The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may

depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Fund is subject to the following Risk Factor (without limitation):
