What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to deliver an income of 3-5% per annum and capital growth over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.

The fund is actively managed and invests at least two-thirds of its assets directly or indirectly through derivatives in equities, bonds and alternative asset classes.

The fund may invest:

- up to 50% of its assets in sub-investment grade bonds (being bonds with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities.
- in excess of 50% of its assets in emerging market bonds.
- up to 20% of its assets in asset-backed securities and mortgage-backed securities.

The fund may invest indirectly in alternative asset classes such as commodities or real estate through derivatives, investment funds or structured securities.

The fund may invest up to 10% of its assets in open-ended investment funds. The fund may invest in money market investments and hold cash.

The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against the income target of 3-5% per year. The fund's volatility should be compared against 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD). The comparator benchmark is only included for volatility comparison purposes and does not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to have limited overlap with the components of the

comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Other Information

The fund maintains a higher overall sustainability score than 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD) based on the investment manager's rating system.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the fund's webpage, accessed via www.schroders.com/en/lu/private-investor/gfc

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class pays a monthly distribution at a rate of 4.5% per annum of the value per share plus a premium when the Australian dollar interest rate is higher than the fund's base currency (US dollar) interest rate and minus a discount when the Australian dollar interest rate is lower. The distribution policy is kept under review.

The level of premium or discount is determined by differences in Australian dollar and US dollar interest rates and is not part of the fund's objective or investment policy.

Depository: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The unfavourable scenario occurred for an investment between 2021-08-31 to 2022-12-16

The moderate scenario occurred for an investment between 2014-09-30 to 2017-09-30

The favourable scenario occurred for an investment between 2018-12-31 to 2021-12-31

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest AUD 10 000,00. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 3 years
Total costs	AUD 696	AUD 1189
Annual cost impact (*)	7.0%	3.8% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,6 % before costs and 0,8 % after costs.

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of Recommended Holding Period;
- the meaning of the different cost categories.
