Swisscanto (LU) Bond Fund

General information

Investment fund under Luxembourg law "Umbrella Construction"

Swisscanto (LU) Bond Fund is subject to the legal provisions set forth in Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

The management regulations of the investment fund were established by the management company on 30 October 1991. Several amendments have been made and, in accordance with the management regulations, published in the "Mémorial".

The current versions of the management company's articles of association and the fund's management regulations have been deposited at the Register of Companies in Luxembourg.

The fund contract, the detailed sales prospectus, the key investor information, and the annual and semi-annual reports may be obtained directly and free of charge in printed form from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office. The information is also available on the Swisscanto website (www.swisscanto.com), where current information on the fund is available.

Subscriptions shall only be made after consulting the current sales prospectus and the most recent annual report, as well as, where available, any subsequent semi-annual report. Subscriptions to fund units solely on the basis of the annual and semi-annual reports are not accepted.

Sales restrictions

Units in Swisscanto (LU) Bond Fund may not be offered, sold or delivered within the US or to persons considered US persons within the meaning of Regulation S of the US Securities Act of 1933 or in accordance with the US Commodity Exchange Act, as amended.

Guidelines of the Swiss Funds and Asset Management Association (SFAMA) on duties regarding the charging and use of fees and costs (22 May 2014)

Compensation for the marketing of the investment fund is paid out of the flat-rate administrative commission. Swisscanto Asset Management International S.A. also offers remuneration to institutional investors holding fund units for third parties from the fixed administrative commission.

Risk management process

As part of the risk management process the total risk of all the subfunds is measured and checked using the so-called commitment approach. The management company applies a risk management process to the fund and each subfund that complies with the Luxembourg law of 17 December 2010 and other applicable regulations, in particular CSSF Circular 11/51.

Swisscanto (LU) Bond Fund

Activity Report

Swisscanto (LU) Bond Fund Vision Responsible EUR

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same calendar year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong performance of bonds in absolute terms.

Review of fund-relevant categories

Last year, interest rates in many currencies increased over the reporting period, with those in EUR increasing particularly sharply. While they were hardly positive at the beginning of the reporting season, the ten-year yield on German federal

bonds rose to over 2.5% at times. As credit risk premiums rose, corporate bonds and government bonds also experienced significant year-on-year price declines. However, credit spreads declined again from October, which had a positive impact on the fund.

Performance review

Due to the rapid and strong rise in interest rates in most currencies and maturities, bonds recorded exchange losses, resulting in a negative performance of the portfolio in absolute terms (-13.59%). Thanks to the shorter maturity allocation and the balanced credit allocation in the fund compared to the benchmark, a better annual performance than the benchmark was achieved (+0.79% outperformance).

Swisscanto (LU) Bond Fund

Activity Report (cont.)

bonds recorded major changes as they were more directly affected by the rate hikes of the various central banks. As credit risk premiums rose, corporate bonds and government bonds also experienced significant year-on-year price declines.

Performance review

The developments described above were followed by a very difficult year for the fund. Following a good previous year, absolute gross performance (before fees and costs) was -7.66% in the reporting period. Interest rate positioning, curve positioning and overweight in corporate bonds led to significant outperformance (+0.58%). The performance of the benchmark was -8.36%. The fund was very active in new issues, but credit risks were chosen very selectively. Further trade ideas were successfully implemented using derivative strategies (interest rate futures, FX forwards and credit default swaps).

Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

The offshoots of the global slowdown have now also reached Switzerland. Unlike the eurozone, however, Switzerland is not likely to slip into recession. While there are increasing signs that high inflation rates around the globe are gradually declining, the sheer level of inflation leaves central banks with no choice but to raise rates further. In Switzerland, inflation at the end of December 2022 was clearly above the target range of 0% to 2%, as set by the Swiss National Bank

Activity Report (cont.)

(SNB). However, the value is significantly lower than the peak in August 2022. An important reason for this is the varied mix of energy consumption in different countries. But the strength of the Swiss franc also contributed to the relatively moderate inflation trend in Switzerland.

Performance review

In the reporting period from February 2022 to the end of January 2023, the Swisscanto (LU) Bond Fund Vision Responsible CHF achieved an absolute gross performance of -5.58% before deduction of costs. Since the beginning of the year, interest rates have risen sharply over all maturities and contributed negatively to absolute performance. The yield curve became flatter. The fund benefited strongly due to the shorter interest rate positioning, especially during March and April. In addition, the underweight in Russia has a positive impact on relative performance. Compared to the benchmark, relative performance was +1.43% before costs. Credit spreads on corporate bonds increased markedly during the year. The fund is neutrally positioned in the BBB segment and actively exploited individual buying opportunities following increased yields and risk premiums to selectively increase exposure to good reputations.

In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

2022 was a special year. While inflation concerns as a result of immense fiscal and monetary stimuli caused astonishment globally, political unrest in the UK also added to this. The unrealistically high budget spending of Liz Truss's government caused bellyaching among international investors and the market demanded a significant risk premium for British government bonds, so-called gilts. Specifically, the long end of the gilt curve suffered, with 30-year government bonds

Activity Report (cont.)

rising above 1.1% in yield in one day. Such a movement has never happened before! This movement led to collateral demands on British pension funds, which make heavy use of derivative instruments, and quickly showed how fragile the global financial system is even in 2022.

In parallel with the inflation trends in Europe and the USA, the UK also had to contend with high inflation, which has not been the case for years. As in Europe, the UK was initially driven by the energy price shock caused by the Russia-Ukraine conflict. However, the increased prices were soon followed by demands for higher wages, which are much more significant on the island. This is because, since the Brexit vote, migration from mainland Europe to the UK has fallen sharply and a shortage of labour has been felt. Knowing this, unions and workers have been able to impose clear wage demands, which carries with it the risk of an emerging wage-price spiral.

The Bank of England (BoE) was decisive in countering these trends and has consistently raised its benchmark interest rate throughout the year. The looming monetary tightening led to higher credit spreads on corporate bonds. Real estate companies were probably the most affected as their financing costs in the financial market literally went through the ceiling.

Performance review

In such a challenging year as 2022, the fund was able to achieve relative outperformance against the benchmark (+1.21%). Absolute performance before costs is -17.34%. Initially cautious positioning on the credit side was transformed into a strong overweight during the course of the year, in parallel with the increase in credit spreads. The focus on higher quality recognised the fact that the more restrictive monetary policy suggests an economic slowdown. In terms of interest rate risk, the fund was underweight throughout the year, contributing significantly to relative outperformance.

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

Last year, Canadian government bond rates rose over all maturities, with short rates picking up more than long rates. The trigger was, among other things, the Bank of Canada (BOC) trying to bring excessive inflation under control with its rate hikes. By the end of January 2023, the BOC had gradually increased its key interest rates by 4%. In addition to government bonds, corporate bonds also experienced significant year-on-year declines as credit risk premiums rose.

Past performance is no indicator of current or future performance. The performance data do not take account of fees and expenses incurred in the issue and redemption of units.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

Performance review

Due to the rapid and strong rise in interest rates in all maturities, bonds recorded exchange losses, resulting in a negative absolute performance of the portfolio (-5.77%). Thanks to the shorter maturity allocation and the slightly more cautious credit allocation in the fund compared to the benchmark, a better annual performance than the benchmark was achieved (+0.73% outperformance).

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

Market volatility remained high in the last quarter. Significant reductions in credit spreads have more than offset higher interest rates and have provided corporate bonds with a positive quarterly yield. Interest rates for ten-year government bonds have risen in the US and Germany. Credit spreads of global corporate bonds have fallen during the reporting period. The overweight of financial bonds (banks and insurance companies) and the short interest term positioning

Past performance is no indicator of current or future performance. The performance data do not take account of fees and expenses incurred in the issue and redemption of units.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

relative to the benchmark had a positive effect. The underweight of the utility sector and cyclical sectors (energy and industrials) made a negative contribution.

Recently, the new issues markets were brought back to life after a long period of drought. We were particularly active in October, when issuers offered attractive new-issue premiums. The huge demand from investors has repaid the premiums in November and some issues in euro have been priced to the swap curve at no extra charge. In the reporting period, we further reduced debtors in the BB area as the yield difference from the investment grade area narrowed too much and no longer compensated for the risks of a possible recession. We have also reduced the automotive sector following good performance as the economic and sector-specific outlook has deteriorated. We remain cautious and have not yet increased risk in portfolios. We prefer the financial sector, remain underweight in cyclical sectors and have an above-average cash share.

Performance review

After 40 years of almost continuous decline in interest rates, the rapid and massive rate hikes by central banks made 2022 the worst year in history for bond markets. Thanks to relatively stable credit spreads, corporate bonds performed better (in the euro market) or only slightly worse (in the US dollar market) than government bonds. The fund achieved negative absolute performance in USD of -8.96% and positive relative performance against the benchmark of +0.48% before costs during the reporting season (February 2022 – January 2023). The underweight of utilities and cyclical sectors such as energy and industrials were positive. The short interest rate duration positioning relative to the benchmark has also made a positive contribution. The overweight of subordinated financial and corporate bonds has contributed negatively.

Activity Report (cont.)

Swisscanto (LU) Bond Fund Responsible Global Convertible

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

The performance of convertible bonds is mainly due to equity market participation. The reporting period was marked by a bear market. The number of bond-like convertibles has jumped due to very poor stock performance.

Past performance is no indicator of current or future performance. The performance data do not take account of fees and expenses incurred in the issue and redemption of units.

The information and figures contained in this report relate to past performance only and give no indication of future performance.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

The first half of the reporting period was exceptionally challenging. There was a marked increase in discounts in valuations. Since then, a certain bottoming out in the equity markets has been noticeable; the discount also narrowed somewhat towards the end of the reporting period. A possible further normalisation of valuations could be a source of performance for the asset class in the coming months.

In the reporting period, the most important sector – Information Technology (IT) – particularly underperformed. Interest-sensitive sectors such as property, and cyclical sectors such as leisure, have also suffered disproportionately. The few sectors that could resist the trend were utilities (defensive), media and insurance.

The primary market for convertible bonds was virtually unnoticeable last year. There was a record-breaking slump in new issues.

Performance review

In the reporting period (1 February 2022–31 January 2023), the Swisscanto (LU) Bond Fund Responsible Global Convertible hedged EUR achieved a performance of -9.7%.

Thus, the stellar double-digit performance of 2020 was almost completely reversed.

Nevertheless, the fund was able to outperform its benchmark. The Thomson Reuters Global Focus hedged EUR Convertible Bond Index lost -10.4% during the reporting period. Relative performance was therefore +74 basis points on a gross basis.

The fund has a rather neutral to slightly long delta positioning. The long positioning has contributed negatively to performance. By contrast, the more defensive credit quality compared to the benchmark made a positive contribution.

Last year, we completely sold our convertible bond exposure in the UK. Our smaller position consisted of bond-like convertibles, which we sold in favour of more balanced convertible bonds.

In terms of sectors, our outperformance was mainly due to the IT sector; our security selection in IT was by far the most important factor in the outperformance. In addition, our security selection in the telecomms sector was positive, especially the avoidance of index heavyweight, Dish. Our underweight in the property sector (both asset allocation and security selection) has also paid off. This fully compensated for the negative contribution from the security selection in services as well as the underweight in steel and metals as well as utilities.

We have made a few changes, for example in Snam. Due to our 90-day hold period rule, conversions never contribute excessively to the total equity exposure.

The total delta (equity sensitivity) at the end of the reporting period was about 46%, which is slightly above the benchmark. The effective duration is currently 1.3 years. The risk of interest rate changes is therefore considerably lower than it is for most bond funds.

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

High-yield issuance, which had been very subdued so far this year, increased in the quarter – a welcome development for companies with refinancing needs. In a remarkable change of direction, the Chinese Communist Party started to lift certain restrictions after pursuing a zero-COVID policy for nearly three years. The potential impact on supply chains, demand and inflation could pose major challenges for analysts in 2023.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

We reduced our exposures in December 2022 as credit spreads narrowed significantly. Overall, the fund's market risk profile is now below the benchmark. We expect the fund to be exposed to lower credit risk than the reference index. We hold overweight positions in BB and underweight positions in B and CCC bonds.

The fund is overweight in the basic industries and healthcare sectors. We have no exposure to oil and gas, the largest sector in the reference index.

The portfolio has been supplemented by additional green bonds, which now account for 14.5% of the fund. Reaching and, if possible, even exceeding our Swisscanto climate target remains our focus – the CO2 intensity of the portfolio is currently 50% below the threshold.

Performance review

Since the repositioning at the end of May 2022, the Swisscanto (LU) Bond Fund Sustainable Global High Yield has lost -3.45% (before fees, hedged in EUR). It was thus 0.77% above the reference index, which lost -1.21%. The fund's cash holdings and its CDS index exposure contributed to outperformance, both outperforming high yield bonds during the reporting period. Compared to the benchmark, we achieved remarkably positive results from our stock selection in the basic industries, healthcare, real estate, retail and telecommunications sectors. However, this was partially neutralised by a negative selection result in the capital goods sector. We suffered a negative attribution effect from our exclusion of the well-performing oil and gas sector.

A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

The CoCo market ended the year with a strong recovery: credit spreads (OAS) narrowed significantly in the fourth quarter at a high level. Despite the high credit spreads and yields, we were positively surprised that three major banks (BNP, Deutsche Bank and Société Générale) issued new CoCo bonds (with coupons in the range of 9–10%) in the past quarter. We considered this to be a very attractive offer and have participated in all three transactions.

Past performance is no indicator of current or future performance. The performance data do not take account of fees and expenses incurred in the issue and redemption of units.

The information and figures contained in this report relate to past performance only and give no indication of future performance.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

Another important topic on the CoCo market in 2022 was the high number of calls (at the first call date) that were announced despite the market environment. More than 25 CoCo bonds were withdrawn at the first call date, which was largely in line with our expectations. We have invested in many of these bonds as one of our key investment priorities in 2022 was short-term bonds.

Performance review

From the beginning of February 2022 to the end of January 2023, the Swisscanto (LU) Bond Fund Responsible COCO lost -2.60% in value (before fees, hedged in EUR). This corresponds to an outperformance of 5.34% compared to the benchmark (-7.40%).

The main performance drivers in 2022 were (i) the strong underweight of CoCo bonds with longer maturities (five to ten years), (ii) no participation in Russian banks, and (iii) successful issuer selection.

It should be noted that all dimensions of our investment process contributed to the outperformance, i.e. active beta management (underweight in first half of 2022, increase in second half of 2022), country allocation (avoidance of Russian CoCo bonds), issuer allocation (underweighting some large underperforming banks) and stock selection (overweight shorter-term bonds and underweight longer-term bonds). The most important performance driver was the successful management of the credit beta factor through active positioning along the maturity curve. In the first half of 2022, the beta factor was low. This was due to the underweight of bonds with higher extension risk mainly in the five- to ten-year maturity segment (whose valuation we considered to be extremely inappropriate in early 2022). This led to strong outperformance in times of market weakness. Since the summer of 2022, however, we have seen a much more adequate pricing in of growth/inflation and policy risks from the market, reflected in significantly tighter financial conditions and higher real interest rates. As a result, in the second half of 2022, we increased the fund's beta factor through (i) lower-priced longer-term bonds that were considered interesting by our CoCo-Bond monitoring tool on the basis of their past performance, and (ii) new issues at attractive prices. This decision allowed the fund to continue to outperform the market during the fourth quarter rally.

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. The extremely high volatility was the only constant. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

Although global corporate bonds lost nearly as much as equity markets in 2022, the bulk of the negative performance was due to rising interest rates. On a risk-adjusted basis, corporate bonds have performed better than other risk assets as credit spreads have increased relatively little. While the current spread level does not price in a recession, the overall

Swisscanto (LU) Bond Fund

Activity Report (cont.)

yield on corporate bonds is at its highest since the financial crisis in 2008 and is above the earnings yield on equity markets. The high yield and low cash prices are historically attractive and can cushion the effects of any further correction.

In 2022, for the first time, the subordinated corporate bond market systematically focused on the risk that issuers would not repay the bonds as usual on the first call date. Before 2022, this had only occurred five times in the ten-year history of the market, and each time the risk was only selectively priced in on the market for issuers. However, the sharp rise in senior bond spreads in 2022 has led to them moving close to or even above the reset spread of many corporate hybrids. The repayment of the first call date thus became no longer attractive for issuers for purely economic reasons. Bonds with low reset spreads and short remaining maturities until the first call were systematically punished. But this fear has proved unfounded. Towards the end of the year, large issuers (Telefonica, EDF, Orsted) received their repayments due at the beginning of 2023 and replaced them with new issues, even if this was not optimal from a purely economic point of view. As expected, the main reason for this was the high value of hybrids in the capital structure and the reputation in respect of investors. Markets largely normalised in November and December and started to price in risk only for specific issuers and sectors. These include the real estate sector, where two issuers actually announced that they will not pay the repayments due in 2023.

Performance review

After 40 years of almost constantly declining interest rates, the rapid and massive interest rate hikes by central banks made 2022 the worst year in history for bond markets. Credit spreads of corporate hybrids rose more strongly than for senior bonds, as they have suffered disproportionately from high volatility as a high-beta asset class. However, thanks to the shorter duration, absolute performance was slightly better than that of global corporate bonds. The fund achieved negative absolute performance in EUR of -9.67% and positive relative performance against the benchmark of +1.49% before costs. The biggest positive contribution was from the underweight of the real estate sector. Positioning along the first-call curve and the short interest-term positioning relative to the benchmark also contributed positively. The BB share, on the other hand, made a negative contribution.

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realisation that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have only reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

In the past year, all investable segments were under severe pressure to some extent. The rise in interest rates and the further expansion of credit risk premiums have had a negative impact on the fund. In the first half of the year in particular, investments in EUR and USD suffered a lot. The largest contributors to performance were the cancelled hedge positions on Bunds (German Federal bonds) in EUR and the extension of duration in USD. The long positions in credit

Swisscanto (LU) Bond Fund

Activity Report (cont.)

derivatives also contributed significantly positively, and currency bets also closed positively. The broad diversification in various local markets (MXN, ZAR, CNY) contributed to the positive result compared to the Global Aggregates segment.

Performance review

In the reporting season (February 2022 – January 2023), the Swisscanto (LU) Bond Fund Responsible Global Absolute Return reported absolute performance in USD of -3.56% before costs. The sharp rise in interest rates and the expansion of credit risk premiums have had a negative impact on the fund. However, due to the hedge positions on interest rates and currencies we were able to limit the losses and suffered significantly lower losses than the Global Aggregate segment. This year, all investable segments have lost to varying degrees due to the extraordinary combination of inflation and growth concerns. Ultimately, we managed to do a lot better than the overall market with lower volatility, although absolute performance was not satisfactory.

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realization that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

High-yield issuance, which had been very subdued so far this year, increased in the fourth quarter – a welcome development for firms with refinancing needs. In a remarkable change of direction, the Chinese Communist Party started to lift certain restrictions after pursuing a zero-COVID policy for nearly three years. The potential impact on supply chains, demand and inflation could pose major challenges for analysts in 2023.

Past performance is no indicator of current or future performance. The performance data do not take account of fees and expenses incurred in the issue and redemption of units.

The information and figures contained in this report relate to past performance only and give no indication of future performance.

Swisscanto (LU) Bond Fund

Activity Report (cont.)

All high yield sectors posted a positive overall return in the fourth quarter of 2022. However, there were clear variations, with telecommunications and services performing best, and real estate and technology performing worst. The fund performed excellently during the recent high yield recovery due to a timely shift in our market beta positioning and tactical risk increase. The automotive, healthcare and transportation sectors contributed the most to outperformance. In addition, new issues were also an important performance driver, as many new deals were placed at exceptionally attractive discounts and performed well in the secondary market accordingly. By contrast, our retail and capital goods positioning was below average in the fourth quarter, largely due to our underweight in these segments.

Performance review

The Swisscanto Bond Fund Responsible Secured High Yield experienced a loss of -5.54% (hedged in EUR, before deduction of fees). The reference index, on the other hand, even lost -5.80%. The fund thus outperformed by 1.67%. Maintaining a lower beta position throughout the year was critical in an environment of expanding spreads and rising quality. The strongest sector performance was in the technology, healthcare and basic industries. We were significantly underweight in these three sectors. Our positioning in the automotive, service and utilities sectors contributed negatively to relative performance for a number of reasons: The automotive sector was affected by the events in February (Russian invasion of Ukraine). The services sector was unfavourably affected by a disappointing earnings release from one issuer, while utilities suffered from risk-averse sentiment and outflows in emerging markets. This has had a negative impact on some of our positions with sustainable energy producers in India. However, we have no concerns about the fundamental soundness of the sector and attribute price performance to market volatility rather than fundamental problems. In terms of ratings, the fund was ahead of the reference index thanks to its underweight in lower-valued corporate bonds, as the spread between BB and B bonds continued to widen.

Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities

Market Overview

2022 is finally behind us! It was a year of disastrous records. It was the worst year since the 2008 financial crisis for equity markets, and the worst year since records began for global bond markets. This was the first time in history that both equity and bond markets lost more than 15% in the same year. Investors had to cope with the realization that there is no longer a central bank put, or that its strike price is far lower than it has been in recent years. After much deliberation, central banks on both sides of the Atlantic discarded the narratives of "temporary inflation" and launched the fastest interest rate hike cycle in history, regardless of collateral damage. But interest-rate markets have reluctantly taken part in the interest rate hikes of central banks. Interest rates remain well below the level targeted by central banks (terminal rate). The inverse yield curve also signals the expectation of an early trend reversal.

Even in the fourth quarter, extremely high volatility was the only constant. The feared energy crisis in Europe did not materialise thanks to the mild weather, and news about developments in the Ukraine war moved markets less than previously. Markets are driven mainly by published inflation figures and changing inflation expectations. At the beginning of October, US inflation was again higher than expected in September. What is particularly worrying is the rise in core inflation to its highest level since 1982. This triggered wild fluctuations in the financial markets. In mid-October, the political situation in the UK was once again in the spotlight. The resignation of Prime Minister Liz Truss after only 44 days in office and the complete fiscal policy reversal by her successor, Rishi Sunak, lowered yields on British government bonds.

At the end of October, the European Central Bank (ECB) raised interest rates as expected. However, the statements of ECB President Christine Lagarde were interpreted by the markets as dovish because she mainly stressed her concerns about the deteriorating growth prospects. A few days later, inflation in the euro area reached a new double-digit record in early November and both the US Federal Reserve and the Bank of England raised interest rates. US Federal Reserve President Jay Powell indicated that a possible future shift to smaller rate hikes would not be the end of the rate hikes. However, the markets were unimpressed. The fall in US inflation figures in October reinforced investors' belief in an early trend reversal by the US Federal Reserve. A markedly lower implicit interest rate volatility significantly reduced corporate credit spreads. The rally in the financial markets was further accelerated by lower November inflation figures in Europe and the USA. Such developments counteract the objectives of restrictive monetary policy. In December, both the ECB and the US Federal Reserve increased rates by another 50 basis points. The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

In the past year, all investable segments were under severe pressure. The rise in interest rates and the further expansion of credit risk premiums have had a negative impact on the fund. In the first half of the year in particular, HY investments

Activity Report (cont.)

in EUR and USD suffered a lot. Hybrid segments in financials and industrials also came under strong pressure. Broad diversification in various local markets (MXN, ZAR, CNY) contributed somewhat positively to the overall disappointing result.

Central banks in many emerging countries have now increased interest rates by resolutely tightening their monetary policy to such an extent that some countries in Latin America in particular already have significant positive real interest rates in their "naive" measurement (nominal interest rate minus current inflation rate).

Performance review

In 2022, the Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities posted absolute performance in USD of -5.68% before costs, and thus had significant losses in absolute terms. The sharp rise in interest rates and the expansion of credit risk premiums have had a negative impact on the fund. Even in the local markets of the emerging countries, there were some losses due to rising interest rates. Investments in CNY, BRL and ZAR had a relatively positive impact. Investments in Ukrainian companies have lost significant value due to the Russian invasion. Overall, the fund performed the same as its benchmark (underperformance of -0.13%).

The smaller interest rate hikes were put into perspective by hawkish statements at the press conferences. Both central banks stressed that interest rates will continue to rise and are expected to remain high for a longer period of time. Equity markets then corrected and interest rates climbed sharply.

At the end of December, the Bank of Japan (BoJ) provided the final shock of the year. It was the last major central bank to usher in the end of its expansionary monetary policy, raising the ten-year bond yield cap from 0.25% to 0.50%. The move set markets in turmoil, though it was presented as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. Japan's highest inflation rate since 1981 led to concerns that the BoJ could completely abandon its policy of curve control, and that the Japanese bond market will continue to create turbulence in global markets next year through repatriation of foreign investment.

The largely positive sentiment in January 2023 was driven by good corporate results, robust economic data and lower inflation figures. In the euro area, preliminary consumer price data for January 2023 were lower than expected, but core inflation remained high. Consumer prices in the USA were also trending downwards in December. Interest rate hikes by central banks are beginning to affect inflation, which continued to cool in both regions. Positive sentiment boosted equity markets and led to a strong rally in Europe and the US. Both interest rates and credit risk spreads on corporate bonds fell in the first month of the year. These developments led to a strong absolute performance of bonds.

Review of fund-relevant categories

After three consecutive negative quarters, bond markets recovered some ground toward the end of the year. Nevertheless, global corporate bonds experienced significant year-on-year declines as both interest rates and credit spreads rose. However, a slight recovery began in the last quarter. Credit risk premiums decreased significantly,

Swisscanto (LU) Bond Fund

Activity Report (cont.)

especially for financial bonds. The overweight of credit risk in this sector thus provided the largest relative performance contribution. The duration was also reduced tactically in December, which generated a positive contribution due to the rise in interest rates.

Performance review

The Swisscanto (LU) Bond Fund Sustainable Global Credit achieved a return of -11.60% in EUR before fees over the course of the year. In a challenging year, the fund surpassed the benchmark by 1.87%. It is particularly gratifying that both duration and credit positioning provided added value. Conservative sector allocation, with an overweight in healthcare and technology, contributed positively to relative performance. The selection of subordinated financial instruments from the banking and insurance sectors generated the biggest negative contribution. A significant positive contribution was made by the shorter duration.

As in the previous quarter, we further increased the share of green bonds. Although the primary market was less active than expected throughout the year due to market turmoil, for example, we subscribed to a green bond from Suez. Among other things, the proceeds from the issue will be used to finance projects for water treatment and waste recycling. Dedicated bonds such as green, social and sustainable bonds currently account for about 28% of the portfolio. Defensive sector positioning, with an overweight in healthcare, technology and finance and an underweight in energy, continues to be offset by a preference for subordinated bonds from solid investment grade issuers. The fund has an average rating of BBB+ and is close to the benchmark for its overall duration at year end.

Swisscanto (LU) Bond Fund

Swisscanto (LU) Bond Fund
Responsible Emerging Markets
Opportunities

Activity Report (cont.)

The major market driver was the tighter monetary policy of central banks worldwide, but also the first signs of declining inflation as a glimmer of hope. This resulted in markedly lower spreads and generally lower yields on local bond maturity in the last quarter of 2022. We generally had a more defensive duration exposure than the benchmark over the quarter, which had a negative impact on our performance. Overall, country allocation continued to contribute to positive performance, with the zero weight in local government bonds costing Hungary slightly for the first time this year.

Performance review

The asset class performed negatively in the reporting season, with the JEMB Sovereign-only 50-50 (JEMBAGTU) achieving a return of -10.07%. The fund generated gross performance in USD of -7.25% for the reporting season (February 2022 – January 2023). This represents an outperformance of +305 basis points over the benchmark. Over the year, overweight in Brazilian and Mexican local bonds contributed positively. In addition, the underweight in local government bonds of Colombia and Hungary had a positive impact, as these markets were among the worst. Underweights in Russian hard and local government bonds also had a positive impact on performance. All in all, the investment strategy proved very successful in 2022.

The fund invests flexibly and pursues an active selection from the entire emerging market universe. Depending on the attractiveness of the yield opportunities, investments are made in hard currency or local currency bonds. The choice between hard and local currency bonds is made on a country-by-country basis, which significantly increases the yield potential. Over the quarter, we continued to increase duration in specific countries we prefer. In USD bonds, we prefer countries with limited liquidity problems, supportive trade balance, robust fundamentals and attractive valuations. We favour local currency bonds from countries that have attractive valuations and solid or improving external balance-of-trade figures, such as Indonesia, Brazil or Mexico. However, we completely avoid local investments in countries that do not have a convincing real interest valuation and therefore offer an asymmetrical total return profile (Hungary and Romania).

Swisscanto (LU) Bond Fund

Notes on the annual report as at 31 January 2023

Note 1: Financial Reports

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

Note 2: Main Accounting Policies

The net assets of each subfund or each unit class correspond to the difference between the total assets of the subfund or unit class and the total liabilities of the subfund or unit class concerned.

The total net assets are given in Swiss Francs (CHF). For this purpose the net assets of any subfunds that are not denominated in CHF are converted at the last known middle rate of exchange at the closing date. This conversion was based on the following rates:

1 CHF	=	1.544646	AUD
1 CHF	=	5.541704	BRL
1 CHF	=	1.452352	CAD
1 CHF	=	869.357029	CLP
1 CHF	=	7.354340	CNH
1 CHF	=	7.354489	CNY
1 CHF	=	5062.488372	COP
1 CHF	=	23.851405	CZK
1 CHF	=	7.455545	DKK
1 CHF	=	32.848499	EGP
1 CHF	=	1.002196	EUR
1 CHF	=	0.884116	GBP
1 CHF	=	8.531726	HKD
1 CHF	=	392.484828	HUF
1 CHF	=	16,315.919652	IDR
1 CHF	=	3.761032	ILS
1 CHF	=	89.172128	INR
1 CHF	=	141.545454	JPY
1 CHF	=	1,340.437192	KRW
1 CHF	=	20.462766	MXN
1 CHF	=	4.642999	MYR
1 CHF	=	10.871522	NOK
1 CHF	=	1.684232	NZD
1 CHF	=	4.185355	PEN
1 CHF	=	4.724131	PLN
1 CHF	=	4.931539	RON
1 CHF	=	76.381404	RUB
1 CHF	=	11.395674	SEK
1 CHF	=	1.430585	SGD
1 CHF	=	35.929062	THB
1 CHF	=	20.473929	TRY
1 CHF	=	1.088435	USD
1 CHF	=	18.968561	ZAR

Subscriptions, redemptions and conversions are made based on an unknown net asset value.

Valuation principles:

a) Securities, derivatives and other investments that are listed on a stock market are valued at the last-known market prices. If these securities, derivatives and other investments are listed on several stock exchanges the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.) as at 31 January 2023

Note 2: Main Accounting Policies (cont.)

for which trading on an exchange is minor and for which there is a second market between securities traders with market-based price formation, the management company may undertake the valuation of these securities, derivatives and other investments on the basis of these prices. Securities, derivatives and other investments which are not listed on an exchange, but are traded on another regulated market which is recognized, open to the public and functions in an orderly manner, are valued at the last known price on this market.

b) Securities and other investments that are not listed on a stock exchange or on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price, the value of which must be estimated with due care and in good faith.

c) Money market instruments which are not listed on a stock exchange, but are traded on another regulated market which is recognized, open to the public and functions properly, may be valued as follows: starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping the investment yield constant. In the event of significant changes in market conditions, the valuation basis of the individual investments is brought into line with the new market yield.

d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.

e) Units in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.

f) Derivatives that are not traded on a stock exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.

g) For each subfund the assets that are denominated in a currency other than that of the subfund are converted to the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.

h) Calculation of the net asset value

The net asset value of the units is calculated by the management company for each individual subfund and for each unit class as per the contractual conditions and item 3.1 in the sales prospectus on every banking business day in Luxembourg.

i) Swinging Single Prices (SSP)

The SSP method is used for all subfunds. With the SSP method, the ancillary costs created by subscriptions and redemptions for the purchase and sale of investments (price spreads, brokerage in line with market conditions, commission, fiscal charges etc.) are taken into account in the calculation of the NAV. If, on a banking day, the total subscriptions and redemptions of all unit classes of a subfund result in a net inflow or outflow, the net asset value of the relevant subfund is increased or reduced. This amount is known as the "modified net asset value". The adjustment results in an increase in the net asset value if the net movements lead to a rise in the number of units in the relevant subfund. It results in a decrease in the net asset value if the net movements cause a fall in the number of units.

The transaction costs incurred by subscriptions and redemptions on the trading day are paid by the investors who commission these transactions.

The surcharge on, or deduction from, the transaction costs incurred by subscriptions or redemptions is effected at a flat rate and is based on an average value from a previous period of a maximum of one year.

The maximum adjustment is 2% of the net asset value of the subfund in question. If the fund has been on the market for less than one year, depending on the fund's special features this factor will be determined so that a representative figure results.

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.)
as at 31 January 2023**Note 2: Main Accounting Policies (cont.)**

As at 31 January 2023, Swinging Single Price values were recorded in the following subfunds:

Swisscanto (LU) Bond Fund Vision Responsible CHF	in other assets
Swisscanto (LU) Bond Fund Vision Responsible International	in bank interest and other liabilities
Swisscanto (LU) Bond Fund Responsible Global Absolute Return	in bank interest and other liabilities
Swisscanto (LU) Bond Fund Sustainable Global Credit	in bank interest and other liabilities
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities	in other assets

The amounts are reversed on the following day after the capital has been definitively booked.

j) Valuation of forward exchange contracts

Any unrealised gains or losses resulting from the valuation of open forward exchange contracts at the reporting date are included in the statement of net assets and the income and expense statement.

k) Capital gains or losses from security transactions

The realised gains or losses resulting from the sale of securities will be calculated on the basis of the average purchase price.

Note 3: Information on forward exchange contracts

The following currency forward contracts were open on the reporting date:

The margin accounts form part of the "bank balance" shown on the statement of net assets as at 31 January 2023.

The futures contracts were entered into with the following counterparty: J.P.Morgan Securities PLC.

Note 5: Administrative commission

The fund will be invoiced a fixed administrative commission for management and administration plus the distribution of fund units, to be paid to the Management Company. This commission will be paid monthly, based on the average net fund volume of the respective subfund.

The flat-rate administrative commission comprises the two components of the flat-rate management fee (costs of asset management and sales) and the flat-rate administration fee (costs of management and administration).

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.)
as at 31 January 2023**Note 5: Administrative commission (cont.)**

As at 31 January 2023, the effective flat-rate administrative commission amounted to:

FAC: flat-rate administrative commission / FMF: flat-rate management fee / FAF: flat-rate administration fee

In addition to the fixed administrative commission, the following are charged to the fund:

- the subscription tax ("taxe d'abonnement");
- the usual transaction costs associated with buying and selling;
- the costs for extraordinary measures in the interests of the shareholders.

Note 6: Subscription tax ("Taxe d'abonnement")

In accordance with the rules applicable in Luxembourg, the fund is subject to a quarterly subscription tax ("taxe d'abonnement") of 0.05% p.a. in the case of units of unit classes A, B, C, and M of 0.01% p.a. for units of unit classes D, G, J and N, based on the net assets of the given subfund at the end of the respective quarter.

Pursuant to Article 175a of the amended Law of 17 December 2010, the portion of net assets invested in UCITS that are already subject to capital tax is exempt from this tax.

Note 7: Contingent liabilities from options

The options contracts were entered into with the following counterparties: J.P.Morgan Securities PLC.

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.) as at 31 January 2023

Note 10: Total Expense Ratio (TER)

The TER reported under "Statistics" in this report was calculated in accordance with the "Guidelines on the Calculation and Disclosure of TER and PTR" published by the Swiss Funds and Asset Management Association (SFAMA) on 16 May 2008. These Guidelines have been aligned with the revised Collective Investment Schemes Ordinance-FINMA. The amended TER Guidelines entered into force on 1 June 2015. It is no longer necessary to disclose the PTR in the annual report.

The TER has been calculated for the last 12 months prior to the date of this report.

Total Expense Ratio (TER) = (operating expenses / average net assets) x 100

The operating expenses include all of the fees and costs associated with the fund. The operating expenses do not include the ancillary costs that the fund incurred when buying and selling assets.

Note 11: Changes in the investment portfolio

Information on changes in the investment portfolio for the reporting period are available to all unitholders at the Swisscanto website (www.swisscanto.com) or can be obtained free of charge from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office.

Note 12: Transaction costs

In the reporting year, the Fund incurred the following transaction costs from the purchase or sale of transferable securities or money market instruments:

Swisscanto (LU) Bond Fund Vision Responsible EUR	EUR	-
Swisscanto (LU) Bond Fund Vision Responsible USD	USD	-
Swisscanto (LU) Bond Fund Vision Responsible CHF	CHF	-
Swisscanto (LU) Bond Fund Vision Responsible GBP	GBP	-
Swisscanto (LU) Bond Fund Vision Responsible CAD	CAD	-
Swisscanto (LU) Bond Fund Vision Responsible AUD	AUD	-
Swisscanto (LU) Bond Fund Vision Responsible International	CHF	-
Swisscanto (LU) Bond Fund Responsible Global Corporate	USD	16
Swisscanto (LU) Bond Fund Responsible Global Convertible	USD	262
Swisscanto (LU) Bond Fund Sustainable Global High Yield*	USD	53
Swisscanto (LU) Bond Fund Responsible COCO	USD	-
Swisscanto (LU) Bond Fund Responsible Corporate Hybrid	EUR	-
Swisscanto (LU) Bond Fund Responsible Global Absolute Return	USD	3,052
Swisscanto (LU) Bond Fund Responsible Secured High Yield	USD	8
Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities	USD	454
Swisscanto (LU) Bond Fund Sustainable Global Credit	CHF	191
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities	USD	5,697

The transaction costs listed in the "Income and expense statement" and primarily associated with sub-custodian bank charges and similar charges are therefore not included in the values stated above, but are likewise directly connected to the sale and purchase of securities. Due to technical accounting restrictions, the transaction costs reported under this item cannot be allocated to the acquisition costs of the various securities.

Note 13: Securities lending transactions

In order to ensure efficient asset management, a subfund may, in accordance with the requirements of the applicable provisions, use securities lending techniques and instruments in accordance with Article 51, para. 2 of the UCITS Directive and Article 11 of Directive 2007/16/EC of 19 March 2007 (Eligible Assets Directive) to generate additional income. In securities lending transactions, the subfund acts as lender and lends the borrower a security for use during a

* See note 16.

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.)
as at 31 January 2023**Note 13: Securities lending transactions (cont.)**

limited time; the subfund receives a fee for this. Zürcher Kantonalbank is the only direct borrower (principal) and the only direct counterparty of the securities lending transactions. As an independent, public-law institution of the canton of Zurich, the bank enjoys an unlimited state guarantee. It is therefore subject to regulatory supervision by the Swiss supervisory authority (Swiss Financial Market Supervisory – FINMA), which is considered by the CSSF as equivalent to the rules laid down under European Union law (Art. 41 (1) f) of the UCITS Law).

As at 31 January 2023, securities lending transactions existed in the following amount:

Subfund	Currency	Fair value	Guarantee amount
Swisscanto (LU) Bond Fund Vision Responsible EUR	EUR	2,664,394	3,233,760

Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities	15,373,780
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunitie	10,750,475

Note 16: Significant events

In February 2022, several countries (including the US, the UK and the EU) imposed sanctions on certain institutions and persons in Russia due to the official recognition by the Russian Federation of the People's Republics of Donetsk and Lugansk. Following the military operations against Ukraine launched by Russia on 24 February 2022, possible further sanctions have been announced.

Since February 2022, the increasing geopolitical tensions have led to a considerable increase in volatility in securities and foreign exchange markets as well as a significant depreciation of the rouble against the US dollar and the euro. These events are expected to affect the activities of Russian companies in various sectors of the economy.

The Company considers these to be non-adjusting events after the reporting period. Although, at the time of reporting, neither the performance of the Company nor the Company's continuing operations or transactions were affected by the above events, the Board of Directors continues to monitor the evolving situation and its effects on the Company's financial position and results of operations.

With effect from 31 May 2022, the Swisscanto (LU) Bond Fund Responsible Global Short Term High Yield will be renamed Swisscanto (LU) Bond Fund Sustainable Global High Yield. In future, the sub-fund will pursue sustainable investments and invest at least two thirds of its assets in compliance with the sustainable approach guidelines. The composition of the portfolio will be based on the reference index "ICE BofA Global High Yield Index TR", whereby the investment universe is restricted by the sustainable approach.

Securities priced by the Board of Directors at or close to zero

Based on an analysis performed by the Board of Directors, the Board of Directors has decided to value the following securities at or close to zero:

Held in Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities:

Min Fin Ruf 5.1% 19-28.03.35

Min Fin Ruf 6.9% 18-23.05.29

Russia 7.1% 17-16.10.24

Swisscanto (LU) Bond Fund

Notes on the annual report (cont.) as at 31 January 2023

Note 17: Subsequent events

The management company has decided to transfer the function of fund accounting and NAV calculation for the Swisscanto (LU) Bond Fund. The transfer will take place on 16 May 2023. The tasks related to these functions were carried out by Swisscanto Fondsleitung AG as a service provider and were the responsibility of the management company. The transfer of the fund accounting and NAV calculation does not result in any change in the amount of the lump-sum administrative commission or other fees imposed on the shareholder. The fees remain the same for the shareholder.

Note 18: Classification according to SFDR Regulation (EU 2019/2088) (unaudited)

The sub-funds that follow the Responsible approach and include the name "Responsible" in the name were actively managed by the asset manager of these sub-funds in line with Article 8 of 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure obligations in the financial services sector (hereinafter "SFDR").

Compliance with the requirements of Article 8 of the SFDR has been achieved in that the asset manager has applied the criteria of the Responsible approach in its investment decisions to 100% of the assets of the respective sub-fund, excluding cash and derivatives: (1) Exclusion criteria, (2) ESG integration, (3) Reduction of portfolio CO2e intensity.

Exclusion criteria:

The exclusion criteria applied to companies were as follows:

- Manufacture of weapons and ammunition, including the following banned weapons:
 - Cluster bombs and cluster munitions
 - Anti-personnel and land mines
 - Biological and chemical weapons
 - Nuclear weapons systems
 - Nuclear weapons material
 - Enriched uranium
 - Blinding laser weapons
 - Firearms
- manufacture of war technology (> 5% turnover)
- behavioural-based exclusions under SVVK-ASIR
- UN Global Compact Violations
- child labour
- pornography production
- coal extraction (> 5% turnover)*
- coal reserves (ex metal production)*

The exclusions for government issuers were as follows:

- Afghanistan
- Iran
- Sudan
- Angola
- Yemen

*Green bonds and sustainable bonds do not have to be excluded. In the case of a green bond and a sustainable bond, the issuer must use the financial resources raised by the issue of the green or sustainable bond for a specific purpose. Green bonds serve to raise capital for specific activities to reduce or prevent negative environmental impacts. Sustainable bonds are also used to raise capital for specific activities to reduce or prevent negative impacts on the environment, as well as to raise capital for specific activities to reduce or prevent negative impacts on society. Investments in green bonds or sustainable bonds thus contribute to a positive change in relation to the respective exclusion criterion.

Good corporate governance:

Where investments have been made in companies, those that have complied with the principles of good management have been selected. To achieve this, the companies have been chosen on the basis of indicators provided by third parties.

ESG integration:

In all investment decisions made by the asset manager in the management of the Responsible portfolios, ESG integration was part of the analysis and therefore the investment process.

Reduction of CO2e intensity:

The investment decisions taken by the asset manager of the Responsible sub-funds in 2022 have resulted in a reduction in the CO2e intensity of the respective sub-fund portfolio compared to the specified benchmark.

Investments according to the taxonomy regulation:

No targeted investments have been made in accordance with Regulation (EU) 2020/852 of 18 June 2020 establishing a framework to facilitate sustainable investment.

The Swisscanto (LU) Bond Fund Sustainable Global Credit, which pursues the Sustainable approach, has been actively managed by the asset manager of this sub-fund in accordance with Article 9 of 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure obligations in the financial services sector (hereinafter referred to as "SFDR").

Compliance with the requirements of Article 9 of the SFDR for this sub-fund has been achieved in that the asset manager has applied the criteria of the Sustainable approach in their investment decisions to 100% of assets, excluding cash: (1) Exclusion criteria, (2) ESG integration, (3) Reduction of portfolio CO2e intensity and (4) Positive contribution to meeting the UN Sustainable Development Goals (hereinafter referred to as "SDGs") and taxonomy-aligned investments under Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework for facilitating sustainable investment (hereinafter referred to as "taxonomy").

- Somalia
- Venezuela

and

- Low degree of democracy and freedom
- Application of the death penalty
- High military budgets (> 4% of GDP)
- Development of nuclear energy (total share > 50%)
- Countries that have not ratified the Paris climate agreement
- Countries that have not ratified the Convention on Biological Diversity (CBD)

Good governance:

Where investments have been made in companies, those that have complied with the principles of good management have been selected. To achieve this, the companies have been chosen on the basis of indicators provided by third parties.

ESG integration:

In all the investment decisions made by the asset manager in the management of the Swisscanto (LU) Bond Fund Sustainable Global Credit sub-fund, ESG integration was part of the analysis and therefore the investment process.

Reduction of CO₂e intensity:

The investment decisions taken by the asset manager in 2021 with regard to the Swisscanto (LU) Bond Fund Sustainable Global Credit sub-fund have led to a reduction in the CO₂e intensity of the portfolio.

Contribution to compliance with SDGs and taxonomy-aligned investments:

The SDGs as well as climate mitigation and adaptation to climate change as environmental objectives of the taxonomy have been taken into account in the investment decisions.

By applying the criteria of the Sustainable approach, the asset manager also invested in economic activities that contribute to meeting these various environmental objectives. The share of investments that contributed to the SDGs was 53%. The share of investments that contributed to the taxonomy-aligned environmental objectives was between 0-5%¹

The principle of Do No Significant Harm applies only to those investments underlying the respective sub-fund where the investment decisions take into account the SDGs and taxonomy-aligned environmental objectives. The investments underlying the remaining part of the respective sub-fund do not take into account these criteria for environmentally sustainable economic activities.

¹Due to the lack of data, it is not possible to determine the share more precisely.

Swisscanto (LU) Bond Fund

Additional unaudited information

Information on remuneration policy

European Directive 2014/91/EU amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the fund, entered into force on 18 March 2016. It was transposed into national law by the Luxembourg Law of 10 May 2016 on the transposition of Directive 2014/91/EU. Due to these new regulations, the fund is required to publish information relating to the remuneration of identified employees within the meaning of the Law in the annual report. This information corresponds with the appropriate remuneration information which the management company has published in the previous annual report for 2017, and relates to the entire workforce:

	Number of employees	CHF
Overall remuneration for Swisscanto Asset Management International S.A. (01.01.2022 – 31.12.2022):	12	2,208,690.90
of which is fixed:		1,417,442.27
of which is variable*:		791,248.63

* The basis of the variable remuneration paid out in March of each fiscal year relates to the previous year.

Due to the low number of employees and based on the principle of proportionality, no further breakdown of the remuneration of identified employees will be provided. The calculation of the remuneration and other benefits is based on prevailing market norms and the individual performance of the employee. The fixed part of the remuneration relates to factors of long-term significance, such as sustainable profitability, robust risk and capital management, first-class customer service and teamwork. The same procedure applies for the variable part of the remuneration, which also encompasses factors such as the reward of success and achievement, and the continued adherence to corporate governance guidelines. Furthermore, variable remuneration depends to a significant extent on the income of the group as well as the management company and the funds it manages.

Further information on the remuneration policy can be found on the [website www.swisscanto.com/int/de/rechtliches/verguetungspolitik.html](http://www.swisscanto.com/int/de/rechtliches/verguetungspolitik.html).

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Vision Responsible EUR

Legal entity identifier (LEI-Code):

549300OZ5ONRSYC73L87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

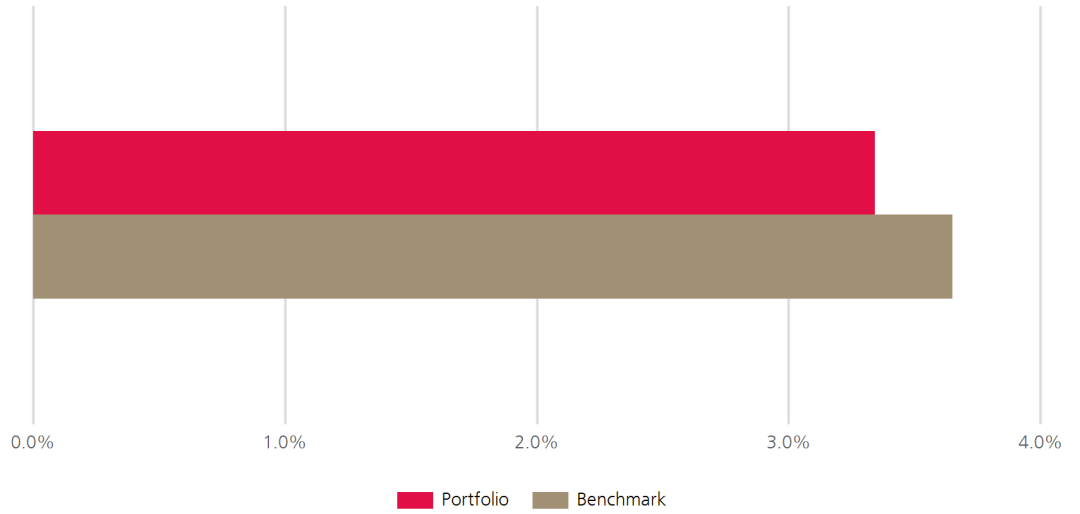

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.10%	7	 Child labour	0.00%	0.12%	3
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Production of military hardware (>5% revenue)	0.00%	0.10%	4
 Climate change				Manufacture of weapons and ammunition	0.00%	0.08%	2
 Risk to society and health				UN Global Compact violations	0.00%	0.03%	0
				Controversial weapons	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-16%

+8%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

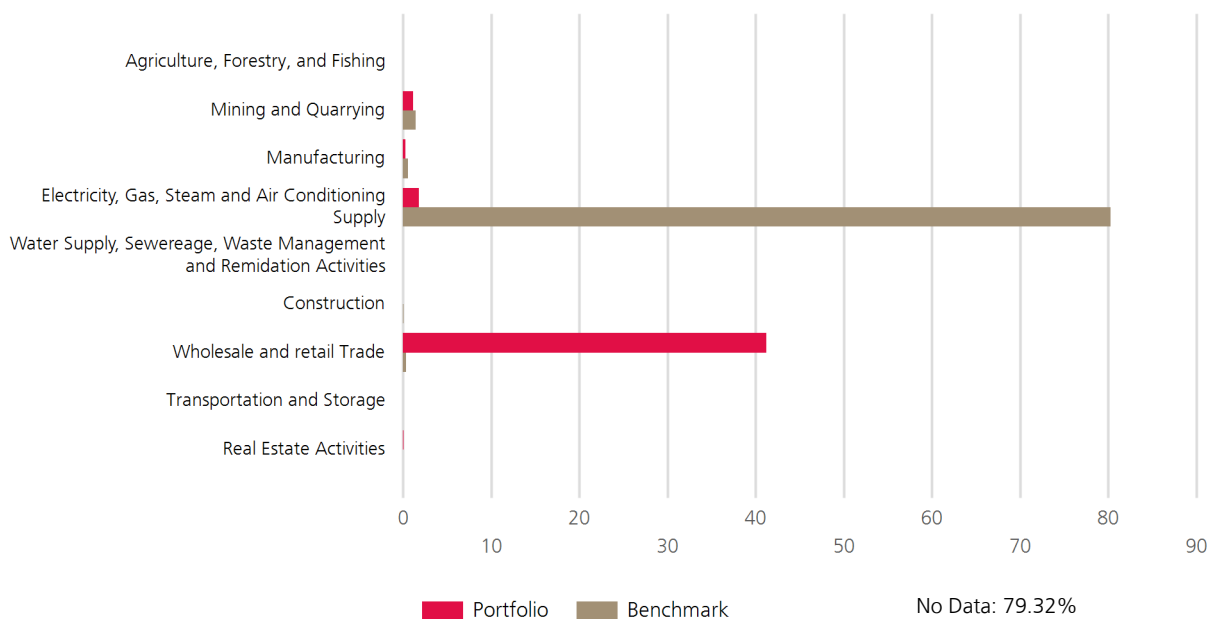

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

Indicator	ISS ESG Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Vigie SA	Water Supply, Sewerage, Waste Management and Remediation Activities	82.47%	-	82.47%	-	0.33%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.02%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	78.74%	-	43.11%	-	0.03%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.00%
SNCF Reseau	Transporting and Storage	100.00%	-	20.00%	-	0.30%
SNCF Mobilites	Manufacturing	100.00%	-	19.94%	-	0.26%
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.01%
Deutsche Post AG	Transporting and Storage	56.75%	-	11.35%	-	0.04%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.69%
Umicore	Water Supply, Sewerage, Waste Management and Remediation Activities	52.18%	-	10.44%	-	0.01%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

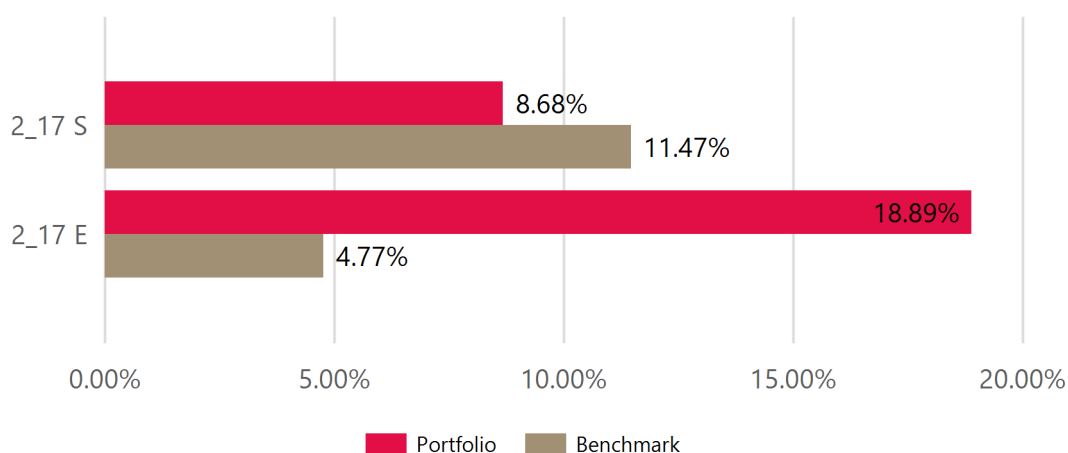

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.50%	8	 Production of military hardware (>5% revenue)	0.00%	0.49%	11
Extraction of coal (>5% revenue)	0.00%	0.00%	0	 Manufacture of weapons and ammunition	0.00%	0.33%	6
 Climate change				 Controversial weapons	0.00%	0.27%	3
 Risk to society and health				Child labour	0.00%	0.18%	2
				UN Global Compact violations	0.00%	0.04%	1
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-27%

+9%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

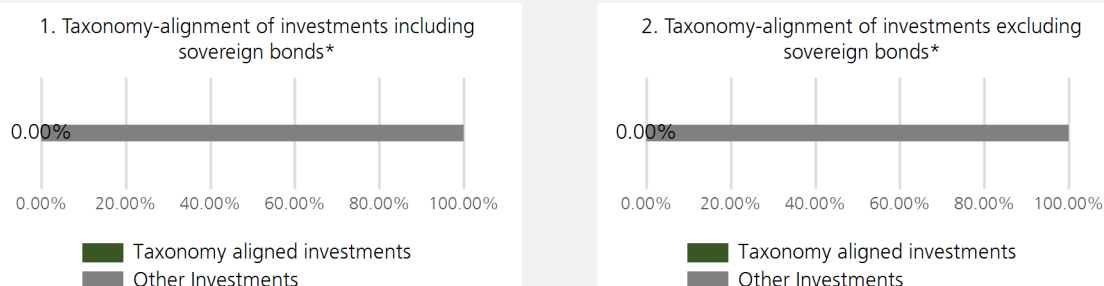

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Waste Connections, Inc.	Transporting and Storage	79.76%	-	76.43%	3.33%	0.19%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.02%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	78.74%	-	43.11%	-	0.02%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.01%
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.01%
Waste Management, Inc.	Water Supply, Sewerage, Waste Management and Remediation Activities	91.30%	-	16.39%	-	0.85%
Deutsche Post AG	Transporting and Storage	56.75%	-	11.35%	-	0.03%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.02%
Umicore	Water Supply, Sewerage, Waste Management and Remediation Activities	52.18%	-	10.44%	-	0.01%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.02%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.01%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.01%
Ford Motor Company	Manufacturing	3.00%	-	3.00%	-	0.03%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.01%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.01%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.00%
General Motors Company	Manufacturing	2.97%	-	-	2.50%	0.01%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Vision Responsible GBP

Legal entity identifier (LEI-Code):

549300BWFGKZQUQG0265

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.12%	1	 Child labour	0.00%	0.24%	2
Extraction of coal (>5% revenue)	0.00%	0.00%	0	 UN Global Compact violations	0.00%	0.02%	0
 Climate change				 Controversial weapons	0.00%	0.00%	0
 Risk to society and health				 Manufacture of weapons and ammunition	0.00%	0.00%	0
				 Production of military hardware (>5% revenue)	0.00%	0.00%	0
				 Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

Over the reporting period (except for January 2023), the sub-fund did not comply with the requirement* put into effect as of January 1, 2023 in the pre-contractual documents.
*The portfolio aims for a lower exposure to ESG laggards compared to the benchmark. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-24%

-1%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.24%	2	 Child labour	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change				Manufacture of weapons and ammunition	0.00%	0.00%	0
 Risk to society and health				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

Over the reporting period (except for January 2023), the sub-fund did not comply with the requirement* put into effect as of January 1, 2023 in the pre-contractual documents.
*The portfolio aims for a lower exposure to ESG laggards compared to the benchmark. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-25%

+4%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the “greenness” of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.01%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	78.74%	-	43.11%	-	0.02%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.01%
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.01%
Deutsche Post AG	Transporting and Storage	56.75%	-	11.35%	-	0.03%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.01%
Umicore	Water Supply, Sewerage, Waste Management and Remediation Activities	52.18%	-	10.44%	-	0.01%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.01%
Faurecia Societe europeenne	Manufacturing	26.09%	-	5.22%	-	0.00%
Ford Motor Company	Manufacturing	3.00%	-	3.00%	-	0.04%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard (issgovernance.com)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Vision Responsible AUD

Legal entity identifier (LEI-Code):

549300G7JSDUD511ZE39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.03%	0	 Child labour	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change				Manufacture of weapons and ammunition	0.00%	0.00%	0
 Risk to society and health				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

Over the reporting period (except for January 2023), the sub-fund did not comply with the requirement* put into effect as of January 1, 2023 in the pre-contractual documents.
*The portfolio aims for a lower exposure to ESG laggards compared to the benchmark. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-40%

+7%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPs) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

■ Portfolio ■ Benchmark

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.01%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.01%
Faurecia Societe europeenne	Manufacturing	26.09%	-	5.22%	-	0.00%
Ford Motor Company	Manufacturing	3.00%	-	3.00%	-	0.03%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.01%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.01%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.01%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Vision Responsible International

Legal entity identifier (LEI-Code):

549300CV4U6ZU8YGRP84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.31%	22	 Production of military hardware (>5% revenue)	0.00%	0.24%	16
Extraction of coal (>5% revenue)	0.00%	0.01%	2	 Manufacture of weapons and ammunition	0.00%	0.15%	7
 Climate change				Child labour	0.00%	0.13%	4
 Risk to society and health				Controversial weapons	0.00%	0.11%	3
				UN Global Compact violations	0.00%	0.04%	2
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-9%

+25%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	1.72%	23	 Production of military hardware (>5% revenue)	0.00%	1.22%	16
Extraction of coal (>5% revenue)	0.00%	0.04%	2	 Manufacture of weapons and ammunition	0.00%	0.80%	7
 Climate change				Child labour	0.00%	0.67%	4
 Risk to society and health				Controversial weapons	0.00%	0.57%	3
				UN Global Compact violations	0.00%	0.21%	2
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

Achievement of the 2-degree target **-72%** **+1%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

Indicator	ISS ESG Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Waste Connections, Inc.	Transporting and Storage	79.76%	-	76.43%	3.33%	0.40%

Waste Management, Inc.	Water Supply, Sewerage, Waste Management and Remediation Activities	91.30%	-	16.39%	-	0.39%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Global Convertible

Legal entity identifier (LEI-Code):

549300BEZ1CJCP4C0A88

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Production of military hardware (>5% revenue)	0.00%	1.37%	1
Extraction of coal (>5% revenue)	0.00%	0.00%	0	 UN Global Compact violations	0.00%	0.38%	0
 Climate change				Child labour	0.00%	0.00%	0
 Risk to society and health				Controversial weapons	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

Achievement of the 2-degree target **-1%** **+30%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	78.74%	-	43.11%	-	0.69%
Deutsche Post AG	Transporting and Storage	56.75%	-	11.35%	-	0.95%
Umicore	Water Supply, Sewerage, Waste Management and Remediation Activities	52.18%	-	10.44%	-	0.23%
Ford Motor Company	Manufacturing	3.00%	-	3.00%	-	1.85%
Enphase Energy, Inc.	Manufacturing	100.00%	-	-	100.00%	0.18%
SolarEdge Technologies, Inc.	Manufacturing	84.36%	-	-	84.36%	0.53%
Dropbox, Inc. Class A	Information and Communication	100.00%	-	-	20.00%	0.93%
ESR Group Limited	Real Estate Activities	51.26%	-	-	10.25%	0.26%
Middleby Corporation	Manufacturing	22.68%	-	-	4.54%	0.93%
Sika AG	Manufacturing	8.00%	-	-	1.60%	0.91%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

Swisscanto | Proxy Voting Dashboard (issgovernance.com)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Sustainable Global High Yield*

Legal entity identifier (LEI-Code):

549300QT8R0DJRSOJL97

* See note 16.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: <u>25%</u></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: <u>25%</u></p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of <u> </u>% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● How did the sustainability indicators perform?

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with an environmental ratio of 80% with this financial product by targeting the portfolio to reduce CO₂ emissions in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

Achievement of the 1.5-degree target

-39%

+47%

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Exclusion Criteria

Exposure to Controversies

Sustainable

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.48%	8	 Gambling (>5% revenue)	0.00%	2.50%	33
Non-sustainable forestry	0.00%	0.15%	7	Nuclear energy	0.00%	1.89%	16
Unsustainable fisheries and aquaculture	0.00%	0.01%	1	Production of military hardware	0.00%	0.93%	16
 Extraction of fossil fuels	0.00%	16.51%	82	Intensive livestock farming	0.00%	0.67%	10
Operation of fossil-fuel power stations	0.00%	5.06%	56	Production of pornography	0.00%	0.44%	3
Manufacture of automobiles and aircraft	0.00%	2.94%	11	Manufacture of tobacco and smokers' accessories	0.00%	0.41%	6
Coal reserves	0.00%	1.49%	23	UN Global Compact violations	0.00%	0.28%	4
Airlines	0.00%	1.35%	13	Manufacture of weapons and ammunition	0.00%	0.23%	5
Cruise ship operators	0.00%	1.02%	5	Child labour	0.00%	0.10%	1
Extraction of coal (>5% revenue)	0.00%	0.28%	9	Production of alcohol (>5% revenue)	0.00%	0.02%	1
 Decline in biodiversity				Controversial weapons	0.00%	0.00%	0
 Climate change				Genetic engineering: human medicine	0.00%	0.00%	0
 Risk to society and health							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

This fund was realigned as of June 1, 2022 in accordance with the exclusion criteria applicable to Swisscanto's Sustainable funds. The table shows all violations of the comprehensive Sustainable exclusion criteria since June 1, 2022.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

How did this financial product consider principal adverse impacts on sustainability factors?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.51%
TenneT Holding BV	Electricity, Gas, Steam and Air Conditioning Supply	100.00%	-	20.00%	-	0.40%
Covanta Holding Corporation	Other Service Activities	19.79%	-	12.70%	-	0.36%
Faurecia Societe europeenne	Manufacturing	26.09%	-	5.22%	-	0.38%
Ford Motor Company	Manufacturing	3.00%	-	3.00%	-	0.42%
National Express Group PLC	Transporting and Storage	100.00%	-	1.42%	18.58%	0.89%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	78.02%	-	-	43.24%	0.33%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.26%
TransAlta Corporation	Electricity, Gas, Steam and Air Conditioning Supply	31.92%	-	-	20.18%	0.06%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with an environmental ratio of 80% with this financial product by targeting the portfolio to reduce CO₂ emissions in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

What was the share of socially sustainable investments?

See charts above

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Child labour	0.00%	0.00%	0
 Extraction of coal (>5% revenue)	0.00%	0.00%	0	 Controversial weapons	0.00%	0.00%	0
 Climate change				 Manufacture of weapons and ammunition	0.00%	0.00%	0
 Risk to society and health				 Production of military hardware (>5% revenue)	0.00%	0.00%	0
				 Production of pornography	0.00%	0.00%	0
				 UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

Achievement of the 2-degree target

-14%

+2%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- The category #1 Aligned with E/S characteristics covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
 - The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Corporate Hybrid

Legal entity identifier (LEI-Code):

549300GAYISEMK2SEE06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	4.64%	2	 Child labour	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change				Manufacture of weapons and ammunition	0.00%	0.00%	0
 Risk to society and health				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

Achievement of the 2-degree target

-9%

+64%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Global Absolute Return

Legal entity identifier (LEI-Code):

5493000621Y00HOW1538

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible		Criteria	Portfolio weight	Criteria	Portfolio weight
		Coal reserves (ex. metal production)	0.00%		Child labour 0.00%
		Extraction of coal (>5% revenue)	0.00%		Controversial weapons 0.00%
		Climate change			Manufacture of weapons and ammunition 0.00%
		Risk to society and health			Production of military hardware (>5% revenue) 0.00%
					Production of pornography 0.00%
					UN Global Compact violations 0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / USD million in turnover
Scope 1 & 2

342 (2° Max)

70

-80%

CO₂e intensity

Sovereign
Tonnes of CO₂e / USD million in GDP

518 (2° Max)

254

-51%

Achievement of the 2-degree target

-69%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the investment universe, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio. CO₂e intensities below the 2° Max line indicate that the portfolio meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
VERBUND AG Class A	Electricity, Gas, Steam and Air Conditioning Supply	50.08%	-	49.03%	-	0.25%
Atos SE	Information and Communication	54.66%	-	10.93%	-	0.50%
Faurecia Societe europeenne	Manufacturing	26.09%	-	5.22%	-	0.09%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.45%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.79%
Alphabet Inc. Class A	Information and Communication	7.45%	-	-	1.49%	1.59%
Occidental Petroleum Corporation	Mining and Quarrying	26.87%	-	-	0.01%	0.80%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Secured High Yield

Legal entity identifier (LEI-Code):

549300OW4OTO4HNXLS12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.09%	1	 Production of pornography	0.00%	0.88%	1
 Extraction of coal (>5% revenue)	0.00%	0.04%	0	 Child labour	0.00%	0.00%	0
 Climate change				 Controversial weapons	0.00%	0.00%	0
 Risk to society and health				 Manufacture of weapons and ammunition	0.00%	0.00%	0
				 Production of military hardware (>5% revenue)	0.00%	0.00%	0
				 UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

Achievement of the 2-degree target

-4%

+56%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Getlink SE	Transporting and Storage	100.00%	-	20.00%	-	0.37%
Constellium SE Class A	Transporting and Storage	67.85%	-	13.57%	-	0.27%
Faurecia Societe europeenne	Manufacturing	26.09%	-	5.22%	-	0.08%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.28%
Adani Green Energy Limited	Electricity, Gas, Steam and Air Conditioning Supply	67.25%	-	57.64%	9.62%	0.65%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What was the share of socially sustainable investments?

See Charts above

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities

Legal entity identifier (LEI-Code):

222100LOO8ZT8UVERA95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

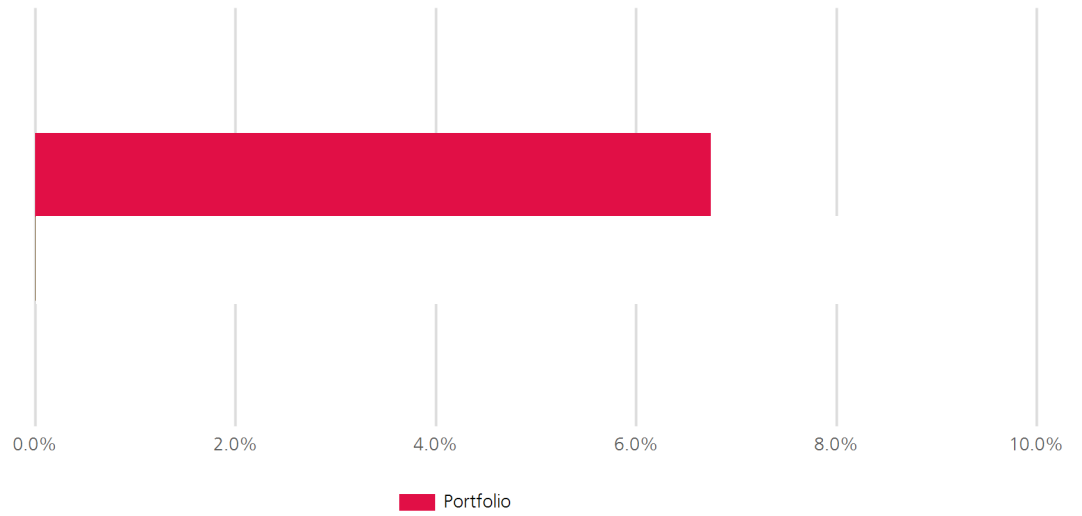

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.69%	18	 Production of pornography	0.00%	0.20%	3
 Extraction of coal (>5% revenue)	0.00%	0.15%	10	 UN Global Compact violations	0.00%	0.19%	5
 Climate change				 Manufacture of weapons and ammunition	0.00%	0.10%	5
 Risk to society and health				 Production of military hardware (>5% revenue)	0.00%	0.10%	2
				 Child labour	0.00%	0.04%	1
				 Controversial weapons	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-19%

+18%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGPR) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● How did the sustainability indicators perform?

Sustainable Investments

Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (1 7) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with an environmental ratio of 80% with this financial product by targeting the portfolio to reduce CO₂ emissions in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

Achievement of the 1.5-degree target

-71%

+13%

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Exclusion Criteria

Exposure to Controversies

Sustainable

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	1.15%	10	 Nuclear energy	0.00%	6.95%	62
Non-sustainable forestry	0.00%	0.21%	13	Production of military hardware	0.00%	2.26%	33

Extraction of coal (>5% revenue)	0.00%	0.04%	2	Gambling (>5% revenue)	0.00%	0.21%	6
Cruise ship operators	0.00%	0.00%	0	UN Global Compact violations	0.00%	0.21%	2
 Decline in biodiversity				Genetic engineering: human medicine	0.00%	0.00%	0
 Climate change				Production of pornography	0.00%	0.00%	0
 Risk to society and health							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

State Street Corp 3.031% 01-NOV-2034	Financial and Insurance Activities	0.75%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Vigie SA	Water Supply, Sewerage, Waste Management and Remediation Activities	82.47%	-	82.47%	-	0.12%
Waste Connections, Inc.	Transporting and Storage	79.76%	-	76.43%	3.33%	0.46%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	50.69%	-	42.48%	7.57%	0.74%
TenneT Holding BV	Electricity, Gas, Steam and Air Conditioning Supply	100.00%	-	20.00%	-	0.88%
Johnson Controls International plc	Manufacturing	89.74%	-	17.95%	-	0.34%
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.74%	-	17.55%	-	0.23%
Red Electrica Corp. SA	Construction	84.90%	-	16.98%	-	0.08%
Waste Management, Inc.	Water Supply, Sewerage, Waste Management and Remediation Activities	91.30%	-	16.39%	-	1.33%
Volvo Car AB Class B	Manufacturing	36.03%	-	7.00%	28.00%	0.53%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	78.02%	-	-	43.24%	0.27%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2_17 E") and social ("2_17 S") goals resulting from the SDGs as per Art. 2 (1 7) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with an environmental ratio of 80% with this financial product by targeting the portfolio to reduce CO₂ emissions in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

What was the share of socially sustainable investments?

See charts above

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

Periodic disclosure as at 31.01.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities

Legal entity identifier (LEI-Code):

549300J68T7Q0GVJ6Z95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

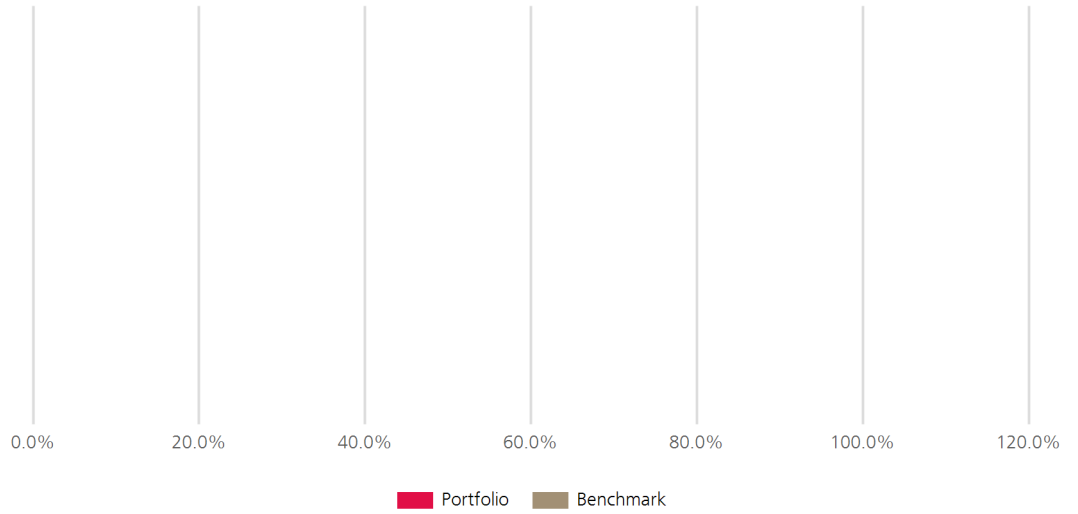

Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.19%	1	 UN Global Compact violations	0.00%	0.16%	1
Extraction of coal (>5% revenue)	0.00%	0.09%	1	Child labour	0.00%	0.03%	0
 Climate change				Controversial weapons	0.00%	0.00%	0
 Risk to society and health				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The portfolio did not contain any ESG laggards during the reporting period.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

The portfolio targets a lower CO₂e intensity than the benchmark.

Sustainable Investments

Exposure to Sustainable Investments

This fund did not pursue sustainable investments (minimum ratio: 0%)

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

No sustainable investments were made with this financial product in the reporting period.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

No sustainable investments were made with this financial product in the reporting period.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

No sustainable investments were made with this financial product in the reporting period.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

No sustainable investments were made with this financial product in the reporting period.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

16a	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law
16b	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.02.2022-31.01.2023

Largest investments	NACE Sector	% Assets	Country
Government of Mexico 7.75% 29-MAY-2031	Financial and Insurance Activities	3.77%	
Government of South Africa 8.25% 31-MAR-2032	Public Administration and Defence, Compulsory Social Security	3.63%	South Africa
Government of Mexico 8.5% 31-MAY-2029	Financial and Insurance Activities	3.22%	
Government of Indonesia 6.125% 15-MAY-2028	Financial and Insurance Activities	3.18%	
USD Cash		3.17%	
Government of Malaysia 2.632% 15-APR-2031	Public Administration and Defence, Compulsory Social Security	3.03%	Malaysia
Government of Brazil 10.0% 01-JAN-2029	Financial and Insurance Activities	3.03%	
Government of Oman 6.25% 25-JAN-2031 REGS	Financial and Insurance Activities	2.83%	
Government of Brazil 10.0% 01-JAN-2025	Financial and Insurance Activities	2.72%	
Government of Thailand 0.75% 17-JUN-2024	Public Administration and Defence, Compulsory Social Security	2.11%	

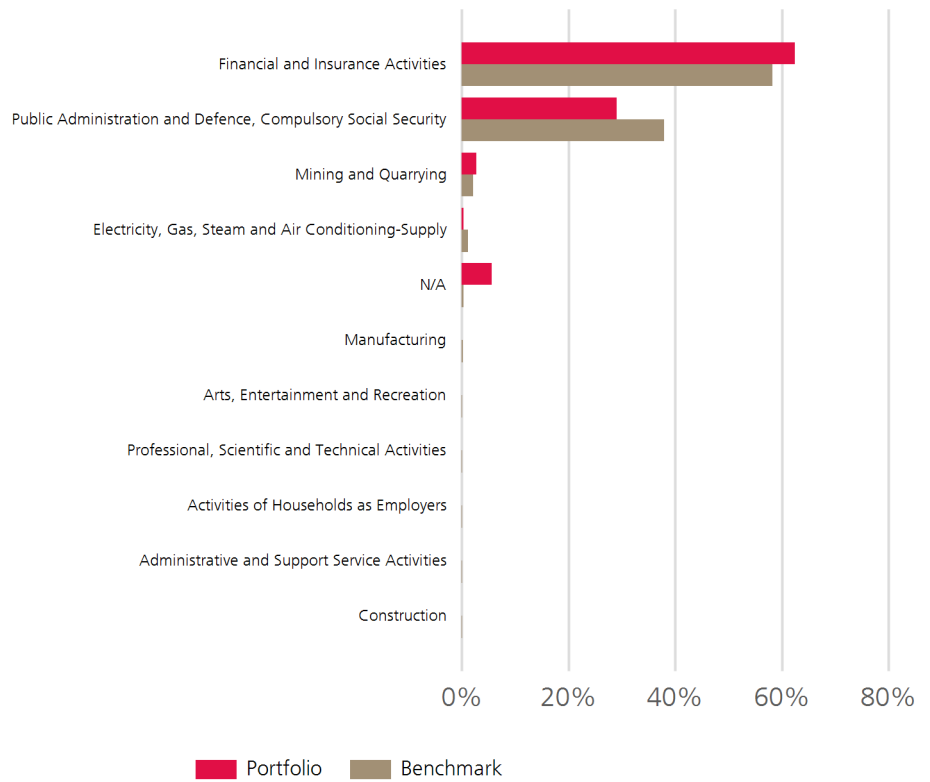

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

No sustainable investments were made with this financial product in the reporting period.

 **What was the share of socially sustainable investments?**

No sustainable investments were made with this financial product in the reporting period.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Swisscanto (LU) Bond Fund

Report by the Réviseur d'Entreprises agréé

To the shareholders of the
Swisscanto (LU) Bond Fund

Audit opinion

We have audited the financial statements of the Swisscanto (LU) Bond Fund (the "Fund") and for each of its respective sub-funds, which comprise the statement of net assets and the statement of investments as at 31 January 2023, the statement of operations and changes in net assets for the financial year that ended upon this date, and notes, including a summary of significant accounting policies.

In our opinion, the accompanying annual financial statements give a true and fair view of the assets and the financial position of the Fund and its sub-funds as at 31 January 2023, as well as its income and the development of its net assets for the financial year ending on this date, in compliance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements.

Basis for our audit opinion

We conducted our audit in accordance with the Law of 23 July 2016 governing the audit profession and according to the International Standards on Auditing (ISA) adopted by the Commission de Surveillance du Secteur Financier ("CSSF") for Luxembourg. Our responsibilities under the Law of 23 July 2016 and the ISA standards are described in more detail in the section "Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements." In addition, independent of the Company, we comply with the "International Code of Ethics for Professional Accountants, including International Independence Standards", issued by the "International Ethics Standards Board for Accountants" (IESBA Code) and adopted by the CSSF for Luxembourg together with the ethical requirements that are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other information

The Management Company's Board of Directors is responsible for the other information. Other information includes the information contained in the annual report, but does not include the financial statements or our Report by the Réviseur d'Entreprises agréé on these annual financial statements.

Our audit opinion on the annual financial statements does not cover other information and we do not give any kind of assurance concerning this information.

In connection with our audit of the annual financial statements, it is our responsibility to read the other information and thereby assess whether there is any material discrepancy between this information and the annual financial statements or with the findings of our audit, or whether the other information appears to contain material misstatements. If, on the basis of our work, we conclude that the other information contains material misstatements, we are obliged to report this. We have nothing to report in this respect.

Responsibility of the Board of Directors of the Management Company for the annual financial statements

The Management Company's Board of Directors is responsible for the preparation and fair presentation of the annual financial statements in accordance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements and in respect of internal controls which the Management Company's Board of Directors deems necessary to enable the preparation of annual financial statements which are free from material misstatements, whether due to fraud or error.

Swisscanto (LU) Bond Fund

Report by the Réviseur d'Entreprises agréé (continued)

In preparing the annual financial statements, the Management Company's Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters relating to the going concern principle and using the going concern basis of accounting unless the Management Company's Board of Directors either intends to liquidate the Fund or one of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements

The objectives of our audit are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatements, whether due to fraud or error, and to issue a Report by the Réviseur d'Entreprises agréé thereupon that contains our audit opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg will always detect a material misstatement when it exists. Misstatements can arise from inaccuracies or infringements and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg, we exercise professional judgement and maintain professional scepticism. In addition:

- We identify and assess the risks of material misstatements in the annual financial statements, whether due to inaccuracies or infringements, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement resulting from infringements is higher than for one resulting from inaccuracies, as infringements may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- We obtain an understanding of the internal control system relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control system.
- Evaluate the appropriateness of accounting policies used by the Management Company's Board of Directors, and the reasonableness of accounting estimates and related disclosures.
- We draw conclusions on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or any of its Sub-Funds to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the Report by the Réviseur d'Entreprises agréé to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the Report by the Réviseur d'Entreprises agréé. However, future events or circumstances may result in the Fund or one of its sub-funds being unable to continue as a going concern.

Swisscanto (LU) Bond Fund

Report by the Réviseur d'Entreprises agréé (continued)

- We evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether they constitute a fair presentation of the underlying transactions and events.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control system that we identify during our audit.
