

## Key Investor Information

This document provides key information for investors about this collective investment of capital. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this collective investment. You are advised to read it so that you can make an informed decision about whether to invest.

## Pictet CH - Enhanced Liquidity EUR

(the "Compartment") is a compartment of Pictet CH (the "Fund").

## Z dy (The "Unit Class") - ISIN CH0021733065

The Fund is managed by Pictet Asset Management S.A. (the "Management Company"), part of the Pictet group

### Objectives and investment policy

#### OBJECTIVE

To preserve the value of your investment, while achieving a return in line with money market rates.

#### PORTFOLIO ASSETS

The Compartment mainly invests in deposits, money market instruments and highly rated bonds of all currencies and which are systematically hedged against the Compartment currency (meaning investments have little or no exposure to currency risk). It may also invest in other funds.

#### DERIVATIVES AND STRUCTURED PRODUCTS

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management. It may also use structured products to gain exposure to certain assets.

#### COMPARTMENT CURRENCY

EUR

#### INVESTMENT PROCESS

The investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in light of interest rate trends. The Compartment's active management approach uses strict risk controls.

#### Terms to understand

**Money market instruments** Financial instruments designed to provide stable value, interest and a very low risk of loss, as well as being readily convertible into cash.

**Bonds, highly rated bonds** Securities that represent an obligation to repay a debt, along with interest. Highly rated bonds generally have a lower interest rate but are more likely to meet their obligations.

**Derivatives** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

**Structured products** Securities similar to derivatives, but with defined risk or performance characteristics.

#### Other characteristics

Designed for Investors who understand the risks of this Compartment and plan to invest for less than 1 year or may need to take their money out at any time. This is a distribution unit class, meaning that its aim is to pay income to the holder. Orders to buy, switch or redeem units are ordinarily processed on any day that is a full bank business day in Switzerland.

### Risk and reward profile

The Unit Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Unit Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

## Charges

The charges you pay are used to cover the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry, conversion and exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 December 2021. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.

**For more information on charges, please refer to the "Remuneration and additional fees" section of the fund agreement available on [assetmanagement.pictet](http://assetmanagement.pictet)**

### One-off charges deducted before or after you invest

Entry charge (in favour of the distributor)	Up to 5.00%
Exit charge (in favour of the distributor)	Up to 1.00%
Conversion charge (in favour of the distributor)	No conversion charge

This is the maximum figure that might be taken out of your capital before it is invested and before the proceeds of your investment are paid out.
