What is this product?

Type

This is an open ended UCITS fund.

Term

The fund invests its assets for a fixed four year period.

Investment objective

The fund aims to provide income over a fixed four year period by investing in USD-denominated bonds issued by companies, governments, government agencies, and supra-nationals worldwide. The income distribution is based on the yield to maturity of the fixed income securities within the portfolio.

The fund invests its assets for a fixed four year period. The fund is actively managed and invests at least two-thirds of its assets in USD-denominated bonds issued by companies, governments, government agencies and supranationals worldwide, including in emerging markets, with a maturity date within the fixed period.

The fund may invest up to 50% of its assets in sub-investment grade bonds (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) while also aiming to achieve an average credit rating of investment grade.

The fund may invest up to 20% of its assets in asset-backed securities and mortgage-backed securities.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. After these investments mature (or are sold) the fund will be authorised to hold up to 100% of its assets in deposits,

cash and money market investments until it is liquidated. Whilst it is intended that the fund will hold securities until maturity, the investment manager has the discretion to sell them prior to their maturity.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed by measuring the absolute performance of the fund over the fixed period for which the fund is created as stated in the fund's investment objective and investment policy.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class pays a quarterly distribution at a variable rate based on gross investment income.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SSSF-Prospectus-LUEN.pdf>

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		4 years	
Example Investment:		USD 10000	
		If you exit after 1 year	If you exit after 4 years

Note that the figures shown also reflect the maximum redemption fee of 2.00%. This fee may be applicable at the discretion of the Directors from time to time, in the event that the fund would need to make asset sales in the secondary market at a spread to meet redemption requests.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 08 2021 to 04 2023

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 04 2019 to 04 2023

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 12 2016 to 12 2020

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- USD 10 000,00 is invested

	If you exit after 1 year	If you exit after 4 years
Total costs	USD 405	USD 801
Annual cost impact (*)	4.1%	1.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3,4 % before costs and 1,5 % after costs.
