Far East Equity

(ISIN: LU0368556733, share class: HI (hedged), currency: EUR)

a sub-fund of Vontobel Fund

This fund is managed by Vontobel Management S.A., which is part of Vontobel Group.

Objectives and investment policy

The sub-fund aims to achieve the highest possible capital growth.

- The sub-fund mainly invests in equities and equity-like securities. The sub-fund may also hold cash.
- The sub-fund invests in securities issued by companies that are based and/or conduct their majority of their business activity in the Far East and/or Oceania (excluding Japan).
- The sub-fund can use derivatives for hedging purposes and to efficiently manage the portfolio.
- The currency of this class is continually hedged against the sub-fund's main currency. This hedging does not necessarily cover all currency risks. It entails costs which in turn reduce the share class's return.

- The portfolio manager can make investments for the sub-fund at his or her own discretion within the predefined investment limits.
- Income is not paid out, but retained for reinvestment.
- The charges for buying and selling securities are paid by the sub-fund. They are payable in addition to the charges listed and reduce the sub-fund's return.
- You can redeem shares in the sub-fund on any working day. The only exceptions are on public holidays in Luxembourg or if a large number of stock exchanges and markets in which the sub-fund invests are closed.
- HI shares are exclusively reserved for institutional investors.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The sub-fund is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- The sub-fund entails a higher degree of liquidity risk and greater operational risks as it invests in markets that may be affected by political developments and/or changes in legislation as well as tax and foreign exchange controls.
- This share class of the sub-fund is issued in EUR. The sub-fund can invest extensively in securities denominated in other currencies, which means that the class may be exposed to a higher currency risk.
