## What is this product?

### Type

This is an open ended UCITS fund.

### Term

There is no maturity date of the fund.

### Investment objective

The fund aims to provide capital growth and income over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.

The fund is actively managed and invests directly or indirectly through derivatives in equity and equity-related securities, fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide in various currencies and alternative asset classes.

The fund may invest:

– up to 50% in sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

– up to 20% of its assets in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade or sub investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The fund may invest directly in China B-Shares and China H-Shares and may invest less than 15% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext. The fund may also invest up to 10% in mainland China through regulated markets (including the CIBM via Bond Connect or CIBM Direct).

The exposure to alternative asset classes is taken through eligible assets as described in appendix III of this prospectus. The fund may invest in money market investments and hold cash. The fund may invest up to 10% of its assets in openended investment funds.

The fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Where the fund uses total return swaps and contracts for difference, the underlying consists of instruments

in which the fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the net asset value. In certain circumstances this proportion may be higher.

The fund is valued with reference to the net asset value of the underlying assets.

**Benchmark:** The fund does not have a target benchmark. The fund's performance and volatility should be compared against 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% Thomson Reuters Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD). The fund's investment universe is expected to have limited overlap with the components of the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

**Dealing Frequency:** You may redeem your investment upon demand. This fund deals daily.

**Distribution Policy:** This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

**Depositary:** J.P. Morgan SE

### Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

## What are the risks and what could I get in return?

### Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario occurred for an investment between 10 2021 to 04 2023

The Moderate scenario occurred for an investment between 09 2016 to 09 2019

The Favourable scenario occurred for an investment between 12 2018 to 12 2021

## What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000,00 is invested

|                        | If you exit after 1 year | If you exit after 3 years |
|------------------------|--------------------------|---------------------------|
| Total costs            | USD 605                  | USD 1321                  |
| Annual cost impact (*) | 6.0%                     | 4.1% each year            |

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5,2 % before costs and 1,0 % after costs.

## Composition of costs

| One-off costs upon entry or exit                                   |   | If you exit after 1 year |
|--|---|--------------------------|
| <b>Entry costs</b>   | These costs are already included in the price you pay when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge. [3.00%] | Up to USD 300            |
| <b>Exit costs</b>  | We do not charge an exit fee for this product, but the person selling you the product may do so.  | USD 0                    |
| <b>Ongoing costs taken each year</b>                               |   |                          |
| <b>Management fees and other administrative or operating costs</b> | These costs are an estimate based on actual costs over the last year that we take each year for managing your investments. [2.05%]  | USD 205                  |
| <b>Transaction costs</b>   | This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. [1.01%]                       | USD 101                  |
| <b>Incidental costs taken under specific conditions</b>            |   |                          |
| <b>Performance fees</b>  | There is no performance fee for this product.   | USD 0                    |
