**Objectives:** The sub-fund aims to generate long-term capital growth based on a diversified approach with an economic focus on future developments in the fields of production, services and technological change, taking sustainability criteria into account. The sub-fund achieves its objective by predominantly investing either directly or indirectly in equities and securities similar to equities issued by companies that have recognised the economic relevance of the thematic area and that fulfil stringent sustainability criteria. The investment style is active, focusing on a global investment universe and adherence to strict liquidity criteria. The sub-fund is based on the sustainability approach of VP Bank. This approach incorporates requirements both relating to individual securities as well as at portfolio level. Individual security selection excludes companies with a low ESG rating as well as certain business activities and practices, and breaches of internationally recognised standards. A detailed list of the grounds for exclusion is provided on the sustainability page of the VP Bank website ([www.vpbank.com/en/vp-bank-sustainability-score](http://www.vpbank.com/en/vp-bank-sustainability-score)). Securities are selected based on a clearly structured, quantitative investment process. The sub-fund aims to achieve a broadly diversified portfolio of around 40 to 60 securities with an optimal risk/reward ratio, focusing on companies that value quality and sustainability in order to generate added value. Companies with competitive advantages are identified through proprietary analysis. These include sound business practices, efficiency gains and the development and implementation of new solutions, focusing on the defined thematic spectrum.

**Intended retail investor:** In the member state of origin, the product is intended for professional and private investors with a long-term investment horizon, basic experience and who are able to bear a full financial loss. The product may be used for capital appreciation.

## What are the risks and what could I get in return?

### Risk Indicator:

Lower risk

Higher risk

The risk indicator assumes you keep the product until 9 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.

We have classified this product as 4 out of 7, which is a medium. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance-Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 14 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

This type of unfavorable scenario occurred for an investment between 24.09.2021 - 26.09.2022 (if you exit after 1 year), 04.01.2022 - 03.10.2023 (if you exit after 9 years).

This type of moderate scenario occurred for an investment between 08.12.2009 - 08.12.2010 (if you exit after 1 year), 19.02.2010 - 21.02.2019 (if you exit after 9 years).

This type of favorable scenario occurred for an investment between 23.03.2020 - 23.03.2021 (if you exit after 1 year), 04.06.2012 - 04.06.2021 (if you exit after 9 years).

Recommended holding period: 9 years Example Investment: 10'000 USD		If you exit after 1 year	If you exit after 9 years
<b>Worst case scenario</b>	<b>You could lose some or all of your investment</b>		
<b>Stress scenario</b>	<b>What you might get back after costs</b>	1'280 USD	460 USD
	Average return each year	-87.2 % p.a.	-29.0 % p.a.
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	7'780 USD	8'270 USD
	Average return each year	-22.2 % p.a.	-2.1 % p.a.
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	11'050 USD	22'000 USD
	Average return each year	10.5 % p.a.	9.2 % p.a.
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	17'670 USD	30'910 USD

### What happens if VP Fund Solutions (Liechtenstein) AG is unable to pay out?

Should the manufacturer, VP Fund Solutions (Liechtenstein) AG, or the custodian default on their obligations, the product is not included in the insolvent estate, and may be transferred or liquidated with the consent of the competent supervisory authority.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10'000 USD Investment.

	If you exit after 1 year	If you exit after 9 years
Total costs	335 USD	2'677 USD
Annual cost impact (*)	3.4 %	1.4 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.3 % before costs and 8.9 % after costs.
