments in the securities of companies headquartered outside of the European Union, including emerging countries (up to a maximum of 10%).

between 0% and 25% in money market instruments as part of cash management. This portfolio component shall consist of debt securities such as transferable debt securities, money market instruments and short-term bonds rated Investment Grade, i.e. between AAA and BBB- (by Standard & Poor's or deemed equivalent by the Management Company or using the Management Company's internal rating), which are denominated in euro and from issuers headquartered in the European Union or United Kingdom. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits

The Fund is managed actively with reference to its benchmark. The Fund's composition may deviate significantly from that of the benchmark index.

- The Fund may invest up to 10% of its net assets (i) in units or shares of UCITS under European Directive 2009/65/EC, (ii) in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH, and will be compatible with the Fund's investment strategy.

The Fund may invest in futures or options, traded on regulated or organised markets or over-the-counter in France and other countries to hedge the portfolio against or expose the portfolio to equity risks and hedge currency risks (futures, options on equities or indices, swaps and forward exchange contracts). These instruments shall be held subject to the limit of 100% of the Fund's net assets. The Fund will not use total return swaps.

The Fund may invest up to 10% of its net assets in warrants or subscription certificates

The portfolio's maximum exposure to the different asset classes (equities, debt securities, UCIs and derivatives) may not exceed 100%, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money, credit) to which the Fund is exposed (the sum of long and hedging positions). Other information:

The management team takes into account environmental, social and governance (ESG) criteria in its investment decisions but they are not the dominant factor. The investment decisions taken may therefore not be consistent with ESG criteria.

The Management Company may make use of a gate provision to cap redemptions. For more details on this provision, please refer to the "Gate provision for capping redemptions" section of the prospectus, available at http://am.oddo-bhf.com.

Subscription and redemption requests are centralised by the depositary every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

CR-EUR units accumulate their income.

Recommended investment horizon: 5 years

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

#### RISK AND REWARD PROFILE

Lower ris	k						H	ligher risk
Potentially lower return Potentially higher							her return	
	1	2	3	4	5	6	7	

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

## Why is the Fund placed in category 6?

The Fund presents a high level of risk due to its strategy of investing at least 75% of its assets in equities issued by European SMEs or intermediate-sized enterprises (ETI).

#### Material risks to the Fund that are not taken into account in the indicator:

Counterparty risk: the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

Liquidity risk: the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

If one of these risks were to materialise, the Fund's net asset value may fall.

#### CHARGES

Charges and fees paid are used to pay the costs of marketing and distributing units; these charges reduce the potential growth of the investment.
