## Swisscanto (LU) Portfolio Fund

### General Information

#### **Investment fund under Luxembourg “Umbrella Construction” Law**

Swisscanto (LU) Portfolio Fund is subject to the legal provisions set forth in the first part of Luxembourg law regarding undertakings for collective investment of 17 December 2010.

The contractual conditions of the investment fund were established by the management company on 14 November 1994. Several amendments followed and, in accordance with the contractual conditions, were published in “Mémorial”.

The current versions of the management company’s articles of association and the contractual conditions and their amendments have been deposited at the Registry of the District Court of Luxembourg.

The contractual conditions, the detailed sales prospectus, the key investor information, and the annual and semiannual reports may be obtained directly and free of charge in printed form from Swisscanto Fondsleitung AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal Banks and any payment and sales office. The information is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)), where additional current information on the fund is available.

Subscriptions to fund units solely on the basis of the annual and semi-annual reports are not accepted. Subscriptions shall only be made after consulting the current sales prospectus and the most recent annual report, as well as, where available, any subsequent semi-annual report.

#### **Sales restrictions**

Units in Swisscanto (LU) Portfolio Fund may not be offered, sold or delivered within the US.

#### **Guidelines of the Swiss Funds and Asset Management Association (SFAMA) on duties regarding the charging and use of fees and costs (22 May 2014)**

Compensation for the marketing of the investment fund is paid out of the flat-rate administrative commission. Swisscanto Asset Management International S.A. also offers remuneration to institutional investors holding fund units for third parties from the fixed administrative commission.

#### **Risk management process**

The management company applies a risk management process to the fund and each subfund that complies with the Luxembourg law of 17 December 2010 and other applicable regulations, in particular CSSF Circular 11/512. As part of the risk management process the total risk of all the subfunds is measured and checked using the so-called commitment approach.

## Activity Report

### Swisscanto (LU) Portfolio Fund Sustainable Balance (CHF)

#### Market overview

The start of the new reporting period was marked by generally turbulent markets and, in some cases, major losses on the bond and stock markets. Increasing macroeconomic uncertainty combined with a sharp rise in central bank nervousness caused prices to fall on the stock exchanges. The fight against inflation was clearly defined as the primary objective, and corresponding comments indicated that a significant slowdown in growth or even a recession would be accepted in order to put a stop to the excessive price rises and to counteract a wage-price spiral. At the start of the second half of 2022, central banks were still the focus of attention. At its September meeting, the European Central Bank (ECB) raised the key interest rate by 75 basis points (bp) for the first time since its creation. President Lagarde had to admit that action had not been taken soon enough and there was now a need to chase the resulting inflation in the eurozone in order to avert the dreaded wage-price spiral. The US Federal Reserve also raised interest rates by a further 150 bp during the third quarter of 2022, and continued to apply the brakes in terms of monetary policy, as both headline and core inflation were too far from their target values. The fourth quarter brought some relief among market players for the first time, with global price developments in November that were surprisingly "tame" compared with expectations. This positive development led to a fall in annual inflation rates in many places, albeit starting from an exceptionally high level. However, scepticism returned in December when the central banks made it clear that combatting high inflation rates was the utmost priority and that a turnaround in monetary policy was not to be expected in the short term. Positive economic and inflation data (reopening of China, better economic data from the US and Europe, falling inflation) helped the financial markets to make a brilliant start to 2023. By February, that euphoria had already worn off somewhat with rising interest rate expectations, before turbulence in the banking sector dampened spirits again in mid-March.

#### Review of categories relevant to the Fund

The period under review was correspondingly difficult for the majority of financial markets. Interest rates continued to rise in all major currency areas. As at the end of March 2023, yields on ten-year government bonds amounted to 3.5% in USD (previous year: 2.3%) and 2.3% in EUR for Germany (previous year: 0.5%). In Switzerland, the yields of ten-year Swiss Confederation bonds also rose from around 0.6% to 1.1%. This, in turn, resulted in losses for the bond markets. Global stock markets, measured by MSCI World NR in USD, also depreciated in value by 7%. The Swiss stock market (SPI) also reported losses of 6.4%. The emerging markets grew much more positively with growth of 8.1% (MSCI Emerging Markets NR in USD).

#### Performance review

Against this backdrop, the funds generated negative absolute returns across the board, with the profiles having a higher strategic bond ratio holding up better. Before costs, all profiles developed within the respective reference indices over the reporting period.

#### **Swisscanto (LU) Portfolio Fund Sustainable Balanced (EUR)**

##### **Market overview**

The start of the new reporting period was marked by generally turbulent markets and, in some cases, major losses on the bond and stock markets. Increasing macroeconomic uncertainty combined with a sharp rise in central bank nervousness caused prices to fall on the stock exchanges. The fight against inflation was clearly defined as the primary objective, and corresponding comments indicated that a significant slowdown in growth or even a recession would be accepted in order to put a stop to the excessive price rises and to counteract a wage-price spiral. At the start of the second half of 2022, central banks were still the focus of attention. At its September meeting, the European Central Bank (ECB) raised the key interest rate by 75 basis points (bp) for the first time since its creation. President Lagarde had to admit that action had not been taken soon enough and there was now a need to chase the resulting inflation in the eurozone in order to avert the dreaded wage-price spiral. The US Federal Reserve also raised interest rates by a further 150 bp during the third quarter of 2022, and continued to apply the brakes in terms of monetary policy, as both headline and core inflation were too far from their target values. The fourth quarter brought some relief among market players for the first time, with global price developments in November that were surprisingly "tame" compared with expectations. This positive development led to a fall in annual inflation rates in many places, albeit starting from an exceptionally high level. However, scepticism returned in December when the central banks made it clear that combatting high inflation rates was the utmost priority and that a turnaround in monetary policy was not to be expected in the short term. Positive economic and inflation data (reopening of China, better economic data from the US and Europe, falling inflation) helped the financial markets to make a brilliant start to 2023. By February, that euphoria had already worn off somewhat with rising interest rate expectations, before turbulence in the banking sector dampened spirits again in mid-March.

##### **Review of categories relevant to the Fund**

The period under review was correspondingly difficult for the majority of financial markets. Interest rates continued to rise in all major currency areas. As at the end of March 2023, yields on ten-year government bonds amounted to 3.5% in USD (previous year: 2.3%) and 2.3% in EUR for Germany (previous year: 0.5%). This, in turn, resulted in losses for the bond markets. Global stock markets, measured by MSCI World NR in USD, also depreciated in value by 7%. The emerging markets grew much more positively with growth of 8.1% (MSCI Emerging Markets NR in USD), with the Eurozone stock markets also experiencing the same level of growth (8.1%) (measured by MSCI EMU NR in EUR).

##### **Performance review**

Over the last 12 months, the fund had a negative performance in absolute terms and lost 6.3% before costs. It thus performed slightly worse than its reference index.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

The information and figures contained in this report are based upon the past and provide no indication of future developments.

As at the end of March 2023, yields on ten-year government bonds amounted to 3.5% in USD (previous year: 2.3%) and 2.3% in EUR for Germany (previous year: 0.5%). This, in turn, resulted in losses for the bond markets. Global stock markets, measured by MSCI World NR in USD, also depreciated in value by 7%. The emerging markets grew much more positively with growth of 8.1% (MSCI Emerging Markets NR in USD), with the Eurozone stock markets also experiencing the same level of growth (8.1%) (measured by MSCI EMU NR in EUR).

##### **Performance review**

Against this backdrop, the funds generated mainly negative absolute returns, with the profiles having a higher strategic equity ratio holding up better. Before costs, all profiles developed within the respective reference indices over the reporting period.

### Activity Report (cont.)

#### **Swisscanto (LU) Portfolio Fund Sustainable Select (CHF)**

##### **Market overview**

The start of the new reporting period was marked by generally turbulent markets and, in some cases, major losses on the bond and stock markets. Increasing macroeconomic uncertainty combined with a sharp rise in central bank nervousness caused prices to fall on the stock exchanges. The fight against inflation was clearly defined as the primary objective, and corresponding comments indicated that a significant slowdown in growth or even a recession would be accepted in order to put a stop to the excessive price rises and to counteract a wage-price spiral. At the start of the second half of 2022, central banks were still the focus of attention. At its September meeting, the European Central Bank (ECB) raised the key interest rate by 75 basis points (bp) for the first time since its creation. President Lagarde had to admit that action had not been taken soon enough and there was now a need to chase the resulting inflation in the eurozone in order to avert the dreaded wage-price spiral. The US Federal Reserve also raised interest rates by a further 150 bp during the third quarter of 2022, and continued to apply the brakes in terms of monetary policy, as both headline and core inflation were too far from their target values. The fourth quarter brought some relief among market players for the first time, with global price developments in November that were surprisingly "tame" compared with expectations. This positive development led to a fall in annual inflation rates in many places, albeit starting from an exceptionally high level. However, scepticism returned in December when the central banks made it clear that combatting high inflation rates was the utmost priority and that a turnaround in monetary policy was not to be expected in the short term. Positive economic and inflation data (reopening of China, better economic data from the US and Europe, falling inflation) helped the financial markets to make a brilliant start to 2023. By February, that euphoria had already worn off somewhat with rising interest rate expectations, before turbulence in the banking sector dampened spirits again in mid-March.

##### **Review of categories relevant to the Fund**

The period under review was correspondingly difficult for the majority of financial markets. Interest rates continued to rise in all major currency areas. As at the end of March 2023, yields on ten-year government bonds amounted to 3.5% in USD (previous year: 2.3%) and 2.3% in EUR for Germany (previous year: 0.5%). In Switzerland, the yields of ten-year Swiss Confederation bonds also rose from around 0.6% to 1.1%. This, in turn, resulted in losses for the bond markets. Global stock markets, measured by MSCI World NR in USD, also depreciated in value by 7%. The Swiss stock market (SPI) also reported losses of 6.4%. The emerging markets grew much more positively with growth of 8.1% (MSCI Emerging Markets NR in USD).

##### **Performance review**

Against this backdrop, the funds generated negative absolute returns across the board, with the profiles having a higher strategic bond ratio holding up better. Before costs, all profiles developed within the respective reference indices over the reporting period.

	Class BT:	-8.73%
	Class DT*:	-8.54%
	Class NT*:	-7.78%

\* The performance of the institutional unit classes is calculated using the net asset value assessment (unswung net asset value). By contrast, the remaining classes are calculated using the modified net asset value (swung net asset value).

\*\* Percentage figures including dividends impact.

The historic performance is not an indicator of the current or future performance. Performance details do not take into account the costs and commissions charged for the issue and redemption of units.

The information and figures contained in this report are based upon the past and provide no indication of future developments.

## Swisscanto (LU) Portfolio Fund

### Notes on the annual report as at 31 March 2023

#### **Note 1: Financial Reports**

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

#### **Note 2: Main Accounting Policies**

The net assets of each subfund or each unit class correspond to the difference between the total assets of the subfund or unit class and the total liabilities of the subfund or unit class concerned.

The total net assets are given in Swiss Francs (CHF). For this purpose the net assets of any subfunds that are not denominated in CHF are converted at the last known middle rate of exchange at the closing date. This conversion was based on the following rates:

1 CHF	=	1.634387 AUD
		5.550051 BRL
		1.481419 CAD
		7.517141 CNH
		7.522151 CNY
		23.653889 CZK
		7.505389 DKK
		1.007530 EUR
		0.885301 GBP
		8.592822 HKD
		383.213779 HUF
		3.941378 ILS
		145.684489 JPY
		11.464145 NOK
		1.749590 NZD
		11.350854 SEK
		1.455367 SGD
		1.094631 USD
		19.421436 ZAR

Subscriptions, redemptions and conversions are made based on an unknown net asset value.

Valuation principles:

a) Securities, derivatives and other investments that are listed on a stock market are valued at the last-known market prices. If these securities, derivatives and other investments are listed on several stock exchanges, the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments for which trading on an exchange is minor and for which there is a second market between securities traders with market-based price formation, the management company may undertake the valuation of these securities, derivatives and other investments on the basis of these prices. Securities, derivatives and other investments which are not listed on an exchange, but are traded on another regulated market which is recognized, open to the public and functions in an orderly manner, are valued at the last known price on this market.

b) Securities and other investments that are not listed on an exchange or traded on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company as per the other criteria to be set by the board of directors and on the basis of the expected possible sale price, the value of which is to be invested with all due care and to the best of their knowledge.

c) Money market instruments which are not listed on an exchange, but are traded on another regulated market which is recognized, open to the public and functions in an orderly manner, may be valued as follows: Starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping

## Swisscanto (LU) Portfolio Fund

### Notes on the annual report (cont.) as at 31 March 2023

#### **Note 2: Main Accounting Policies (cont.)**

the investment yield constant. In the event of key changes to the market conditions, the valuation basis of the individual assessments is modified to the new market yield.

d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.

e) Shares in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.

f) Derivatives that are not traded on an exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.

g) For each subfund the assets that are denominated in a currency other than that of the subfund are converted to the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.

h) Dividends are posted on the "ex-dividend" date and interest is accrued daily.

i) Calculation of the net asset value

The net asset value of the shares will be calculated by the management company for each individual sub-fund or for each class of shares in accordance with the terms of the contract and in accordance with Section 3.1 of the Sales Prospectus on each banking business day in Luxembourg. For each sub-fund, the values denominated in a currency other than that of the sub-fund will be converted into the sub-fund's currency at the respective exchange rate. In order to hedge the currency risk, concluded futures contracts are taken into account in the conversion.

j) Valuation of forward foreign exchange contracts

Any unrealised gains or losses resulting from the valuation of open forward exchange contracts at the reporting date are included in the statement of net assets and the income and expense statement.

k) Capital gains or losses from securities transactions

The realised gains or losses resulting from the sale of securities will be calculated on the basis of the average purchase price.

l) Partial Swinging Single Prices (PSSP)

The PSSP method is used for all subfunds. With the PSSP method, the ancillary costs created by subscriptions and redemptions for the purchase and sale of investments (price spreads, brokerage in line with market conditions, commission, fiscal charges etc.) are taken into account in the calculation of the NAV. If, on a banking day, the total subscriptions and redemptions of all unit classes of a subfund result in a net inflow or outflow that exceeds a specific threshold (given as a percentage of the net asset value), the net asset value of the relevant subfund is increased or reduced. This amount is known as the "modified net asset value". The adjustment results in an increase in the net asset value if the net movements lead to a rise in the number of units in the relevant subfund. It results in a decrease in the net asset value if the net movements cause a fall in the number of units.

The transaction costs incurred by subscriptions and redemptions on the trading day are paid by the investors who commission these transactions.

The surcharge on, or deduction from, the transaction costs incurred by subscriptions or redemptions is effected at a flat rate and is based on an average value from a previous period of a maximum of one year. The maximum adjustment is 2% of the net asset value of the subfund in question.

## Swisscanto (LU) Portfolio Fund

Notes on the annual report (cont.)  
as at 31 March 2023**Note 2: Main Accounting Policies (cont.)**

If the fund has been on the market for less than one year, depending on the fund's special features this factor will be determined so that a representative figure results.

As at 31 March 2023, Partial Swinging Single Price values were recorded in the following subfunds:

Swisscanto (LU) Portfolio Fund Sustainable Select (CHF)	in bank interest and other liabilities
Swisscanto (LU) Portfolio Fund Responsible Ambition (CHF)	in bank interest and other liabilities
Swisscanto (LU) Portfolio Fund Sustainable Ambition (CHF)	in other assets

The amounts are reversed on the following day after the capital has been definitively booked.

**Note 3: Tax information for investors in the Federal Republic of Germany (in accordance with Section 5 of the Investment Tax Act, para. 1, sentence 1, no. 1)**

This information will be published in the Federal Gazette. It is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)).

Investors should consult their own financial advisor for advice on any tax-based consequences that could result from the acquisition, possession, transfer or disposal of units in accordance with the laws of the country of which they are nationals or where they are domiciled or based.

**Note 4: Information on futures contracts**

The following futures contracts were outstanding at the time of the report:

## Swisscanto (LU) Portfolio Fund

### Notes on the annual report (cont.) as at 31 March 2023

#### Note 7: Subscription tax "Taxe d'abonnement"

In accordance with the rules applicable in Luxembourg, the fund is subject to a quarterly subscription tax ("taxe d'abonnement") of 0.05% p.a. in the case of units of unit classes A, B, and C, and of 0.01% p.a. for units of unit classes D and N, based on the net assets of the given subfund at the end of the respective quarter.

Pursuant to Article 175a of the amended Law of 17 December 2010, the portion of net assets invested in UCITS that are already subject to capital tax is exempt from this tax.

#### Note 8: Administrative commission

The fund is invoiced a flat-rate administrative commission for management and administration plus the distribution of units to be paid to the management company. This commission will be paid monthly, based upon the average net fund volume of the respective subfund.

The flat-rate administrative commission comprises the two components of the flat-rate management fee (costs of asset management and sales) and the flat-rate administration fee (costs of management and administration).

As at 31 March 2023, the effective flat-rate administrative commission amounted to:

Swisscanto (LU) Portfolio Fund Responsible Focus (CHF)	NT	0.00%	0.00%	0.00%

FAC = Fixed Administrative Commission FMF = Fixed Management Fee FAF = Fixed Administration Fee

In addition to the fixed administrative commission, the following are charged to the fund:

- the subscription tax ("taxe d'abonnement");
- the usual transaction costs associated with buying and selling;
- the costs for extraordinary measures in the interests of the unitholders.

If the fund invests in units of other UCITS and/or other UCIs managed directly or by delegation by the same Management Company or by another company with which the Management Company is associated through common management or control or through a significant direct or indirect stake (of more than 10% of the capital or its votes), this Management Company or the other company may not charge subscription, redemption or management fees for the investments of the fund in the units of the other UCITS and/or UCIs. There was no duplication of management, subscription or redemption fees in the fund.

**Note 9: Total Expense Ratio (TER)**

The TER that is reported under "Statistics" in this report was calculated in accordance with the "Guidelines on the Calculation and Disclosure of the TER" published by the Swiss Funds and Asset Management Association (SFAMA) on 16 May 2008. The synthetic TER is also calculated in accordance with these same SFAMA Guidelines. These Guidelines have been aligned with the revised Collective Investment Schemes Ordinance-FINMA. The amended TER Guidelines entered into force on 1 June 2015. It is no longer necessary to disclose the PTR in the annual report.

The TER has been calculated for the last 12 months prior to the date of this report.

**Total Expense Ratio (TER)** = (operating expenses / average net assets) x 100

The operating expenses include all of the fees and costs associated with the fund. The operating expenses do not include the ancillary costs that the fund incurred when buying and selling assets.

If a fund invests at least 10% of its net assets in other funds which publish a TER as defined in the Guidelines issued by the Swiss Funds and Asset Management Association SFAMA on 16 May 2008, a combined (synthetic) TER for the umbrella fund is calculated as at the reporting date of the annual or semi-annual report. This corresponds to the sum of the pro rata TER of the individual target funds, weighted according to their share in the net assets of the fund as at the reporting date, the effectively paid issue and redemption commissions of the target funds and the TER of the umbrella fund minus the reimbursements of target funds received in the reporting period. The synthetic TER is calculated using the information available at the time this document is prepared.

### Note 10: Changes in the investment portfolio

Information on changes in the investment portfolio for the reporting period is available to all unitholders at the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)) or can be requested free of charge from Swisscanto Fondsleitung AG, the

## Swisscanto (LU) Portfolio Fund

### Notes on the annual report (cont.) as at 31 March 2023

#### Note 10: Changes in the investment portfolio (cont.)

head office of the management company, the Custodian Bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office.

#### Note 11: Transaction costs

In the year under review, the fund incurred the following transaction costs from the sale and purchase of transferable securities and money market instruments:

Swisscanto (LU) Portfolio Fund Sustainable Balance (CHF)*	CHF	51,651
Swisscanto (LU) Portfolio Fund Sustainable Balanced (EUR)*	EUR	225,508
Swisscanto (LU) Portfolio Fund Responsible Relax (CHF)*	CHF	308
Swisscanto (LU) Portfolio Fund Responsible Relax (EUR)*	EUR	532
Swisscanto (LU) Portfolio Fund Responsible Select (CHF)*	CHF	65,470
Swisscanto (LU) Portfolio Fund Responsible Select (EUR)*	EUR	89,376
Swisscanto (LU) Portfolio Fund Sustainable Select (CHF)*	CHF	15,386
Swisscanto (LU) Portfolio Fund Responsible Balance (CHF)*	CHF	148,799
Swisscanto (LU) Portfolio Fund Responsible Balance (EUR)*	EUR	108,421
Swisscanto (LU) Portfolio Fund Responsible Ambition (CHF)*	CHF	54,237
Swisscanto (LU) Portfolio Fund Responsible Ambition (EUR)*	EUR	36,975
Swisscanto (LU) Portfolio Fund Sustainable Ambition (CHF)*	CHF	5,103
Swisscanto (LU) Portfolio Fund Responsible Focus (CHF)*	CHF	71,071

The transaction costs listed in the "Income and expense statement" and primarily associated with sub-custodian bank charges and similar charges are therefore not included in the values stated above, but are likewise directly connected to the sale and purchase of securities. Due to technical accounting restrictions, the transaction costs reported under this item cannot be allocated to the acquisition costs of the various securities.

#### Note 12: Securities lending transactions

In order to ensure efficient asset management, a subfund may, in accordance with the requirements of the applicable provisions, use securities lending techniques and instruments in accordance with Article 51, para. 2 of the UCITS Directive and Article 11 of Directive 2007/16/EC of 19 March 2007 (Eligible Assets Directive) to generate additional income. In securities lending transactions, the subfund acts as lender and lends the borrower a security for use during a limited time; the subfund receives a fee for this. Zürcher Kantonalbank is the only direct borrower (principal) and the only direct counterparty of the securities lending transactions. As an independent, public-law institution of the canton of Zurich, the bank enjoys an unlimited state guarantee. It is therefore subject to regulatory supervision by the Swiss supervisory authority (Swiss Financial Market Supervisory Authority - FINMA), which is considered by the CSSF as equivalent to the rules laid down under European Union law.

As at 31 March 2023, securities lending transactions existed in the following amount:

Subfund	Currency	Fair value	Guarantee
Swisscanto (LU) Portfolio Fund Responsible Select (CHF)	CHF	28,975,751	33,453,387
Swisscanto (LU) Portfolio Fund Responsible Select (EUR)	EUR	6,323,367	7,300,554
Swisscanto (LU) Portfolio Fund Responsible Balance (CHF)	CHF	24,382,904	28,150,813
Swisscanto (LU) Portfolio Fund Responsible Balance (EUR)	EUR	3,346,764	3,863,971

\* Bonds and money market instruments are usually traded "net".

The following share classes were issued during the fiscal year:

Swisscanto (LU) Portfolio Fund Sustainable Balance (CHF) CT: 20 July 2022

Swisscanto (LU) Portfolio Fund Responsible Balance (CHF) NT: 01 July 2022

**Note 14: Related parties**

Zürcher Kantonalbank, as portfolio manager of the fund, is a related party. Swisscanto Asset Management International S.A., the fund's management company, is part of the Zürcher Kantonalbank group.

**Note 15: Fees for subscription and redemption of target funds**

In accordance with the amended law of 2010, no fees are payable for the subscription or redemption of units in target funds managed by the same management company or by a company affiliated with the management company.

Some subfunds of the Swisscanto (LU) Portfolio Fund invest in other subfunds of Swisscanto. As at 31 March 2023, the value of these cross-investments stands at:

Subfund	Market value
Swisscanto (LU) Portfolio Fund Sustainable Balance (CHF)	15,823,334
Swisscanto (LU) Portfolio Fund Sustainable Balanced (EUR)	102,624,897
Swisscanto (LU) Portfolio Fund Responsible Relax (CHF)	9,261,073

Swisscanto (LU) Portfolio Fund Responsible Ambition (EUR)	8,948,017
Swisscanto (LU) Portfolio Fund Sustainable Ambition (CHF)	2,531,273
Swisscanto (LU) Portfolio Fund Responsible Focus (CHF)	35,230,681

**Note 16: Significant events**

In February 2022, several countries (including the US, the UK and the EU) imposed sanctions on certain institutions and persons in Russia due to the official recognition by the Russian Federation of the People's Republics of Donetsk and Lugansk. Possible further sanctions were announced following the military operations against Ukraine launched by Russia on 24 February 2022.

## Swisscanto (LU) Portfolio Fund

### Notes on the annual report (cont.) as at 31 March 2023

#### **Note 16: Significant events (cont.)**

Since February 2022, rising geopolitical tensions have led to a significant increase in volatility in the securities and foreign exchange markets, as well as a significant devaluation of the rouble against the US dollar and the euro. These events are expected to affect the activities of Russian companies in various sectors of the economy.

The company considers these events to be non-adjusting events after the reporting period. Although at the time of this report neither the performance of the company, the continuing operation of the company as a going concern, nor the business activities were affected by the events mentioned above, the Board of Directors continues to monitor the evolving situation and its effects on the financial position and results of the company.

#### **Note 17: Subsequent events**

With effect from 5 June 2023, Swisscanto has moved from its old business address: 19, rue de Bitbourg, L-1273 Luxembourg to its new business address: 6B, route de Trèves, L-2633 Senningerberg, Luxembourg.

The Management Company has decided to transfer the roles of fund accounting and NAV calculation for the Swisscanto (LU) Equity Fund. The transfer will take place on 1 April 2023. Up until now, the tasks related to these roles were carried out by Swisscanto Fondsleitung AG as a service provider and were the responsibility of the Management Company. The transfer of the fund accounting and NAV calculation does not have any effect on the amount of the flat-rate administrative commission or any other fees imposed on unitholders. Fees remain the same for unitholders.

#### **Note 18: Classification pursuant to the SFDR Regulation (EU 2019/2088) (unevaluated)**

In accordance with Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), comprehensive information on the environmental and social characteristics of the investment fund can be found in the attached document.

## Swisscanto (LU) Portfolio Fund

### Additional information

#### Information on remuneration policy

European Directive 2014/91/EU amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the fund, entered into force on 18 March 2016. It was transposed into national law by the Luxembourg Law of 10 May 2016 on the transposition of Directive 2014/91/EU. Due to these new regulations, the fund is required to publish information relating to the remuneration of identified employees within the meaning of the Law in the annual report. This information corresponds with the appropriate remuneration information which the management company has published in the previous annual report for 2017, and relates to the entire workforce:

	<b>Number of employees</b>	<b>CHF</b>
Total remuneration Swisscanto Asset Management International S.A. (01.01.2022 – 31.12.2022):	12	2,208,690.90
of which is fixed:		1,417,442.27
of which is variable*:		791,248.63

Due to the low number of employees and based on the principle of proportionality, no further breakdown of the remuneration of identified employees will be provided. The calculation of the remuneration and other benefits is based on prevailing market norms and the individual performance of the employee. The fixed part of the remuneration relates to factors of long-term significance, such as sustainable profitability, robust risk and capital management, first-class customer service and teamwork. The same procedure applies for the variable part of the remuneration, which also encompasses factors such as the reward of success and achievement, and the continued adherence to corporate governance guidelines. Furthermore, variable remuneration depends to a significant extent on the income of the group as well as the management company and the funds it manages.

Further information on the remuneration policy can be found on the following website:

<https://www.swisscanto.com/lu/de/gs/rechtliche-hinweise/verguetungspolitik.html>

The Management Company:  
SWISSCANTO ASSET MANAGEMENT INTERNATIONAL S.A., Luxembourg

\* The basis of the variable remuneration paid out in March of each fiscal year relates to the previous year.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Sustainable Balance (CHF)

**Legal entity identifier (LEI-Code):**

549300UWR31L6HUAIX55

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: <u>25</u>%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u> % of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: <u>25</u>%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

## Sustainable Investments

### Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 1.5-degree target

**-51%**

**+21%**

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Exclusion Criteria

Airlines	0.00%	0.05%	29	Gambling (>5% revenue)	0.00%	0.11%	20
Cruise ship operators	0.00%	0.01%	3	Production of pornography	0.00%	0.01%	2
				Genetic engineering: human medicine	0.00%	0.00%	0

  
Decline in biodiversity

  
Climate change

  
Risk to society and health

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

### ● How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

### ● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	9.64	74.96%		32.64		
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	5.69	74.96%		6.5		
	1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value	197.9	74.96%		219.04

Alcon AG	Manufacturing	0.71%	Switzerland
UnitedHealth Group Incorporated	Financial and Insurance Activities	0.64%	USA

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

## What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**  
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- **How did this financial product perform compared with the broad market index?**  
Not applicable.

**Swisscanto**  
Asset Management  
International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Sustainable Balanced (EUR)

**Legal entity identifier (LEI-Code):**

5493005Q3OWBF2Q02321

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: <u>25</u>%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: <u>25</u>%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u>% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

## Sustainable Investments

### Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 1.5-degree target

**-53%**

**+33%**

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Exclusion Criteria

## Exposure to Controversies

### Sustainable

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.50%	11	 Nuclear energy	0.00%	2.18%	80
Non-sustainable forestry	0.00%	0.20%	23	Production of military hardware	0.00%	1.39%	66
Unsustainable fisheries and aquaculture	0.00%	0.05%	8	Production of alcohol (>5% revenue)	0.00%	0.69%	39

Decline in biodiversity

  
Climate change

  
Risk to society and health

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

### How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

16b	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.04.2022-31.03.2023

Largest investments	NACE Sector	% Assets	Country
Swisscanto (LU) Equity Fund Sustainable Emerging Markets NT USD Klasse		4.21%	
EUR Cash		3.05%	
Microsoft Corporation	Information and Communication	2.14%	USA
Alphabet Inc. Class A	Information and Communication	1.67%	USA
USD Cash		1.14%	
UnitedHealth Group Incorporated	Financial and Insurance Activities	1.14%	USA
GBP Cash		0.95%	
Thermo Fisher Scientific Inc.	Manufacturing	0.92%	USA
Accenture Plc Class A	Information and Communication	0.87%	Ireland
AbbVie, Inc.	Manufacturing	0.84%	USA
Unilever PLC	Manufacturing	0.83%	United Kingdom
Vertex Pharmaceuticals Incorporated	Manufacturing	0.82%	USA
CHF Cash		0.81%	
Tractor Supply Company	Wholesale and Retail Trade	0.78%	USA
Apple Inc.	Manufacturing	0.75%	USA

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

## What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

### ● How did the reference benchmark differ from a broad market index?

Not applicable.

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

### ● How did this financial product perform compared with the reference benchmark?

Not applicable.

### ● How did this financial product perform compared with the broad market index?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Swisscanto**  
Asset Management  
International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Relax (CHF)

**Legal entity identifier (LEI-Code):**

5493003FVJM6BSK5QE46

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.24%	48	 UN Global Compact violations	0.00%	0.37%	14
Extraction of coal (>5% revenue)	0.00%	0.03%	22	Child labour	0.00%	0.30%	4
 Climate change				Production of military hardware (>5% revenue)	0.00%	0.21%	27
 Risk to society and health				Controversial weapons	0.00%	0.12%	5
				Manufacture of weapons and ammunition	0.00%	0.12%	8
				Production of pornography	0.00%	0.00%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-44%**

**+2%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-46%**

**-6%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

**Swisscanto**  
Asset Management  
International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Select (CHF)

**Legal entity identifier (LEI-Code):**

549300DCBHLGB0HCE981

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective   <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 <b>Coal reserves (ex. metal production)</b>	0.00%	0.33%	48	 <b>UN Global Compact violations</b>	0.01%	0.33%	14
<b>Extraction of coal (&gt;5% revenue)</b>	0.00%	0.04%	22	<b>Production of military hardware (&gt;5% revenue)</b>	0.00%	0.31%	27
 <b>Climate change</b>				<b>Child labour</b>	0.00%	0.28%	4
 <b>Risk to society and health</b>				<b>Controversial weapons</b>	0.00%	0.19%	5
				<b>Manufacture of weapons and ammunition</b>	0.00%	0.18%	8
				<b>Production of pornography</b>	0.00%	0.01%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-38%**

**+6%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

**Swisscanto**  
Asset Management  
International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Select (EUR)

**Legal entity identifier (LEI-Code):**

549300ZSSV1ZG3JJGU13

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.46%	48	 Production of military hardware (>5% revenue)	0.00%	0.71%	27
Extraction of coal (>5% revenue)	0.00%	0.04%	22	 Manufacture of weapons and ammunition	0.00%	0.40%	8
 Climate change				 Controversial weapons	0.00%	0.19%	5
 Risk to society and health				 Child labour	0.00%	0.15%	4
				 UN Global Compact violations	0.03%	0.09%	14
				 Production of pornography	0.00%	0.01%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-50%**

**-5%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	14.8	55.53%		30.26

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: <u>20</u>%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: <u>25</u>%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u>% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

## Sustainable Investments

### Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 1.5-degree target

**-52%**

**+16%**

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Exclusion Criteria

## Exposure to Controversies

### Sustainable

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark

<b>Cruise ship operators</b>	0.00%	0.01%	3	<b>Production of pornography</b>	0.00%	0.01%	2
 <b>Decline in biodiversity</b>				 <b>Genetic engineering: human medicine</b>	0.00%	0.00%	0
 <b>Climate change</b>							
 <b>Risk to society and health</b>							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

### ● How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

### ● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

## What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**  
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- **How did this financial product perform compared with the broad market index?**  
Not applicable.

**Swisscanto**  
Asset Management  
International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Balance (CHF)

**Legal entity identifier (LEI-Code):**

549300MYFUHLQIWGU303

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 <b>Coal reserves (ex. metal production)</b>	0.00%	0.47%	48	 <b>Production of military hardware (&gt;5% revenue)</b>	0.00%	0.45%	27
<b>Extraction of coal (&gt;5% revenue)</b>	0.00%	0.06%	22	 <b>Controversial weapons</b>	0.00%	0.30%	5
 <b>Climate change</b>				 <b>Child labour</b>	0.00%	0.27%	4
 <b>Risk to society and health</b>				 <b>UN Global Compact violations</b>	0.02%	0.27%	14
				 <b>Manufacture of weapons and ammunition</b>	0.00%	0.26%	8
				 <b>Production of pornography</b>	0.00%	0.01%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-36%**

**+17%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● How does the reference benchmark differ from a broad market index?

Not applicable.

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### ● How did this financial product perform compared with the reference benchmark?

Not applicable.

### ● How did this financial product perform compared with the broad market index?

Not applicable.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Balance (EUR)

**Legal entity identifier (LEI-Code):**

549300BVWREIUPX2DR18

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective   <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.63%	48	 Production of military hardware (>5% revenue)	0.00%	1.02%	27
Extraction of coal (>5% revenue)	0.00%	0.06%	22	 Manufacture of weapons and ammunition	0.00%	0.56%	8
 Climate change				 Controversial weapons	0.00%	0.32%	5
 Risk to society and health				 Child labour	0.00%	0.19%	4
				 UN Global Compact violations	0.04%	0.13%	14
				 Production of pornography	0.00%	0.01%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-50%**

**+1%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.61%	48	 Production of military hardware (>5% revenue)	0.00%	0.61%	27
Extraction of coal (>5% revenue)	0.00%	0.07%	22	Controversial weapons	0.00%	0.40%	5
 Climate change				Manufacture of weapons and ammunition	0.00%	0.35%	8
 Risk to society and health				Child labour	0.00%	0.26%	4
				UN Global Compact violations	0.03%	0.24%	14
				Production of pornography	0.00%	0.01%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-32%**

**+23%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 <b>Coal reserves (ex. metal production)</b>	0.00%	0.81%	48	 <b>Production of military hardware (&gt;5% revenue)</b>	0.00%	1.33%	27
<b>Extraction of coal (&gt;5% revenue)</b>	0.00%	0.08%	22	 <b>Manufacture of weapons and ammunition</b>	0.00%	0.73%	8
 <b>Climate change</b>				 <b>Controversial weapons</b>	0.00%	0.44%	5
 <b>Risk to society and health</b>				<b>Child labour</b>	0.00%	0.24%	4
				<b>UN Global Compact violations</b>	0.05%	0.16%	14
				<b>Production of pornography</b>	0.00%	0.02%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-50%**

**+6%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**● How does the reference benchmark differ from a broad market index?**

Not applicable.

**● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**● How did this financial product perform compared with the reference benchmark?**

Not applicable.

**● How did this financial product perform compared with the broad market index?**

Not applicable.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Sustainable Ambition (CHF)

**Legal entity identifier (LEI-Code):**

3912002MS4VLKZHGGP29

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: <u>25</u>%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>  </u> % of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: <u>25</u>%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

## Sustainable Investments

### Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 1.5-degree target

**-48%**

**+24%**

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of the 1.5-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Exclusion Criteria

## Exposure to Controversies

### Sustainable

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.44%	11	 Nuclear energy	0.00%	1.97%	82
Non-sustainable forestry	0.00%	0.17%	24	Production of military hardware	0.00%	1.17%	66
Unsustainable fisheries and aquaculture	0.00%	0.05%	9	Production of alcohol (>5% revenue)	0.00%	0.53%	39
Uncertified Palm Oil (<50% RSPO)	0.00%	0.00%	0	Manufacture of tobacco and smokers' accessories	0.00%	0.45%	23
 Extraction of fossil fuels	0.00%	7.36%	131	Controversial weapons	0.00%	0.40%	5
Operation of fossil-fuel power stations	0.15%	2.34%	170	Intensive livestock farming	0.00%	0.38%	40

				Genetic engineering: human medicine	0.00%	0.00%	0

Decline in biodiversity

Climate change

Risk to society and health

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

Issuers with a net negative contribution to the SDGs were removed from the financial product's investment universe during the reporting period. In addition, the portfolio considered Principal Adverse Impacts (PAI). For this purpose, the mandatory indicators from Annex 1 to Regulation (EU) 2019/2088 were used as a basis. Companies considered to do significant harm according to the PAI were not eligible to be counted as sustainable investments.

### ● How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse effects have been systematically taken into account in the investment process.

### ● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were considered in the reporting period: the United Nations Global Compact (UNGC), the United Nations General Principles of Business and Human Rights (UNGP), and the International Labour Organization (ILO) Conventions (Core and Broad). Any serious violation of these norms resulted in the removal of the issuer from the financial product's investable universe.

## How did this financial product consider principal adverse impacts on sustainability factors?

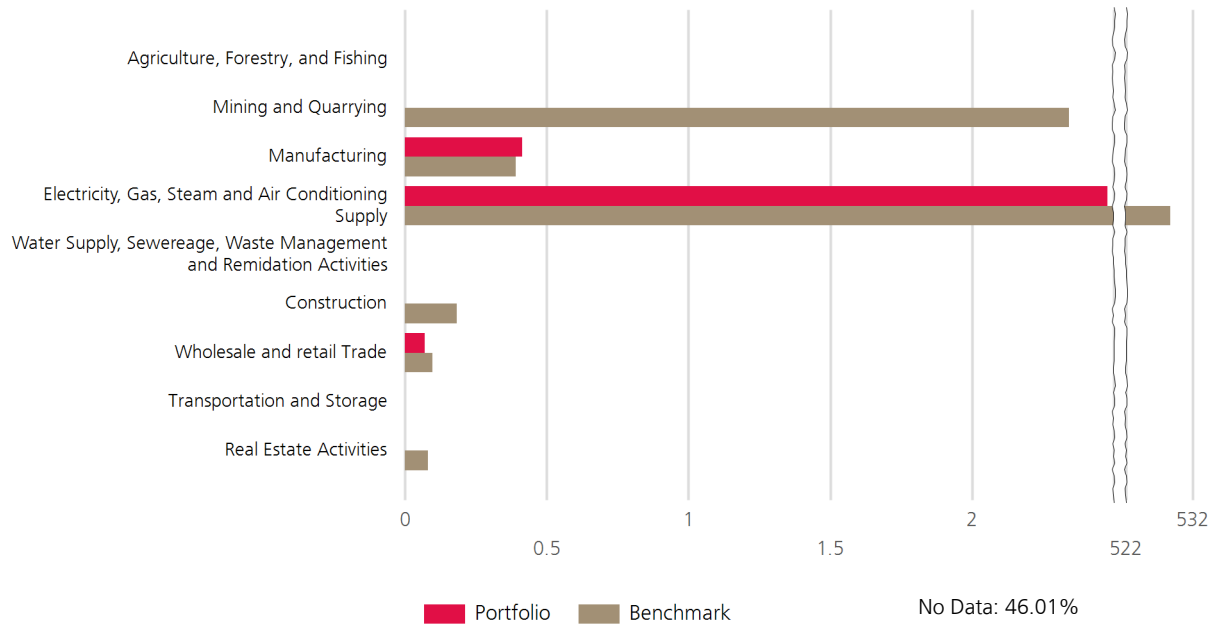

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year and the comparison to previous periods will be shown starting from the next available report.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR. The total quota of 50% was reached, the environmental partial quota was slightly not reached.

In addition, since January 1, 2023, the Portfolio Manager also aimed at sustainable investments with this financial product by targeting the portfolio to reduce CO2 emissions (ratio of 80%) in sense of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial sector. This aspect could not be shown in the chart due to the short application period.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Non-sustainable investments included derivatives and cash and cash equivalents. These did not meet the minimum social and environmental protection requirements.

## What actions have been taken to attain the sustainable investment objectives during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

International S.A.

## **Periodic disclosure as at 31.03.2023**

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name:**

Swisscanto (LU) Portfolio Fund Responsible Focus (CHF)

**Legal entity identifier (LEI-Code):**

549300WLCBSRIB0E4R71

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy   <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>5%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective   <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The key figures stated refer to the sustainable investments committed to in the sustainability-related appendix to the sales prospectus, not to the sustainable investments actually achieved.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

## Exclusion Criteria

### Exposure to Controversies

#### Responsible

Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 <b>Coal reserves (ex. metal production)</b>	0.01%	0.74%	48	 <b>Production of military hardware (&gt;5% revenue)</b>	0.00%	0.77%	27
<b>Extraction of coal (&gt;5% revenue)</b>	0.00%	0.08%	22	<b>Controversial weapons</b>	0.00%	0.51%	5
 <b>Climate change</b>				<b>Manufacture of weapons and ammunition</b>	0.00%	0.44%	8
 <b>Risk to society and health</b>				<b>Child labour</b>	0.00%	0.28%	4
				<b>UN Global Compact violations</b>	0.04%	0.20%	14
				<b>Production of pornography</b>	0.00%	0.02%	2

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

# ESG Laggards

## Exposure to ESG Laggards

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

# Reduction of CO<sub>2</sub>e intensity

## CO<sub>2</sub>e intensity relative to Paris climate targets

### CO<sub>2</sub>e intensity

Corporate  
Tonnes of CO<sub>2</sub>e / EUR million in turnover  
Scope 1 & 2

### CO<sub>2</sub>e intensity

Sovereign  
Tonnes of CO<sub>2</sub>e / EUR million in GDP

### Achievement of the 2-degree target

**-33%**

**+27%**

In line with the < 2° Paris climate target ("well below 2 degrees"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of the 2-degree target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved.

# Sustainable Investments

## Exposure to Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### ...and compared to previous periods?

The information was published for the first time in the reporting year.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17s SGD and did not have DNSH and/or Minimum Safeguards violations.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	23.89	77.44%		46.11		
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	5.27	77.44%		8.74		
	1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value	280.54	77.44%		312.04		
2. Carbon footprint	2. GHG Emissions - Scope 1+2+3 per Mio EUR Enterprise Value	309.7	77.44%		366.89		
3. GHG intensity of investee companies	3. GHG Emissions - Emissions Intensity - Total Emissions (EUR)	105.43	77.43%		188.58		
4. Exposure to companies active in the fossil fuel sector	4. Fossil Fuel - Involvement (PAI)	3.99%	77.49%		6.48%		

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
5. Share of non-renewable energy consumption and production	5a. CR Raw - Energy use - Coal/nuclear/unclear energy sources	53.09%	49.36%		55.89%		Non-renewable energy consumption encompasses consumption of energy generated from non-renewable sources, as well as energy consumption from biomass. Any energy use figures where the source of energy is unclear is also included in this factor.
	5b. Non-renewable energy consumption	74.36%	43.75%		74.62%		
	5c. Non-renewable energy production	0.62%	75.73%		1.87%		
6. Energy consumption intensity per high impact climate sector	6. Energy consumption intensity (GWh/mEUR)	0.34	41.92%		7.66		

## Energy Consumption Intensity per High Impact Climate Sector (per mio EUR)

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
7. Activities negatively affecting biodiversity-sensitive areas	7. Companies negatively affecting biodiversity-sensitive areas	0.08%	77.49%		0.04%

Swisscanto (LU) Bond Fund Responsible Global Credit Opportunities NTH CHF Klasse		1.26%	
Swisscanto (LU) Equity Fund Systematic Responsible Emerging Markets NT CHF Klasse		1.25%	

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

● **In which economic sectors were the investments made?**

Due to lack of data availability, subsectors cannot not be shown.

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

No investments were made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first reporting year. The comparison with earlier periods will be presented from next year's report onwards.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental ("2\_17 E") and social ("2\_17 S") goals resulting from the SDGs as per Art. 2 (17) SFDR.

### What was the share of socially sustainable investments?

See charts above

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, this sub-fund had invested less than 33% of the net assets in assets that did not meet the advertised environmental and/or social characteristics (#2 Other Investments). These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs).

More information is available at:

Swisscanto | Proxy Voting Dashboard ([issgovernance.com](https://issgovernance.com))

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**● How does the reference benchmark differ from a broad market index?**

Not applicable.

**● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**● How did this financial product perform compared with the reference benchmark?**

Not applicable.

**● How did this financial product perform compared with the broad market index?**

Not applicable.

## Swisscanto (LU) Portfolio Fund

### Report of the Réviseur d'Entreprises agréé

To shareholders of the  
Swisscanto (LU) Portfolio Fund

#### **Audit opinion**

We have audited the annual financial statements of Swisscanto (LU) Portfolio Fund and its sub-funds (the "Fund"), comprising the statement of net investment portfolio as at 31 March 2023, the income and expense statement and other changes in net assets for the financial year ending on this date, as well as the notes with a summary of significant accounting policies.

In our opinion, the accompanying annual financial statements give a true and fair view of the assets and the financial position of the Fund and its sub-funds as at 31 March 2023, as well as its income and the development of its net assets for the financial year ending on this date, in compliance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements.

#### **Basis for our audit opinion**

We conducted our audit in accordance with the Law of 23 July 2016 governing the audit profession and according to the International Standards on Auditing (ISA) adopted by the Commission de Surveillance du Secteur Financier (CSSF) for Luxembourg. Our responsibilities under the Law of 23 July 2016 and the ISA standards, as adopted in Luxembourg by the CSSF, are described in more detail in the section "Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements". We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) adopted by the CSSF for Luxembourg together with the ethical requirements that are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Other information**

The Management Company's Board of Directors is responsible for the other information. Other information includes the information contained in the annual report, but does not include the financial statements or our Report by the Réviseur d'Entreprises agréé on the annual financial statements.

Our audit opinion on the annual financial statements does not cover other information and we do not give any kind of assurance concerning this information.

In connection with our audit of the annual financial statements, it is our responsibility to read the other information and thereby assess whether there is any material discrepancy between this information and the annual financial statements or with the findings of our audit, or whether the other information appears to contain material misstatements. If, on the basis of our work, we conclude that other information contains material misstatements, we are obliged to report this. We have nothing to report in this respect.

## Swisscanto (LU) Portfolio Fund

### Report by the Réviseur d'Entreprises agréé (continued)

#### **Responsibility of the Board of Directors of the Management Company for the financial statements**

The Management Company's Board of Directors is responsible for the preparation and fair presentation of the annual financial statements in accordance with the legal provisions and regulations applicable in Luxembourg for the preparation of annual financial statements and in respect of internal controls which the Management Company's Board of Directors deems necessary to enable the preparation of annual financial statements which are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the Management Company's Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Management Company's Board of Directors either intends to liquidate the Fund or one of its sub-funds or to cease operations, or has no realistic alternative but to do so.

#### **Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements**

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a Report by the Réviseur d'Entreprises agréé that contains our audit opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg, we exercise professional judgement and maintain professional scepticism. In addition:

- We identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- We evaluate the appropriateness of accounting policies used by the Management Company's Board of Directors, and the reasonableness of accounting estimates and related disclosures.
- We draw conclusions on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or any of its sub-funds to continue as a going concern.

## Swisscanto (LU) Portfolio Fund

### Report by the Réviseur d'Entreprises agréé (continued)

If we conclude that a material uncertainty exists, we are required to draw attention in the Report by the Réviseur d'Entreprises agréé to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the Report by the Réviseur d'Entreprises agréé. However, future events or circumstances may result in the Fund or one of its sub-funds being unable to continue as a going concern.

- We evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether they constitute a fair presentation of the underlying transactions and events.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young  
Société anonyme  
Cabinet de révision agréé
