Swisscanto (LU) Money Market Fund

General Information

Investment fund under Luxembourg “Umbrella Construction” Law

Swisscanto (LU) Money Market Fund is subject to the legal provisions set forth in the first part of the Luxembourg law regarding undertakings for collective investment of 17 December 2010.

The contractual conditions of the investment fund were established by the Management Company on 30 October 1991. Several amendments followed and, in accordance with the contractual conditions, were published in “Mémorial”.

The current versions of the Management Company’s articles of association and the contractual conditions have been deposited at the Register of Companies in Luxembourg.

The contractual conditions, the detailed sales prospectus, the key investor information documents, and the annual and semi-annual reports may be obtained directly and free of charge in printed form from Swisscanto Fondsleitung AG, the registered office of the Management Company, the Custodian Bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office. The information is also available on the Swisscanto website (www.swisscanto.com), where additional current information on the fund is available.

No fund unit subscriptions may be received based on the annual and semi-annual reports. Subscriptions shall only be made after consulting the current sales prospectus and the most recent annual report as well as, where available, any subsequent semi-annual report.

Sales restrictions

Units in Swisscanto (LU) Money Market Fund may not be offered, sold or delivered within the US or to persons considered US persons within the meaning of Regulation S of the US Securities Act of 1933 or in accordance with the US Commodity Exchange Act, as amended.

Guidelines of the Swiss Funds and Asset Management Association (SFAMA) on duties regarding the charging and use of fees and costs (22 May 2014)

Compensation for the marketing of the investment fund is paid out of the flat-rate administrative commission. Swisscanto Asset Management International S.A. also offers remuneration to institutional investors holding fund units for third parties from the fixed administrative commission.

Risk management process

The Management Company applies a risk management process to the fund and each subfund that complies with the Luxembourg law of 17 December 2010 and other applicable regulations, in particular CSSF Circular 11/512. As part of the risk management process the total risk of all the subfunds is measured and checked using the so-called commitment approach.

Swisscanto (LU) Money Market Fund

Activity Report

Swisscanto (LU) Money Market Fund Responsible AUD

Market overview

We have finally left 2022 behind us. The year was one of disastrous records. It was the worst year since the 2008 financial crisis for stock markets, whereas global bond markets experienced the worst year since records began. For the first time ever, both stock and bond markets sustained losses of more than 15% in the same year. Investors had to come to terms with the realisation that there is no longer a central bank put, or that its strike price is far lower than they had been used to in recent years. After much hesitation, central banks on either side of the Atlantic have cast aside the narrative of "temporary inflation" and launched the fastest rate hike cycle in history, regardless of collateral damage. However, it is only with reluctance that interest rate markets have taken part in central bank rate hikes. Interest rates remain well below central banks' target level (terminal rate). The inverted yield curve also indicates that there may be a trend reversal in the near future.

Even in the last quarter of 2022, the only constant was extremely high volatility. Given the mild weather, the feared energy crisis in Europe did not come about and the markets were not as affected by news of the Ukraine war than had previously been the case. The markets are driven mainly by published inflation data, which is continuing to rise. The rise in core inflation is particularly concerning, and triggered frantic ups and downs on the financial markets. In mid-October, UK politics were once again in the spotlight. Prime Minister Liz Truss' resignation after only 44 days in office followed by the complete fiscal reversal by her successor, Rishi Sunak, led to yields falling on British government bonds.

As inflation threatened to become more and more persistent, central banks continued to raise their key interest rates in unison. At the end of December, the Bank of Japan (BoJ) rounded off the year with a final bombshell. It was the last major bank to initiate the end of its expansionary monetary policy, raising the ceiling on 10-year government bond yields from 0.25% to 0.50%. The move set markets in turmoil, though the bank presented it as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. With Japan seeing its highest inflation rate since 1981, there are concerns that the BoJ could abandon its yield curve control policy altogether, and that the Japanese bond market, through repatriation of foreign investment, will continue to create turbulence in global markets in 2023.

In the first month of 2023, positive sentiment largely reigned, driven by good corporate results, economic data remaining robust and lower inflation figures. Positive sentiment boosted stock markets and led to a strong rally in Europe and the US. Interest rates fell and credit risk spreads on corporate bonds narrowed, helping bonds perform well. However, the cracks continued to emerge. Central banks' extreme rate hikes took their toll in March, with three US banks collapsing. The uncertainty spilled into Europe, which had a very negative impact on investments in bank stocks, culminating in the emergency takeover of Credit Suisse by UBS. Central banks are closely monitoring these developments and stress that rapidly deteriorating financing conditions will have a significant impact on their future interest rate decisions.

Review of categories relevant to the fund

The Reserve Bank of Australia began raising its interest rates in April 2022, and continued to do so throughout the period. Overall, interest rates have increased by 3.5%, which has had a very positive impact on the money market fund's yield.

Performance review

As money market funds quickly benefit from changes in interest rates, the yield improved by more than 2% compared to the previous year. During the period under review, the fund's absolute performance was 2.37%. Moreover, the encouraging relative performance of +24 basis points shows that the money market fund's dry spell should now be over.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

The information and figures contained in this report are based upon the past and provide no indication of future developments.

Market overview

We have finally left 2022 behind us. The year was one of disastrous records. It was the worst year since the 2008 financial crisis for stock markets, whereas global bond markets experienced the worst year since records began. For the first time ever, both stock and bond markets sustained losses of more than 15% in the same year. Investors had to come to terms with the realisation that there is no longer a central bank put, or that its strike price is far lower than they had been used to in recent years. After much hesitation, central banks on either side of the Atlantic have cast aside the narrative of "temporary inflation" and launched the fastest rate hike cycle in history, regardless of collateral damage. However, it is only with reluctance that interest rate markets have taken part in central bank rate hikes. Interest rates remain well below central banks' target level (terminal rate). The inverted yield curve also indicates that there may be a trend reversal in the near future.

Even in the fourth quarter, the only constant was extremely high volatility. Given the mild weather, the feared energy crisis in Europe did not come about and the markets were not as affected by news of the Ukraine war than had previously been the case. The markets are driven mainly by published inflation data, which is continuing to rise. The rise in core inflation to its highest level since 1982 is particularly concerning, and triggered frantic ups and downs on the financial markets.

As inflation threatened to become more and more persistent, central banks continued to raise their key interest rates in unison. At the end of December, the Bank of Japan (BoJ) rounded off the year with a final bombshell. It was the last major bank to initiate the end of its expansionary monetary policy, raising the ceiling on 10-year government bond yields from 0.25% to 0.50%. The move set markets in turmoil, though the bank presented it as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. With Japan seeing its highest inflation rate since 1981, there are concerns that the BoJ could abandon its yield curve control policy altogether, and that the Japanese bond market, through repatriation of foreign investment, will continue to create turbulence in global markets in 2023.

In the first month of 2023, positive sentiment largely reigned, driven by good corporate results, economic data remaining robust and lower inflation figures. Positive sentiment boosted stock markets and led to a strong rally in Europe and the US. Interest rates fell and credit risk spreads on corporate bonds narrowed, helping bonds perform well. However, the cracks continued to emerge. Central banks' extreme rate hikes took their toll in March, with three US banks collapsing. The uncertainty spilled into Europe, which had a very negative impact on investments in bank stocks, culminating in the emergency takeover of Credit Suisse by UBS. Central banks are closely monitoring these developments and stress that deteriorating financing conditions will affect their future interest rate decisions.

Review of categories relevant to the fund

To combat the rapid price increases, the Swiss National Bank (SNB) also began raising its interest rates in June 2022. Since then, interest rates have risen by at least 0.50% at each central bank meeting. Overall, its policy rate has been increased by 2.25% and currently stands at 1.50%, which has had a very positive impact on the money market fund's yield.

Performance review

During the period under review, the fund's absolute performance was -0.04%. Due to the sharp rise in interest rates, the relative performance was -0.02%.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

The information and figures contained in this report are based upon the past and provide no indication of future developments.

Investors had to come to terms with the realisation that there is no longer a central bank put, or that its strike price is far lower than they had been used to in recent years. After much hesitation, central banks on either side of the Atlantic have cast aside the narrative of "temporary inflation" and launched the fastest rate hike cycle in history, regardless of collateral damage. However, it is only with reluctance that interest rate markets have taken part in central bank rate hikes. Interest rates remain well below central banks' target level (terminal rate). The inverted yield curve also indicates that there may be a trend reversal in the near future.

Even in the last quarter of 2022, the only constant was extremely high volatility. Given the mild weather, the feared energy crisis in Europe did not come about and the markets were not as affected by news of the Ukraine war than had previously been the case. The markets are driven mainly by published inflation data, which is continuing to rise. The rise in core inflation is particularly concerning, and triggered frantic ups and downs on the financial markets. In mid-October, UK politics were once again in the spotlight. Prime Minister Liz Truss' resignation after only 44 days in office followed by the complete fiscal reversal by her successor, Rishi Sunak, led to yields falling on British government bonds.

As inflation threatened to become more and more persistent, central banks continued to raise their key interest rates in unison. At the end of December, the Bank of Japan (BoJ) rounded off the year with a final bombshell. It was the last major bank to initiate the end of its expansionary monetary policy, raising the ceiling on 10-year government bond yields from 0.25% to 0.50%. The move set markets in turmoil, though the bank presented it as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. With Japan seeing its highest inflation rate since 1981, there are concerns that the BoJ could abandon its yield curve control policy altogether, and that the Japanese bond market, through repatriation of foreign investment, will continue to create turbulence in global markets in 2023.

In the first month of 2023, positive sentiment largely reigned, driven by good corporate results, economic data remaining robust and lower inflation figures. Positive sentiment boosted stock markets and led to a strong rally in Europe and the US. Interest rates fell and credit risk spreads on corporate bonds narrowed, helping bonds perform well. However, the cracks continued to emerge. Central banks' extreme rate hikes took their toll in March, with three US banks collapsing. The uncertainty spilled into Europe, which had a very negative impact on investments in bank stocks, culminating in the emergency takeover of Credit Suisse by UBS. Central banks are closely monitoring these developments and stress that rapidly deteriorating financing conditions will have a significant impact on their future interest rate decisions.

Review of categories relevant to the fund

The European Central Bank (ECB) began raising its interest rates in July 2022, and continued to do so throughout the period. Overall, interest rates have increased by 3.5%, which has had a very positive impact on the money market fund's yield. Negative interest rates now seem to be a thing of the past.

Performance review

During the period under review, the fund's yield finally became positive again, reaching 0.43%. The extremely changeable interest rates resulted in a relative performance of -0.27%.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

Market overview

We have finally left 2022 behind us. The year was one of disastrous records. It was the worst year since the 2008 financial crisis for stock markets, whereas global bond markets experienced the worst year since records began. For the first time ever, both stock and bond markets sustained losses of more than 15% in the same year. Investors had to come to terms with the realisation that there is no longer a central bank put, or that its strike price is far lower than they had been used to in recent years. After much hesitation, central banks on either side of the Atlantic have cast aside the narrative of "temporary inflation" and launched the fastest rate hike cycle in history, regardless of collateral damage. However, it is only with reluctance that interest rate markets have taken part in central bank rate hikes. Interest rates remain well below central banks' target level (terminal rate). The inverted yield curve also indicates that there may be a trend reversal in the near future.

Even in the last quarter of 2022, the only constant was extremely high volatility. Given the mild weather, the feared energy crisis in Europe did not come about and the markets were not as affected by news of the Ukraine war than had previously been the case. The markets are driven mainly by published inflation data, which is continuing to rise. The rise in core inflation is particularly concerning, and triggered frantic ups and downs on the financial markets. In mid-October, UK politics were once again in the spotlight. Prime Minister Liz Truss' resignation after only 44 days in office followed by the complete fiscal reversal by her successor, Rishi Sunak, led to yields falling on British government bonds.

As inflation threatened to become more and more persistent, central banks continued to raise their key interest rates in unison. At the end of December, the Bank of Japan (BoJ) rounded off the year with a final bombshell. It was the last major bank to initiate the end of its expansionary monetary policy, raising the ceiling on 10-year government bond yields from 0.25% to 0.50%. The move set markets in turmoil, though the bank presented it as a technical adjustment rather than a rate hike. The BoJ had to buy large amounts of government bonds in December to keep yields below the new ceiling. With Japan seeing its highest inflation rate since 1981, there are concerns that the BoJ could abandon its yield curve control policy altogether, and that the Japanese bond market, through repatriation of foreign investment, will continue to create turbulence in global markets in 2023.

In the first month of 2023, positive sentiment largely reigned, driven by good corporate results, economic data remaining robust and lower inflation figures. Positive sentiment boosted stock markets and led to a strong rally in Europe and the US. Interest rates fell and credit risk spreads on corporate bonds narrowed, helping bonds perform well. However, the cracks continued to emerge. Central banks' extreme rate hikes took their toll in March, with three US banks collapsing. The uncertainty spilled into Europe, which had a very negative impact on investments in bank stocks, culminating in the emergency takeover of Credit Suisse by UBS. Central banks are closely monitoring these developments and stress that rapidly deteriorating financing conditions will have a significant impact on their future interest rate decisions.

Review of categories relevant to the fund

The US Federal Reserve began raising its interest rates in March 2022, and continued to do so throughout the period. Overall, interest rates have increased by 4.75%, which has had a very positive impact on the money market fund's yield.

Performance review

As money market funds quickly benefit from changes in interest rates, the yield improved by more than 2.5% compared to the previous year. During the period under review, the fund's absolute performance was 2.80%. The extremely changeable interest rates resulted in a relative performance of -0.16%.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

Swisscanto (LU) Money Market Fund

Notes on the annual report as at 31 March 2023

Note 1: Financial Reports

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

Note 2: Main Accounting Policies

The net assets of a subfund correspond to the difference between the assets of the subfund and the total liabilities of the subfund.

The total net assets are given in Swiss Francs (CHF). For the purpose of this calculation, the net assets of a subfund not denominated in CHF are converted to CHF, and this conversion was based on the following rates:

1 CHF	=	1.634387	AUD
		1.007530	EUR
		1.094631	USD

Valuation principles:

a) Securities, derivatives and other investments that are listed on a stock exchange are valued at the last known market prices. If these securities, derivatives and other investments are listed on several stock exchanges, the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments, for which trading on a stock exchange is minor and for which there is a second market between securities traders with price formation that complies with the market, the Management Company may undertake the valuation of these securities, derivatives and investments on the basis of these prices.

Securities, derivatives and other investments which are not listed on a stock exchange, but are traded on another regulated stock exchange which is recognised, open to the public and functions properly, are valued at the last known price on this market.

b) Securities and other investments that are not listed on a stock exchange or on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company as per the other criteria to be set by the board of directors and on the basis of the expected possible sale price, the value of which is to be invested with all due care and to the best of their knowledge.

c) Money market instruments which are not listed on a stock exchange, but are traded on another regulated stock exchange which is recognized, open to the public and functions properly, may be valued as follows: Starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping the investment yield constant. In the event of key changes to the market conditions, the valuation basis of the individual investments is adjusted in line with the new market yield. In Swisscanto (LU) Money Market Fund, commercial papers and certificates of deposit are linearised.

d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.

e) Units in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the Management Company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.

f) Derivatives that are not traded on a stock exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.

g) For each subfund, the assets that are denominated in a currency other than that of the subfund are converted into the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.

Swisscanto (LU) Money Market Fund

Notes on the annual report (cont.) as at 31 March 2023

Note 2: Main Accounting Policies (cont.)

h) Calculation of the net asset value

The net asset value of the units is calculated by the Management Company for each individual subfund as per the contractual conditions and item 3.1 in the sales prospectus on every banking business day in Luxembourg.

The Management Company is entitled to apply other generally accepted valuation principles deemed reliable by auditors for the total fund assets and the assets of a subfund at times, if the valuation criteria mentioned above seem impossible or inappropriate due to extraordinary events.

i) Capital gains or losses from security transactions

The realised gains or losses resulting from the sale of securities will be calculated on the basis of the average purchase price.

Note 3: Information on financial instruments

At year-end, the fund did not have any open futures or forward exchange contracts.

Note 4: Administrative commission

The fund will be invoiced a flat-rate administration commission for management and administration plus the distribution of units to be paid to the management company. This commission will be paid monthly, based on the average net fund volume of the respective subfund.

The fixed administrative commission comprises the two components of the fixed management fee (costs of asset management and sales) and the fixed administration fee (costs of management and administration).

As at 31 March 2023, the effective flat-rate administrative commission amounted to:

Subfund	Classes	FAC (p.a.)	FMF (p.a.)	FAF (p.a.)
Swisscanto (LU) Money Market Fund AUD	AT	0.60%	0.55%	0.05%

FAC: flat-rate administrative commission / FMF: flat-rate management fee / FAF: flat-rate administration fee

Swisscanto (LU) Money Market Fund

Notes on the annual report (cont.)
as at 31 March 2023

Note 4: Administrative commission (cont.)

In addition to the fixed administrative commission, the following are charged to the fund:

- the subscription tax ("taxe d'abonnement");
- the usual transaction costs associated with buying and selling;
- the costs for extraordinary measures in the interests of the unitholders.

Note 5: Tax information for investors in the Federal Republic of Germany (in accordance with Section 5 of the Investment Tax Act, para. 1, sentence 1, no. 1)

This information will be published in the Federal Gazette. It is also available on the Swisscanto website (www.swisscanto.com).

Investors should consult their own financial advisor for advice on any tax-based consequences that could result from the acquisition, possession, transfer or disposal of units in accordance with the laws of the country of which they are nationals or where they are domiciled or based.

Note 6: Subscription tax "Taxe d'abonnement"

In accordance with the provisions applicable in Luxembourg, the fund is subject to a subscription tax ("taxe d'abonnement") of 0.01% p.a., payable quarterly and calculated on the basis of the net assets of each subfund at the end of the quarter.

Note 7: Information on forward exchange contracts

The following forward exchange contracts were outstanding at the time of the report:

Swisscanto (LU) Money Market Fund Responsible AUD

Currency	Purchases	Currency	Sales	Maturity	Un-realised result (in AUD)
AUD	30	CHF	(18)	03/04/2023	0
AUD	33	EUR	(20)	03/04/2023	0

USD	284	EUR	(262)	03/04/2023	0
					0

The forward foreign exchange contracts were entered into with the following counterparty:

RBC Investor Services Bank S.A.

Swisscanto (LU) Money Market Fund

Notes on the annual report (cont.) as at 31 March 2023

Note 8: Total Expense Ratio (TER)

The TER that is reported under "STATISTICS" in this report was calculated in accordance with the "Guidelines on the Calculation and Disclosure of the TER" published by the Swiss Funds and Asset Management Association (SFAMA) on 16 May 2008. These Guidelines have been aligned with the revised Collective Investment Schemes Ordinance-FINMA. The amended TER Guidelines entered into force on 1 June 2015. It is no longer necessary to disclose the PTR in the annual report.

The TER has been calculated for the last 12 months prior to the date of this report.

Total Expense Ratio (TER) = (operating expenses / average net assets) x 100

The operating expenses include all of the fees and costs associated with the fund. The operating expenses do not include the ancillary costs that the fund incurred when buying and selling assets.

Note 9: Changes in the investment portfolio

Information on changes in the investment portfolio for the reporting period are available to all unitholders at the Swisscanto website (www.swisscanto.com) or can be obtained free of charge from Swisscanto Asset Management AG, the head office of the management company, the Custodian Bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office.

Note 10: Transaction costs

In the year under review, the fund incurred the following transaction costs from the sale and purchase of transferable securities and money market instruments:

Money Market Fund Responsible USD*	USD	0,000
Money Market Fund Responsible EUR*	EUR	0,000
Money Market Fund Responsible CHF*	CHF	0,000
Money Market Fund Responsible AUD*	AUD	0,000

The transaction costs listed in the "Income and expense statement" and primarily associated with sub-custodian bank charges and similar charges are therefore not included in the values stated above, but are likewise directly connected to the sale and purchase of securities. Due to technical accounting restrictions, the transaction costs reported under this item cannot be allocated to the acquisition costs of the various securities.

* Bonds and money market instruments are usually traded "net".

Note 11: Securities lending transactions

In order to ensure efficient asset management, a subfund may, in accordance with the requirements of the applicable provisions, use securities lending techniques and instruments in accordance with Article 51, para. 2 of the UCITS Directive and Article 11 of Directive 2007/16/EC of 19 March 2007 (Eligible Assets Directive) to generate additional income. In securities lending transactions, the subfund acts as lender and lends the borrower a security for use during a limited time; the subfund receives a fee for this. Zürcher Kantonalbank is the only direct borrower (principal) and the only direct counterparty of the securities lending transactions. As an independent, public-law institution of the canton of Zurich, the bank enjoys an unlimited state guarantee. It is therefore subject to regulatory supervision by the Swiss supervisory authority (Swiss Financial Market Supervisory Authority - FINMA), which is considered by the CSSF as equivalent to the rules laid down under European Union law.

As at 31 March 2023, there were no outstanding securities lending transactions.

Swisscanto (LU) Money Market Fund

Notes on the annual report (cont.) as at 31 March 2023

Note 12: Cross-subfund investments

The consolidated annual report was not adjusted for the following cross-subfund investment within Swisscanto (LU) Money Market Fund AUD:

Subfund	Currency	Fair value	% of net assets
Swisscanto (LU) Money Market Fund Responsible CHF GT	AUD	3,239,323	4.23
Swisscanto (LU) Money Market Fund Responsible USD NT	AUD	2,939,545	3.84

Note 13: Related parties

Zürcher Kantonalbank, as portfolio manager of the fund, is a related party. Swisscanto Asset Management International S.A., the fund's management company, is part of the Zürcher Kantonalbank group.

Note 14: Significant events

In February 2022, several countries (including the US, the UK and the EU) imposed sanctions on certain institutions and persons in Russia due to the official recognition by the Russian Federation of the People's Republics of Donetsk and Lugansk. Possible further sanctions were announced following the military operations against Ukraine launched by Russia on 24 February 2022.

Since February 2022, rising geopolitical tensions have led to a significant increase in volatility in the securities and foreign exchange markets, as well as a significant devaluation of the rouble against the US dollar and the euro. These events are expected to affect the activities of Russian companies in various sectors of the economy.

The company considers these events to be non-adjusting events after the reporting period. Although at the time of this report neither the performance of the company, the continuing operation of the company as a going concern, nor the business activities were affected by the events mentioned above, the Board of Directors continues to monitor the evolving situation and its effects on the financial position and results of the company.

Note 15: Subsequent events

The Management Company has decided to transfer the roles of fund accounting and NAV calculation for the Swisscanto (LU) Money Market Fund. The transfer will take place on 1 April 2023. Up until now, the tasks related to these roles were carried out by Swisscanto Fondsleitung AG as a service provider and were the responsibility of the Management Company. The transfer of the fund accounting and NAV calculation does not have any effect on the amount of the flat-rate administrative commission or any other fees imposed on unitholders. Fees remain the same for unitholders.

With effect from 5 June 2023, Swisscanto has moved from its old business address: 19, rue de Bitbourg, L-1273 Luxembourg to its new business address: 6B, route de Trèves, L-2633 Senningerberg, Luxembourg.

Note 16: Classification pursuant to the SFDR Regulation (EU 2019/2088) (unevaluated)

In accordance with Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), comprehensive information on the environmental and social characteristics of the investment fund can be found in the attached document.

Swisscanto (LU) Money Market Fund

Additional unaudited information

Information on remuneration policy

The following is a disclosure concerning the remuneration paid by the management company to its employees. This information applies both to the management company and the investment funds it manages, and relates to the entire workforce.

	Number of employees	CHF
Total remuneration Swisscanto Asset Management International S.A. (01.01.2022 – 31.12.2022)	12	2,208,690.90
of which is fixed		1,417,442.27
of which is variable*		791,248.63

* The basis of the variable remuneration paid out in March of each fiscal year relates to the previous year.

Due to the low number of employees and based on the principle of proportionality, no further breakdown of the remuneration of identified employees will be provided.

The calculation of the remuneration and other benefits is based on prevailing market norms and the individual performance of the employee. The fixed part of the remuneration relates to factors of long-term significance, such as sustainable profitability, robust risk and capital management, first-class customer service and teamwork. The same procedure applies for the variable part of the remuneration, which also encompasses factors such as the reward of success and achievement, and the continued adherence to corporate governance guidelines. Furthermore, variable remuneration depends to a significant extent on the income of the group as well as the management company and the funds it manages.

Further information on the remuneration policy can be found on the following website:

www.swisscanto.com/lu/de/gs/rechtliche-hinweise/verguetungspolitik.html

The Management Company:
SWISSCANTO ASSET MANAGEMENT INTERNATIONAL S.A., Luxembourg

Regulation on transparency of securities financing transactions (Regulation (EU) 2015/2365)

During the period to which this report relates, the company did not make use of any transactions subject to reporting obligations under Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse. Therefore no information is reported on global, concentration or transaction data, or on reuse or safekeeping of collateral.

Periodic disclosure as at 31.03.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Money Market Fund Responsible AUD

Legal entity identifier (LEI-Code):

54930001XQA7MBCRCC47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

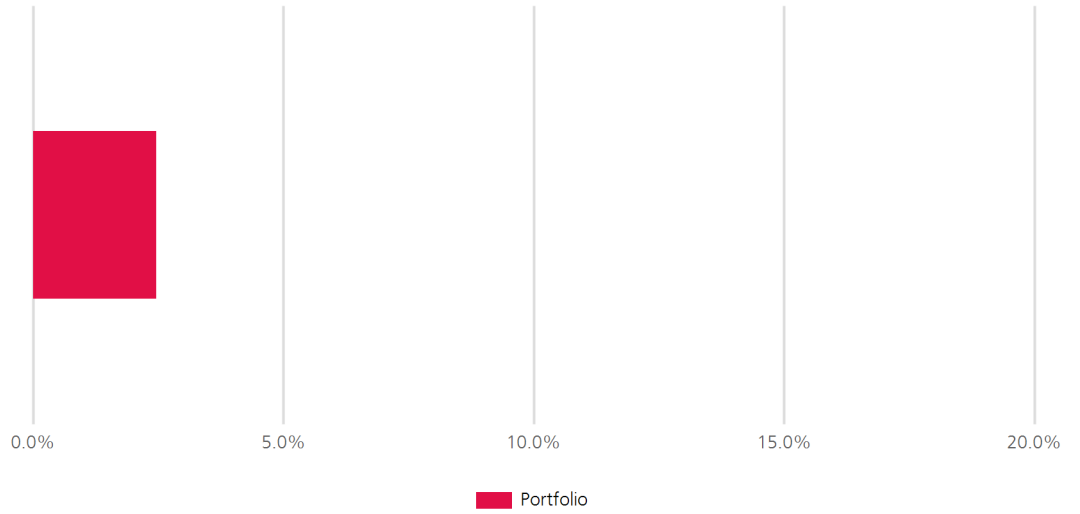

Exposure to Controversies

Responsible			
Criteria	Portfolio weight	Criteria	Portfolio weight
 Coal reserves (ex. metal production)	0.00%	 Child labour	0.00%
Extraction of coal (>5% revenue)	0.00%	Controversial weapons	0.00%
 Climate change		Manufacture of weapons and ammunition	0.00%
 Risk to society and health		Production of military hardware (>5% revenue)	0.00%
		Production of pornography	0.00%
		UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-66%

0%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the investment universe of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

No sustainable investments have been made with this financial product.

...and compared to previous periods?

The information was published for the first time in the reporting year.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

No sustainable investments have been made with this financial product.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

No sustainable investments have been made with this financial product.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

No sustainable investments have been made with this financial product.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

No sustainable investments have been made with this financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	1	36.79%		0

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

No sustainable investments have been made with this financial product.

What was the share of socially sustainable investments?

No sustainable investments have been made with this financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure as at 31.03.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Money Market Fund Responsible CHF

Legal entity identifier (LEI-Code):

549300RM31NUOY25RP72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible		Criteria	Portfolio weight	Criteria	Portfolio weight	
		Coal reserves (ex. metal production)	0.00%		Child labour	0.00%
		Extraction of coal (>5% revenue)	0.00%		Controversial weapons	0.00%
		Climate change			Risk to society and health	
					Manufacture of weapons and ammunition	0.00%
					Production of military hardware (>5% revenue)	0.00%
					Production of pornography	0.00%
					UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the respective portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-72%

-99%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the investment universe of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

No sustainable investments have been made with this financial product.

...and compared to previous periods?

The information was published for the first time in the reporting year.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

No sustainable investments have been made with this financial product.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

No sustainable investments have been made with this financial product.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

No sustainable investments have been made with this financial product.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

No sustainable investments have been made with this financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

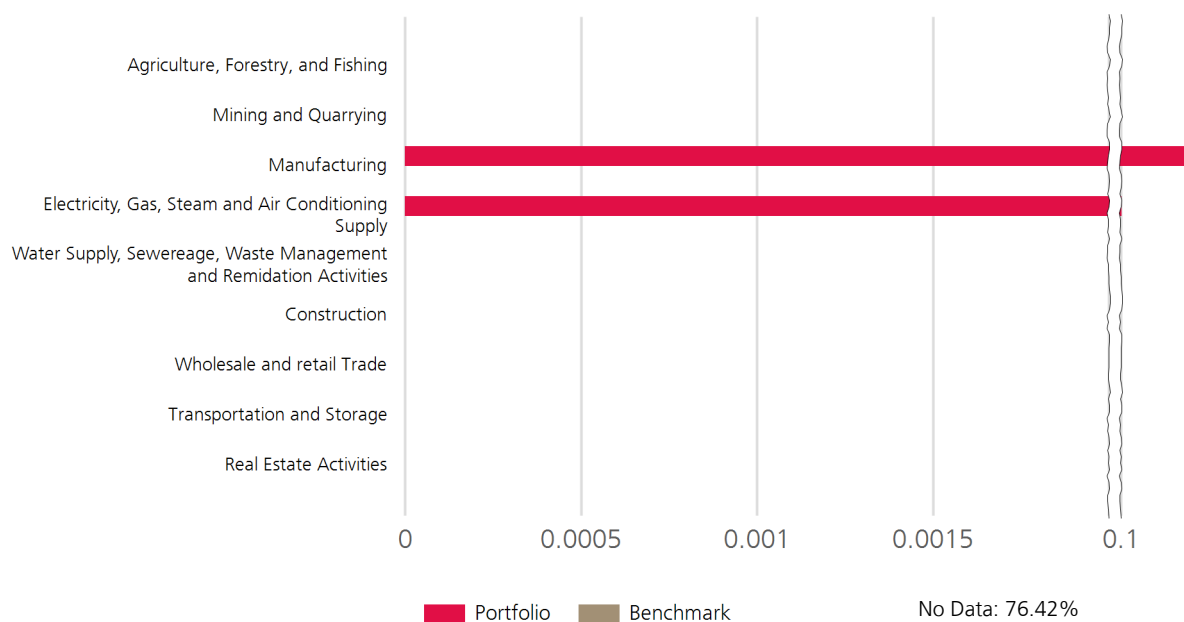

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

What was the proportion of sustainability-related investments?

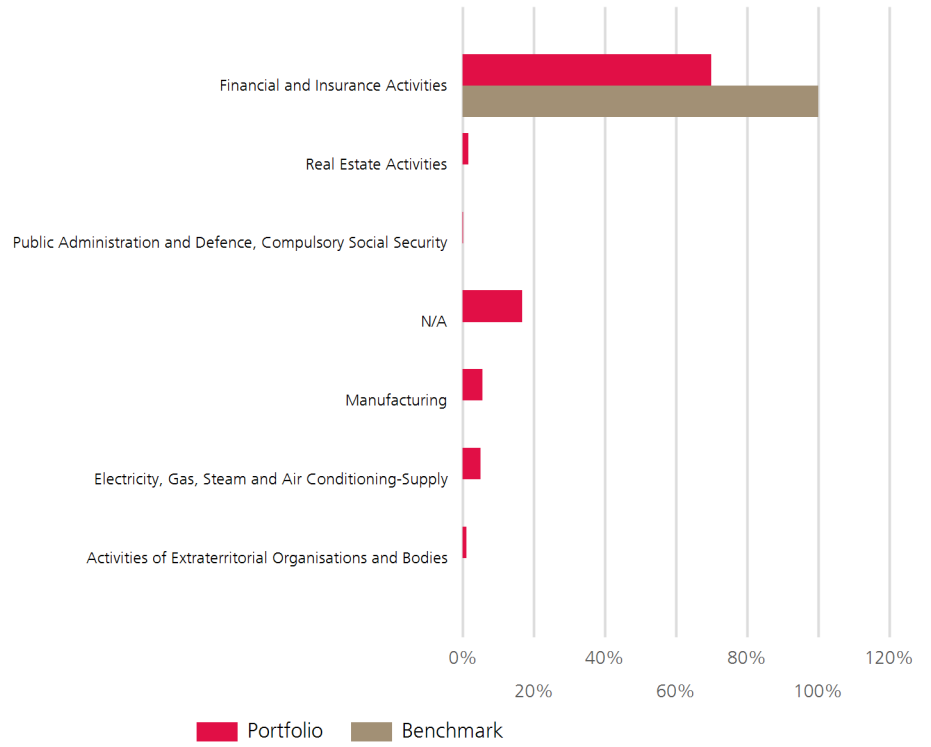

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

No sustainable investments have been made with this financial product.

What was the share of socially sustainable investments?

No sustainable investments have been made with this financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

<input type="checkbox"/> It made sustainable investments with an environmental objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

Exposure to Controversies

Responsible		Criteria	Portfolio weight	Criteria	Portfolio weight	
		Coal reserves (ex. metal production)	0.00%		Child labour	0.00%
		Extraction of coal (>5% revenue)	0.00%		Controversial weapons	0.00%
		Climate change			Risk to society and health	
					Manufacture of weapons and ammunition	0.00%
					Production of military hardware (>5% revenue)	0.00%
					Production of pornography	0.00%
					UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the respective portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

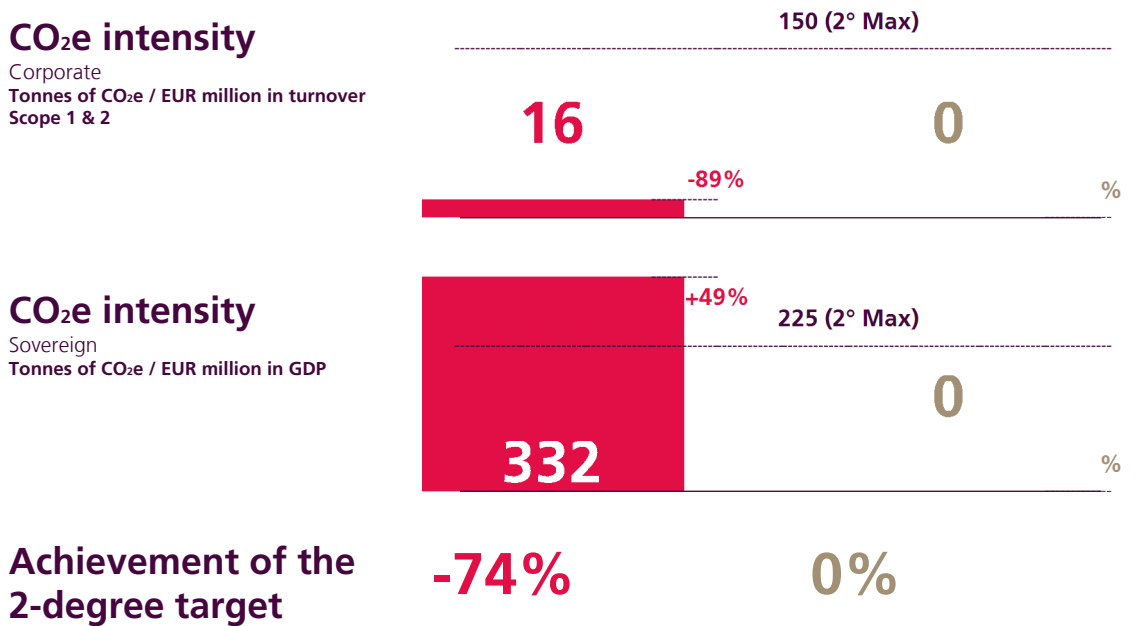

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the investment universe benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

No sustainable investments have been made with this financial product.

...and compared to previous periods?

The information was published for the first time in the reporting year.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

No sustainable investments have been made with this financial product.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

No sustainable investments have been made with this financial product.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

No sustainable investments have been made with this financial product.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

No sustainable investments have been made with this financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	5.16	32.11%		0

What was the proportion of sustainability-related investments?

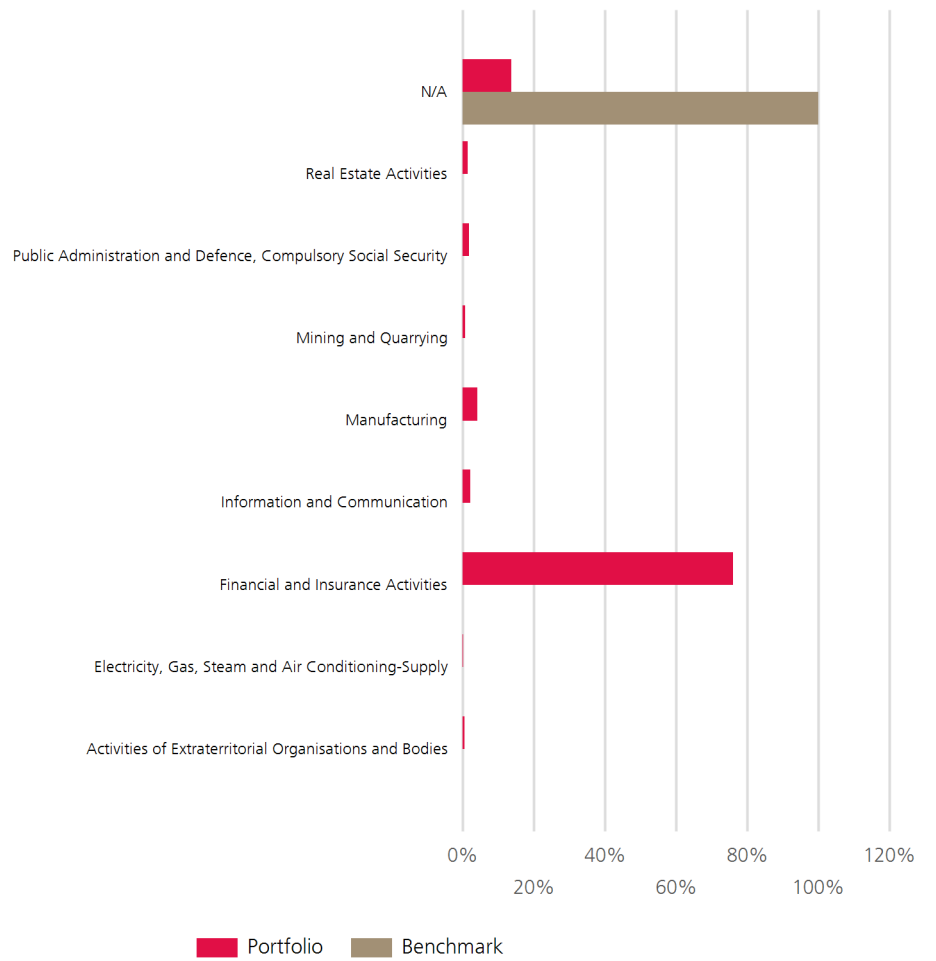

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year’s report onwards.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

No sustainable investments have been made with this financial product.

What was the share of socially sustainable investments?

No sustainable investments have been made with this financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Periodic disclosure as at 31.03.2023

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Money Market Fund Responsible USD

Legal entity identifier (LEI-Code):

5493004F95ISP2JTIM61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusion Criteria

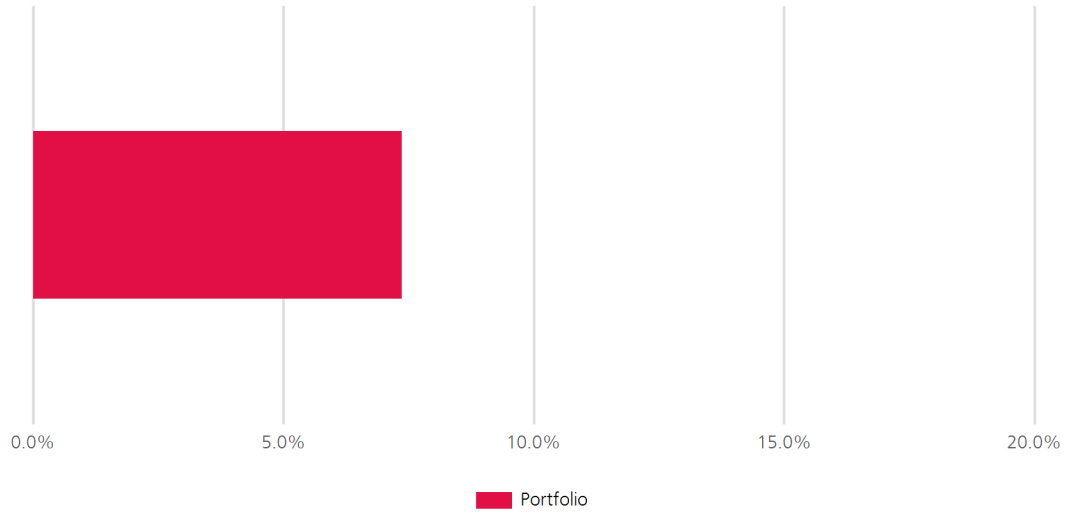

Exposure to Controversies

Responsible		Criteria	Portfolio weight	Criteria	Portfolio weight	
		Coal reserves (ex. metal production)	0.00%		Child labour	0.00%
		Extraction of coal (>5% revenue)	0.00%		Controversial weapons	0.00%
		Climate change			Risk to society and health	
					Manufacture of weapons and ammunition	0.00%
					Production of military hardware (>5% revenue)	0.00%
					Production of pornography	0.00%
					UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the respective portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

ESG Laggards

Exposure to ESG Laggards

The portfolio targeted an allocation to ESG Laggards $\leq 20\%$ during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

Reduction of CO₂e intensity

CO₂e intensity relative to Paris climate targets

CO₂e intensity

Corporate
Tonnes of CO₂e / EUR million in turnover
Scope 1 & 2

CO₂e intensity

Sovereign
Tonnes of CO₂e / EUR million in GDP

Achievement of the 2-degree target

-73%

0%

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the investment universe of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

Sustainable Investments

Exposure to Sustainable Investments

No sustainable investments have been made with this financial product.

...and compared to previous periods?

The information was published for the first time in the reporting year.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

No sustainable investments have been made with this financial product.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

No sustainable investments have been made with this financial product.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

No sustainable investments have been made with this financial product.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

No sustainable investments have been made with this financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

No sustainable investments have been made with this financial product.

What was the share of socially sustainable investments?

No sustainable investments have been made with this financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Swisscanto (LU) Money Market Fund

Report by the Réviseur d'Entreprises agréé

To shareholders of the Swisscanto (LU)
Money Market Fund

Audit opinion

We have audited the annual financial statements of Swisscanto (LU) Money Market Fund and its sub-funds (the "Fund"), comprising the statement of net investment portfolio as at 31 March 2023, the income and expense statement and other changes in net assets for the financial year ending on this date, as well as the notes with a summary of significant accounting policies.

In our opinion, the accompanying annual financial statements give a true and fair view of the assets and the financial position of the Fund and its sub-funds as at 31 March 2023, as well as its income and the development of its net assets for the financial year ending on this date, in compliance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements.

Basis for our audit opinion

We conducted our audit in accordance with the Law of 23 July 2016 governing the audit profession and according to the International Standards on Auditing (ISA) adopted by the Commission de Surveillance du Secteur Financier (CSSF) for Luxembourg. Our responsibilities under the Law of 23 July 2016 and the ISA standards are described in more detail in the section "Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements". We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) adopted by the CSSF for Luxembourg together with the ethical requirements that are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other information

The Management Company's Board of Directors is responsible for the other information. Other information includes the information contained in the annual report, but does not include the financial statements or our Report by the Réviseur d'Entreprises agréé on the annual financial statements. Our audit opinion on the annual financial statements does not cover other information and we do not give any kind of assurance concerning this information.

In connection with our audit of the annual financial statements, it is our responsibility to read the other information and thereby assess whether there is any material discrepancy between this information and the annual financial statements or with the findings of our audit, or whether the other information appears to contain material misstatements. If, on the basis of our work, we conclude that other information contains material misstatements, we are obliged to report this. We have nothing to report in this respect.

Swisscanto (LU) Money Market Fund

Report by the Réviseur d'Entreprises agréé (continued)

Responsibility of the Board of Directors of the Management Company for the financial statements

The Management Company's Board of Directors is responsible for the preparation and fair presentation of the annual financial statements in accordance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements and in respect of internal controls which the Management Company's Board of Directors deems necessary to enable the preparation of annual financial statements which are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the Management Company's Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Management Company's Board of Directors either intends to liquidate the Fund or one of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a Report by the Réviseur d'Entreprises agréé that contains our audit opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg, we exercise professional judgement and maintain professional scepticism. In addition:

- We identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- We evaluate the appropriateness of accounting policies used by the Management Company's Board of Directors, and the reasonableness of accounting estimates and related disclosures.

Swisscanto (LU) Money Market Fund

Report by the Réviseur d'Entreprises agréé (continued)

- We draw conclusions on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or any of its sub-funds to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the Report by the Réviseur d'Entreprises agréé to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the report by the Réviseur d'Entreprises agréé. However, future events or circumstances may result in the Fund or one of its sub-funds being unable to continue as a going concern.
- We evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether they constitute a fair presentation of the underlying transactions and events.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
