

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Euro Active Bonds (the "Fund")

AE share class LU0096353940, a sub-fund of Threadneedle (Lux) (the "SICAV").

The management company of the SICAV is Threadneedle Management Luxembourg S.A.

Objectives and investment policy

The aim of the Fund is to provide income with the potential to grow the amount you invested as well.

The Fund invests at least two-thirds of its assets in European bonds (which are similar to a loan and pay a fixed or variable interest rate) issued by companies and governments in, or companies that have significant operations in the countries that have adopted the Euro currency.

The Fund invests directly in these assets or by using derivatives. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets. The Fund may also make use of short selling techniques (which are designed to make a profit from falling prices) and leverage (which increases the effect that a change in the price of an investment has on the Fund's value). The Fund will actively manage interest rate risk - which may boost performance or reduce it.

The Fund will invest mainly in bonds that mature in less than 10 years.

Income from investments in the Fund will be added to the value of your shares.

You can buy or sell shares in the Fund on any day which is a business day in Luxembourg unless the directors have decided that insufficient markets are open. Such days are published on www.threadneedle.com. You can find more detail on the investment objective and policy of the Fund in the "Investment Objectives and Policies" section of the Prospectus.

As part of the investment process, the Fund will make reference to the Merrill Lynch EMU Large Cap Investment Grade 3-5 Year Index.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is in this specific category because historically it has shown a medium to low level of volatility (how much the value of the Fund went up and down compared to other categories).
- The lowest category does not mean a risk-free investment.
- Where investments are made in assets that are denominated in foreign currency, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund invests in assets that are not always readily saleable without suffering a discount to fair value. The portfolio may have to lower the selling price, sell other investments or forego another, more appealing investment opportunity.
- The Fund's assets may sometimes be difficult to value objectively and the true value may not be recognised until assets are sold.
- Investment in derivatives may result in losses to the Fund in excess of the amount the Fund invested.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	2.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charge	1.63%
----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.75%.

The ongoing charge is based on the last year's expenses for the year ending 2011 and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The ongoing charges figure is calculated as at 31.12.2011.
