Objectives and investment policy

The objective of the investment policy is to achieve sustainable capital growth. In order to achieve this, the fund invests in equities of U.S. issuers or companies whose principal business activity is in the U.S., funds which themselves invest at least 51% of their assets in U.S. issuers, and certificates whose underlyings are U.S. equities or equity indices. In addition, investments may be made in interest-bearing securities, certificates whose underlyings are bonds, and certificates on commodities and commodity indices. Up to 15% of the net assets may be invested in real estate funds and up to 30% in shares of hedge funds and funds with special instruments. In this context, the selection of individual investments is the responsibility of the fund management. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors. The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. A more detailed description of risks and other general information can be found under "Risks" in the sales prospectus.
