Fund Name Global Technology Fund, a sub-fund of Polar Capital Funds PLC

Share Class Class R US Dollar Share Class

ISIN IE00B433M743

Objectives and investment policy

Objectives

The objective of the Fund is to achieve long term capital appreciation by way of investing in a globally diversified portfolio of technology companies.

Investment policy

At least two-thirds of the Fund's assets are invested in technology-related companies. These may include computer software and equipment, internet software and systems, electronic technology and other technology-related companies.

The Fund may have significant exposure to companies in the USA and Canada.

The Fund may invest in financial derivative instruments for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund may invest in emerging markets (developing countries).

You may sell your shares on days which banks are normally open for business in Dublin and London.

Risk and reward profile

Why is this fund in category 7?

The Fund is in category 7 as it invests globally in technology-related equities (shares). The indicator above reflects the price movements (volatility) of technology shares within the Fund.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Strategy Risk - investments in technology companies may be subject to greater price fluctuations than investments in other sectors. Rapid changes in technology and/or government regulation of use in certain countries may affect the value of the Fund's investments. The Fund may be less diversified than other investment funds.

Investment Risk - the Fund invests in equities globally, share prices can rise or fall due to a number of factors affecting global stock markets.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

Emerging Markets Risk - emerging market countries face more political, economic or structural challenges than developed countries. Investments in such countries may offer higher potential for gains or losses, and markets may be less liquid.

What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1
