## What is this product?

### Type

This is an open ended UCITS fund.

### Term

There is no maturity date of the fund.

### Investment objective

The fund aims to provide capital growth and income in excess of UK CPI + 2.5% + 2.5% after fees have been deducted over a five to seven year period by investing in alternative asset classes worldwide.

The fund is actively managed and invests at least two-thirds of its assets directly or indirectly (through investment funds) in alternative asset classes worldwide.

The fund may invest up to 10% of its assets in open-ended investment funds (including other Schroders funds).

The fund may have an indirect exposure to distressed securities, contingent convertible bonds, asset-backed securities, mortgage-backed securities and high yield securities.

The fund may invest up to 20% of its assets in China, either directly (for example, via Bond Connect) or indirectly through mainland China focused investment funds.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

**Benchmark:** The fund's performance should be assessed against its target benchmark, being to exceed UK CPI + 2.5% after fees have been deducted over a five to seven year period, and compared against the FT All Share index and the FT actuaries UK Conventional Gilt All Stocks index.

The comparator benchmarks are only included for performance comparison purposes and do not have any bearing on how the

investment manager invests the fund's assets. The fund's investment universe is expected to overlap to a limited extent with the components of each comparator benchmark.

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmarks. The investment manager will invest in companies or sectors not included in the comparator benchmarks.

The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective. Any comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

**Dealing Frequency:** You can buy and sell shares weekly on Wednesday (or the next business day if a Wednesday is not a business day) and on the last business day in a month.

**Distribution Policy:** This share class pays a semi-annual distribution at a variable rate based on gross investment income.

**Depositary:** J.P. Morgan SE

### Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

## What are the risks and what could I get in return?

### Risks

The risk indicator assumes you keep the product for 3 years.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		GBP 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	GBP 2560	GBP 4390
	Average return each year	-74.4%	-24.0%
Unfavourable	What you might get back after costs	GBP 8430	GBP 8660
	Average return each year	-15.7%	-4.7%
Moderate	What you might get back after costs	GBP 10400	GBP 11290
	Average return each year	4.0%	4.1%
Favourable	What you might get back after costs	GBP 11980	GBP 12850
	Average return each year	19.8%	8.7%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

We have classified this product as 3 out of 7, which is a medium-low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

**Credit risk:** A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SSSF-Prospectus-LUEN.pdf>

The Unfavourable scenario occurred for an investment between 04 2022 to 04 2023

The Moderate scenario occurred for an investment between 12 2017 to 12 2020

The Favourable scenario occurred for an investment between 12 2018 to 12 2021

## What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 191	GBP 660
Annual cost impact (*)	1.9%	2.0% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6,1 % before costs and 4,1 % after costs.
