# Vanguard Global Corporate Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays Global Aggregate Float Adjusted Corporate Index Hedged, a market-weighted index of global corporate fixed income investments with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- The fund's benchmark, which is hedged to the US dollar, returned 3.47% for the six months ended 30 June 2020.
- By sector, bonds issued by utility companies outperformed those issued by industrial companies and financial institutions.
- By country, the United States, which accounts for more than half of the index's market value, was among the top performers, as was Canada. Some of the other heavyweights in the index, including France, Spain, Italy and Germany, lagged.
- By maturity, longer-dated bonds outperformed. From a credit-quality perspective, higher-rated bonds generally outperformed.

All returns in the commentary above are in US dollars.

## Benchmark: Bloomberg Barclays Global Aggregate Float Adjusted Corporate Index Hedged

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)	
	Six Months	Ten Years or Since Inception <sup>1</sup>

GBP Hedged Acc	2.64%	3.80%
Benchmark	2.85	3.98
Tracking Difference*	-0.21	
Institutional Plus GBP Hedged Acc	2.66%	3.92%
Benchmark	2.85	3.98
Tracking Difference*	-0.19	
USD Hedged Acc	3.25%	5.46%
Benchmark	3.47	5.64
Tracking Difference*	-0.22	

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

1 Since-inception returns: Institutional Plus EUR Hedged Acc, 7 February 2018; GBP Hedged Acc, Institutional Plus GBP Hedged Acc and USD Hedged Acc, 2 November 2017.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard Global Credit Bond Fund

Managed by Vanguard Global Advisers, LLC.

## Investment Objective

This fund seeks to provide a moderate and sustainable level of current income by investing in a diversified portfolio of global credit fixed income bonds.

## Performance Summary

The Performance Summary does not form part of the Financial Statements. The fund is actively managed and seeks to invest as described in the prospectus. The following performance information shows how the fund's returns compare with those of the Bloomberg Barclays Global Aggregate Credit Index Hedged, a market index that has investment characteristics similar to those of the fund.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- For the six months ended 30 June 2020, the fund outpaced the 3.43% return of its benchmark.
- Security selection was the largest contributor to relative performance. Exposure to sovereign debt in Latin America, especially Mexico and Panama, added value. So did the fund's holdings in European corporate debt issued by companies in the consumer noncyclical, communications and energy sectors. Securities issued by American banks, capital goods and consumer noncyclical companies also helped.
- Having a slightly shorter duration (a measure of a portfolio's price sensitivity to changes in interest rates) than the index was marginally negative as interest rates declined over the period, but the fund's yield-curve positioning was positive.

All returns in the commentary above are in US dollars.

## Benchmark: Bloomberg Barclays Global Aggregate Credit Index Hedged

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)	
	Six Months	Ten Years or Since Inception <sup>1</sup>

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard Global Short-Term Bond Index Fund

Managed by Vanguard Global Advisers, LLC, and sub-managed by Vanguard Investments Australia Ltd.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays Global Aggregate Ex US MBS 1–5 Year Float Adjusted and Scaled Index, a market-weighted index of global government, government-related agency, corporate and securitised bonds, excluding US mortgage-backed securities, with maturities between 1 and 5 years.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- In this environment, the fund's benchmark, which is hedged to the US dollar, returned 2.46% for the six months ended 30 June 2020.
- By country, the United States, which has the largest weighting in the index, turned in one of the strongest performances, as did Canada. Among the other large constituents, France, Spain, Japan and Italy all returned less than 1%.
- By sector, Treasuries and mortgage-backed securities outpaced corporate bonds.
- From a credit-quality perspective, bonds on the highest rung of the investment-grade ladder performed the best.

All returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

1 Since-inception returns: CHF Hedged Acc, Institutional Plus CHF Hedged Acc, EUR Hedged Acc, Investor EUR Hedged and Institutional Plus EUR Hedged Acc, 31 March 2014; GBP Hedged Acc and GBP Hedged Dist, 31 January 2014; Institutional Plus GBP Hedged Acc and Institutional Plus GBP Hedged Dist, 2 September 2014; USD Hedged Acc, 31 January 2014; Institutional Plus USD Hedged Acc, 10 March 2015.

2 Bloomberg Barclays Global Aggregate Ex US MBS 1-5 Year Float Adjusted Index Hedged through 28 April 2019; Bloomberg Barclays Global Aggregate Ex US MBS 1-5 Year Float Adjusted and Scaled Index Hedged thereafter.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard Global Short-Term Corporate Bond Index Fund

Managed by Vanguard Global Advisers, LLC

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays Global Aggregate Corporate 1–5 Year Float Adjusted Index, a market-weighted index of global corporate fixed income investments with maturities of between 1 and 5 years.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- In this environment, the fund's benchmark, which is hedged to the US dollar, returned 2.03% for the six months ended 30 June 2020.
- By sector, bonds issued by utilities and financial institutions outperformed those issued by industrial companies.
- By country, the United States, which accounts for more than half of the index's market value, was among the top performers, as were Canada, China and Japan. Some of the other heavyweights in the index, including Spain, Italy and Germany, lagged.
- From a credit-quality perspective, bonds on the highest rung of the investment-grade ladder returned the most.

All returns in the commentary above are in US dollars.

## Benchmark: Bloomberg Barclays Global Aggregate Corporate 1–5 Year Float Adjusted Index Hedged

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)	
	Six Months	Ten Years or Since Inception <sup>1</sup>

Benchmark	1.54	2.17
Tracking Difference*	-0.56	
USD Hedged Acc	1.62%	3.36%
Benchmark	2.03	3.76
Tracking Difference*	-0.41	

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: EUR Hedged Acc, 11 September 2019; Institutional Plus EUR Hedged Acc, 7 February 2018; GBP Hedged Acc, Institutional Plus GBP Hedged Acc and USD Hedged Acc, 2 November 2017.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard Japan Government Bond Index Fund

Sub-managed by Vanguard Investments Australia Ltd.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays Japan Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of Japanese yen-denominated treasury and Japan government-related securities with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- In Japan, financial conditions eased following the Bank of Japan's emergency meetings in March, April and May. The BOJ forecast a contraction in 2020 economic output of -3% to -5%.
- The central bank said in April that it would buy an additional 7.5 trillion yen's worth each of commercial paper and corporate bonds, a marked increase from the 2-trillion-yen purchase programme announced in March. In addition, the bank said it would allow commercial banks to use household debt as collateral in the new emergency lending facility, effectively nearly tripling the facility's size from 8 trillion to 23 trillion yen.
- Amid these conditions, the yield curve for Japanese government bonds steepened slightly, causing longer-dated issues to underperform their shorter-dated counterparts. Over the six months, yields rose 3 basis points for 5-year maturities, 4 basis points for 10-year maturities, 13 basis points for 20-year maturities and 18 basis points for 30-year maturities. (A basis point is one-hundredth of a percentage point.)
- Japanese sovereign bonds, which accounted for more than 90% of the broad government bond market, declined more than agency bonds and local government bonds.
- The fund's benchmark index returned -1.13% for the six months ended 30 June.

All returns in the commentary above are in Japanese yen.

Institutional Plus USD Hedged Acc	—	—	-0.15%
Benchmark <sup>2</sup>	—	—	-0.11
Tracking Difference*			-0.04

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: Institutional Plus EUR Hedged Acc, 11 December 2019; GBP Hedged Acc, 31 January 2014; Institutional Plus GBP Hedged Dist, 11 December 2019; Institutional Plus JPY Acc, 2 September 2014; USD Acc, 10 March 2015; Institutional Plus USD Hedged Acc, 15 January 2020.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard SRI Euro Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays EUR Non-Government Float Adjusted Bond Index, a market-weighted index of euro-denominated investment-grade fixed income securities excluding euro zone treasury and euro zone government-related securities, with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- In this environment, the fund's benchmark index returned -0.10% for the six months ended 30 June 2020.
- Corporate bonds, which accounted for more than half the index, declined by more than 1%. Bonds issued by utilities held up better than those of industrial companies and financial institutions.
- By country, the Netherlands, Norway and Finland were among the large constituents in the index that posted positive returns. Germany, France and the UK were among the laggards.
- Supranational bonds and mortgage-backed securities posted positive returns.
- Longer-dated and higher-rated investment-grade bonds did best.

All returns in the commentary above are in euros.

## Benchmark: Bloomberg Barclays EUR Non-Government Float Adjusted Bond Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)	
	Six Months	Ten Years or Since Inception <sup>1</sup>
EUR Acc	-0.25%	1.79%
Benchmark	-0.10	1.95
Tracking Difference*	-0.15	
Institutional Plus EUR Acc	-0.23%	1.39%
Benchmark	-0.10	1.57
Tracking Difference*	-0.13	

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: EUR Acc, 18 July 2017; Institutional Plus Eur Acc, 14 December 2017.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.K. Government Bond Index Fund

Sub-managed by Vanguard Asset Management, Limited.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays U.K. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated UK treasury and government-related securities with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global stocks ended the first quarter down sharply as the virus spread worldwide and large swaths of the economy shut down, but they pared those losses in the second quarter.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given global bonds a boost.
- The Bank of England dropped its short-term interest rate target from 0.75% to 0.10%, contributing to declines in government bond yields across the maturity spectrum and helping the fund's benchmark to return 10.38% for the six months ended 30 June 2020.
- By maturity, longer-dated bonds significantly outperformed. For example, gilts maturing in more than 30 years returned more than 20%, while those maturing in less than five years returned less than 2%. Each of those segments of the maturity spectrum accounted for more than 20% of the index.

All returns in the commentary above are in British pounds.

## Benchmark: Bloomberg Barclays U.K. Government Float Adjusted Bond Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)		
	Six Months	Five Years	Ten Years or Since Inception <sup>1</sup>
GBP Acc	10.41%	6.48%	6.09%
Benchmark <sup>2</sup>	10.38	6.63	6.21
Tracking Difference*	0.03		
GBP Dist	10.41%	6.48%	6.09%
Benchmark <sup>2</sup>	10.38	6.63	6.21
Tracking Difference*	0.03		
Institutional Plus GBP Acc	10.44%	6.57%	6.52%
Benchmark <sup>2</sup>	10.38	6.63	6.58
Tracking Difference*	0.06		
Institutional Plus GBP Dist	10.44%	6.57%	6.52%
Benchmark <sup>2</sup>	10.38	6.63	6.58
Tracking Difference*	0.06		

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

<sup>2</sup> Bloomberg Barclays U.K. Government Bond Index through 30 June 2010; Bloomberg Barclays U.K. Government Float Adjusted Bond Index thereafter.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.K. Investment Grade Bond Index Fund

Sub-managed by Vanguard Asset Management, Limited.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays GBP Non-Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated, investment-grade fixed income securities, excluding government and government-related securities, with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given bonds a boost.
- The Bank of England dropped its short-term interest rate target from 0.75% to 0.10%, contributing to declines in government bond yields across the maturity spectrum and helping the fund's benchmark to return 3.21% for the six months ended 30 June 2020.
- Returns generally rose with credit quality. Baa-rated issues, which accounted for roughly 40% of the index's universe, returned about 1.9%, while Aa-rated issues, about 10% of the universe, recorded the highest average return, 4.4%.
- By maturity, issues not due to be paid off for more than 30 years, which accounted for less than 5% of the index, returned the most – 12%, on average. Bonds maturing in 15–30 years (roughly 20% of the index) returned 6%–7%. Bonds maturing in less than five years (more than one-third of the index) returned just 1%.
- By sector, utility company bonds (about 12% of the index) returned the most, 5.3%. Industrial bonds (nearly a quarter of the index) generally performed in line with the index overall, while the debt of financial companies (more than 30% of the index) lagged a bit.

All returns in the commentary above are in British pounds.

## Benchmark: Bloomberg Barclays GBP Non-Government Float Adjusted Bond Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)		
	Six Months	Five Years	Ten Years or Since Inception <sup>1</sup>

Benchmark <sup>2</sup>	3.21	5.42	5.22
Tracking Difference*	0.57		

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

<sup>2</sup> Bloomberg Barclays GBP Non-Government Bond Index through 30 June 2010; Bloomberg Barclays GBP Non-Government Float Adjusted Bond Index thereafter.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.K. Short-Term Investment Grade Bond Index Fund

Sub-managed by Vanguard Asset Management, Limited.

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays GBP Non-Government 1–5 Year 200MM Float Adjusted Bond Index, a market-weighted index of pound sterling-denominated investment-grade bonds, excluding government bonds, with maturities between 1 and 5 years.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had given bonds a boost.
- The Bank of England dropped its short-term interest rate target from 0.75% to 0.10%, contributing to declines in government bond yields across the maturity spectrum – and to the fund's benchmark return of 1.03% for the six months ended 30 June 2020.
- Returns generally rose with credit quality. Baa-rated issues, which accounted for nearly one-third of the index's universe, returned about –0.2%, while Aaa-rated issues, a bit more than one-third of the universe, recorded the highest average return by credit rating, 2.0%.
- Among corporate issues, which accounted for a bit more than half the index during the period, utility company bonds returned the most, 1.4%. Industrial bonds and the debt of financial companies returned 0.6%–0.7%. Noncorporate bonds, which accounted for roughly 40% of the index and are dominated by foreign agency and supranational debt, returned 1.8%, on average.

All returns in the commentary above are in British pounds.

## Benchmark: Bloomberg Barclays GBP Non-Government 1–5 Year 200MM Float Adjusted Bond Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)		
	Six Months	Five Years	Ten Years or Since Inception <sup>1</sup>

Institutional Plus GBP Dist	0.95%	2.14%	2.20%
Benchmark	1.03	2.23	2.29
Tracking Difference*	-0.08		

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

1 Since-inception returns: GBP Acc and GBP Dist, 22 May 2013; Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.S. Government Bond Index Fund

Managed by Vanguard Global Advisers, LLC

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays U.S. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of US dollar-denominated US Treasury and US government-related securities with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had helped global bonds return roughly 3% in US dollars for the six months, according to the Bloomberg Barclays Global Aggregate Bond Index. The US bond market returned more than that, while emerging markets and Japan significantly underperformed.
- The fund's benchmark index returned 8.61% for the six months ended 30 June 2020.
- US Treasuries, which make up the majority of the index, outperformed US government agency securities for the period. Returns for longer-term securities significantly outpaced those of their shorter-term counterparts.

All returns in the commentary above are in US dollars.

## Benchmark: Bloomberg Barclays U.S. Government Float Adjusted Bond Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: EUR Hedged Acc, 31 March 2016; Institutional Plus EUR Hedged Acc, 28 November 2017; GBP Dist, 14 December 2017; GBP Hedged Acc, 31 January 2014; GBP Hedged Dist, 8 March 2018; Institutional Plus USD Acc, 6 December 2013.

<sup>2</sup> Bloomberg Barclays U.S. Government Bond Index through 30 June 2010; Bloomberg Barclays U.S. Government Float Adjusted Bond Index thereafter.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.S. Investment Grade Credit Index Fund

Managed by Vanguard Global Advisers, LLC

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays Global Aggregate USD Credit Float Adjusted Bond Index, a market-weighted index designed to reflect the universe of US dollar-denominated, investment-grade fixed income securities, excluding US Treasury, US government-related and securitised securities, with maturities greater than 1 year.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn't possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic's impact, according to the International Monetary Fund.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had helped global bonds return roughly 3% in US dollars for the six months, according to the Bloomberg Barclays Global Aggregate Bond Index. The US bond market returned more than that, while emerging markets and Japan significantly underperformed.
- The fund's benchmark index returned 4.58% for the six months ended 30 June 2020.
- Corporate bonds, which accounted for more than two-thirds of the index, slightly outperformed the index as a whole. By sector, bonds issued by utilities and industrial companies outperformed those of financial institutions. Bonds with higher credit quality generally outpaced those of lower credit quality. By maturity, longer-dated bonds significantly outperformed those of shorter maturities.
- Returns for corporate bonds outperformed those of their noncorporate counterparts.

All returns in the commentary above are in US dollars.

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

<sup>1</sup> Since-inception returns: Institutional Plus EUR Acc, 19 December 2013; Institutional Plus EUR Hedged Acc, 24 September 2015; GBP Hedged Acc, 31 January 2014; Institutional Plus GBP Hedged Acc and Institutional Plus GBP Hedged Dist, 8 September 2016; Institutional Plus USD Acc, 6 December 2013; Institutional Plus USD Dist, 24 September 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Vanguard U.S. Treasury Inflation-Protected Securities Index Fund

Managed by Vanguard Global Advisers, LLC

## Investment Objective

The fund seeks to provide returns consistent with the performance of the Bloomberg Barclays U.S. Government Inflation-Linked 1–10 Year Index, a market-weighted index designed to measure the performance of US Treasury Inflation-Protected Securities (“TIPS”) with maturities between 1 and 10 years.

## Performance Summary

The Performance Summary does not form part of the Financial Statements.

- The outbreak of the coronavirus turned into a global health crisis in the first half of 2020, and aggressive attempts to contain it wreaked havoc with economies and financial markets worldwide. Many governments shuttered nonessential businesses and restricted trade and travel. Those measures resulted in a sharp downturn in economic activity, especially in sectors where social distancing isn’t possible, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world’s largest economies committed more than \$9 trillion in spending, loans and loan guarantees to blunt the pandemic’s impact, according to the International Monetary Fund.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. By 30 June, however, central bank actions and more optimistic investor expectations for the economy had helped global bonds return roughly 3% in US dollars for the six months, according to the Bloomberg Barclays Global Aggregate Bond Index. The US bond market returned more than that, while emerging markets and Japan significantly underperformed.
- Yields fell and prices rose for Treasury Inflation-Protected Securities even as inflation measures declined over the period.
- The fund’s benchmark index returned 4.18% for the six months ended 30 June 2020.

All returns in the commentary above are in US dollars.

## Benchmark: Bloomberg Barclays U.S. Government Inflation-Linked 1–10 Year Index

	Total Returns Periods Ended 30 June 2020 (Annualised for periods over one year)

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

\* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

# Notes to the Financial Statements

**1. General Information.** Vanguard Investment Series plc (the “Company”), an open-ended investment company with variable capital, was incorporated in Ireland as a public limited company on 4 March 1998. The Company is authorised by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”).

Where applicable, shares are listed on the Global Exchange Market of the Euronext Dublin Exchange.

**2. Presentation of Financial Statements.** The Company is organised as an umbrella fund with segregated liabilities between sub-funds. During the period ended 30 June 2020 the Company had 33 constituent funds (32 operational funds and 1 closed fund) and 4 funds that have not yet commenced trading (each a “Fund”, collectively the “Funds”):

	Commenced Operations
Vanguard Emerging Markets Stock Index Fund (the “Emerging Markets Stock Index Fund”)	7 June 2006

Vanguard U.S. Ultra-Short-Term Bond Fund (the “U.S. Ultra-Short-Term Bond Fund”) <sup>2</sup>	6 May 1999

<sup>1</sup> On 5 June 2020 the Fund was approved for termination on or about 1 October 2020.

<sup>2</sup> The Fund was liquidated on 29 November 2018 and is no longer available for subscription.

The following Funds have received Central Bank approval but have not yet commenced trading:

	Central Bank Approval
Vanguard European Enhanced Equity Fund	12 January 2007
Vanguard Japan Enhanced Equity Fund	12 January 2007
Vanguard U.K. Stock Index Fund	1 September 2002
Vanguard U.S. Enhanced Equity Fund	27 June 2007

The financial statements are prepared in accordance with accounting standards generally accepted in Ireland, including Financial Reporting Standard (“FRS”) 102 and FRS 104, Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “CBI UCITS Regulations”) and the Listing Rules of the Euronext Dublin Exchange. Accounting standards generally accepted in Ireland in preparing financial statements which present a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (the “FRC”).

The Company has determined that the arrangement, headings and sub-headings of the financial statements require adaptation from the requirements in the Companies Act 2014 to more appropriately reflect the Company's business as an investment fund.

A Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares has been presented in place of a Cash Flow Statement due to the exemption contained in FRS 102, Section 7.1A.

The information required by FRS 102 to be included in a statement of comprehensive income is contained in the Statement of Operations of each Fund and the Company.

These financial statements have been prepared on the historical cost convention, as modified by the revaluation of financial assets and liabilities at fair value through profit or loss ("FVTPL"). As a result of the pending terminations, U.S. Fundamental Value Fund and U.S. Ultra-Short-Term Bond Fund are no longer considered a going concern, and their financial statements have been prepared on a liquidation basis which continues to reflect the fair value of assets and liabilities since unitholders are entitled to receive a pro rata share of the fair value of net assets after paying or providing for all liabilities and obligations as of the termination date.

These unaudited financial statements have been prepared in accordance with FRS 104 and should be read in conjunction with the audited financial statements for the year ended 31 December 2019.

### 3. Significant Accounting Policies.

**(a) Critical Accounting Estimates and Judgements.** The preparation of these financial statements requires the use of certain accounting estimates and requires the Company to exercise judgement when applying the Funds' accounting policies. The estimates and associated judgements are based on historical experience and various other facts that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements concerning the classification of financial assets and liabilities, the carrying values of financial instruments, as well as the fair value of certain financial instruments in instances where information is not readily apparent from other sources.

**(b) Revenue Recognition.** Dividends, whether cash or stock, are recognised when the securities are quoted ex-dividend. Special dividends are treated as either capital or revenue depending on the facts of each particular case.

In the case of debt securities, any difference between acquisition cost and maturity value is recognised as revenue over the life of the security using the effective yield basis of calculating amortisation. Revenue from debt securities is accounted for on a basis which takes account of the amortisation of any discount or premium between the purchase price and the expected final maturity price over the remaining life of the security. During the six months ended 30 June 2020, the Eurozone Inflation-Linked Bond Index Fund and U.S. Treasury Inflation-Protected Securities Index Fund recorded net negative income on inflation index bonds primarily due to deflationary adjustments exceeding the aggregate interest income for such bonds. Such net negative income is presented as Negative Yield on Financial Assets in the Statement of Operations.

The treatment of returns from derivatives is dependent upon the nature of the transaction and considers both motives and circumstances to determine whether returns should be treated as capital or revenue. Where positions are undertaken to protect or enhance capital, the returns are considered capital. Similarly, where positions are undertaken for generating or protecting revenue, the returns are considered revenue. Where positions generate total returns, an apportionment of any such return between capital and revenue is made to properly reflect the nature of the transaction.

Revenue is recognised gross of any withholding taxes incurred.

Bank interest is recognised on an accrual basis.

Securities lending revenue is accounted for on an accrual basis.

**(c) Taxation.** Current tax is recognised as the amount of income tax paid or payable in respect of the taxable overseas net profit. Deferred taxation is provided on all timing differences that have originated but not reversed by the reporting date. Deferred tax is measured at the rates expected to apply for the year in which the timing differences will reverse. Deferred taxes are not discounted to reflect the time value of money and are only recognised to the extent they are expected to crystallise.

Withholding taxes on foreign dividends and capital gains have been provided for in accordance with the Funds' understanding of the applicable countries' tax rules and rates. Foreign capital gains tax is accounted for based upon net unrealised gains.

**(d) Financial Assets and Financial Liabilities.** FRS 102 requires a reporting entity to apply either (a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues; (b) the recognition and measurement provisions of International Accounting Standards ("IAS") 39, Financial Instruments: Recognition and Measurement ("IAS 39"), and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments; or (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9, Financial Instruments, and the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments. The Company has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of FRS 102.

**Classification and Measurement.** Financial assets and financial liabilities, including derivative investments, are classified and measured at FVTPL from the launch date. Obligations for net assets attributable to holders of redeemable shares are presented at the redemption amount, which approximates their fair value. All other financial assets and liabilities are measured at amortised cost, which approximates fair value.

**Recognition and Derecognition.** Purchases and sales of financial instruments are recognised on the trade date, being the date on which the Company commits itself to the purchase or sale. Financial instruments at FVTPL are initially recognised when the Funds become party to the contractual provisions of the instrument. Financial instruments are derecognised when the contractual rights to the cash flows from the instruments expire, or when substantially all the risks and rewards of ownership have been transferred. Realised gains and losses are specifically identified when securities are derecognised. Premiums received on expired options are realised as gains, while premiums paid on expired options are realised as losses. Premiums on exercised options will result in gains or losses by either increasing the proceeds received when selling the underlying security or decreasing the cost basis when purchasing the underlying security.

**Equities.** Equities (including warrants and rights) are valued at the latest available last traded value at year-end. Instruments traded on a recognised market are valued on the basis of valuations provided by a principal market maker or a pricing service. When applicable, unlisted and suspended instruments are based on the Investment Manager's assessment of their net realisable value or the last traded price from broker-dealers for non-exchange-trade purposes.

**Fixed Income.** Fixed income securities traded in recognised markets are valued using the latest bid prices on the securities exchange in which they are principally traded or using valuations based on a matrix system (which considers such factors as security prices, yields, maturities and ratings), both as furnished by independent pricing services.

**Derivatives.** Futures contracts are valued in an active market if quoted prices are readily and regularly available; this represents the amount that would be required to close the position. Forward currency contracts are valued at the closing prices of the forward currency contract rates in the London foreign exchange markets on a daily basis as provided by a reliable bank or dealer. Credit default swaps are valued using a pricing service provider; where no pricing service provider is available, contracts are marked-to-market daily based upon quotations received from counterparties or based upon calculations using valuation models. Option contracts are valued at their quoted daily settlement prices.

**(e) Fair Value Measurement.** The Funds classify financial instruments measured at fair value using a three-level hierarchy. Instruments are categorised in their entirety based on the lowest-level input that is significant to the fair value measurement. Assessing the significance and observability of a particular input requires significant judgement specific to an asset or liability. Inputs are considered to be observable when they are readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

**Level 1** — Quoted prices in active markets for identical securities.

**Level 2** — Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

**Level 3** — Significant unobservable inputs (including the fund's own assumptions used to determine the fair value of investments).

**(f) Transaction Costs.** Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment. These costs include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs incurred in the purchase and sale of securities designated at FVTPL are expensed on an accrual basis.

**(g) Foreign Currency.** All transactions in foreign currencies are translated into each Fund's functional currency at the exchange rates prevailing on the date of the transaction. At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the prevailing exchange rates. Gains and losses arising on translation are included in total return and are reported on a net basis.

The functional currency of each Fund is:

Fund	Currency	Fund	Currency
Emerging Markets Stock Index Fund	US dollar (US\$)	U.S. Investment Grade Credit Index Fund	US dollar (US\$)
ESG Developed World All Cap Equity Index Fund	US dollar (US\$)	U.S. Treasury Inflation-Protected Securities Index Fund	US dollar (US\$)
ESG Emerging Markets All Cap Equity Fund	US dollar (US\$)	U.S. Ultra-Short-Term Bond Fund	US dollar (US\$)
European Stock Index Fund	US dollar (US\$)	Eurozone Stock Index Fund	Euro (€)
Global Enhanced Equity Fund	US dollar (US\$)	Japan Stock Index Fund	Euro (€)
Global Small-Cap Index Fund	US dollar (US\$)	Pacific ex-Japan Stock Index Fund	Euro (€)
Global Stock Index Fund	US dollar (US\$)	SRI European Stock Fund	Euro (€)
U.S. 500 Stock Index Fund	US dollar (US\$)	20+ Year Euro Treasury Index Fund	Euro (€)
U.S. Fundamental Value Fund	US dollar (US\$)	Euro Government Bond Index Fund	Euro (€)
U.S. Opportunities Fund	US dollar (US\$)	Euro Investment Grade Bond Index Fund	Euro (€)
Emerging Markets Bond Fund	US dollar (US\$)	Eurozone Inflation-Linked Bond Index Fund	Euro (€)
Global Bond Index Fund	US dollar (US\$)	SRI Euro Investment Grade Bond Index Fund	Euro (€)
Global Corporate Bond Index Fund	US dollar (US\$)	U.K. Government Bond Index Fund	British pound (£)
Global Credit Bond Fund	US dollar (US\$)	U.K. Investment Grade Bond Index Fund	British pound (£)
Global Short-Term Bond Index Fund	US dollar (US\$)	U.K. Short-Term Investment Grade Bond Index Fund	British pound (£)
Global Short-Term Corporate Bond Index Fund	US dollar (US\$)	Japan Government Bond Index Fund	Japanese yen (¥)
U.S. Government Bond Index Fund	US dollar (US\$)		

In preparing the aggregate Company financial statements, all transactions have been translated into USD at the prevailing exchange rates in effect.

**(h) Cash and Bank Overdrafts.** Cash is composed of demand deposits with financial institutions or bank overdrafts. Bank overdrafts, when applicable, are presented as current liabilities. Cash held or pledged as collateral against financial transactions or derivative instruments is not included within Cash and Bank Overdrafts but is segregated and presented separately on the Statement of Assets and Liabilities as Cash Collateral.

In respect to share issuances or redemptions, the Company operates an umbrella cash account. Monies received or proceeds due will be held and transmitted through this account and are included in Cash and Bank Overdrafts.

**Margin.** Upon entering into futures contracts, cash deposits are required (initial margin) in an amount equal to a certain percentage of the contract value. Subsequent payments (variation margin) are made or received by the Funds each day. Margin against these derivative instruments is not included within Cash or Bank Overdrafts but is segregated and presented separately as Futures Margin Cash or Futures Margin Cash Due to Broker, as applicable.

**(i) Redeemable Participating Shares.** Redeemable participating shares provide Shareholders with the right to redeem their shares for cash and are classified as financial liabilities.

**(j) Trade Date Reporting.** Investment transactions for financial statement purposes as at 30 June 2020 are accounted for on the trade date. This is different from the basis used for the daily dealing net asset value, which is accounted for using the trade date plus one business day.

**(k) Offsetting.** Financial assets and liabilities are offset and the net amount reported when there is both a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. As at 30 June 2020, there were no financial assets or liabilities offset.

**(l) Equalisation.** Equalisation occurs to reflect the pro rata payment of distributions based on the time period over which shares have been owned by an investor. If shares are purchased when the Funds have accrued income but not yet declared a distribution, the Funds will credit to the equalisation account the portion of the purchase price representing income accrued but directly attributable to those shares. Conversely, if shares are redeemed when the Funds have accrued income but not yet declared a distribution, the Funds will deduct from the equalisation account the portion of the redemption price representing income accrued but directly attributable to those shares. Equalisation is accounted for through the Statement of Operations as a finance cost.

**(m) Swing Pricing.** The Funds employ swing pricing as a means to prevent dilution. Swing pricing results from the Company's determination to adjust the Funds' net asset value, on any dealing day, following a consideration of dealing activity (i.e. level of subscriptions and redemptions) and the level of costs associated with such activity. A dilution adjustment is exercised only for the purpose of reducing the negative effects of transaction charges in the interest of the non-dealing shareholders in the Funds and is applied consistently in respect of the Funds, and in respect of all assets of the Funds. The direction of the swing depends on whether there are net subscriptions or net redemptions in the Funds on the relevant dealing day, while the magnitude of the swing is based on pre-determined estimates of the average execution costs in the relevant asset classes in which the Funds are invested.

The dilution adjustment did not exceed 2% of the original net asset value per share of the Funds during the period (31 December 2019: none).

#### 4. Risk Management Policies.

**Price Risk.** Price risk is the risk that the value of financial instruments will fluctuate because of changes in the market. The Investment Manager considers the asset allocation of the portfolio in order to minimise the risk associated with particular countries or industry sectors while continuing to follow the stated investment objective.

The investment objective for an index fund is to seek to track as closely as reasonably possible the performance of the benchmark index. In order to achieve this objective, an index fund invests primarily in securities held in the relevant benchmark index. An index fund places limitations on the amount by which a holding may deviate from the proportion in the benchmark to limit the market risk from mismatched positions.

All investments present a risk of loss of capital. The Investment Manager assesses market risk volatility to ensure that the effect of using financial derivative instruments is not significant enough to cause disproportionate losses to overall value. The Investment Manager moderates this risk through careful selection of financial instruments.

**Currency Risk.** Currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in currency exchange rates. Local interest rates and monetary policy, as well as other government fiscal and labour policies, can also adversely impact currency values. The Funds may enter into foreign currency contracts for hedging purposes, which can include the economic hedging of all or a portion of the currency exposure of an investment or group of investments. The Funds may also enter into these contracts for non-hedging purposes, which can include increasing the exposure to a foreign currency, or the shifting of exposure to foreign currency fluctuations from one country to another.

All currency-hedged share classes for the period ended 30 June 2020 are listed in the following table:

Each hedged share class incorporates a currency hedge, which acts as a buffer against the impact of currency fluctuations for investors for whom the base currency is hedged-share-class-specific currency.

**Interest Rate Risk.** Revenue on fixed income securities may be affected by changes in interest rates relevant to particular securities or as a result of the Investment Manager being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed rate securities may be affected by interest rate movements or the expectation of such movements in the future. Interest receivable on bank deposits or payable on bank overdraft positions will also be affected by fluctuations in interest rates.

For Funds with exposure to interest rate risk, the tables below summarise the percentage of each Fund's holdings by maturity:

Fund	30 June 2020						
	Under 1 Year	1-5 Years	5-10 Years	10-15 Years	15-20 Years	20-25 Years	Over 25 Years
20+ Year Euro Treasury Index Fund	0.03%	—	—	—	—	46.54%	53.43%

**Management of Market Risk (Including Price, Currency and Interest Rate Risks).** The Investment Manager performs daily reviews of portfolio attributes, such as sector diversification, maturity and credit quality, and makes adjustments where necessary to ensure that the risk components closely match those of the respective benchmarks. In addition, the Investment Manager and Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the “Administrator”) perform daily checks of performance against the respective benchmarks. Potential tracking errors are raised and discussed by the Investment Manager and the Administrator for investigation and resolution. Market impact, currency discrepancies and interest rate exposure are investigated as possible causes. Currency positions are reconciled daily and discrepancies are immediately resolved. Procedures are established with the Investment Manager to trade currency as closely as possible to the close of the markets, so as to obtain exchange rates that closely approximate the rates used in the daily valuation.

Market disruptions associated with the COVID-19 pandemic have had a global impact, and uncertainty exists as to the long-term implications. Such disruptions can adversely affect assets of the Funds and thus performance of the Funds.

**Liquidity Risk.** Liquidity risk is the risk that sufficient cash cannot be raised to meet liabilities when due. One of the key liquidity factors influencing the Funds is exposure to cash redemptions of redeemable participating shares. Hence the Funds invest the large majority of their assets in investments that are traded in active markets and can ordinarily be readily disposed. However, liquidity risk will occur if an issuer becomes credit-impaired or if the relevant market becomes illiquid. In such a case, it may not be possible to initiate or liquidate a position at a price deemed by the Investment Manager to be demonstrating fair value. Liquidity risk may be temporary or may last for extended periods. The Funds invest in securities that form part of the benchmark indices. Benchmark indices are constructed from index rules requiring securities to have a specified minimum trading volume, which, although not guaranteeing liquidity, provides indication of the liquid nature of the securities underlying the Funds. The Funds are exposed to withdrawals and contributions that are invested to ensure that exposure to the benchmark indices are maintained in order to meet the investment objective of the Funds.

Index futures contracts may be used to a limited extent, to maintain full exposure to the index, maintain liquidity and minimise transaction costs. The Funds may equitise cash holdings from inflows and outflows by purchasing futures contracts to immediately invest incoming cash to the market, or selling futures in responses to cash outflows, thereby simulating a fully invested position in the underlying index while maintaining a cash balance for liquidity.

Liquidity risk is not deemed to be significant to the Funds.

**Management of Liquidity Risk.** In order to meet redemption requests and raise cash from the portfolio, the Investment Manager receives daily reports of share capital activity from the Administrator. The Investment Manager incorporates cash forecasts into the daily management of the portfolio and monitors cash balances daily.

**Credit Risk.** Credit risk is the risk that a counterparty to a transaction or an issuer of a financial instrument will fail to pay interest and principal when due, or that perceptions of the issuer’s ability to make such payments will cause the price of an investment to decline. Significant investment in debt securities or use of over-the-counter derivative contracts to a material degree will generally increase credit risk.

Credit risk exposure is also created through interactions with brokers and custodians. However, transactions in listed securities are settled and paid for upon delivery of securities using only approved brokers. The risk of default is therefore considered minimal because securities are delivered only when the broker has made payment and the broker is paid for purchases only once the securities have been received by Brown Brothers Harriman Trustee Services (Ireland) Limited (the “Depositary”).

Credit risk may also arise from assets of the Funds which are substantially all held by the Depositary. Bankruptcy or insolvency of the Depositary may cause certain rights with respect to securities and other positions held to be delayed or limited. As of 30 June 2020, the Depositary has a long-term credit rating of A+ from Fitch (31 December 2019: A+). Additionally, the Depositary ensures there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. All securities held in custody by the Depositary are segregated from the Depositary’s own assets, whether in a vault, in segregated accounts on the books of sub-custodians, or in an account maintained at a central securities depositary. The Depositary maintains segregated accounts per client on its own books as well as on the books of sub-custodians in local markets, where possible.

Certain Funds may use credit default swaps (“CDS”) to a limited extent, for efficient replication of credit risk exposure or to transfer default protection on an underlying fixed income security. Credit protection purchased results in an asset which may increase credit risk, while credit protection sold results in a liability which may increase liquidity risk.

For Funds invested in debt securities the following is an analysis of the concentration of issuer credit ratings:

30 June 2020:

Fund	AAA	AA	A	BBB	Less than BBB	NR

**Management of Credit Risk.** Credit risk is managed by investment policies which restrict or place limits on acceptable portfolio and net asset concentrations as well as exposure to certain instruments, credit institutions, and counterparties. The Investment Manager performs daily reviews of portfolio attributes, such as sector diversification and credit quality, and makes adjustments where necessary to ensure that the credit risk components closely match those of the respective benchmarks. Credit ratings of debt instruments and counterparties are monitored and evaluated periodically by the Investment Manager; an approved counterparty list is maintained, and trading with approved counterparties is enforced.

**5. Taxation.** Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares, or appropriation or cancellation of shares of a Shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer. Any tax arising on a chargeable event is a liability of the Shareholders, albeit it is paid by the Company (although if the Company fails to deduct the correct amount of tax it becomes ultimately a liability of the Company).

No Irish tax will arise on the Company in respect of chargeable events in respect of:

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

(b) certain exempted Irish tax resident shareholders who have provided the necessary signed statutory declarations.

Dividends, interest and capital gains received on investments may be subject to withholding or other taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable.

The Funds have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative and judicial proceedings within these countries. Such tax reclaims received during the year, if any, are included in Foreign Withholding Tax. No other amounts for additional tax reclaims are reflected in the financial statements due to the uncertainty as to the ultimate resolution of proceedings, the likelihood of receipt of these reclaims and the potential timing of payment. During the period ended 30 June 2019 Vanguard Eurozone Stock Index and Vanguard Emerging Markets Stock Index Funds received reclaims, and recognized a tax benefit, in the amount of €4,319,917 and \$336,758, respectively.

**6. Distribution Policy.** The following table presents the payment frequency with respect to distributing share classes. If a dividend has not been declared, income and gains of such Fund will be reflected in the net asset value per share.

**7. Net Asset Value Per Share.** The net asset value per share of each share class is calculated by dividing the total net assets of each share class by the number of shares in issue.

**8. Share Capital.** The Company has variable share capital consisting of 500,000,030,000 authorised shares divided into 30,000 subscriber shares and 500,000,000,000 redeemable participating shares (no par value).

The Directors may issue shares of any class and create new classes of shares on such terms as the Directors may from time to time determine in relation to any Fund and in accordance with the requirements of the Central Bank. Shares may be divided into different classes to accommodate different subscription, redemption or fee arrangements, dividend provisions, or charges.

**Subscriber Shares.** There are two Subscriber Shares in issue, which are held by nominees for the Investment Manager. Subscriber Shares do not entitle the holders thereof to any dividend and on a winding-up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The Subscriber Shares do not form part of the Shareholders' funds and are not included in the net asset value of the Company.

Members who are individuals may attend and vote at general meetings in person or by proxy. Members who are corporations may attend and vote at general meetings by appointing a representative or proxy. Subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, at any general meeting on a show of hands every Shareholder who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder present as aforesaid or by proxy shall have one vote for every share held.

Movement in shares for the period ended 30 June 2020:

**9. Credit Facility.** The Funds and certain other funds managed by the Manager or its affiliates participate in an annually renewable USD \$4.3 billion (2019: \$4.3 billion) committed credit facility. Each participating Fund is individually liable for its borrowings under the credit facility. Borrowings may be utilised for temporary or emergency purposes and are subject to the participating fund's regulatory and contractual borrowing restrictions. Participating Funds are allocated an annual commitment fee of 0.10% of the undrawn facility amount as well as certain administrative fees. Any fees allocated to the Funds are paid by the Manager. Interest and direct borrowing costs associated with draws on the credit facility are charged to the Funds and recorded in the Statement of Operations.

Any borrowings under this facility denominated in euros bear interest at the Euro Interbank Offered Rate plus an applicable margin, while borrowings under this facility in denominations other than euros bear interest at a rate equal to the higher of the one-month London Interbank Offered Rate (or an acceptable alternate rate, if necessary), federal funds effective rate or overnight bank funding rate plus an agreed-upon spread.

The Funds did not have any borrowings outstanding at 30 June 2020 or at any time during the period then ended (31 December 2019: none).

**10. Efficient Portfolio Management.** Investment techniques and financial derivative instruments (FDIs) may be employed for efficient portfolio management purposes, including hedging against market movements, currency exchange or interest rate risks. Any investment technique or use of FDIs must be one which is reasonably believed by the Investment Manager to be economically appropriate in that it is realised in a cost-effective way. Realised and unrealised gains or losses arising from financial derivative transactions are accounted for through the Statement of Operations as Net Gain/(Loss) on Investment Instruments.

Securities lending is also used for efficient portfolio management. The securities lending agent is JPMorgan Chase Bank, N.A. (London Branch). All operational costs in support of the lending programme are borne by the lending agent and paid directly out of any lending agent fees. Securities lending revenue is net of any lending agent fees paid.

Securities on loan by the Funds and the value of collateral held in respect of the securities as at 30 June 2020:

Fund	Value of Outstanding Securities on Loan	Value of Collateral

## 12. Related Party Transactions.

**Manager.** Vanguard Group (Ireland) Limited is the Funds' Manager and acts as a principal in respect of all transactions of shares in the Funds. For its services, the Manager receives a fixed single fee per share class (the "Management Fees") calculated on a daily basis and expressed as a percentage by dividing the total net assets of each share class by the number of shares in issue and paid monthly. Out of the fees received, the Manager pays for any sub-advisers, as well as the costs of administration including audit, depository, legal, registration and regulatory fees associated with the Funds. As a result, the Manager anticipates that the ongoing charges figure ("OCF") of each share class will closely track the Management Fees. In the event that the costs and expenses of the Company or any Fund exceed the OCF, the Manager will be responsible for discharging any excess out of its own assets. The Manager, in its sole discretion, may voluntarily waive all or part of its fee, and any such waiver could be discontinued at any time and without notice.

Any amounts due from or to the Manager at the end of the period are disclosed in the Statement of Assets and Liabilities. Amounts paid to the Manager in respect to fees for the period are disclosed in the Statement of Operations.

The Annual Management Fees of certain share classes, in certain Funds, were reduced during the period. The table below presents the amounts in effect during the period and as at 30 June 2020:

<sup>1</sup> The fund launched 9 June 2020.

**13. Soft Commission Arrangements.** Neither the Investment Manager nor PRIMECAP Management Company, the sub-manager for Vanguard U.S. Opportunities Fund, has a commission arrangement on behalf of the Company. Pzena Investment Management, LLC, the sub-manager for Vanguard U.S. Fundamental Value Fund, has established client commission arrangements consistent with the concepts of Section 28(e) of the Securities Exchange Act of 1934 and the relevant interpretive guidance issued by the U.S. Securities and Exchange Commission. Under these arrangements, an adviser receives a variety of research and brokerage products and services, including but not limited to written research reports analysing performance or securities, discussions with research analysts, meetings with corporate executives regarding company performance, and market data. Any benefits obtained by an adviser in conjunction with a client commission arrangement are used for the benefit of the respective Fund.

## 18. Events During the Period.

On 30 March 2020 shareholders voted to approve: (i) a change to the benchmark of the Vanguard SRI Global Stock Fund from the FTSE Developed Index to the FTSE Developed All Cap ex Controversies/Non-Renewable Energy/Vice Products/Weapons Index; and (ii) following this change in benchmark, a change to the name of the fund from Vanguard SRI Global Stock Fund to Vanguard ESG Developed World All Cap Equity Index Fund. These changes went into effect on 13 May 2020.

The Management Fee was reduced during the period for the ESG Developed World All Cap Equity Index Fund and SRI European Stock Index Fund for all share classes.

Vanguard ESG Emerging Markets All Cap Equity Index Fund commenced operations on 9 June 2020.

A revised prospectus was approved by the Central Bank on 19 June 2020 and replaced the previous prospectus dated 13 May 2020.

The Funds undertook a number of changes in connection with the Company's desire to make the share classes available in the Funds more clearly accessible and transparent to shareholders, including:

- Change of share class names;
- Consolidation of share classes and subsequent revision of share class names;
- Share classes closing to new investment; and
- Change of minimum investment amounts.

All changes were effective 19 June 2020.

### Change of Share Class Names

The Directors have determined to change the share class names of a number of share classes in order to create a simplified and consistent approach across the Company.

Revised share class names:

Global Bond Index Fund	Investor CHF-Hedged Shares	Institutional CHF-Hedged Shares	CHF Hedged Acc
Global Bond Index Fund	Investor EUR-Hedged Shares (€)	Institutional EUR-Hedged Shares (€)	EUR Hedged Acc
Global Short-Term Bond Index Fund	Investor CHF-Hedged Shares	Institutional CHF-Hedged Shares	CHF Hedged Acc
Global Short-Term Bond Index Fund	Investor USD-Hedged Shares (\$)	Institutional USD-Hedged Shares (\$)	USD Hedged Acc
Japan Government Bond Index Fund	Investor JPY Shares (¥)	Institutional JPY Shares (¥)	JPY Acc
Japan Government Bond Index Fund	Investor USD Shares (\$)	Institutional USD Shares (\$)	USD Acc
U.S. Investment Grade Credit Index Fund	Investor USD Shares (\$)	Institutional USD Shares (\$)	USD Acc

### Share Classes Closed to New Investment

The Directors have determined that the following share classes were closed to new investment.

Fund	Share Class Name
Emerging Markets Stock Index Fund	Investor EUR
Emerging Markets Stock Index Fund	Investor USD
European Stock Index Fund	Investor EUR
Eurozone Stock Index Fund	Investor EUR
Global Small-Cap Index Fund	Investor EUR
Global Stock Index Fund	Investor EUR
Global Stock Index Fund	Investor USD
Japan Stock Index Fund	Investor EUR
Japan Stock Index Fund	Investor JPY
Japan Stock Index Fund	Investor USD
U.S. 500 Stock Index Fund	Investor EUR
U.S. 500 Stock Index Fund	Investor USD
Euro Government Bond Index Fund	Investor EUR
Euro Investment Grade Bond Index Fund	Investor EUR
Eurozone Inflation-Linked Bond Index Fund	Investor EUR
Global Bond Index Fund	Investor USD-Hedged
Global Short-Term Bond Index Fund	Investor EUR-Hedged
U.S. Government Bond Index Fund	Investor USD

### Change of Minimum Investment Amounts

The Directors of the Company have determined to change the minimum initial subscription amounts in respect of the Funds. Please note that these changes will not apply in respect of the Vanguard U.S. Fundamental Value Fund, Vanguard U.S. Opportunities Fund, Vanguard Emerging Markets Bond Fund or Vanguard Global Credit Bond Fund.

The minimum initial subscription amounts will change in accordance with the below table:

Share Class	Current Minimum Initial Subscription	New Minimum Initial Subscription
Investor	100,000 in relevant currency	1,000,000 in relevant currency
Institutional	5,000,000 in relevant currency	
General (formerly Investor or Institutional)		1,000,000 in relevant currency
Institutional Plus	200,000,000 in relevant currency	100,000,000 in relevant currency

### 19. Events Since the Statement of Assets and Liabilities Date.

Thomas Merz resigned as Director on 17 August 2020.

**20. Approval of Financial Statements.** The Financial Statements were approved by the Directors on 27 August 2020.

# Additional Information From the Directors

## Connected Persons Disclosure

Transactions carried out with the Company by the Investment Manager, Manager, Depositary, Investment Adviser and/or associated or group companies of these ("Connected Persons") during the period ended 30 June 2020 were carried out as if negotiated at arm's length and were in the best interests of the Company's Shareholders. The Directors of the Company are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that all transactions entered into by the Company with Connected Persons are carried out as if negotiated at arm's length and in the best interests of the Company's Shareholders.

## Potential Implications of Brexit

The United Kingdom ("UK") left the European Union ("EU") on 31 January 2020, with a transition period that will end on 31 December 2020, unless extended (the "Transition Period"). Therefore, the UK has ceased to be an EU Member State but, during the Transition Period, the UK continues to be treated as an EU Member State and EU law continues to apply. The exact nature and extent of the UK's future relationship with the EU, following the Transition Period, remains uncertain.

Political instability and economic uncertainty may lead to speculation and subsequent market volatility, particularly for assets denominated in British pounds. Vanguard continues to encourage investors to follow its core investing principles, including maintaining long-term discipline. The implications of Brexit extend well beyond the UK economy and financial markets, affecting multinational organisations globally. Vanguard remains committed to safeguarding our investors' assets and their long-term interests and has devoted significant resources to developing plans to manage the impact of Brexit.

## Coronavirus (COVID-19)

Market disruptions associated with the COVID-19 pandemic have had a global impact, and uncertainty exists as to the long-term implications. Such disruptions can adversely affect assets of the Funds and thus performance of the Funds. Vanguard continues to encourage investors to follow its core investment principles, including maintaining long-term discipline. Vanguard is committed to safeguarding the assets of investors and their long-term interests.

## Securities Financing Transactions Regulation ("SFTR")

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs").

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- A repurchase/ reverse repurchase agreement.
- Securities or commodities lending and securities or commodities borrowing.
- A buy-sell back transaction or sell-buy back transaction.
- A margin lending transaction.

As at 30 June 2020, Vanguard Investment Series Plc had a securities lending programme as a type of SFT under the scope of the SFTR.

**Global Data**

The amounts of securities on loan as at 30 June 2020 are as follows:

Fund	Amount	Proportion of NAV (%)	% of Lendable Assets
Emerging Markets Stock Index Fund	\$93,146,000	0.99	1.72
ESG Developed World All Cap Equity Index Fund	\$6,147,000	0.64	0.68

Eurozone Stock Index Fund	€70,696,755	4.17	4.11
Global Enhanced Equity Fund	\$2,094,347	1.54	1.54
Global Small-Cap Index Fund	\$68,841,885	3.33	3.63
Global Stock Index Fund	\$153,004,313	1.54	1.62
Japan Stock Index Fund	€257,236,081	9.05	9.17
Pacific ex-Japan Stock Index Fund	€12,675,513	0.46	1.14
SRI European Stock Fund	€4,940,951	1.61	1.70
U.S. 500 Stock Index Fund	\$3,631,760	0.05	0.05
U.S. Fundamental Value Fund	\$42,269	0.20	0.23
U.S. Opportunities Fund	\$39,518,978	2.27	2.61

**Data on Re-Use of Collateral**

Vanguard Investment Series Plc did not re-use any collateral received during the period ended 30 June 2020.

**Concentration Data**

The split of issuers of collateral securities received across all STFs as at 30 June 2020 is as follows:

Fund	Collateral Issuer	Collateral Amount
Emerging Markets Stock Index Fund	DE Government	\$8,534,440

## Additional Information for Investors in the Federal Republic of Germany

J.P. Morgan AG, Junghofstrasse 14, D-60311 Frankfurt am Main has undertaken the function of Paying and Information Agent for the Company in the Federal Republic of Germany (the "German Paying and Information Agent").

Applications for the redemptions and conversion of Shares may be sent to the German Paying and Information Agent. All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the German Paying and Information Agent.

The Prospectus together with its supplements, the key investor information documents, the Memorandum and Articles of Association of the Company and the annual and semi-annual reports may be obtained, free of charge, in hard-copy form at the office of the German Paying and Information Agent during normal opening hours. The statement of changes in the composition of the investment portfolio is also free of charge upon request at the office of the German Paying and Information Agent.

Issue, redemption and conversion prices of Shares, and any other information to the shareholders, are also available, free of charge, from the German Paying and Information Agent.

The issue, redemption and conversion prices will be published on the following website: [www.fundinfo.com](http://www.fundinfo.com).

Any other information to the shareholders will be published in Germany by way of investor letter.

BLOOMBERG is a trademark and service mark of Bloomberg Finance L.P. BARCLAYS is a trademark and service mark of Barclays Bank Plc, used under license. Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited (BISL) (collectively, Bloomberg), or Bloomberg's licensors, own all proprietary rights in the Bloomberg Barclays Euro Treasury 20+ Year Bond Index, Bloomberg Barclays Euro Government Float Adjusted Bond Index, Bloomberg Barclays EUR Non-Government Float Adjusted Bond Index, Bloomberg Barclays Global Inflation-Linked: Eurozone – Euro CPI Index, Bloomberg Barclays Global Aggregate Float Adjusted Bond Index, Bloomberg Barclays Global Aggregate Float Adjusted Corporate Index Hedged, Bloomberg Barclays Global Aggregate Credit Index Hedged, Bloomberg Barclays Global Aggregate Ex US MBS 1–5 Year Float Adjusted Bond Index, Bloomberg Barclays Global Aggregate Corporate 1–5 Year Float Adjusted Index, Bloomberg Barclays Japan Government Float Adjusted Bond Index, Bloomberg Barclays U.K. Government Float Adjusted Bond Index, Bloomberg Barclays GBP Non-Government Float Adjusted Bond Index, Bloomberg Barclays GBP Non-Government 1–5 Year 200MM Float Adjusted Bond Index, Bloomberg Barclays U.S. Government Float Adjusted Bond Index, Bloomberg Barclays Global Aggregate USD Credit Float Adjusted Bond Index, and Bloomberg Barclays U.S. Government Inflation-Linked 1–10 Year Index (the Indices or Bloomberg Barclays Indices).

Neither Barclays Bank Plc, Barclays Capital Inc., or any affiliate (collectively Barclays) or Bloomberg is the issuer or producer of the Vanguard Funds and neither Bloomberg nor Barclays has any responsibilities, obligations or duties to investors in the Vanguard Funds. The Indices are licensed for use by The Vanguard Group, Inc. (Vanguard) as the sponsor of the Vanguard Funds. Bloomberg and Barclays' only relationship with Vanguard in respect of the Indices is the licensing of the Indices, which are determined, composed and calculated by BISL, or any successor thereto, without regard to the Issuer or the Vanguard Funds or the owners of the Vanguard Funds.

Additionally, Vanguard may for itself execute transaction(s) with Barclays in or relating to the Indices in connection with the Vanguard Funds. Investors acquire the Vanguard Funds from Vanguard and investors neither acquire any interest in the Indices nor enter into any relationship of any kind whatsoever with Bloomberg or Barclays upon making an investment in the Vanguard Funds. The Vanguard Funds are not sponsored, endorsed, sold or promoted by Bloomberg or Barclays. Neither Bloomberg nor Barclays makes any representation or warranty, express or implied regarding the advisability of investing in the Vanguard Funds or the advisability of investing in securities generally or the ability of the Indices to track corresponding or relative market performance. Neither Bloomberg nor Barclays has passed on the legality or suitability of the Vanguard Funds with respect to any person or entity. Neither Bloomberg nor Barclays is responsible for and has not participated in the determination of the timing of, prices at, or quantities of the Vanguard Funds to be issued. Neither Bloomberg nor Barclays has any obligation to take the needs of the Issuer or the owners of the Vanguard Funds or any other third party into consideration in determining, composing or calculating the Indices. Neither Bloomberg nor Barclays has any obligation or liability in connection with administration, marketing or trading of the Vanguard Funds.

The licensing agreement between Bloomberg and Barclays is solely for the benefit of Bloomberg and Barclays and not for the benefit of the owners of the Vanguard Funds, investors or other third parties. In addition, the licensing agreement between Vanguard and Bloomberg is solely for the benefit of Vanguard and Bloomberg and not for the benefit of the owners of the Vanguard Funds, investors or other third parties.

NEITHER BLOOMBERG NOR BARCLAYS SHALL HAVE ANY LIABILITY TO THE ISSUER, INVESTORS OR TO OTHER THIRD PARTIES FOR THE QUALITY, ACCURACY AND/OR COMPLETENESS OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN OR FOR INTERRUPTIONS IN THE DELIVERY OF THE BLOOMBERG BARCLAYS INDICES. NEITHER BLOOMBERG NOR BARCLAYS MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER, THE INVESTORS OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN. NEITHER BLOOMBERG NOR BARCLAYS MAKES ANY EXPRESS OR IMPLIED WARRANTIES, AND EACH HEREBY EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN. BLOOMBERG RESERVES THE RIGHT TO CHANGE THE METHODS OF CALCULATION OR PUBLICATION, OR TO CEASE THE CALCULATION OR PUBLICATION OF THE BLOOMBERG BARCLAYS INDICES, AND NEITHER BLOOMBERG NOR BARCLAYS SHALL BE LIABLE FOR ANY MISCALCULATION OF OR ANY INCORRECT, DELAYED OR INTERRUPTED PUBLICATION WITH RESPECT TO THE BLOOMBERG BARCLAYS INDICES. NEITHER BLOOMBERG NOR BARCLAYS SHALL BE LIABLE FOR ANY DAMAGES, INCLUDING, WITHOUT LIMITATION, ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY LOST PROFITS AND EVEN IF ADVISED OF THE POSSIBILITY OF SUCH, RESULTING FROM THE USE OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN OR WITH RESPECT TO THE VANGUARD FUNDS.

None of the information supplied by Bloomberg or Barclays and used in this publication may be reproduced in any manner without the prior written permission of both Bloomberg and Barclays Capital, the investment banking division of Barclays Bank Plc.
