Risk and reward profile

More about the risk category

- The risk category is based on the fund's return volatility over the last five years. If the fund has less than 5 years' history, estimated volatility is used for the missing period.
- The fund is in category 7 because the volatility of its past returns has been extremely high.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest risk category does not mean 'risk free'.

Further material risks

- Small use of over-the-counter instruments exposes the fund to small potential counterparty default risk.
- No capital guarantee exists for this product so investors can lose the whole of their investment.
- A considerable portion of the fund is invested in less liquid investments, the value of which can fluctuate under certain market conditions.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	6.00%
Exit charge	2.00%
Conversion charge	3.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Ongoing charges	2.42%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The entry charge and exit charge shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending in 2011. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.ubs.com/funds.

Past performance

Performance in the past is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage year-end over year-end change in the fund's net asset value. In general, any past performance takes account of all ongoing charges but not the entry charge. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 2010. The fund was launched in 1997. The past performance is calculated in SGD.
