

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Total Return Bond Fund

a sub-fund of PIMCO Funds : Global Investors Series plc

(ISIN: IE00B0V9T086, share class: Institutional - EUR)

PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

Objectives and investment policy

- The fund aims to prudently generate a total return through a combination of both income and capital growth.
- The fund invests in a wide range of fixed income securities (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. Securities will mainly be priced in US Dollars but the fund may also hold other currencies as well as securities that are priced in other currencies. The investment advisor will choose securities with varying repayment dates based on its expectations for interest rate and exchange rate changes.
- The fund may invest in emerging markets, which in investment terms are those economies that are still developing.
- The Fund's benchmark is the Barclays Capital U.S. Aggregate Index (EUR Hedged). It is used to measure duration. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates.
- The securities will mostly be "investment grade", as determined by international ratings agencies. Whilst potentially producing a lower level of income than "non-investment grade" securities, they are also considered to be of lower risk.

For full investment objectives and policy details please refer to the prospectus.

- The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying asset.
- Any income the fund generates will be paid out to your bank account or automatically reinvested in shares depending upon your election.
- You can buy and sell shares on most working days in Dublin, exceptions to this are more fully described in the Fund Holiday Calendar available from the Administrator.
- The investment advisor will aim to remove the impact of movements in exchange rates between US dollars and euros by hedging (a currency transaction which can protect against such movements) which may have an impact on the value of the share class.

Risk and reward profile

The indicator above is not a measure of the risk of capital loss, but a measure of the fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The fund is classified in the category indicated above due to its past behaviour.
- The fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

- Investing in fixed income securities offers you the chance to gain returns through growing your capital and generating income. Nevertheless, there is a risk that the institution which issued the security will fail, which would result in a loss of income to the fund, along with its initial investment. Fixed income values are likely to fall if interest rates rise.
- There may be times where the issuer or guarantor of a fixed income security or derivative cannot meet its payment obligations. The credit rating and risks associated with the securities can change over time and therefore affect the performance of the fund.
- Certain derivatives may result in gains or losses that are greater than the original amount invested.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Certain investments are less liquid and may be more difficult to buy or sell in a timely fashion.
- Changes in exchange rates may cause the value of investments to decrease or increase.

Charges

The charges you pay are used to pay for the costs of running the fund, which include the marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.50%
-----------------	-------

Charges taken from the fund under certain specific conditions

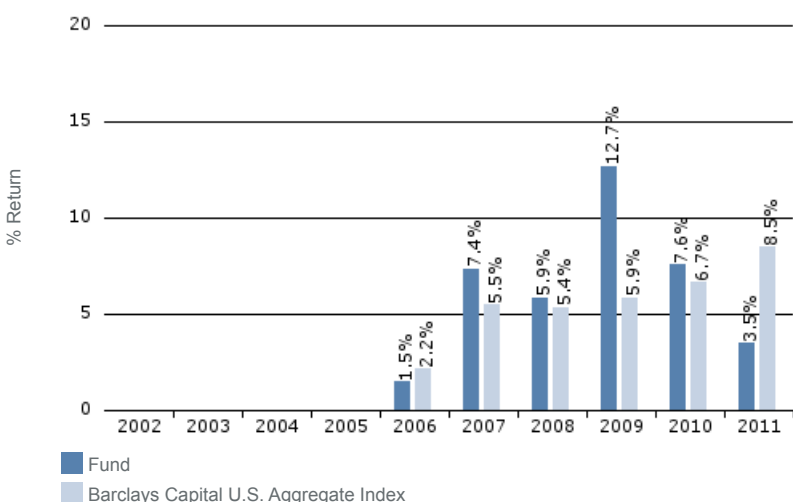

Performance fee	None
-----------------	------

The entry charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 2011. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section of the prospectus entitled Fees and expenses, which is available at www.europe.pimco-funds.com

Past performance

- Past performance is not an indicator of future returns.
- The impact of charges and fees on the performance has been included.
- The fund was created in 1998 and this share class was launched in 2005.
- The past performance has been calculated in EUR.
