What is this product?

Type: Organismes de Placement Collectif en Valeurs Mobilières (OPCVM) Société d'Investissement à Capital Variable (SICAV) SEXTANT

Maturity: [FR]La durée de vie de ce produit est de 99 ans.[FR]

Classification: International equities

Objectives: SEXTANT AUTOUR DU MONDE is a dynamic subfund aiming to optimise performance through a selection of international equities, without reference to an index.

The strategy to achieve the investment objective of the subfund SEXTANT AUTOUR DU MONDE is based on a highly disciplined stock picking approach, after a fundamental multiple-criterion analysis specific to the investment management firm. The subfund is at least 60% invested in equities listed on all regulated markets throughout the world, irrespective of their market capitalisation or sector. However, the management of SEXTANT AUTOUR DU MONDE generally focuses on international equity markets outside the euro zone. The subfund may, in particular, invest in companies having their origins in, listed in, or whose business is mainly focused on so-called "emerging" regions. The subfund may also invest up to 10% of its assets in companies listed on the unregulated "Marché Libre". The subfund reserves the right to invest up to at most 40% in debt securities, money market instruments and all fixed-income securities irrespective of currency and creditworthiness. Investments in speculative "high-yield" bonds and securities with a Standard & Poor's rating of less than BBB- will not exceed 20% of assets. The subfund may also invest up to 10% of its assets in securities of other French and/or European coordinated UCITS, in particular to invest cash holdings. Futures and securities that include derivatives may be used to expose the subfund to a favourable movement - or for partial coverage against an unfavourable trend - in equities, interest rates, indices or forex. There will be no excessive exposure of the portfolio to equity or credit risk.

Benchmark Information: The UCI is actively managed. The management strategy is unconstrained by the securities making up the benchmark index.

Allocation of distributable income:

- **Allocation of net income:** Accumulation
- **Allocation of net realised capital gains:** Accumulation

What are the risks and what's in it for me?

Risk indicator:

Recommended holding period: **5 years**

The risk indicator assumes that you will continue to hold the product 5 years. The actual risk could be very different if you opt to exit prior to the end of the recommended holding period, and you may recover less of your initial investment.

The synthetic risk indicator measures this product's level of risk compared to other products. It measures the probability that this product will suffer losses in the event of market movements or the impossibility for us to pay you. We have classified this product in the risk class 3 out of 7, which is a risk class between low and medium.

This product offers no capital guarantee or protection. It is possible that initially invested capital will not be recovered in full upon redemption. For more information on these risks, please refer to the prospectus.

Other important risk factors not included in the indicator:

- Credit risk
- Liquidity risk
- Risk of impact of the use of financial techniques related to futures instruments

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you get from this product depends on future market performance. Future market developments are uncertain and cannot be accurately predicted.

The scenarios presented represent examples based on past performance and certain assumptions. Markets could evolve very differently in the future.

Recommended holding period: 5 years Investment example: 10000 €			
Scenario		If you exit after 1 year	If you exit after 5 years
Minimum			
Pressure	<i>What you could get after deducting costs</i>	4394 €	4154 €
	Average annual return	-56.06%	-16.11%
Unfavourable	<i>What you could get after deducting costs</i>	7664 €	9062 €
	Average annual return	-23.36%	-1.95%
Intermediary	<i>What you could get after deducting costs</i>	10527 €	14110 €
	Average annual return	5.27%	7.13%
Favourable	<i>What you could get after deducting costs</i>	15351 €	21214 €
	Average annual return	53.51%	16.23%

A market distress scenario shows what you may obtain in extreme market situations.

Unfavourable scenario: This type of scenario has occurred for an investment between 24/03/2015 - 23/03/2020

Intermediate scenario: This type of scenario has occurred for an investment between 05/12/2016 - 06/12/2021

Favourable scenario: This type of scenario has occurred for an investment between 09/05/2013 - 09/05/2018

What happens if Amiral Gestion is unable to make the payments?

The underlying assets of the product are held separately by the custodian. If we experience financial difficulties, these assets will not be affected. If the product suffers a loss due to the failure of the custodian, the risk of financial loss to the product may be mitigated due to the segregation of the custodian's assets with those of its clients. Investment in a fund is neither guaranteed nor covered by a national clearing system.

What will this investment cost me?

The person who sells you this product or who provides advice on it may charge you additional fees. If so, said person shall inform you of such fees and of the impact they have on your investment.

Costs over time:

The tables show the amounts taken from your investment in order to cover the various types of costs. These amounts depend on the amount that you invest, the time during which you hold the product, and the product's returns. The amounts indicated here are illustrations based on an example of invested amount and various possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (annual return of 0.0%)
- that for the remaining holding periods, the product evolves as indicated in the intermediate scenario
- that 10000 EUR are invested

	If you exit after 1 year	If you exit after 5 years
Total costs	620 €	1093 €
Impact of annual costs (*)	6.20%	2.19% every year

(*) It shows to what extent the costs reduce your returns annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is expected to be 9.3% before deduction of costs and 7.1% after this deduction.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	4.00% maximum of the amount invested.	Up to 400 €
Exit costs	1.00% maximum of your investment before it is paid to you.	96 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	1.20% of the value of your investment per year. This estimate is based on actual costs charged last year.	120 €
Transaction costs	0.12% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on how much we buy and sell.	12 €
Incidental costs incurred under specific conditions		
Performance-related fees	0.00%. The actual amount varies depending on the performance of your investment. The above estimate of total costs includes the average over the past 5 years.	0 €

How long do I have to hold it and can I withdraw money early?

Recommended holding period: 5 years

The investor may request the total or partial redemption of his units at any time during the life of the Fund. Fees applied in case of redemption: 1.00% maximum
