Frontier Markets Equity

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation USD (LU0562313402)

This fund is managed by Schroder Investment Management (Luxembourg) S.A., which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth.

Investment Policy

At least two-thirds of the fund (excluding cash) will be invested in shares of frontier markets companies.

Frontier markets are at an even earlier stage of development than the emerging markets and offer some of the fastest rates of economic growth in the world. Frontier countries are characterised by large populations and low labour costs, and they also benefit from access to significant natural resources. Using proprietary research, we seek to add value through country selection and our choice of stocks.

The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to achieve the invest-

ment objective and to reduce risk or manage the fund more efficiently.

Benchmark

This share class is managed with reference to the MSCI Frontier Markets financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Other particular risks

Credit risk / structured products: In order to access restricted markets, the fund may invest in structured products. Should the counterparty default, the value of these structured products may be nil.

Liquidity risk / small cap liquidity risk: Investments in small companies can be difficult to sell quickly which may affect the value of the fund and, in extreme market conditions, its ability to meet redemption requests upon demand.

Market risk / emerging markets & frontier: Emerging markets will generally be subject to greater political, legal, counterparty and operational risk.

Operational risk / third parties: The fund's operations depend on third parties and it may suffer disruption or loss in the event of their failure.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year	
Ongoing Charge	2.23%
Charges taken from the fund under certain specific conditions	
Performance fee	Subject to the "high water mark" principle, 15.00% of the share class outperformance in excess of the MSCI Frontier Markets Index TR. See the prospectus for more details. In the fund's last financial year the performance fee was 0.00% of the fund.

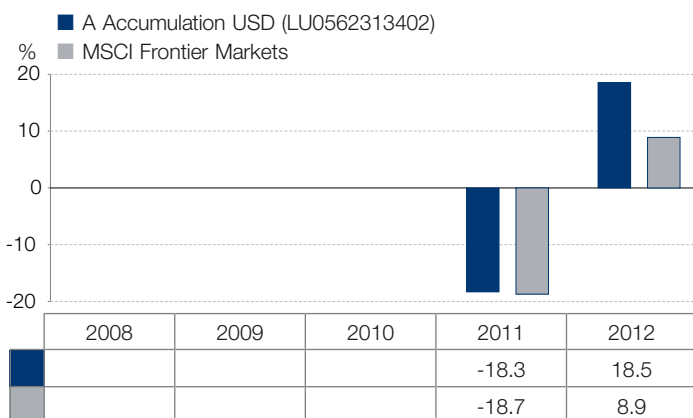

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2012 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past Performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in US dollar after the ongoing charges, the portfolio transaction costs and the performance fee have been paid. Entry and exit charges are excluded from calculations of past performance.

The fund was launched on 15 December 2010.
