## What is this product?

### Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

### Term

The fund is a perpetual fund.

### Objectives

The Sub-Fund will achieve its investment objective by investing in a diversified portfolio of debt securities, issued or guaranteed by emerging market governments or their agencies; and by companies that are domiciled, or carrying out the main part of their economic activity, in an emerging market country (emerging and less developed markets include any country -including Russia, subject to the sanctions being lifted- or region other than the United States of America, Canada, Japan, Australia, New Zealand and Western Europe, although the Sub-Fund may invest in securities tied to those countries as well), which comply with the eligibility criteria stated in the 2010 law and the Grand-Ducal Regulation of February 8, 2008 relating to certain definitions of the amended law of 20 December 2002 on undertakings for collective investment, as amended from time to time. The average duration of the Sub-Fund will be typically comprised between 2 and 4 years with a maximum target of 6 years with no specific maximum maturity per instrument and perpetual and callable securities shall use the current market expectations of maturity in calculation of the duration.

### Intended retail investor

This share class is aimed at private clients, professional clients and eligible counterparties. An investment in this Sub-Fund is suitable only for investors who are able to appraise the risks and economic value of the investment. The investor must be prepared to accept a medium volatility of the Sub-Fund and potentially capital losses in order to achieve moderate potential investment performances. The Sub-Fund is intended for investors with a medium-term investment horizon. The investor may bear losses (up to the full loss of the invested capital). The Fund falls into risk class 3 on a scale of 1 (safety-oriented; very low return) to 7 (very risk-tolerant; highest return).

## What are the risks and what could I get in return?

### Risk Indicator

**The risk indicator assumes you keep the product for 3 years.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 3 years			
Investment EUR10,000 Scenarios		If you exit after 1 year	If you exit after 3 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	What you might get back after costs	5,550 EUR	5,750 EUR
	Average return each year	-44.5%	-16.9%
<b>Unfavourable</b>	What you might get back after costs	7,100 EUR	7,660 EUR
	Average return each year	-29.0%	-8.5%
<b>Moderate</b>	What you might get back after costs	9,650 EUR	10,370 EUR
	Average return each year	-3.5%	1.2%
<b>Favourable</b>	What you might get back after costs	11,410 EUR	13,140 EUR
	Average return each year	14.1%	9.5%

The stress scenario shows what you might get back in extreme market circumstances.  
The unfavourable scenario occurred for an investment between 05/2021 and 07/2023.  
The moderate scenario occurred for an investment between 11/2014 and 11/2017.  
The favourable scenario occurred for an investment between 03/2015 and 03/2018.

## What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
<b>Total costs EUR</b>	EUR 698	EUR 1,172
<b>Annual cost impact (*)</b>	7.0%	3.9% per year

(\*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.2% before costs and 1.2% after costs.

## Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	5.00% of the amount you pay in when entering this investment.	EUR 487
<b>Exit costs</b>	We do not charge an exit fee for this product.	EUR 0
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	1.88% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 183
<b>Transaction costs</b>	0.29% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 28
Incidental costs taken under specific conditions		
<b>Performance fees</b>	There is no performance fee for this product.	EUR 0

## How long should I hold it and can I take money out early?

### Recommended holding period: 3 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.
