What is this product?

Type:	Société d'Investissement à Capital Variable (SICAV) – Undertaking for Collective Investment in Transferable Securities incorporated under Luxembourg law.
Objective:	Robeco QI Global Developed Enhanced Index Equities is an actively managed fund that invests in stocks of companies in developed markets. The selection of these stocks is based on a quantitative model. The fund's objective is to achieve a better return than the index. The fund aims to gain a well-diversified exposure to an integrated multi-factor stock selection model which ranks stocks on their expected future relative performance using three factors: valuation, quality and momentum. The portfolio overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. The fund aims for a better sustainability profile compared to the Benchmark by promoting E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrating sustainability risks in the investment process and applying Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement.
Benchmark:	MSCI World Index (Net Return, EUR) The majority of stocks selected through this approach will be components of the Benchmark, but stocks outside the Benchmark index may be selected too. The fund can deviate from the weightings of the Benchmark to a limited extent. The fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on currencies, countries and sectors) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the ESG characteristics promoted by the fund.
Subscription and Redemption:	You can purchase or sell (partial) units any given workday, with the exception of Fund Holidays. An overview of fund holidays can be retrieved from www.robeco.com/riam .
Currency Risk:	The fund may use currency forwards to achieve currency exposures that are close to the benchmark.
Dividend policy:	Accumulating
Intended Retail Investor:	The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.
Product Term:	The fund does not have a fixed term of existence or maturity period. In certain circumstances, as described in the fund documentation, the fund may be unilaterally terminated following written notice to shareholders subject to compliance with the fund documentation and applicable regulation.
Other Information:	The depositary of the SICAV is J.P. Morgan SE. The English prospectus, the semi annual report and the details of the remuneration policy of the management company are documents required by law and can be obtained free of charge on www.robeco.com/riam . The website also publishes the latest prices and other information.

What are the risks & what could I get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level

Be aware of currency risk. If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown. If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

Other relevant risks

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfill its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets.
- The fund is managed using quantitative models. Materialisation of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

What are the risks & what could I get in return? (continued) Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years.

Recommended holding period	5
Example investment	EUR 10,000

Minimum Scenario

There is no minimum guaranteed return. You could lose some or all of your investments

Stress Scenario	1 Year	5 Years
The stress scenario shows what you might get back in extreme market circumstances.

What you might get back after costs	€14,420	€18,060
Average return each year	44.00%	12.55%

What happens if Robeco is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE, Luxembourg Branch (the "Depositary"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depositary. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depositary is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest; how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested. For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you cash in after 1 year	If you cash in after 5 years
Total cost	€94	€429
Annual Cost Impact (*)	0.94%	0.59%

Composition of Costs

One-off costs upon entry or exit		If you cash in after 1 year
Entry Costs	0.50% Maximum of your investments that you pay to your distributor when entering this investment.	Up to 50 EUR
Exit Costs	0.00% Maximum of your investments that you pay to your distributor when entering this investment.	0 EUR

Ongoing costs

Management fees and other administrative or Operating Costs	0.38% of your investment that will be used for the payment of annual charges on your investment levied for managing the investment.	38 EUR
Transaction Costs	0.06% of your investment that will be used for the payment of estimated annual costs incurred when we buy and sell the underlying instruments for the product. The actual amount will vary depending on how much we buy and sell.	6 EUR

Incidental costs taken under specific conditions

Performance fee	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

We have determined the recommended holding period of this product to be 5 years.

The recommended holding period of this product is determined taking into consideration the nature of underlying investment securities and the volatility of thereof. The product can be traded daily and no minimum holding period applies. Exiting before the end of the recommended holding period does not bear any additional risks or costs other than those mentioned in the text above.

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:
