### Portfolio manager's report

---

Although Emerging Markets equities underperformed global equities by 5% over the past year, they still gained by nearly 18% in absolute terms. This fact is remarkable, considering that most major Emerging Markets, including China, Brazil, and India, saw significantly slower economic growth and their companies suffered substantial losses in revenues and profitability over this period. Since many of these economies are dependent on exports for growth, the drop in European demand, high wage inflation domestically, and vast overcapacities in China led to their unexpectedly fast slowdown. It would seem that the resilience of Emerging Markets equities had very much to do with the fact central banks globally provided markets with an unprecedented amount of liquidity, which supported risk assets generally. While this liquidity most likely helped to stem a financial crisis, it remains to be seen whether it would indeed lead to better economic growth. So far, GDP growth, as well as earnings growth, is continually being revised downwards.

India and Brazil were the poorest performing BRIC countries over the past year. India suffered, because of high valuation, a large drop in industrial production amidst high inflation, poor governance, and the dual budget and current account deficits that led to a steep drop in its currency in the second half of 2011 and the first half of 2012. Brazil suffered mainly due its high dependence on hard commodities, whose prices have dropped steeply due to lower demand by China. Also, its industrial output dropped due to lack of competitiveness, arising from the high Real, high interest rates, and high wage inflation. Mexico, Thailand and the Philippines were notable outperforming countries due to their stable banking systems, improved governance, and low dependence on China's commodity demand.

We significantly underperformed the benchmark this year. Simply put, our stock holdings, as well as our country and sector allocations, were too cyclical in the fourth quarter 2011 and in the second quarter 2012, when markets went down. At the end of the second quarter 2012, we had a switch of fund manager and a more defensive positioning was taken. The market saw a strong rally in the third quarter 2012, when many cyclical stocks of poor quality and earnings outlook performed best. In this environment, our defensive portfolio, focused on sectors and economies with more stable growth outlooks underperformed significantly. We will nevertheless remain with this stance, as we believe that many difficulties and uncertainties still remain in the global economy. We would change our stance should we see signs of a turnaround in Europe, a resolution of the fiscal cliff in the US, and a return to stronger growth in China.

### **TER and PTR**

The TER and PTR were determined in accordance with the "Guidelines on the calculation and disclosure of the TER and PTR of collective investment schemes" which were published by the Swiss Funds Association SFA on 16 May 2008.

### **Explanation of footnotes**

- 1) Rounded off or not according to the contract of fund current in the closing date
- 2) Purchases include among others the following transactions: purchases / bonus securities / conversions / changes of corporate name / splits / stock-/cash-dividends / demergers / transfers / exchanges between companies / allotments from subscription/option rights
- 3) Sales include among others the following transactions: sales / draws by lot / cancellations as a result of expiry / exercises of rights/options / conversions / reverse-splits / repayments / transfers / exchanges between companies
- 4) According to a communication issued by the Swiss Federal Tax Administration
- 5) As a percentage of net fund assets

## Principles for the valuation and calculation of net assets values

1. The valuation net asset value of the fund and the share of the individual classes (quotas) are calculated in the fund's unit of account at the market value at the end of the financial year and for each day on which units are issued or redeemed. The fund's assets will not be calculated on days when the stock exchanges / markets in the fund's main investment countries are closed (e.g. bank and stock exchange holidays).
2. Investments traded on an exchange or other regulated market open to the public must be valued at the current prices paid on the primary market. Other assets or investments for which no current price is available must be valued at the price that would probably be obtained in a diligent sale at the time of valuation. In such cases, the fund management company will use appropriate and recognised valuation models and principles to determine the market value.
3. Open-ended collective investment schemes are valued at their redemption price or net asset value. If they are regularly traded on an exchange or other regulated market open to the public, the fund management company may value them in accordance with para. 2.
4. The value of money market instruments that are not traded on an exchange or other regulated market open to the public is determined as follows: the valuation price of such investments, based on the net acquisition price, shall be progressively adjusted to the redemption price whilst keeping the resulting investment return constant. If there are significant changes in the market conditions, the valuation principles for the individual investments will be adjusted in line with the new market returns. If there is no current market price in such instances, the calculations are as a rule based on the valuation of money market instruments with the same characteristics (quality and domicile of the issuer, issuing currency, term to maturity).
5. Bank deposits are valued on the basis of the amount due plus accrued interest. If there are significant changes in market conditions or credit ratings, the valuation principles for bank deposits on demand will be adjusted in line with the new circumstances.
6. The valuation net asset value of a unit of a given class is determined by the proportion of the fund's assets as valued at the market value attributable to the given unit class, minus any of the fund's liabilities that are attributed to the given unit class, divided by the number of units of the given class in circulation. It will be rounded up to the nearest 0.01 of the fund's unit of account.
7. If on any order day the total of subscriptions or redemptions in the respective fund result in a net asset inflow or outflow of assets, the valuation net asset value of the fund concerned is increased or reduced (swinging single pricing). The maximum adjustment is 1 % of the valuation net asset value. Transaction costs (bid / ask spreads, standard market brokerage charges, commission, taxes etc.) incurred on average in connection with the investment of the amount paid in, or with the sale of a portion of investments corresponding to the redeemed unit, will be factored in. The adjustment leads to an increase in the valuation net asset value if the net movements cause a rise in the number of units of the fund in question. The adjustment leads to a reduction in the valuation net asset value if the net movements cause a decline in the number of units. The net asset value calculated using the swinging single pricing method is thus a net asset value modified in accordance with the first sentence of this paragraph.  
The surcharge or discount on the valuation net asset value in the case of the transaction costs incurred on the subscriptions or redemptions is made at a flat rate in each case and is based on an average value from a period defined more closely in the Prospectus.
8. The share of the market value of the net fund assets (fund assets minus liabilities) attributable to the respective unit classes is determined for the first time at the initial issue of more than one class of units (if this occurs simultaneously) or the initial issue of a further unit class. The calculation is made on the basis of the assets accruing to the fund for each unit class. The share is recalculated when one of the following events occurs:
  - a) upon the issue and redemption of units;
  - b) on the pertinent date for distributions, provided (i) such distributions relate only to individual unit classes (distribution classes) or provided (ii) the distributions made by the various unit classes differ when expressed as a percentage of their respective net asset value or provided (iii) differing costs or commissions, calculated as a percentage of the distribution itself, are to be charged on the distributions of different unit classes;
  - c) when the net asset value is calculated, as part of the allocation of liabilities (including due or accrued costs and commissions) to the various unit classes, provided the liabilities of the various unit classes differ when expressed as a percentage of their respective net asset value, especially if (i) different commission rates are applied for the various unit classes or if (ii) class-specific costs are charged;
  - d) when the net asset value is calculated, as part of the allocation of income or capital gains to the various unit classes, provided the income or capital gains stem from transactions made solely in the interests of one unit class or in the interests of several unit classes but disproportionately to their share of the fund's net assets.

Short form report of the audit company for collective investment schemes to the Board of Directors of the Fund Management Company on the financial statements of

## **SWISSCANTO (CH) EQUITY FUND EMERGING MARKETS**

As audit company for collective investment schemes, we have audited the accompanying financial statements of the investment fund SWISSCANTO (CH) EQUITY FUND EMERGING MARKETS which comprise the statement of net assets and the income statement, the statement of the appropriation of available earnings and the disclosure of the total costs as well as the supplemental disclosures in accordance with article 89 paragraph 1 lit. b-h of the Swiss Collective Investment Schemes Act (CISA) for the year ended 30 September 2012.

### **Responsibility of the Fund Management Company's Board of Directors**

The Board of Directors of the Fund Management Company is responsible for the preparation of the financial statements in accordance with the requirements of the Swiss Collective Investment Schemes Act, the related ordinances as well as the investment fund agreement and the prospectus. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors of the Fund Management Company is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

### **Responsibility of the audit company for collective investment schemes**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the existence and effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the financial statements for the year ended 30 September 2012 comply with the Swiss Collective Investment Schemes Act, the related ordinances as well as the investment fund agreement and the prospectus.

### **Report on other legal requirements**

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and article 127 CISA as well as on independence (article 11 AOA) and that there are no circumstances incompatible with our independence.
