# Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Equity funds with a global and or regional focus on developed markets are well diversified over countries and sectors making them less sensitive to price movements.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks
- The product invests in assets that could become less liquid in distressed (market) conditions, which could have a significant impact on the market price of those assets.
