Robeco Global Consumer Trends Equities F EUR (LU0871827464)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Luxembourg S.A.

Objectives and investment policy

Robeco Global Consumer Trends Equities invests in a number of structural growth trends in consumer spending. The first is the "digital consumer". Consumers are increasingly spending more time and / or ordering more goods on the Internet using mobile devices. The second trend is that of growing consumer spending in emerging markets. This is linked to the rising demand for basic products, but also for western luxury items. The third trend focuses on the appeal of 'strong brands'. The fund managers select stocks of the structural winners within these trends..

The fund can engage in currency hedging transactions. Typically currency hedging is not applied.

The fund is not constrained by a benchmark.

This share class of the fund does not distribute dividend. This Sub-fund may invest in China A-shares via the QFII and/or a Stock Connect Programme which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

For a complete overview of all risks attached to this fund we refer to section Risk considerations within the prospectus.

Equities in general are more volatile than bonds. Equity theme funds have a view on a specific segment of the equity market. By making the choice to focus on a specific segment the fund becomes more volatile as price movements of shares within this theme tend to have a larger impact on the value of the fund.
