## Risk and Reward Profile

### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk factors

The following risks may affect fund performance.

**Capital risk / distribution policy:** Because the fund intends to pay dividends regardless of its performance, a dividend may include a return of part of your original investment.

**China country risk:** Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.

**Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

**Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

**Emerging markets & frontier risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

**Equity risk:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.

**Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk:** The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.
