#### General comments common to all funds

#### 2022 Chronology

2022 was one of the worst years on record for credit markets, with total returns deeply in negative territory driven by a combination of several factors including high and sticky inflation figures, major Central Banks being "behind the curve" and embarking on a very aggressive hiking cycle, geopolitical risks, and a deteriorating macroeconomic environment. January set the tone with the publication of the Fed's December FOMC meeting minutes showing a markedly more hawkish tone than what was expected by the market, leading to a significant adjustment in market expectations regarding the path for rates going forward. Market downturn was then further exacerbated in February as growing tensions between Russia and Ukraine led to the worst-case scenario; the invasion of Ukraine by Russian troops and the start of a war that is still ongoing to date. The response from the EU and its allies was swift and unprecedented, with a large range of sanctions applied to the Russian government and those close to it, including the exclusion of Russian banks from the SWIFT system (making all transactions with foreign banks problematic) and the freezing of Russian central bank assets. This led to further inflationary pressures in Europe, given the importance of Russian Oil & Gas in the EU's energy mix.

Given the stickiness of inflation, further fuelled by China's "Zero-Covid policy" impacting supply chains and transports on the back of harsh lockdowns, the Federal Reserve hiked interest rates at its March meeting by 25bps and for the first time since 2018. In an attempt to contain rapidly the ever-rising inflation figures the Institution embarked on an aggressive tightening cycle, accelerating the pace of hikes to +50bps in May and then to +75bps in June and July. The Bank of England and the European Central Bank followed suit, starting their own monetary tightening with a +25bps hike in June and a +50bps hike in July respectively. It is worth noting that the European institution hiked interest rates for the first time in 11 years. However, to avoid the "fragmentation" risk, the ECB introduced the TPI (Transmission Protection Instrument), a new tool implicitly aiming at containing any undue widening in government spreads between "core" and "peripheral" European countries. By the end of June, all markets were sharply down, with the Equity markets down between -15% in Europe and -20% in the US, and the Credit markets not holding up better, with the Investment Grade universe down between -12% in Europe and -14% in the US driven by their high rates' sensitivity: the 10-year US Treasuries and the 10-year German Bund reached 3.0% and 1.33% respectively (having started the year at 1.6% and -0.12% respectively). At this point, there was no de-escalation on the Ukrainian front, with remote expectations for peace talk, leading to further pressure on raw material and energy prices.

Nonetheless, markets somehow enjoyed a summer rally on investors' hopes for a quicker pivot from Central Banks given increasing prospects of growth slowing down, inexorably leading to a recession. But that summer hype was short lived as hopes were dampened at Jackson Hole by J. Powell's comments and his strong will to control/tame inflation and anchor inflation expectations even if this could lead to a recession. Shortly after those comments, markets were caught on the wrong foot with the UK's mini budget announcement in September and took another sharp leg down given the debt sustainability tantrum that follow suit. Indeed, newly appointed leaders in the UK announced unexpected major tax measures without quantifying/clarifying how they would be paid for through potential reductions in public spending. The pound quickly plunged and long rates soared (+150bps on the 30-year Gilts in 3 days) before the BoE intervened. Inevitably this led both the new PM Liz Truss and her Chancellor K. Kwarteng to step down, leaving the leadership to the pair Sunak/Hunt, who corrected the budget (almost all announces were dropped) in order to restore confidence. All this led to markets reaching their low point in mid-October: 10-year US Treasuries reached 4.25%, the S&P 500 lost 9% in September (its worst monthly performance this year) while the credit markets lost between 5% and 7% in Europe.

Investors had to wait until the last quarter of the year to see a long-awaited rebound in performance and a return in risk appetite materializing through inflows in the different asset classes. Indeed, towards the end of the year, declining inflation figures in the US, a restored UK confidence, mild winter conditions and successful gas storage in Europe leading to declining pressure on energy costs, a resilient labour market and some relaxation of the Zero-Covid policy in China all drove renewed investor optimism, especially on the back of attractive valuations. At its last meeting of the year, the Fed decided to slow down the pace of hikes to +50 bps (after several consecutive 75bps hikes), even if guiding for further hikes in 1H23.

#### **Market Performance**

#### **Government Bonds**

- 10-year US increased by 236bps to end the year at 3.87%
- 10-year German Bund increased by 275bps to end the year at 2.56%
- 10-year BTP increased by 353bps to end the year at 4.70%
- 2/10 year in US gradually inverted through the year, ending 2022 at -55bps after reaching a record negative level of -84bps in December. An important read, as all US recession were preceded by yield curve inversion. Equity Markets
- S&P 500 index in the US was down -18.13% this year
- Stoxx 600 index in Europe was down -9.98% this year
- Hang Seng index in China was down -12.56% this year Credit Indexes

In the US

- IG Corporate Credit Index was down -15.45% this year
- HY Corporate Credit index was down -11.22% this year In Europe
- IG Corporate Credit Index was down -13.95% this year
- HY Corporate Credit index HECO was down -11.48% this year
- Financial Subordinated Index HEBC was down -12.05% this year

#### 2023 Outlook

After a tough year for markets in 2022, there are still a lot of uncertainties ahead for 2023:

- 1. Has inflation reached a peak level, and if so, at what pace will it decrease?
- 2. Will Europe and the US be able to avoid a recession in 2023?
- 3. What will be the path of the monetary policy of the main central banks?

Inflation will, once again, be a key focus for investors. The latest prints of 2022 were showing signs of cooling for headline figures, mainly due to the fast decrease in energy prices while core inflation seems more persistent for now. The trajectory of core inflation towards the 2% target set by the Fed and ECB will be a key element for monetary policy moves in 2023.

Additionally, economic activity will also be of importance, as we are left with GDP figures still in positive territory, a resilient labour market (US unemployment rate is still at its lowest level) and the PMIs are not yet showing signs of any significant contraction. When combining a sticky core inflation with a strong labour market and resilient economies, this supports the hawkish narrative of central banks willing to keep hiking rates further, and to maintain rates at high levels for longer to tame inflation.

Finally, geopolitical risks are still something to keep in mind in 2023. We haven't seen any progress on a potential end to the Ukraine war yet. US and China tensions around the Taiwan situation are still elevated. Political and fiscal risks are also high given the impact of high inflation on both individuals and corporates, especially on the energy front in Europe.

We are starting the year on a constructive tone, as recession fears are being pushed to 2H23, if a recession is to happen as the soft-landing narrative is gaining grounds. Moreover, the terminal rates priced by the market participants at 5.0% in the US and 3.5% in Europe look realistic in our opinion.

# TSD only Fund comment

The fund started the year with a rather defensive positioning in terms of rate and spread duration as we anticipated in late 2021 a level of inflation higher and for longer than foreseen by the market participants. The conflict between Ukraine and Russia added more inflationary pressure, which triggered hawkish reactions from Central banks, leading us to remain even more prudent towards rates duration given the rates volatility. Durations decreased to as low as 0.55 for rates and 0.8 for spreads in early October 2022. As recession fears were also mounting during the course of 2022, we let our exposure to High Yield and subordinated financials bonds naturally decreased with bonds maturing or being called by issuer (exposure to High Yield dropped to less 28% from almost 35% and exposure to subordinated financials dropped to 21% from 29%) and we were more willing to take advantage of higher rates in 2022 or early 2023 corporates IG and financials senior bonds. In October, we started to be more constructive on rates duration after the significant repricing already done in 2022, so we lengthened rates duration by purchasing bonds with a maturity expected until 2025. We also increased exposure to High Yield bonds and to subordinated financials. However, on High Yield bonds, we remained focused on short bonds (less than 1 year of maturity) as the credit spread curves were flat for bonds maturing between 0.50 to 1.75 year. At the end of the year, the metrics were the following: -

Yield to worst: 5.78%
Yield to maturity: 5.78%
Rates duration: 0.81y
Spread duration: 1.04y
Average coupon: 3.15%
Average rating: BBBAverage spread: 395bps

#### TCCT only Fund comment

The fund started the year with a rather defensive positioning in terms of rate and spread duration as we anticipated in late 2021 a level of inflation higher and for longer than foreseen by the market participants. The conflict between Ukraine and Russia added more inflationary pressure, which triggered hawkish reactions from Central banks, leading us to remain even more prudent towards rates duration given the rates volatility. Durations decreased to as low as 0.40 for rates and 0.57 for spreads in early October 2022. As recession fears were also mounting during the course of 2022, we let our exposure to High Yield and subordinated financials bonds naturally decreased with bonds maturing or being called by issuer and we were more willing to take advantage of higher rates in 2022 or early 2023 corporates IG and financials senior bonds. In October, we started to be more constructive on rates duration after the significant repricing already done in 2022, so we lengthened rates duration by purchasing bonds with a maturity expected until 2024. We also increased exposure to High Yield bonds (exposure dropped to less than 29% from 34%) and to subordinated financials (exposure dropped to 21% from 34%). However, on High Yield bonds, we remained focused on short bonds (less than 1 year of maturity) as the credit spread curves were flat for bonds maturing between 0.50 to 1.75 year. At the end of the year, the metrics were the following:

Yield to worst: 5.14%
Yield to maturity: 5.14%
Rates duration: 0.54y
Spread duration: 0.66y
Average coupon: 3.11%
Average rating: BBB
Average spread: 349bps

pressure, which triggered hawkish reactions from Central banks, leading us to remain even more prudent towards rates duration given the rates volatility. It was decided to liquidate the sub-fund with an effective date on December 22<sup>nd</sup>, 2022.

#### TC+ only Fund comment

TC+ started the year with a defensive stance, carrying an 88% beta compared to EUR HY index and limited durations at 1.8 year for rates and 2.2 years for spreads as we were forecasting a more restrictive tone from central banks for 2022. During the first two months, the positioning remained prudent and the beta was decreased to 84% in January and 80% in February while durations remained contained with the emergence of tensions between Russia and Ukraine leading to the invasion of Ukraine. Over the second half of March, the Beta was tactically raised back to 93% by purchasing subordinated financials, and BB corporates papers in switch versus B and CCC bonds which outperformed BB. In April, we adjusted down again Beta to 81% by selling more of the bonds with the lowest ratings in portfolio and purchasing short duration bonds BBs having underperformed and even positive yielding Investment Grade bonds to park cash. The Beta was maintained close to 80% in May and June but raised in the first days of July above 90% after the significant selloff experienced while keeping durations at 1.7 and 2.1 for respectively rates and spread, much lower than EUR High Yield index. July was a strong month for credit, and primary market reopened for High Yield issuers. TC+ participated in several bond issuances and could benefit from the very large pricing even for issuers with strong credit fundamentals. After a strong rebound in July and the first part of August, markets saw another leg down on the back of high CPI prints in the US and growing concerns around the closure of the Nord Stream pipeline for maintenance, leading energy prices up again. TC+ maintained a prudent positioning until mid-October. Then, TC+ increased AT1 exposure significantly for the first time since 2021 and raised the portfolio Beta to 98% at the end of the month and up to 112% in November, while at the same time, raising rates and spreads durations to 2.3 and 3.0 respectively, the highest level of 2022. The fund took some profits and decreased Beta after the constructive tone in November and December. TC+ ends 2022 with a marked outperformance vs EUR High Yield (HEC0: ICE EUR High Yield index) of 1.39% for Institutional share class and 1.04% for retail share class. At the end of the year, the metrics were the following:

- Yield to worst: 9.07%Yield to maturity: 9.07%Rates duration: 2.11y
- Spread duration: 2.76y
- Beta vs EUR HY (HEC0 index): 104%
- Average coupon: 4.94%Average rating: BBAverage spread: 735bps

# TIC only Fund comment

In 2022 we focused our efforts towards obtaining the SRI label for the fund, which in turn drove our investments as it requires a "best-in-universe" approach.

In order to do that we had to build an in-house model that was in turn audited and validated by EY. The general idea is to generate an SRI grade at the fund's level that has to be lower than that of the universe (using the same in-house model) after taking out the 20% of issuers with the highest grades.

The model takes into account a lot of different KPIs such as the carbon footprint, human and labour rights controversies, gender equality and independent board members. Bonuses are applied for European Taxonomy alignment and maluses are also applied for meaningful controversies. Needless to say, we check not only that the companies we invest in are virtuous but also that they manage their negative externalities.

We had to revamp the whole process of the fund in terms of issuer selection as follows:

- 1/ Check that the issuer is not part of Tikehau Capital's exclusion policy
- 2/ Calculate the SRI grade of the issuer considering all the above mentioned KPIs and make sure that it does not negatively impact the overall SRI grade of the fund.

3/ Perform the fundamental analysis of the issuer from a financial and extra financial point of view using our in-house ESG model 4/ Perform an impact grid to classify the issuer within the fund according to two categories: (i) durable instruments (Green Bonds/Sustainability-Linked Bonds) or (ii) issuers that participate in the transition towards a low carbon and circular economy with the "Pledgers" on one side (with an emissions reduction target validated or in the process of being validated by at least one of the following initiatives: SBTis or GFANZ) and the "Transition" one on the other side (those who are not "Pledgers" but operate in all types of sectors and have the potential through their goods, services, or their supply chain more generally, to contribute significantly to the transition to a low carbon and circular economy).

Throughout the year we made arbitrages in the fund to stick to that philosophy, focusing on best-in-class issuers while at the same time navigating through the environment described above, focusing on spread products in times of rising rates and on quality names in times of recession fears. Over the year, the fund outperformed the HWSG Index (Global High Yield ESG Tilt Index) by close to 50bps. At the end of the year, the metrics were the following:

- Yield to worst: 7.27%
  Yield to maturity: 7.27%
  Rates duration: 2.59y
  Spread duration: 3.03y
  Average coupon: 4.89%
- Average rating: BB+
   Average spread: 508bps

# TSF only Banks Specifics

At odds with the price action we saw in 2022, it was a pretty good year for European Banks from a fundamental perspective. Results were indeed boosted by the positive impact from rising rates, helping banks to increase Net Interest Income through the year through positive repricing of Loans. Cost bases were kept under control despite inflationary pressure on personnel expenses, while Asset Quality metrics continued to improve. Average NPL ratios across Europe kept falling, ending the year below 2%, with no sign yet of deterioration in Lending Books quality.

Solvency levels are slightly down as banks started to distribute the excess capital accumulated over the recent years, but buffers above regulatory minima were maintained at very high level. Liquidity positions also remained healthy, which allowed the ECB to revise the rules for its TLTRO operations, rendering potential exceptional profits from the recent rate hikes null and void. New early repayment dates have been introduced to allow banks to adjust their positions following new terms, and as such close to € 700bn were repaid early.

The few numbers of banks that had sizeable exposure to Russia were successful in either exiting the country or reduce potential losses from their business there, following the set of sanctions decided by the EU post invasion of Ukraine. Primary market for European Financial institutions remained efficient through the year despite the difficult market backdrop. European Banks thus issued close to € 25bn of AT1 this year, and € 35bn of Tier2, completing their fundling plan for the year, while insurers issued € 16bn of Subordinated Debt (o.w. € 3.2bn of RT1).

#### 2023 Outlook

After a tough 2022 year for markets, 2023 bears a lot of uncertainty but prospects for Credit investors are more optimistic, helped by the starting point in terms of rates and spreads compared to the same period last year. While macroeconomic uncertainty is high to start the year (US recession of soft landing? Europe already seems in recession, but will it be brief and shallow or long and severe?), the current high level of yield on European Credit offers some protection against volatility. Looking at banks especially, we're confident on their fundamentals as continuous rate hikes from the ECB will further help Top Line along with their positive impact on Interest Income. While we expect Credit losses to pick up, as they were kept at record low levels for the past years, we do not expect a too high increase even in a more severe recession scenario, given provisions already sitting on Balance Sheet, ongoing fiscal support from Governments and healthier Balance Sheet metrics compared to previous recessionary environments.

We expect the Primary Market to stay active, with similar levels of issuance compared to 2022 (i.e. between € 20-30bn of AT1, € 30-40bn of Tier2 and € 150-200bn of MREL eligible debt – i.e. Senior HoldCo and Senior Non Preferred instruments). 2023 however should see a pickup in Covered Bond and Senior Preferred issuance given the expected end of the TLTRO over the next 18 months and the need to partially replace this source of funding.

We'll keep a particular focus on economic data next year, as inflation while coming off record levels is still high from an historical perspective and way above Central Banks targets. Economic data will be of importance as well given the current uncertainty on economic growth next year globally, which could thus have a great influence on Monetary Policy as well. Geopolitical Risks are still on top of investors' concerns, as we haven't seen any progress on a potential end of the war in Ukraine, and US and China tensions around Taiwan situation are still elevated. Political/Fiscal risk is also high given the impact of current high inflation on both individuals and Corporates, especially on the Energy front in Europe.

#### **Fund Performance**

- TSF share Class I returned a negative [-14.08%] in 2022
- TSF share Class RC returned a negative [-14.96%] in 2022
- TSF share Class AF returned a negative [-14.20%] in 2022
- TSF share Class S returned a negative [-14.16%] in 2022

Main contributor to this year negative return were several legacy T1 bonds, as the broader segment was affected by some issuers' decision to leave them outstanding despite them losing their regulatory value, thus surprising negatively the market which start to price them at perpetuity. We saw since then several positive actions taken (tender offers with premium, activation of calls) and we expect more issuers to take action on their legacy subordinated debt stack. AT1 Bonds also performed poorly, on both spread and risk free rates widening, even if trends in Q4 were more positive.

On the opposite, we recorded positive contributions from several AT1 and Tier 2 bonds that we bought late in the year as we took the opportunity of attractive valuations at the end of September / beginning of October to buy bonds at low prices, and thus benefiting from the market rebound over the last quarter of the year.

Main Metrics as of end December 2022:

Currency Risk: hedged Yield to worst: 8.5% Modified duration: 2.9 Spread Duration: 3.8 Average coupon: 4.2% Average rating: BB+

# BREAKDOWN BY INSTRUMENT TYPE BREAKDOWN BY COUNTRIES

#### Market review

2022 saw the lowest levels of performance since the financial crisis of 2008. In a very rare phenomenon on the financial markets, both the equity and bond markets closed largely in the red. Inflation\* remained the central theme of the past quarter. While inflation is coming down, we see it becoming a long-term issue, under the influence of structural changes linked to demography (aging working-age world population), changes in the energy mix (the energy transition is inflationary, as is the failure to restart investment in shale gas and oil and less access to cheap Russian gas) and de-globalisation (globalisation was a deflationary factor and lesser optimisation in the production of goods and services is now inflationary).

At the same time, we are gradually beginning to see the form that the recession\* will take, particularly in Europe, and many macroeconomic indicators have already begun to slow down.

We are therefore witnessing what we consider to be systemic change in the financial markets marked by more structural inflation coupled with a risk of recession, which could have long-term repercussions. The markets must therefore adjust to this new dynamic. This shift will lead to higher volatility and dispersion, two factors that contribute to strong market dislocation.

#### Performance OF Tikehau International Cross Assets ("Tikehau InCA") 2022

#### 1.1 Change in the net asset value of Tikehau InCA vs. prospectus performance objective

In 2022, Tikehau InCA was down 9,08% (for the R-Acc-EUR unit class) and down 8,47% (for the I-Acc-EUR unit class), net of management fees.

#### 1.2 Change in the net asset value of Tikehau InCA vs Morningstar comparables

The fund (I-Acc EUR unit) is rated 4 stars by Morningstar overall (Morningstar overall rating).

The fund (R-Acc EUR unit) is rated 3 stars by Morningstar overall (Morningstar overall rating).

The fund has outperformed its Morningstar peer group (EUR category Flexible Allocation) since its creation (in December 2013\* for the R-Acc Eur unit and May 2014 for the I-Acc-Eur unit) and in 2022 (graphs below).

#### **Analysis by Asset Class**

Overall gross performance over 2022 is -8.02%.

Past performance does not predict future returns.

Contribution to performance (gross of fees)	2019	2020	2021	2022
Equity	+16.6%	+3.9%	+16.3%	-13.4%
Bonds	+0.0%	+0.0%	+0.0%	+0.0%
Cash & short-term investments	-0.3%	-0.3%	-0.3%	-0.1%
Currency	-0.4%	-0.9%	+0.5%	-0.3%
Derivatives and hedging	-5.2%	-4.0%	-8.7%	+5.9%
Fund performance gross of fees	+10.8%	-0.8%	+7.8%	-8.0%

The Equity Component

In 2022, the equity component is the main negative contributor<sup>3</sup> to performance (negative contribution of -13.4%).

Our equity component is concentrated, with an average of 25 stocks spread across different sectors and geographies.

Top 3 positive contributors in 2022

Activision Blizzard: +0.5%

- Beiersdorf: +0.5% - Waters: +0.3%

Activision Blizzard (video game publisher) was the main positive contributor to performance. We invested in this company in September 2021, when the share price had hit a multi-year low, after initial reports of serious workplace misconduct. In addition, our analysis allowed us to conclude that the strength of Activision's franchises, the bedrock of the security's intrinsic value, had largely been preserved. The company should therefore be able to capitalize on what we believe are attractive longterm trends in the video game industry.

On 18 January 2022, Microsoft announced that it had reached an agreement with Activision's board of directors to acquire the company. From our point of view, the proposed price seems fair (premium of 45% compared to the price preceding the announcement). The transaction has not yet been completed, as it requires antitrust review in an unfavourable environment for large acquisitions in the technology sector. That being said, the announcement from Microsoft, one of the best allocators in the technology sector so far, tends to confirm our initial analysis of Activision's valuation. From an ESG point of view, the Microsoft takeover seems to us to be a favourable signal

n terms of continuing the efforts to improve the corporate culture initiated by the company since 2021 (new resources, commitments and investments concerning prevention of harassment and discrimination in particular).

Beiersdorf (consumer staples) benefited from excellent operational performance in 2022. Sales were sustained with, in particular, a marked improvement in the market share of Nivea, the group's flagship brand, and significant price increases. Margins also held up well against inflationary pressures. Waters (scientific instruments), added to our portfolio in March 2022, had a very good year according to us, driven by favourable industry dynamics as well as the success of recent instrument launches.

Top 3 negative contributors in 2022

Meta Platforms: -5.8%Alphabet: -2.4%Amazon: -1.2%

The negative contributors 4 to performance in 2022 were Meta Platforms, Amazon and Alphabet.

In a context of sharp decline in technology stocks, Meta Platforms (social networks and digital advertising) suffered from the slowdown in digital advertising linked to an unfavourable post-Covid comparison basis, combined with the sluggishness of the advertising market: one of

the first easily adjustable expenditure items in an uncertain economic context. Added to this is concern about margins linked to the announcement of a sharp increase in investments in 2023 in an economic environment that is deteriorating.

The price of Alphabet (digital advertising and cloud) has also been affected by the slowdown in digital advertising and the reduction in the group's margins. Amazon (e-commerce and cloud), added to our portfolio in April 2022, has contributed negatively following slowdowns in Cloud growth and deteriorating prospects for the group's e-commerce business in Europe.

#### Main movements within the equity component

In 2022, the main additions to our portfolio were Kone Oyj, a world leader in the elevator and escalator sector, and Starbucks, the world's leading coffee chain. We also took a position in Waters, a supplier of laboratory equipment, hardware and software for scientists, with a strong presence in the liquid chromatography sector. In the technological sectors Amazon, an e-commerce company and Cloud provider, and Adobe, a leader in creative software (Photoshop, Ilustrator, etc.) with a strong presence in digital marketing and e-commerce optimization solutions, were added.

The main disposal in 2022 was Meta Platforms (social networks and digital advertising). The risk on this position has in our view increased given the continued significantly higher-than-anticipated investments in a context more competitive than previously observed and a worsening macroeconomic environment.

After a period of outperformance and a deteriorating risk/return profile, we sold our investments in some of the portfolio companies in the consumer staples sector: PepsiCo, Procter & Gamble and Church & Dwight.

#### **The Credit Component**

In 2022, the credit component has had a neutral impact on performance (contribution of 0.0%).

Top 3 positive contributors in 2022:

- IQV 2 1/4 01/15/28: +0.3%
- RECORDATI E+387.5 10/25: +0.02%
- SMYRIS 1 3/8 0/7/01/27: +0.1%

Over the period, despite the correction in the bond markets as a whole, several bonds that we hold made a positive contribution 5 to the performance of the fund.

IQV 2 ½ 2028, added to portfolio in September, is a bond issued by IQVIA, the world leader in clinical research and health data. The company published solid results for Q3 sales in the upper range of forecasts. Net leverage was down from the previous quarter and the company appears to be looking to prepay debt, given the high interest rate environment. On the other hand, this BB issue posted a positive performance during the 4th quarter, in a market rebound context.

RECORDATI E+387.5 10/25, added to the portfolio between July and October 2022, is a bond issued by Recordati, one of Italy's leading manufacturers of pharmaceutical products for specialist and primary care. The company published good results for the 3rd quarter of 2022, marked by higher sales and lower leverage compared to the previous quarter. At the same time, this variable-rate B bond benefited from the rise in interest rates and thus closed the year in positive territory.

SYMRIS 1 3/8 07/01/27, purchased in October 2022, is an unrated bond issued by Symrise, one of the world leaders in ingredients (flavours, fragrances). The bond also made a positive contribution to the fund's performance, benefiting from resilient operating results in an inflationary environment, as well as the rebound of this asset class at the end of the year.

Top 3 negative contributors in 2022:

Tikehau Short Duration: -0.1%ESSITY 0 1/4 02/08/31: -0.01%SYK 0 03/01/19: -0.01%

Over the period, several bonds we hold contributed negatively 6 to the fund's performance.

In 2022, the house fund, **Tikehau Short Duration**, was added to the portfolio during the first half of the year, showed a negative performance over the period. 2022 has been a particularly difficult year in the bond markets with performance anchored in negative territory, with several factors such as high and persistent inflation, aggressive rate hikes by central banks, geopolitical risks and slowing macroeconomic conditions making themselves felt. At the same time, Tikehau Short Duration's exposure to the banking sector was the most significant negative contributor to performance in 2022. Over the period, banks once again played their role as proxies for general macroeconomic sentiment and underperformed the rest of the credit market.

**ESSITY 0** ¼ **02/08/31** was added in December 2022 after a sharp drop in price. This is an Investment Grade (IG)\* bond issued by Essity, one of the leaders in the hygiene and health markets (Lotus, Tena, Tork, etc.). This Investment Grade (IG) issuer suffered over the period from its long duration in an environment of markedly rising interest rates in Europe.

Finally, **SYK 0** % **03/01/29**, bought in November 2022, is an Investment Grade (IG) bond issued through Stryker, one of the world leaders in medical technology. The group's operational performance remains solid despite inflationary pressures, the share price being mainly affected at the end of the year by unfavourable interest rates.

#### Main movements within the credit component

From early 2018, our credit exposure was low, below 0.6% through March 2022, reflecting our view that equities offered more attractive yields in a low/negative interest rate environment.

Since the start of the year, the sharp increase in average yields on credit has made this asset class more attractive and has led us to initiate a gradual and selective return to credit.

In collaboration with our credit analysis team, we decided to gradually increase our credit exposure. We first invested in one of our flagship funds: Tikehau Short Duration. We then continued to increase our exposure gradually by investing directly in 40 bonds. At this stage our selection is focused exclusively on securities which, in our view, have defensive operational characteristics, capable of weathering a high-stress scenario, namely a recession combined with sharp rises in rates.

At the end of December 2022 our total credit exposure is at 20% of the portfolio (gross exposure<sup>c</sup>).

#### Hedging

The negative contribution of the equity component was partially offset by our hedging<sup>1</sup> (5.9% gross contribution). Hedging\* tends to weigh on performance in the event of a bullish equity market and conversely becomes a contributor in the event of a decline. The S&P 500, the Nasdaq and the Eurostoxx 50 (three underlying indexes of our derivative hedges) fell by 14.4%, 28.7% and 11.7% respectively in euros in 2022<sup>7</sup>.

Our hedging mainly took the form of sales of futures\*. However, we also used options\* in a tactical and agile way. In fact, notably, we alternated between shorting (through the sale of calls\*) when the equity volatility premiums were high in May 2022 and taking up long positions through the purchase of delta-hedged put positions (technique intended to hedge a portfolio against upward and downward variations of an underlying (index, etc.) when equity volatility premiums were relatively cheap in August.

In our opinion, when used wisely, options can improve InCA's risk-return ratio. In 2022, the options component posted a better return-risk ratio than futures with a return/volatility ratio of 0.84 for options, against 0.58 for futures.

	Shares	Bonds	Futures	Options
Annual return	-13.43%	0.13%	4.51%	1.34%
Annualized volatility	12.27%	0.18%	7.81%	1.60%
Return / volatility ratio	-1.09	0.71	0.58	0.84

Positioning

#### Net exposure management

In order to guide the management of the fund's net equity exposure\*, we use our proprietary top-down model. This model consists of both valuation factors, including absolute and relative valuation data, and "momentum\*" factors which, for example, favour higher exposure when markets are strong. Based on this model's results, we maintained a defensive position throughout the year to take into account worsening in the "momentum\*" factors. In 2022, we reduced our net equity exposure from 29.8% at the end of December 2021 to 21.5% at the end of December 2022.

#### Equity component positioning

Within our equity component, we are exclusively invested in what we consider to be quality companies that we believe are trading at a reasonable price. Quality has generally outperformed in periods of market stress (Covid, 2008/09 recession etc.), although surprisingly this has not been the case in 2022. Given all the remaining risks, we believe that having exposure to quality assets at a reasonable price should prove to be an appropriate positioning for 2023.

#### Conclusion

We believe the fund is well-positioned to navigate an uncertain environment marked by a lack of visibility in terms of monetary policies, high risks of recession and a readjustment to relative value opportunities. Our agility gives us the ability to adapt our positioning when deemed necessary and according to the investment opportunities we identify.

We believe that the environment is favourable to our strategy:

- We adopted a rather defensive positioning throughout 2022. In addition, to strengthen our defensive position in these volatile
  markets, we use derivatives, on which we benefit from solid internal expertise. This helps us find the most appropriate and
  profitable hedges in various market settings.
- We still have the flexibility and agility to take advantage of rapidly changing markets and major dislocations.
- We remain very selective in the area of quality, which, counter intuitively, has underperformed this year, both in the credit and equity markets.
- In our view, the credit universe now offers a more attractive risk/reward ratio than before. In this sense, we have actively increased our exposure to this asset class, retaining quality at a reasonable price at the centre of our analysis and selection.

#### Market review

2022 saw the lowest levels of performance since the financial crisis of 2008. In a very rare phenomenon on the financial markets, both the equity and bond markets closed largely in the red. Inflation\* remained the central theme of the past quarter. While inflation is coming down, we see it becoming a long-term issue, under the influence of structural changes linked to demography (aging working-age world population), changes in the energy mix (the energy transition is inflationary, as is the failure to restart investment in shale gas and oil and less access to cheap Russian gas) and de-globalisation (globalisation was a deflationary factor and lesser optimisation in the production of goods and services is now inflationary).

At the same time, we are gradually beginning to see the form that the recession\* will take, particularly in Europe, and many macroeconomic indicators have already begun to slow down.

We are therefore witnessing what we consider to be systemic change in the financial markets marked by more structural inflation coupled with a risk of recession, which could have long-term repercussions. The markets must therefore adjust to this new dynamic. This shift will lead to higher volatility and dispersion, two factors that contribute to strong market dislocation.

#### 1. PERFORMANCE OF TIKEHAU INTERNATIONAL CROSS ASSETS ("TIKEHAU INCA")

2022 (from 31 December 2021 to 30 December 2022)

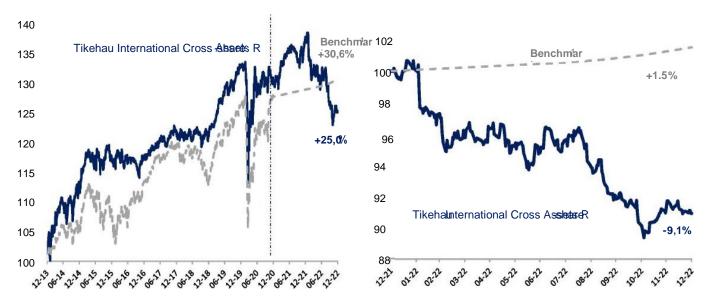

#### 1.1 Change in the net asset value of Tikehau InCA vs. prospectus performance objective

In 2022, Tikehau InCA was down 9,08% (for the R-Acc-EUR unit class) and down 8,47% (for the I-Acc-EUR unit class), net of management fees. Change in Tikehau InCA's net asset value (R-share, net of fees) 2022

Past performance does not predict future returns

Source: Tikehau IM, data from 6 December 2013(\*) to 30 December 2022 (graph on left) and from 31 December 2021 to 31 December 2022 (graph on right). Performance net of fees, displayed in EUR, according to the currency of the state of residence of

the investors the returns may increase or decrease as a result of currency fluctuations.

<sup>1</sup> Tikehau InCA's benchmark index (R-Acc EUR) is €STR + 150 bps net of management fees since January 2021. Since the fund's creation and until January 2021, Tikehau InCA's benchmark was 25% Eurostoxx 50 NR with dividends reinvested + 25% EONIA compound + 25% BofA Merill Lynch Euro High Yield + 25% BofA Merill Lynch Euro Corporate with coupons reinvested. Performance net of fees is shown in EUR, depending on the currency of the investors' country of residence, performance may increase or decrease due to currency fluctuations. The Fund's management style will never consist in reproducing the composition of a benchmark. The cited benchmark may nevertheless be used as an ex-post performance indicator, in particular for the purpose of calculating the amount of the performance fee (where applicable).

Calendar performance of Tikehau InCA since creation (R-share, net of fees)

Past performance does not predict future returns

	R-Acc-EUR unit	Benchmark <sup>1</sup>
2014	+9.8%	+4.7%
2015	+4.2%	+2.1%
2016	-0.2%	+4.7%

#### Report of the Board of Directors

#### Top 3 contributors in 2022

Past performance does not predict future returns

	Contribution 2022
Activision Blizzard	+0.5%
Beiersdorf	+0.5%
Waters	+0.3%

Source: Tikehau IM, data from 31 December 2021 to 30 December 2022. Performance net of fees, displayed in EUR, according to the currency of the

state of residence of the investors the returns may increase or decrease as a result of currency fluctuations.

The top contributors to 2022 performance were Activision Blizzard, Beiersdorf and Waters.

Activision Blizzard (video game publisher) was the main positive contributor to performance. We invested in this company in September 2021, when the share price had hit a multi-year low, after initial reports of serious workplace misconduct. In addition, our analysis allowed us to conclude that the strength of Activision's franchises, the bedrock of the security's intrinsic value, had largely been preserved. The company should therefore be able to capitalize on what we believe are attractive long-term trends in the video game industry.......

On 18 January 2022, Microsoft announced that it had reached an agreement with Activision's board of directors to acquire the company. From our point of view, the proposed price seems fair (premium of 45% compared to the price preceding the announcement). The transaction has not yet been completed, as it requires antitrust review in an unfavourable environment for large acquisitions in the technology sector. That being said, the announcement from Microsoft, one of the best allocators in the technology sector so far, tends to confirm our initial analysis of Activision's valuation. From an ESG point of view, the Microsoft takeover seems to us to be a favourable signal in terms of continuing the efforts to improve the corporate culture initiated by the company since 2021 (new resources, commitments and investments concerning prevention of harassment and discrimination in particular).

**Beiersdorf** (consumer staples) benefited from excellent operational performance in 2022. Sales were sustained with, in particular, a marked improvement in the market share of Nivea, the group's flagship brand, and significant price increases. Margins also held up well against inflationary pressures.

**Waters** (scientific instruments), added to our portfolio in March 2022, had a very good year according to us, driven by favourable industry dynamics as well as the success of recent instrument launches.

<sup>3</sup> Past performance does not predict future returns.

#### Top 3 negative contributors in 2022

Past performance does not predict future returns

	Contribution 2022
Meta Platforms	-5.8%
Alphabet	-2.4%
Amazon	-1.2%

Source: Tikehau IM, data from 31 December 2021 to 30 December 2022. Performance net of fees, displayed in EUR, according to the currency of the state of residence of the investors the returns may increase or decrease as a result of currency fluctuations.

The negative contributors <sup>4</sup> to performance in 2022 were Meta Platforms, Amazon and Alphabet.

In a context of sharp decline in technology stocks, **Meta Platforms** (social networks and digital advertising) suffered from the slowdown in digital advertising linked to an unfavourable post-Covid comparison basis, combined with the sluggishness of the advertising market: one of the first easily adjustable expenditure items in an uncertain economic context. Added to this is concern about margins linked to the announcement of a sharp increase in investments in 2023 in an economic environment that is deteriorating.

The price of **Alphabet** (digital advertising and cloud) has also been affected by the slowdown in digital advertising and the reduction in the group's margins. **Amazon** (e-commerce and cloud), added to our portfolio in April 2022, has contributed negatively following slowdowns in Cloud growth and deteriorating prospects for the group's e-commerce business in Europe.

#### Main movements within the equity component

In 2022, the main additions to our portfolio were **Kone Oyj**, a world leader in the elevator and escalator sector, and **Starbucks**, the world's leading coffee chain. We also took a position in **Waters**, a supplier of laboratory equipment, hardware and software for scientists, with a strong presence in the liquid chromatography sector. In the technological sectors **Amazon**, an e-commerce company and Cloud provider, and **Adobe**, a leader in creative software (Photoshop, Ilustrator, etc.) with a strong presence in digital marketing and e-commerce optimization solutions, were added.

The main disposal in 2022 was **Meta Platforms** (social networks and digital advertising). The risk on this position has in our view increased given the continued significantly higher-than-anticipated investments in a context more competitive than previously observed and a worsening macroeconomic environment.

After a period of outperformance and a deteriorating risk/return profile, we sold our investments in some of the portfolio companies in the consumer staples sector: **PepsiCo**, **Procter & Gamble and Church & Dwight**.

#### 2.2 THE CREDIT COMPONENT

In 2022, the credit component has had a neutral impact on performance (contribution of 0.0%).

#### Top 3 contributors in 2022

Past performance does not predict future returns

	Contribution 2022

Over the period, despite the correction in the bond markets as a whole, several bonds that we hold made a positive contribution <sup>5</sup> to the performance of the fund.

**IQV 2** 1/4 2028, added to portfolio in September, is a bond issued by IQVIA, the world leader in clinical research and health data. The company published solid results for Q3 sales in the upper range of <u>forecasts. Net</u> leverage was down from the previous quarter and the company appears to be looking to prepay debt, given the high interest rate environment. On the other hand, this BB issue posted a positive performance during the 4<sup>th</sup> quarter, in a market rebound context.

**RECORDATI E+387.5 10/25**, added to the portfolio between July and October 2022, is a bond issued by Recordati, one of Italy's leading

manufacturers of pharmaceutical products for specialist and primary care. The company published good results for the 3<sup>rd</sup> quarter of 2022, marked by higher sales and lower leverage compared to the previous quarter. At the same time, this variable-rate B bond benefited from the rise in interest rates and thus closed the year in positive territory.

**SYMRIS 1 3/8 07/01/27**, purchased in October 2022, is an unrated bond issued by Symrise, one of the world leaders in ingredients (flavours, fragrances). The bond also made a positive contribution to the fund's performance, benefiting from resilient operating results in an inflationary environment, as well as the rebound of this asset class at the end of the year.

#### Top 3 negative contributors in 2022

Past performance does not predict future returns

	Contribution 2022
Tikehau Short Duration (*)	-0.01%
ESSITY 0 1/4 02/08/31	-0.01%
SYK 0 3/4 03/01/29	-0.01%

(\*) Tikehau Short Duration E Acc EUR unit – a sub Fund of Tikehau Fund managed by Tikehau Investment Management Source: Tikehau IM, data from 31 December 2021 to 30 December 2022. Performance net of fees, displayed in EUR, according to the currency of the state of residence of the investors the returns may increase or decrease as a result of currency fluctuations.

Over the period, several bonds we hold contributed negatively<sup>6</sup> to the fund's performance.

In 2022, the house fund, **Tikehau Short Duration**, was added to the portfolio during the first half of the year, showed a negative performance over the period. 2022 has been a particularly difficult year in the bond markets with performance anchored in negative territory, with several factors such as high and persistent inflation, aggressive rate hikes by central banks, geopolitical risks and slowing macroeconomic conditions making themselves felt. At the same time, Tikehau Short Duration's exposure to the banking sector was the most significant negative contributor to performance in 2022. Over the period, banks once again played their role as proxies for general macroeconomic sentiment and underperformed the rest of the credit market.

ESSITY 0 1/4 02/08/31 was added in December 2022 after a sharp drop in price. This is an Investment Grade (IG)\* bond issued by Essity, one of the leaders in the hygiene and health markets (Lotus, Tena, Tork, etc.). This Investment Grade (IG) issuer suffered over the period from its long duration in an environment of markedly rising interest rates in Europe.

Finally, **SYK 0 03/01/29**, bought in November 2022, is an Investment Grade (IG) bond issued through Stryker, one of the world leaders in medical technology. The group's operational performance remains solid despite inflationary pressures, the share price being mainly affected at the end of the year by unfavourable interest rates.

#### Main movements within the credit component

From early 2018, our credit exposure was low, below 0.6% through March 2022, reflecting our view that equities offered more attractive yields in a low/negative interest rate environment. Since the start of the year, the sharp increase in average yields on credit has made this asset class more attractive and has led us to initiate a gradual and selective return to credit.

In collaboration with our credit analysis team, we decided to gradually increase our credit exposure. We first invested in one of our flagship funds: Tikehau Short Duration. We then continued to increase our exposure gradually by investing directly in 40 bonds. At this stage our selection is focused exclusively on securities which, in our view, have defensive operational characteristics, capable of weathering a high-stress scenario, namely a recession combined with sharp rises in rates.

At the end of December 2022 our total credit exposure is at 20% of the portfolio (gross exposure<sup>c</sup>).

#### 2.3 HEDGING

The negative contribution of the equity component was partially offset by our hedging<sup>7</sup> (5.9% gross contribution). Hedging\* tends to weigh on performance in the event of a bullish equity market and conversely becomes a contributor in the event of a decline. The S&P 500, the Nasdaq and the Eurostoxx 50 (three underlying indexes of our derivative hedges) fell by 14.4%, 28.7% and 11.7% respectively in euros in 2022<sup>7</sup>.

6 Past performances do not predict future returns. 7 Source: Bloomberg, data as of 30/12/2022.

Our hedging mainly took the form of sales of futures\*. However, we also used options\* in a tactical and agile way. In fact, notably, we alternated between shorting (through the sale of calls\*) when the equity volatility premiums were high in May 2022 and taking up long positions through the purchase of delta-hedged put positions (technique intended to hedge a portfolio against upward and downward variations of an underlying (index, etc.) when equity volatility premiums were relatively cheap in August.

In our opinion, when used wisely, options can improve InCA's risk-return ratio. In 2022, the options component posted a better return-risk ratio than futures with a return/volatility ratio of 0.84 for options, against 0.58 for futures.

	Shares -	Bonds	Futures	Options
Annual return	13.43%	0.13%	4.51%	1.34%

#### **3 POSITIONING**

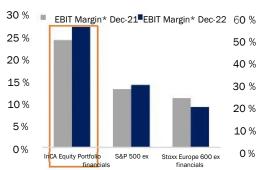

#### Net exposure management

In order to guide the management of the fund's net equity exposure\*, we use our proprietary top-down model. This model consists of both valuation factors, including absolute and relative valuation data, and "momentum\*" factors which, for example, favour higher exposure when markets are strong. Based on this model's results, we maintained a defensive position throughout the year to take into account worsening in the "momentum\*" factors. In 2022, we reduced our net equity exposure from 29.8% at the end of December 2021 to 21.5% at the end of December 2022.

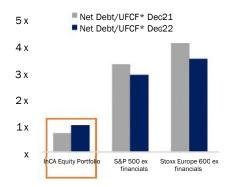

#### **Equity component positioning**

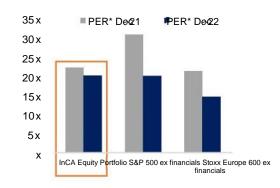

Within our equity component, we are exclusively invested in what we consider to be quality companies that we believe are trading at a reasonable price. Quality has generally outperformed in periods of market stress (Covid, 2008/09 recession etc.), although surprisingly this has not been the case in 2022. Given all the remaining risks, we believe that having exposure to quality assets at a reasonable price should prove to be an appropriate positioning for 2023.

<sup>&</sup>lt;sup>4</sup> Investors' attention is drawn to the fact that the S&P 500, the Stoxx Europe 600 and the MSCI World are not the reference indices of Tikehau InCA (i.e. €STR + 150 bps for the R-Acc-EUR unit/ €STR + 215 bps for the I-Acc EUR unit, net of fees over a recommended minimum investment horizon of 5 years), that they are used for information purposes only and that Tikehau InCA is actively managed and its strategy does not consist in reproducing the composition of a reference index. The Management Company is entirely free to compose the portfolio of Tikehau InCA and there is no restriction on the difference between the portfolio and the performance of Tikehau InCA and the benchmark.

### Independent auditor's report

To the Shareholders of Tikehau Fund 5, Allée Scheffer L-2520 Luxembourg

#### **Opinion**

We have audited the financial statements of Tikehau Fund (the "Fund") and of each of its sub-funds, which comprise the statement of net assets, the securities portfolio and the notes to the financial statements – Schedule of derivative instruments as at 31 December 2022, and the statement of operations and changes in the net assets for the year then ended, and the other notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion

#### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

# Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
  appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
  Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young Société anonyme Cabinet de révision agréé

#### Other notes to the financial statements

#### 1 - General information

Tikehau Fund (the "Company") was incorporated for an unlimited period in the Grand Duchy of Luxembourg on March 18, 2014 as a "société anonyme" under the Luxembourg law of August 10, 1915 related to commercial companies and is organised as a variable capital company ("société d'investissement à capital variable" or "SICAV") under Part I of the modified law of December 17, 2010 related to undertakings for collective investment.

The Company is registered at the Luxembourg Commercial Register under the number B186113 and is established at 5, allée Scheffer, L-2520 Luxembourg. Tikehau Investment Management, registered with number 491 909 446 under the Register of Commerce and Companies of Paris, France, has been designated to serve as management company of the Company. It is regulated in France by the "Autorité des Marchés Financiers", the financial supervisory authority, and is authorised under number GP-07000006 as a UCITS management company in compliance with Directive 2014/91/EU.

As at December 31, 2022, four sub-funds are in operation:

Tikehau Fund - Credit Plus Fund (liquidated on 07/12/22)

Tikehau Fund - Tikehau SubFin Fund

Tikehau Fund - Tikehau Short Duration

Tikehau Fund - Tikehau Global Short Duration (liquidated on 22/12/22)

Tikehau Fund - Tikehau International Cross Assets

Tikehau Fund - Tikehau Impact Credit

#### 2 - Principal accounting policies

#### 2.1 - Presentation of the financial statements

The Company's financial statements have been prepared and presented in accordance with the Luxembourg regulations relating to undertakings for collective investment in transferable securities.

#### 2.2 - Portfolio valuation

Transferable securities and money market instruments admitted to an official listing on a stock exchange or dealt with in on another market in an OECD member country which is regulated, operates regularly and is recognised and open to the public provided, are valued on the basis of the last known price. If the same security is quoted on different markets, the quotation of the main market for this security will be used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation will be done in good faith by the Board of Directors or its delegate with a view to establish the probable sales price for such securities.

Non-listed securities are valued on the basis of their probable sales price as determined in good faith by the Board of Directors or its delegate. Shares or units of UCITS or other UCIs are valued at the latest available net asset value per share. Derivatives are valued at market value.

The Board of Directors may adjust the value of any investment if, having regard to its currency, marketability, applicable interest rates, anticipated rates of dividend, maturity, liquidity or any other relevant considerations, it considers that such adjustment is required to reflect the fair value thereof.

If the Board of Directors deems it necessary, a specific investment may be valued under an alternative method of valuation chosen by the Board of Directors.

The abbreviation "XX" used in the securities portfolio pertains to perpetual maturities.

#### 2.3 - Net realised profits or losses on sales of investments

The profits and losses on sales of securities are determined on the basis of average cost and are recorded in the Statement of Operations and Changes in Net Assets under the caption "Net realised profit / (loss) on sales of securities".

#### 2.4 - Foreign currency translation

The exchange rates between EUR and the other currencies of the Fund are:

1 EUR	=	1.4459	CAD	1 EUR	=	0.98716	CHF	1 EUR	=	0.88695	GBP
1 EUR	=	11.1206	SEK	1 EUR	=	1.06665	USD				

#### Other notes to the financial statements

#### 2 - Principal accounting policies

#### 2.5 - Combined financial statements

The Company's financial statements are expressed in EUR. The combined statements are the sum of the statements of each sub-funds.

Transaction and acquisition costs denominated in foreign currencies are converted into the accounting currency of each sub-fund based on the exchange rate in force on the date of the transaction or acquisition.

Assets and liabilities denominated in foreign currencies are converted into the accounting currency of each sub-fund based on the exchange rate in force at the end of the financial year. Any resulting profits or losses are recognised in the Statement of Operations and Changes in Net Assets.

As at 31 December 2022, the total of cross-Sub-Funds' investments amounts to EUR 59,723,835.22 and therefore total combined Net Asset Value at year-end without cross-investments would amount to EUR 2,938,767,702.44.

The figures presented in the financial statements tables may in some cases show non-significant differences due to the use of rounding. These differences do not affect in any way the fair view of the financial statements of the Fund.

Sub-funds	Cross investments	Amount (in EUR)	% of the NAV of the investing sub-fund
Tikehau Fund - Tikehau International Cross Assets	TIKEHAU SHORT DURATION E- ACC-EUR	59,723,835.22	2.90%

#### 2.6 - Valuation of options contracts

Options traded on a regulated market are valued at their last known price on the valuation date or on the closing date. OTC options are marked to market based upon prices obtained from third party pricing agents.

For the details of outstanding option contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.7 - Valuation of forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued at the closing date by reference to the rate of exchange applicable to the outstanding life of the contract.

The unrealised appreciation or depreciation is disclosed in the financial statements.

For the details of outstanding forward foreign exchange contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.8 - Valuation of futures contracts

Future contracts are valued at their last known price on the valuation date or on the closing date.

The unrealised appreciation or depreciation on financial futures is disclosed in the financial statements.

Related deposit margins/margin calls are included under Cash at banks and liquidities or Bank overdrafts in the Statement of Net Assets. For the details of outstanding futures contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.9 - Dividend and interest income

The contracts marked with an asterisk are those specifically related to the hedging of a class of shares.

#### 2.10 - Transaction fees

The transaction fees, i.e. fees charged by the Depositary Agent for securities transactions and similar transactions are recognised in the Statement of Operations and Changes in Net Assets under the caption "Transaction fees". The transactions fees amounted to EUR 363,795.49 for the year under review.

#### 3 - Management and Management Company fees

The Company pays for the various sub-funds and by Class of Shares a management fee to the Management Company calculated and accrued on each valuation day as a percentage of the net assets attributable to the relevant Class of Shares and payable monthly in arrears.

#### Other notes to the financial statements

#### 3 - Management and Management Company fees

#### 4 - Performance fees

In addition, the Management Company is entitled to receive a performance fee accrued on each valuation day and payable at the end of the performance period (i.e. year). The performance fee is payable if the variation of the Net Asset Value per share over the performance period exceeds the variation of the benchmark over the same performance period, taking subscriptions and redemptions into account.

Classes of Shares S and E are not subject to performance fee.

The performance fees for the year 2022 are presented in the caption "Performance fees" in the Statement of Operations and Changes in Net Assets.

#### Other notes to the financial statements

#### Other notes to the financial statements

#### 4 - Performance fees

Sub-funds	Share Class	ISIN Code	Sub-fund currency	Amount of performance fees as at 31/12/2022 (in Sub-fund currency)	Average NAV of the Share Class (in Sub-fund currency)	% in the Share Class average NAV
Tikehau Internation- -al Cross	Class C - EUR - Capitalisation	LU2147879204	EUR	0.950	38,295,632.06	0.000
Assets	Class R - EUR - Capitalisation	LU2147879543	EUR	4346.380	518,098,007.58	0.001
	Class F - EUR - Capitalisation	LU2147879626	EUR	298.650	65,704,826.75	0.000
	Class I-R - EUR - Capitalisation	LU2147879899	EUR	446.420	40,452,878.76	0.001
	Class SI - EUR – Capitalisation	LU2147880129	EUR	7391.950	68,988,838.18	0.011

The performance amounts of the above-table are those accrued from January 1, 2022 to December 31, 2022 and are not necessarily indicative of future amounts paid for the whole year.

#### 5 - Depositary and Administration fees

The Depositary and the Administration agent are paid by the Company on the basis of business practice in Luxembourg. These fees are calculated on the basis of the daily net assets of the sub-funds and are payable monthly in arrears.

#### 6 - Subscription tax ("Taxe d'abonnement")

Under legislation and regulations currently prevailing in Luxembourg, the Company is exempt from tax except for the "taxe d'abonnement". Classes of Shares reserved to institutional investors are subject to a tax rate of 0.01% p.a. (Class of Shares I, S, SI and K1) and those reserved to retail investors are subject to a tax rate of 0.05% p.a. (Class of Shares, E, C, I-R, R, F, SI, SI-R, SF, AF, A, S, K1 and K2). The tax is calculated and payable quarterly based on the net assets of the Company at the end of the relevant quarter.

#### 7 - Master-Feeder structure

The sub-fund Tikehau Credit Plus Fund was Feeder Fund of the Master Fund Tikehau Credit Plus, constituted under French laws and qualifying as Master UCITS under Directive 2009/65/EC, meaning that it invest in practice substantially all of its asset into Master Fund and will therefore hold virtually no or very low percentage of its asset in ancillary liquid assets. The Feeder Fund invested in the Class of Units E of Master Fund until the date of its liquidation on December 07, 2022.

The Master Fund Tikehau Credit Plus has been established on June 25, 2007. It has appointed Tikehau Investment Management as Management Company, being also the Management Company of the Feeder Fund.

The investment objective of the Master Fund Tikehau Credit Plus was to realise an annual net performance above Euribor 3M +285 bps with an investment horizon of over 3 years.

At the level of the Master Fund, the fees, charges and expenses associated with the investments are an annual management fee and other expenses of the Master Fund, as described in this prospectus.

As at December 07, 2022, the maximum management fees charged by the Master Fund for the Class of Units held by the Feeder Fund is 0.14% for the Master Fund Tikehau Credit Plus.

As at December 07, 2022, the total fees of the Feeder and Master Funds are as follows:

Feeder Fund	Total fees	Currency	% average NAV
Tikehau Credit Plus Fund	13,186.22	EUR	0.79%
Master Fund	Total fees	Currency	% average NAV
Tikehau Credit Plus	424 31	FUR	0.14%

Complete information about the Master Fund, including prospectus, statutes, annual and semi-annual reports and KIIDs can be obtained free of charge at the Company's and Management Company's registered office.

#### Other notes to the financial statements

#### 9 - Swing pricing ADL and Gating

A prospectus dated January, 2023 has been issued in order to introduce the sub-fund Tikehau Impact Credit and to detail its swing mechanism.

The swing pricing mechanism is applied on the capital activity at the level of the sub-fund Tikehau Impact Credit and does not address the specific circumstances of each individual investor transaction. As at the date of this Prospectus, the Management Company has determined that the swing factor will not exceed 2% of the Net Asset Value per Share Class of the sub-fund Tikehau Impact Credit.

The NAV and the NAV per Share disclosed in the financial statements and in the "Key figures" do not include Swing Pricing adjustments.

For the year ended December 31, 2022, there were no swing adjustments applied to the sub-fund Tikehau Impact Credit.

#### 10 - Other expenses

As at December 31, 2022, the other expenses recorded in the statements of operations of changes in net assets are mainly composed of other administrative fees and director fees.

For the sub-fund Tikehau Credit Plus Fund, the Board of Directors of the Company decided through a Circular Resolution dated October 13, 2014 that the following fees will be charged to the Management Company:

- Formation expenses
- Depositary fees
- Domiciliary fees
- Transfer agency fees
- Audit fees
- CSSF fees

#### 11 - Liquidation of sub-funds

As at 31 December 2022, the outstanding cash for the Sub-fund Tikehau - Credit Plus Fund (liquidated on 07 December 2022) amounts EUR -1,401.56.

And for the Sub-fund Tikehau - Global Short Duration (liquidated on 22 December 2022) amounts USD 32,546.60 EUR 2,401.02 and GBP 123.44.

#### 12 - Changes in the composition of securities portfolio

The details of the changes in portfolio composition for the year ended December 31, 2022 are at the disposal of the shareholders at the registered office of the Company and are available upon request free of charge.

#### 13 - Significant events during the year

THE FACTS

On the night of Wednesday 23rd to Thursday 24th February 2022 and after several weeks of tensions, Russian military forces entered Ukraine. As a result, the international community has imposed extensive sanctions against Russia over the last few days, including the exclusion of some Russian banks from the SWIFT interbank network.

#### IMPACT ON FINANCIAL MARKETS

Unsurprisingly, this attack initially led to a strong risk aversion in the markets, particularly in Europe. This was followed by a more volatile and uncertain period, during which the markets regained some of the initial losses.

The Russian equity market plunged by more than 35%, the worst fall in the index' history, while oil exceeded 100 dollars per barrel (Brent) for the first time since 2014. At the same time, the price of major commodities soared, including natural gas.

#### Other notes to the financial statements

#### 13 - Significant events during the year

#### **RESHUFFLING THE CARDS FOR 2022**

While the return of dispersion and volatility was already on the agenda since the beginning of the year, these recent events have amplified the trend.

This geopolitical crisis is taking place in a context of rising prices, and central banks are just beginning their cycle of monetary normalisation. This new uncertainty has added complexity to the question of the return of inflation, in a context where Russia remains a key supplier of natural gas to Europe (around 40% of European consumption).

The market is therefore assessing the extent of this conflict and the consequences that it could have on the macroeconomic environment:

- If commodity prices were to rise, what would the impact on inflation be and what positions could central banks adopt?
- In addition to historically high inflation, this crisis could have a considerable impact on economic growth. Could the theme of stagflation come back to the forefront?
- Finally, could a gradual easing of the conflict between Ukraine and Russia, coupled with a new wave of support from central banks, create a potential scenario that sees a return to normality?

The possible outcomes remain complex, and short-term visibility continues to be limited.

#### **OUR PORTFOLIOS' POSITIONING**

It is important to note that, within our credit and equity funds, we do not have any direct exposure to Russia or Ukraine. In line with our investment philosophy at Tikehau Capital, we only take significant exposure to areas where we have local resources and where we understand the underlying dynamics.

Moreover, our indirect exposure remains very limited. Indeed, within our equity funds, none of our companies generate more than 5% of their sales in Ukraine and Russia, while amongst our credit issuers (c. 300 issuers), only two generate more than 10% of their sales in Russia. In addition, none have Russian companies or oligarchs as reference shareholders.

Finally, we have long warned about the return of inflation and its structural nature. Across our portfolios, we have therefore been favouring exposure to sectors and companies that are more resilient to rising prices, thanks for example to their low capital-intensive activities, their strong pricing power, or the implementation of commodity price hedges. This strategy, which we have been adopting for a while, is designed to position our portfolios for more structural inflation.

Today, we maintain our cautious approach to the equity and bond markets, generally maintaining lower exposures, high levels of liquidity, and low durations

We reiterate our conviction that in an environment marked by uncertainty, dislocation and more generally dispersion, portfolio management based on in-depth fundamental analysis remains key.

#### 14 - Subsequent events

"The Credit Suisse turmoil came to a conclusion on the weekend of 18-19 March 2023. Late on Sunday, Swiss authorities announced that UBS was taking over Credit Suisse in full for a total consideration of CHF 3bn. The details of the deal were extremely negative for AT1 holders of Credit Suisse with the FINMA (Swiss banking regulator) notifying investors of a complete write-down of the nominal value of all AT1 instruments of Credit Suisse, representing a total amount of around CHF 16 billion. As a result, all Credit Suisse AT1 instruments were written down to zero.

As of  $30^{th}$  December 2022 close, we were holders of the 7.5% NC23, 6.375% NC26 and 9.75% NC27 AT1 instruments in the fund – representing 0.71%, 0.96% and 0.28% of total exposures, respectively.

CREDIT SUISSE 6 3/8 CoCo Perp C08/26	USH3698DCP71
CREDIT SUISSE 7 1/2 C23 S4598 CoCo-PERP	XS0989394589
CREDIT SUISSE 9 3/4 CoCo Perp C 06/27	USH3698DDQ46

As of Friday 17<sup>th</sup> March 2023 close, we were holders of the 7.5% NC23 and 6.375% NC26 instruments in the fund – representing 0.39% and 0.22% of total exposures, respectively.

CREDIT SUISSE 6 3/8 CoCo Perp C08/26	USH3698DCP71	In portfolio & deregistration as of 24/04/2023
CREDIT SUISSE 7 1/2 C23 S4598 CoCo-PERP	XS0989394589	In portfolio & deregistration as of 21/03/2023
CREDIT SUISSE 9 3/4 CoCo Perp C 06/27	USH3698DDQ46	Sold on 17/03/2023 before deregistration as of 21/03/2023

All combined, TSF exposure to Credit Suisse AT1 instruments had a -1.59% negative impact to the fund performance over the first quarter of 2023."

# Tikehau Fund Additional unaudited information

#### Additional unaudited information

#### Remuneration policy

#### **Principles**

This compensation policy is designed in accordance with the provisions related to compensation of the Directive 2001/61/EU of the European Parliament and Council of June 8, 2011 (hereinafter the "AIFM directive") and the directive 2014/91/EU of the European Parliament and Council of July 23, 2014 (hereinafter the "UCITS V directive") applicable to the asset management sector.

#### I. SCOPE OF APPLICATION

#### I.1. Identified Employees

The process of identifying the regulated population is carried out jointly by the Human Capital department, the Compliance department and is submitted to the "Nominations and Remuneration Committee" of Tikehau Capital, the parent company of Tikehau IM.

Given the internal organisation of Tikehau IM, the identified personnel (hereinafter the "Identified Personnel") within the meaning of the AIFM Directive and the UCITS V Directive is composed of the following categories of personnel:

- The executives of Tikehau IM,
- The portfolio managers,
- The heads of the control functions, namely the Head of Risk of Tikehau IM, the RCCI of Tikehau IM and the Head of Internal Audit of Tikehau Capital,
- The head of the support functions (Marketing, HR, administrative managers, etc.) of Tikehau IM,
- All employees with a global remuneration in the same remuneration bracket as Tikehau IM's general management and risk takers, and who have a significant impact on the risk profile of Tikehau IM or of the UCITS and AIFs managed by Tikehau IM.

#### 1.2. Remuneration principles within Tikehau IM

The total compensation of Tikehau IM's employees is made of the following elements:

- Fixed remuneration:
- Annual variable compensation;
- Employee savings schemes that do not fall within the scope of the AIFM and UCITS V directives.

Each employee is subject to all or part of these different remuneration components depending on his/her responsibilities, skills and performance.

The variable remuneration is determined on the basis of Tikehau IM's financial and extra-financial performance and the individual performance of the employee, assessed on the basis of the achievement of qualitative and quantitative objectives and his level of commitment. The evaluation of the individual performance takes into account the participation of the employee in Tikehau IM's policy on environmental, social and governance criteria (hereafter "ESG") which integrates sustainability issues as well as the respect of the applicable procedures in this field. It also takes into account the respect of the regulations in force as well as the internal policies and procedures applicable to compliance and risk management.

It is specified that any variable remuneration is not a vested right, including the deferred portion which is only paid or vested if (i) it is justified by the performance of the business unit and the individual concerned and (ii) its amount is compatible with the financial situation of Tikehau IM.

Thus, the total amount of variable remuneration is generally significantly reduced when the portfolio management company and/or the portfolios it manages record poor or negative financial performance.

The remuneration terms and conditions are established in accordance with the applicable regulations.

Finally, it is specified that:

- Guaranteed variable compensation is prohibited, except in the event of employment outside of Tikehau group. In this case, the warranty is strictly limited to the first year.
- The use of coverage or insurance strategies that would limit the scope of this compensation policy for the Identified personnel is strictly prohibited.

#### 1.3. Rules applicable to the variable part of the remuneration of members of the relevant employees

Tikehau IM has set up a deferred variable remuneration system applicable to members of the Identified Personnel who are not excluded in application of the principle of proportionality in accordance with Section 1.4 below (the "Relevant Employees") in compliance with the regulations in force.

Upon the attainment of the applicable threshold, members of the Identified personnel are subject to the following rules for the variable portion of their remuneration:

- at least 50% of the variable portion of the compensation is deferred;
- The deferral of this portion of the variable compensation is applied on a period of minimum three years;
- The deferred portion of the variable compensation is not definitively acquired by the employee until the effective payment date and it cannot be received by the employee before this date;
- the remaining part of the variable part of the remuneration is paid immediately in cash.

#### Additional unaudited information

#### Remuneration policy

#### 1.4. Structure of the variable remuneration of the relevant employees

In application of the principle of proportionality, Tikehau IM excludes from the requirements relating to the remuneration of Relevant employ, any employee who is part of the Identified Personnel:

- whose variable remuneration is lower than one of the two following thresholds:
  - o the percentage of the variable remuneration is less than 30% of the fixed remuneration; or
  - o the amount of the variable remuneration is less than €200k gross or its equivalent in foreign currency.

or

 who does not have a significant influence on the risk profile of Tikehau IM or of the UCITS and AIF managed by Tikehau IM.

Any Concerned Employee will see his variable remuneration structured as follows:

- At least 50% of the variable remuneration will take the form of financial instruments (hereinafter "Eligible Financial Instruments", see Section 2), which may take the form of Cash Units (see Section 2.2) and/or listed shares of Tikehau Capital, the parent company of Tikehau IM (see Section 2.3), and its payment will be deferred over a minimum of 3 years,
- the deferred payment in Eligible Financial Instruments will be indexed to the performance of an index composed of UCITS and FIAs managed by Tikehau IM (hereinafter "Benchmark Index", see Section 2.1),
- the deferred payment will be made in equal tranches
- the remaining part of the variable remuneration will take the form of a cash payment, paid in year N (date of grant of the variable remuneration for the previous year).

#### 1.5. Payment and acquisition of the variable compensation of the relevant employees

The vesting and payment of the deferred variable compensation elements are subject to (i) the achievement of performance conditions related to the company's results and individual criteria (including appropriate risk management), (ii) the absence of fraudulent behaviour or serious error in relation to applicable regulations and internal policies and procedures regarding compliance and risk management and ESG, and (iii) an attendance condition.

These conditions shall be precisely and explicitly defined at the time of granting such remuneration.

Where any of the above vesting conditions are not met, the unvested portion of the deferred variable remuneration may be so reduced, or not paid. Without prejudice to the general principles of national labour law, in the event that the performance of Tikehau IM's business involves the generation of a negative net result, Tikehau IM will be entitled to recover all or part of the variable remuneration previously deferred, announced but not yet vested.

#### 2. ELIGIBLE FINANCIAL INSTRUMENTS

#### 2.1. Definition of the Benchmark Index

The deferred payment in Eligible Financial Instruments is indexed on the performance of the Benchmark Index.

The Benchmark Index is composed of UCITS and FIAs managed by Tikehau IM, representing the 4 main asset management strategies of Tikehau IM:

- Capital Markets Strategies (formerly known as Liquid Strategies),
- Private Debt,
- Real Assets (formerly known as Real Estate),
- Private Equity.

Tikehau IM shall select, at the moment of the allocation of the variable compensation, the representative fund(s) of each of the four strategies, taking into account the opinion of the Head of Risk and the Head of Compliance and internal Control, and will determine the respective weight of each of the four strategies on the basis of the ventilation of the assets at the end of the financial year to which the variable remuneration relates. The funds and their respective weight shall remain identical during the deferred years for the variable compensation relating to a given year.

The performance of the Benchmark Index will be calculated by measuring the evolution in the net asset value per share of the relevant funds between 31 December of the financial year preceding the date of initial award date of the Eligible Financial Instruments and 31 December of the financial year preceding the date of effective acquisition of the Eligible Financial Instruments.

Shall one of the funds whose performance is taken into account for the calculation of the Benchmark Index be liquidated before the acquisition date of one or several portions of deferred compensation, it shall be substituted for calculation purposes of the Benchmark Index after this liquidation by a fund considered as representative of the business line of Tikehau IM.

#### 2.2 Implementation of Cash Units as a support for the alignment of interests

Tikehau IM can implement a Cash Units framework consisting in variable cash compensation, blocked and deferred on a minimum of three years per equal tranche, the valuation of which is based on the performance of the Benchmark Index on the period considered.

#### 2.3. Tikehau Capital Shares

Tikehau IM can use Tikehau Capital shares as Eligible Financial Instruments.

These free share grants would take place in accordance with the requirements of Articles L. 225-197-1 et seq. of the French Commercial Code. The grant shall be structured in a minimum of three equal tranches. The number of shares of each of the tranches definitively acquired would be based on the performance of the Benchmark Index.

In case of a negative performance of the Benchmark Index on a period considered, the final number of granted shares can be proportionally reduced and rounded down to the next whole number.

#### **Additional unaudited information**

#### **Remuneration policy**

The grant of the free shares does not allow to increase the number of granted shares, a compensatory mechanism under the form of Eligible Financial Instruments could be implemented to compensate for the shortfall of the beneficiaries.

Breakdown of fixed and variable remuneration as of 31/12/2022

#### Global Risk Exposure

#### RISK MEASUREMENT AND THE CALCULATION OF GLOBAL EXPOSURE AND COUNTERPARTY RISK

The Management Company uses the commitment approach for the calculation of the Global Exposure of the SICAV.

#### CONSIDERATION OF THE MACROECONOMIC CONTEXT

The economic and geopolitical environment remains uncertain and the companies or assets in which the funds managed by the management company have invested may be negatively affected in terms of their valuation, cash flow, prospects and capacity to distribute dividends, pay interest or, more generally, meet their commitments. The management company remains extremely cautious as to the opportunities that arise and the current macroeconomic environment encourages it to continue to remain prudent and rigorous in its investment choices.

#### RISK EXPOSURE TO THE SITUATION IN UKRAINE AND RUSSIA

The management company and the group to which it belongs do not have any employees, offices or subsidiaries domiciled in Russia or Ukraine. Since the outbreak of the crisis, a thorough review of all portfolio companies held through the funds managed by the management company has been conducted and has concluded that none of these companies are domiciled in Ukraine or Russia and that the proportion of their revenues exposed to these regions is not material.

#### Entry into force of the key information document (KID)

On January 1, 2023, in accordance with the European PRIIPS regulation, the Key Investor Information Document (KIID) is replaced by the Key Information Document (KID). The KID is a new document format which aims to present to investors the characteristics of financial investment vehicles in a clear and synthetic way. The change from the KIID to the KID has had the effect of modifying the risk indicator level of certain share class as indicated in the table below. KIDs are available on the Management Company's website.

#### Tikehau SubFin Fund

The change from the KIID to the KID has had the effect of modifying the risk indicator level of the sub-fund for certain share classes as indicated in the table below:

Sub-fund	Share class	ISIN		
			SRRI (Old)	SRI (new)
Tikehau SubFin Fund	A-Acc-EUR	LU1585264176	4	3
Tikehau SubFin Fund	A-Dis-EUR	LU1585264507	4	3
Tikehau SubFin Fund	I-Acc-EUR	LU1585264762	4	3
Tikehau SubFin Fund	A-Acc-CHF-H	LU1585264259	4	2
Tikehau SubFin Fund	A-Acc-USD-H	LU1585264333	4	2
Tikehau SubFin Fund	A-Acc-GBP-H	LU1585264416	4	2
Tikehau SubFin Fund	S-Acc-EUR	LU1585264846	4	3
Tikehau SubFin Fund	I-R-Acc-EUR	LU1585264929	4	2
Tikehau SubFin Fund	AF-Acc-EUR	LU1805016570	4	3
Tikehau SubFin Fund	E-Acc-EUR	LU1585264689	4	3

#### **Tikehau Short Duration**

The change from the KID to the KID has had no impact on the level of the risk indicator of the sub-fund. The KID of the sub-fund's share class are available on the Management Company's website.

#### **Tikehau International Cross Assets**

The change from the KIID to the KID has had the effect of modifying the risk indicator level of the sub-fund for certain share classes as indicated in the table below:

Sub-fund	Share class	ISIN	SRRI (Old)	SRI (new)
Tikehau International Cross Assets	C-Acc-EUR	LU2147879204	4	3

#### **Additional unaudited information**

Securities Financing Transactions Regulation (SFTR) Disclosures

The Company does not use any instruments falling into the scope of SFTR.

#### Additional unaudited information

#### SFDR (Sustainable Disclosure Regulation)

#### 1-DATA SOURCES & LIMITATIONS

#### **Financial Data**

The financial data is extracted from our Information Systems and is the data used for the accounting reporting.

#### **ESG** data

We rely on SFDR Principal Impact Solution from ISS ESG to collect the ESG data required for PAI disclosures and as such rely on ISS ESG definitions and calculations for each PAI.

ISS ESG relies on data reported by companies but can also use estimates.

We rely on EU Taxonomy solution from ISS ESG to report the Taxonomy related data. ISS ESG relies on data reported by companies but can also use estimates.

We rely on S&P Trucost for the scope 1,2 and 3 sector average of each Global Industry Classification Standard (GICS®) sector.

We try to limit the number of overrides to the minimum<sup>1</sup>.

#### **Indicator Proxies**

It has to be noted that ISS ESG is committed to attempt to follow the regulatory-prescribed metrics as closely as possible within the SFDR Principal Impact Solution and Taxonomy Solution. As disclosed in ISS ESG's methodologies, in some occurrences, proxies are used, and the definitions of the indicators do not exactly match the regulatory definitions.

Most of the time, the use of proxies is justified by lack of data availability at companies' level. The proxy indicators disclosed within the report are the following:

- Activities negatively affecting biodiversity-sensitive areas: ISS ESG links controversies to some, but not all, of the standards
  referenced in the Principal Adverse Impact (PAI) definition of "activities negatively affecting biodiversity-sensitive areas".
   However, the standards/directives referenced in the regulation overlap with those applied in the proxy to a large extent.
- Investments in companies without carbon emission reduction initiatives: For the purpose of this PAI indicator, ISS ESG
  considers companies to have carbon emission reduction initiatives aimed at aligning with the Paris Agreement only if they
  have set themselves or are formally committed to setting themselves carbon reduction targets approved by the Science
  Based Targets initiative.

#### Calculation logics and methodological limitations

ISS ESG is committed to attempt to follow the regulatory-prescribed metrics as closely as possible within the SFDR Principal Impact Solution but in some occurrences, calculation logics doesn't exactly match the regulatory requirements. The following shortcomings have been identified:

Based on our analysis, the computation of the PAI "Carbon footprint" is not consistent with the latest ESMA guidelines: the value "for all investments" used by ISS ESG does not include cash, liquidity ancillary, and derivatives instruments. It can lead to a slight overestimation of the indicator compared to the regulatory guidelines.

The PAI "GHG intensity of investee companies" which can also be designated as Weighted Average Carbon Intensity is manually retreated at fund level as described in the section "Sustainability indicators of the fund - weighted average carbon intensity (WACI)" of this document and the value of all investments is consistent with the regulatory requirements.

#### Specific case of Sustainable Instruments

For Green Bonds and Sustainability Linked Bonds, the PAI and Taxonomy indicators reported are those of the corporates that have issued the sustainable instruments but are not specific on the project or activities covered by the Bond framework. This is due to data availability.

#### Data source updates

#### Funds financial data:

Fund financial data is based on the accounting inventory of the reference period.

#### Regarding ISS ESG data:

- · Market capitalization and EV used is the most recent (same quarter within the calendar year reference period)
- For the PAI indicator "GHG intensity of investee companies", Carbon emissions and Revenue data used are the latest available, i.e., N-1 for Q4, N-2 for other quarters compared to the calendar year reference period)
- The other indicators use the latest available data with a variable temporality depending on the indicators.

<sup>&</sup>lt;sup>1</sup> We allow data overrides when a data point is deemed to be an outlier or corrupted.

• The Taxonomy indicators use the latest available data with a variable temporality depending on the indicators.

#### Regarding S&P Trucost ESG data:

The Emission Factor scope 1,2 and 3 of the investee company's industry are the latest available at the provider level (N-2).

#### 2-COMPUTATION OF REGULATORY INDICATORS AT FUND LEVEL

#### Pai corporate assets

The regulation requires the disclosure of PAI indicators to be based on, at a minimum, the average of four calculations made on March 31<sup>st</sup>, June 30<sup>th</sup>, September 30<sup>th</sup>, and December 31<sup>st</sup> of a reference period. We rely on the standard applied by ISS ESG to compute PAI indicators at portfolio level unless otherwise specified.

For each PAI, we disclose the percentage of the portfolio that is "covered" by data (i.e where the required indicator is known for the corporates) within the "eligible" securities (that is, the percentage of the portfolio invested in securities<sup>2</sup> the PAI is measuring).

#### Taxonomy use of proxy

As stated in Article 17(2)(b) and Recital (35) of the Delegated Regulation, when Taxonomy alignment of investments is not available from the public disclosures of investee companies, then the use of 'equivalent information' from investee companies or third-party providers is permitted.

In such exceptional cases and only for those economic activities for which complete, reliable and timely information could not be obtained, financial market participants are allowed to make complementary assessments and estimates on the basis of information from other sources. Assessments and estimates should only compensate for limited and specific parts of the desired data elements and produce a prudent outcome. Financial market participants should clearly explain the basis for their conclusions as well as the reasons for having to make such complementary assessments and estimates for the purposes of disclosure to end investors.

To provide disclosures in assessing the alignment of corporate issuers with Taxonomy criteria, we decided to use data from ISS ESG to deal with the lack of corporate disclosures. Once the reporting prescribed by Regulation (EU) 2021/2178 on the Taxonomy-aligned activities of non-financial undertakings (from January 2023) and financial undertakings (from January 2024) starts, the disclosure of Taxonomy-aligned investments is expected to become more straightforward.

#### **Taxonomy alignement**

Taxonomy indicators at fund level have been computed relying on the standard applied by ISS ESG Taxonomy Solution:

- "Aligned": ISS ESG collects the company's reported data and the company discloses that it operates in alignment with all relevant Taxonomy criteria
- "Likely aligned": ISS ESG proxy data indicates alignment with all relevant Taxonomy criteria

The data disclosed in the report is at end of 2022 and has been aggregated as per the following rules to match the regulatory reporting template:

- Taxonomy-Aligned no gas and nuclear (Turnover, CapEx, OpEx) is the sum of fund relevant indicators flagged as "Aligned" or
  "Likely Aligned", and not involved in the fossil gas and nuclear sectors under ISS ESG Taxonomy methodology.
- Non-Taxonomy-aligned (Turnover, CapEx, OpEx): is the sum of fund relevant indicators flagged as "Potentially Aligned", "Likely Not Aligned", "Not Aligned", "Not Collected" and "Not Covered".
- Taxonomy-aligned Nuclear (Turnover, CapEx, OpEx) is the sum of sum of fund relevant indicators flagged as "Aligned" or
  "Likely Aligned" and disclosed as involved in the fossil gas and nuclear sectors under ISS ESG Taxonomy methodology. There
  is currently no way to split indicator between fossil gas and nuclear relying on ISS ESG data, so we decided to disclose the
  nuclear and fossil gas aggregated under the nuclear section.
- Taxonomy-aligned Fossil Gas (Turnover, CapEx, OpEx): this indicator is assigned to 0 as the indicator is disclosed within the nuclear indicators due to the limitations highlighted above.

#### **Taxonomy Regulation**

The Management Company has decided to bring the Fund's documentation in line with Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to facilitate sustainable investment (the Taxonomy Regulation). Compliance with the Taxonomy Regulation means that we can ensure unitholders are kept better informed and improve transparency as regards sustainable investment objectives. From 2022 and in connection with this regulation, the Management Company will implement its reporting obligations under the Taxonomy Regulation ((EU) 2020/852).

#### 3-SUSTAINABILITY INDICATORS OF THE FUND

#### Weighted average carbon intensity (WACI)

The weighted average carbon intensity (WACI) of the funds and their investment universe is monitored as part of our non-financial approach.

To ensure the highest possible coverage, we use a several data sources. We use the corporate data (greenhouse gas ("GHG") emissions scope 1,2 and 3 per million euros of turnover) when it is available from ISS ESG and, if not, we rely on the corporate's sector average provided by S&P Trucost.

It has to be noted that following the regulatory clarifications on the computation of the PAI "GHG intensity of investee companies" which is the same indicator as the WACI, we changed our methodology and there is no more rebalancing of the weight of the fund's investment to exclude investment with non-disclosed values and investments not promoting Environmental and Social characteristics (for example cash). This makes the comparison with Benchmark Index less straightforward.

<sup>&</sup>lt;sup>2</sup> For example, investments not promoting environmental or social characteristics are not included.

#### Indicators used under the SRI label approach

The fund granted with the SRI label follows the requirements of the label for computation of non-financial performance indicators. Please refer to the Funds' <a href="Transparency Code">Transparency Code</a> for more information on the SRI approach and methodology implemented within the funds

#### Impact approach

We are not able to report the indicators "the score of the issuer under a proprietary Impact grid" mentioned in the pre-contractual approach for the reference period. The proprietary grid was released at the beginning of 2023 and we disclose some proxy indicator which relate to the asset repartition within the funds.

#### FRENCH ENERGY AND CLIMATE LAW

The fund's SFDR periodic report does not include the information required under Article 29 of the Energy and Climate Law of November 8, 2019 and its implementing decree No. 2021-663 of May 27, 2021. This information will be published in a specific document within 6 months of the fund's accounting close.

#### **CSDR (Central Securities Depositories Regulation)**

Measures related to the application of cash penalties for settlement fail (discipline measures) introduced by the european regulation CSDR (Central Securities Depositories Regulation) entered in force on February 1st, 2022. As a reminder the Regulation (EU) No 909/2014 on improving securities settlement in the European Union and on central securities depositories aims to improve securities settlement in the European Union. In order to comply with, Tikehau IM decided to introduced the following means:

- Allowances receivable and any cash penalties payable are allocated or debited to the fund's account.
- A monthly flow's monitoring is conducted

In case of disagree with a request for cash penalties Tikehau IM claims the request (about its origin or the amounts to be paid).

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** Tikehau SubFin Fund **Legal entity identifier:** 222100SNB56F1LE09J94

# Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of

environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?					
● ● □Yes	• • MNo				
It made sustainable investments with an environmental objective:%	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments				
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy				
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy				
	with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

Please refer to the Annex 1 for details about data sources, methodologies and limitations.

To what extent were the environmental and/or social characteristics by this financial product met?

How did the sustainability indicators perform?

During the reference period, we collected the following information on the sustainability indicators of the Fund:

indicators measure how the sustainable objectives of this financial product are attained.

Sustainability indicator	Metric	Unit	Value
Weighted average carbon	Weighted	Tons CO2e /	- Fund: 397
intensity (WACI) of fund	average carbon	Million Euros	- Benchmark: 569
compared to its investment	intensity	Revenue	- Comparison: fund is 30%

...and compared to previous periods?

Not applicable as this is the fund's first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Adverse sustainability indicator	Metric	Unit	Portfolio current	Coverage
1. GHG emissions	Scope 1 GHG emissions	emissions Tons CO2e / Million Euros Enterprise Value		72%
	Scope 2 GHG emissions	Tons CO2e / Million Euros Enterprise Value	68	72%
	Scope 3 GHG emissions	Tons CO2e / Million Euros Enterprise Value	15,634	72%
	Total GHG emissions	Tons CO2e / Million Euros Enterprise Value	15,743	72%
2. Carbon footprint	Carbon footprint	Tons CO2e / Million Euros Enterprise Value	56	72%
3. GHG intensity of investee companies <sup>1</sup>	GHG intensity of investee companies	Tons CO2e / Million Euros Revenue	397	94%
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	Percentage	0.00%	94%
7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Percentage	0.00%	94%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage	0.00%	94%
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Percentage	0.00%	61%
4. Investments in companies without carbon emission reduction initiatives	Share of companies without Carbon Emission Reduction initiatives	Percentage	59.55%	88%

<sup>&</sup>lt;sup>1</sup> Please refer to the Annex 1 for more details about the computation methodology

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#### The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### **Asset allocation**

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

# Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- expenditure (OpEx) reflecting green operational activities of investee companies.

#### In which economic sectors were the investments made?

Sector - BICS Level 2	Weight at 30/12/2022
Banks	64.24%
Consumer Finance	1.26%
Diversified Banks	12.90%
Financial Services	7.00%
Life Insurance	4.59%
Property & Casualty Insurance	2.62%

The breakdown was performed with the BICS level 2 classification as it is the most granular data available for all investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did this financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

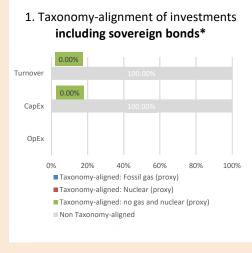

Yes:

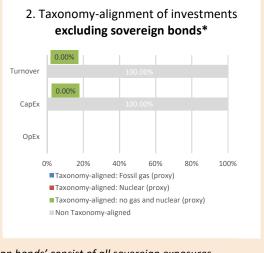

In fossil gas

In nuclear energy

X No

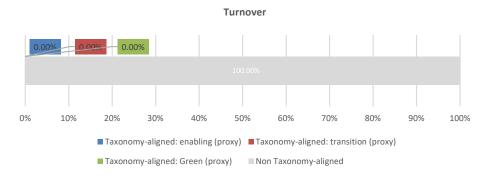

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities? [include a breakdown of the proportions of investments during the reference period]

are
sustainable investments
with an environmental
objective that do not
take into account the
criteria for
environmentally
sustainable economic
activities under the EU

Taxonomy.

Not applicable as this is the fund's first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund promotes environmental characteristics but does not commit to making any sustainable investments.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include bonds and other debt securities issued by public or quasipublic issuers, cash held on an ancillary basis, and joint assets, and derivative instruments for hedging purposes. As such, they are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2022, we implemented some modifications in the calculation of the weighted average carbon intensity (WACI) of the fund and its investment universe:

- The source of data was switched from Bloomberg to ISS ESG;
- The scope was modified to include scope 3 within our WACI computation;
- Following the regulatory clarifications on the computation of the PAI "GHG
  intensity of investee companies", there is no more rebalancing to exclude
  non-disclosed values and investments not promoting Environmental
  characteristics.

The periodic monitoring of the fund's WACI versus the investment universe's WACI is deemed to ensure the respect of the constraints. No overshot was identified. Should an overshot be identified, divestment or reallocation from major contribution would be performed in order to ensure the fund's WACI remains below its investment universe.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

#### ...and compared to previous periods?

Not applicable as this is the fund's first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

#### sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Adverse sustainability indicator	Metric	Unit	Portfolio current	Coverage
1. GHG emissions	Scope 1 GHG emissions	Tons CO2e / Million 110,731 Euros Enterprise Value		57%
	Scope 2 GHG emissions	Tons CO2e / Million Euros Enterprise Value	17,759	57%
	Scope 3 GHG emissions	Tons CO2e / Million Euros Enterprise Value	750,844	57%
	Total GHG emissions	Tons CO2e / Million Euros Enterprise Value	879,335	57%
2. Carbon footprint	Carbon footprint	Tons CO2e / Million Euros Enterprise Value	425	57%
3. GHG intensity of investee companies <sup>1</sup>	GHG intensity of investee companies	Tons CO2e / Million Euros Revenue	879	96%
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	Percentage	4.22%	97%
7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Percentage	0.00%	97%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage	0.00%	97%
14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Percentage	0.00%	73%
4. Investments in companies without carbon emission reduction initiatives	Share of companies without Carbon Emission Reduction initiatives	Percentage	46.93%	83%

The ESG data provider we use to perform our SFDR reporting relies on the following definition to define companies active in the fossil fuels sector:

- i. "Companies that derive any revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite;
- ii. companies that derive any revenues from the exploration, extraction,

<sup>&</sup>lt;sup>1</sup> Please refer to the Annex 1 for more details about the computation methodology

- distribution (including transportation, storage and trade) or refining of liquid fossil fuels; and
- iii. companies that derive any revenues from exploring and extracting fossil gaseous fuels or from their dedicated distribution (including transportation, storage and trade)"

This definition is broader than the Fossil Fuels exclusion policy that was enforceable in 2022 targeting "Companies with more than 5% of revenue estimated by 2024 exposed to extraction, processing/refining, storage, distribution, and power generation related to thermal coal, Artic drilling, deep offshore oil and gas, oil sands and shale gas." This explains why, even if there is no breach of our exclusion policy, some fossil fuels involvement is reported for 2022.

The breakdown was performed with the BICS level 2 classification as it is the most granular data available for all investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did this financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

	Ye	s:	
		In fossil gas	In nuclear energy
X	No	)	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

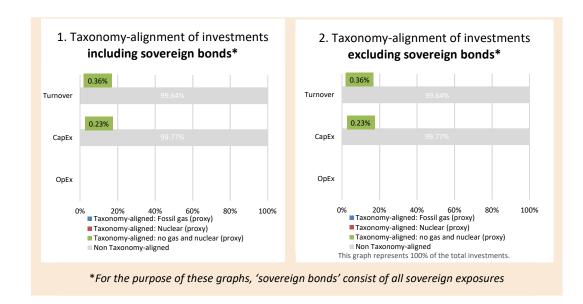

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

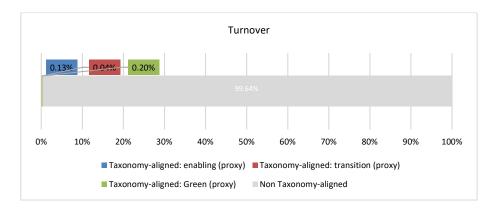

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

- Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the fund's first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund promotes environmental characteristics but does not commit to making any sustainable investments.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include bonds and other debt securities issued by public or quasipublic issuers, cash held on an ancillary basis, and joint assets, and derivative

Taxonomy.

instruments for hedging purposes. As such, they are not subject to any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2022, we implemented some modifications in the calculation of the weighted average carbon intensity (WACI) of the fund and its investment universe:

- The source of data was switched from Bloomberg to ISS ESG;
- The scope was modified to include scope 3 within our WACI computation;
- Following the regulatory clarifications on the computation of the PAI "GHG
  intensity of investee companies", there is no more rebalancing to exclude
  non-disclosed values and investments not promoting Environmental
  characteristics.

In order to meet the environmental characteristics during the reference period, the following actions have been taken during the various investment stages:

In pre-investment phase, issuer selection has been key process to ensure the respect of the sustainability indicators: potential issuers have been analysed to ensure they meet the sectoral and norm-based exclusion criteria, present the appropriate level of ESG risk and is in a range of GHG emissions intensity that is consistent with the investment universe's WACI.

During the investment period:

- The periodic review of companies' ESG risks and monitoring of controversies can have led to some variations in the level of ESG risks of companies in portfolio. During the reference period, one company ESG scores moved from Average ESG risk to Material ESG risk. After consultation of the relevant Tikehau relevant governance bodies it was decided to keep the exposition until maturity as the instrument in portfolio comes to maturity within the following year.
- Also following the questions arising from our clients on controversies affecting one company, it was decided to conduct engagement with the company to understand how the controversies were managed and what remediation actions have been taken. The information provided by the company supported the decision to remain invested.
- The periodic monitoring of the fund's WACI versus the investment universe's WACI is deemed to ensure the respect of the constraints. No overshot was identified. Should an overshot be identified, divestment or reallocation from major contribution would be performed in order to ensure the fund's WACI remains below its investment universe.

It made sustainable investments with an environmental objective:%	□ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments				
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy				
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy				
	with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

Please refer to the Annex 1 for details about data sources, methodologies and limitations.

To what extent were the environmental and/or social characteristics by this financial product met?

How did the sustainability indicators perform?

During the reference period, we collected the following information on the sustainability indicators of the Fund:

Sustainability indicator Metric Unit Value Weighted average carbon Weighted average Tons CO2e / - Fund: 535 - Benchmark for Equity intensity (WACI) of fund carbon intensity Million Euros compared to its investment assets: 1196 (annual average) Revenue universe

### ustainability indicators measure how the sustainable objectives of this financial product are attained.

Number of holdings in the Fund for Policy adopted by the Tikehau Cap	1 investee (0.03% of the funds)		
Number of companies that are in siguidelines	violation of UNGC and	0	
Proprietary ESG profile Score of companies in portfolio	Split per level of ESG risk	Percentage	- ESG opportunity: 29% - Moderate ESG risk: 53% - Average ESG risk: 7% - Material ESG risk: 0% - Significant ESG risk: 0% - Not scored: 11%

### ...and compared to previous periods?

Not applicable as this is the fund's first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as this fund promotes environmental characteristics but does not make any sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Adverse sustainability	Metric	Unit	Portfolio	Coverage
indicator			current	
1. GHG emissions	Scope 1 GHG emissions	Tons CO2e / Million Euros Enterprise Value	1,920	99%
	Scope 2 GHG emissions	Tons CO2e / Million Euros Enterprise Value	2,969	99%
	Scope 3 GHG emissions	Tons CO2e / Million Euros Enterprise Value	74,725	99%
	Total GHG emissions	Tons CO2e / Million Euros Enterprise Value	79,614	99%
2. Carbon footprint	Carbon footprint	Tons CO2e / Million Euros Enterprise Value	172	99%
3. GHG intensity of investee companies <sup>1</sup>	GHG intensity of investee companies	Tons CO2e / Million Euros Revenue	535	71%
4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	Percentage	0.15%	100%
7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Percentage	0.00%	100%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage	2.45%	100%
14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Percentage	0.00%	46%
4. Investments in companies without carbon emission reduction initiatives	Share of companies without Carbon Emission Reduction initiatives	Percentage	30.45%	100%

The provider we use to perform our SFDR reporting relies on the following definition to define companies active in the fossil fuels sector:

i. "companies that derive any revenues from exploration, mining, extraction,

<sup>&</sup>lt;sup>1</sup> Please refer to the Annex 1 for more details about the computation methodology

- distribution or refining of hard coal and lignite;
- ii. companies that derive any revenues from the exploration, extraction, distribution (including transportation, storage and trade) or refining of liquid fossil fuels; and
- iii. companies that derive any revenues from exploring and extracting fossil gaseous fuels or from their dedicated distribution (including transportation, storage and trade)"

This definition is broader than our Fossil Fuels exclusion policy that was enforceable in 2022 targeting "Companies with more than 5% of revenue estimated by 2024 exposed to extraction, processing/refining, storage, distribution, and power generation related to thermal coal, Artic drilling, deep offshore oil and gas, oil sands and shale gas." This explains why, a larger share of fossil fuel involvement is reported for 2022 within the PAI section.

The provider we use to perform our SFDR reporting developed its own methodology to define what constitute a Violation of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In the specific case of the investee company responsible for the share of investments flagged as involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises, we have a different opinion than our provider. Indeed, we performed a detailed analysis of the case that generates the breach according to the provider, and decided not to consider it as a breach based on the following elements: the case generating the breach is linked to a trial in a single country, where the company was firstly judged guilty but where they subsequently won in appeal; moreover, the activities associated to the case represent a very limited share of the total sales of the company. We decided to put the case under close watch to monitor any potential new element.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2022 to 30/12/2022

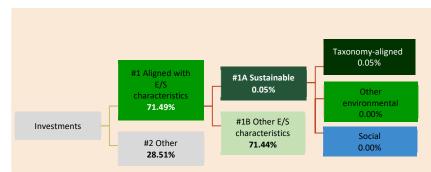

Largest investments as of	Sector	%	Country
30/12/2022		Assets

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Sector - BICS Level 2	Weight at 30/12/2022
Automobiles Manufacturing	0.16%
Banks	0.44%
Biotechnology	0.21%
Chemicals	0.30%
Consumer Discretionary Products	2.51%

Retail & Whsle - Discretionary	1.83%
Software & Services	0.27%
Software & Tech Services	11.00%
Tech Hardware & Semiconductors	2.42%
Travel & Lodging	0.89%

The breakdown was performed with the BICS level 2 classification as it is the most granular data available for all investments.

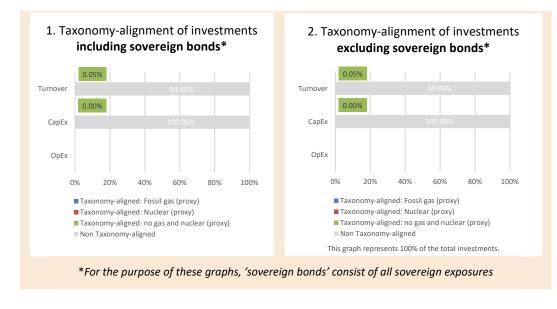

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did this financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

	Ye	S:	
		In fossil gas	In nuclear energy
X	No	)	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the fund's first periodic report.

Not applicable as the Fund promotes environmental characteristics but does not commit to making any sustainable investments.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include bonds and other debt securities issued by public or quasipublic issuers, cash held on an ancillary basis, and joint assets, and derivative

instruments for hedging purposes. As such, they are not subject to any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In Q4 2022, we implemented some modifications in the calculation of the weighted average carbon intensity (WACI) of the fund and its investment universe:

- The source of data was switched from Bloomberg to ISS ESG
- The scope was modified to include scope 3 within our WACI computation
- Following the regulatory clarifications on the computation of the PAI "GHG
  intensity of investee companies", there is no more rebalancing to exclude nondisclosed values and investments not promoting Environmental and Social
  characteristics.

A small (0.03%) non-listed legacy investment of the funds generates a breach of our fossil fuel Policy because the investee corporate is involved in Fracking activities. The position is illiquid. We have been engaging with the shareholders of the company for some time now to discuss the sale of our position.

In order to meet the environmental and/or social characteristics during the reference period, the following actions have been taken during the various investment stages.

In pre-investment phase, issuer selection has been key process to ensure the respect of the sustainability indicators: potential issuers have been analysed to ensure they meet the sectoral and norm-based exclusion criteria, present the appropriate level of ESG risk and is in a range of GHG emissions intensity that is consistent with the investment universe's WACI.

### During the investment period:

- The periodic review of companies' ESG risks and monitoring of controversies can have led to some variations in the level of ESG risks of companies in portfolio but they remain within authorized thresholds. During the reference period, one company was flagged by our ESG data provider as in breach of violations of the UNGC and OECD guidelines. Additional analysis was performed as explained above and engagement was conducted with the ESG data provider to discuss the classification of the case and some aspects of their methodology. The challenge of the case led us to put the company under watch and not consider the company in breach.
- The periodic monitoring of the fund's WACI versus the investment universe's WACI is deemed to ensure the respect of the constraints. No overshot was identified. Should an overshot be identified, divestment or reallocation from major contribution would be performed in order to ensure the fund's WACI remains below its investment universe.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Percentage	0.00%	83%
10. Violations of UN Global Compact principles and Organisation for	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD	Percentage	0.00%	83%

<sup>&</sup>lt;sup>1</sup> Please refer to the Annex 1 for more details about the computation methodology

Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Guidelines for Multinational Enterprises			
13. Board gender diversity	Women on Board (%)	Percentage	39.92%	35%
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Percentage	0.00%	58%
4. Investments in companies without carbon emission reduction initiatives	Share of companies without Carbon Emission Reduction initiatives	Percentage	44.22%	87%

The provider we use to perform our SFDR reporting relies on the following definition to define companies active in the fossil fuels sector:

- i. "Companies that derive any revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite;
- companies that derive any revenues from the exploration, extraction, distribution (including transportation, storage and trade) or refining of liquid fossil fuels; and
- iii. companies that derive any revenues from exploring and extracting fossil gaseous fuels or from their dedicated distribution (including transportation, storage and trade)"

This definition is broader than our Fossil Fuels exclusion policy that was enforceable in 2022 targeting "Companies with more than 5% of revenue estimated by 2024 exposed to extraction, processing/refining, storage, distribution, and power generation related to thermal coal, Artic drilling, deep offshore oil and gas, oil sands and shale gas."

This explains why, even if there is no breach of our exclusion policy, some fossil fuels involvement is reported for 2022.

In addition, we divested in Q4 2022 from a company operating through the waste business as small part of its business was involved in the production of, diesel oil and other by-products via re-refining waste oil. As of Q4 2022, the funds is only involved in fossil fuel though corporates that provide services to fossil fuel activities.

What was the share of investments made in transitional and enabling activities?

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the fund's first periodic report.

are
sustainable investments
with an environmental
objective that do not
take into account the
criteria for
environmentally
sustainable economic
activities under the EU

Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund promotes environmental characteristics but does not

commit to making any sustainable investments.

### What was the share of socially sustainable investments?

Not applicable.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments include bonds and other debt securities issued by public or quasipublic issuers, cash held on an ancillary basis, and joint assets, and derivative instruments for hedging purposes. As such, they are not subject to any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In close collaboration with our financial analysts and our ESG team, we proceeded in November with qualification for the SRI label (the French socially responsible investment certification) for the fund. This certification implied some modifications of the investment strategy, the sustainability indicators and the investment process.

In order to meet the environmental and/or social characteristics during the reference period, the following actions have been taken during the various investment stages:

In pre-investment phase, issuer selection has been key process to ensure the respect of the sustainability indicators: each potential issuer has been analysed to ensure it meets the sectoral and norm-based exclusion criteria, it respects the SRI criteria, presents the appropriate level of ESG risk and is contributing to the impact thesis of the fund.

During the investment period,

- We sold three bonds with the worst SRI ratings for the SRI Label certification, to ensure that the SRI score of the fund is below (i.e. better) the SRI score of the universe after eliminating at least the 20% worst rated securities.
- We perform periodic reviews of companies' ESG risks and monitoring of controversies and it can lead to variations in the level of ESG risks of companies in portfolio. However, they remain within our authorized thresholds

As market impact standards gradually emerge, we regularly challenge our impact approach. During the reporting period, we sold two companies as further analysis revealed some weaknesses in relation to the new Impact standards we aim to implement.

We also engaged 10 issuers in 2022 and we will thrive to increase this number in 2023.
