GBP S Q1 DisH

Wellington Global Credit Buy and Maintain Fund (the "Fund") a Fund of Wellington Management Funds (Ireland) plc (the "Company")

ISIN: IE00BYWR9987

Management company: Wellington Luxembourg S.à r.l.

### OBJECTIVES AND INVESTMENT POLICY

- The Fund seeks long-term total returns (capital appreciation and income).
- The Fund will be actively managed, investing primarily in investment grade global bonds. The Fund seeks to hold securities to their maturity unless their credit outlook deteriorates or securities with a better forecast return are identified. The Fund's interest rate duration (sensitivity to interest rate changes) will be hedged to ensure that the total average will typically be 0.25 years plus or minus 0.25 years. The Fund will generally be diversified by country, currency, industry, sector, issuer and market cap but may hold positions that are concentrated from time to time.
- The Fund will invest, either directly or via derivatives, in a diversified portfolio of investment grade corporate bonds globally. It may also invest in securities issued by government, agency, supranational or corporate issuers; mortgage and other asset-backed securities. Below investment grade securities will be limited to 20% of the net assets of the Fund at the time of purchase.
- Derivatives may be used to hedge (manage) risk and for investment purposes (such as gaining exposure to a security).
- The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.
- The Fund will seek to support certain environmental characteristics by aiming to achieve net zero emissions by 2050 in alignment with the Paris Agreement, by investing a minimum of 20% of its assets in companies which have established, or have committed to establish science-based targets, with this percentage increasing to a minimum of 55% by 2030, 90% by 2040 and 100% by 2050.
- Any income allocated to the Share class from the Fund is distributed.
- Shares can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.
- This Fund may not be appropriate for investors who plan to withdraw their money within five years. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.
- This Share class will, via derivatives, seek to provide similar performance to the Fund in its base currency by limiting the impact of the movement of exchange rates between the currency of the Share class and the base currency of the Fund.

### RISK & REWARD PROFILE

< LOWER RISK

< Typically Lower Rewards

HIGHER RISK >

Typically Higher Rewards >

The indicator is not a measure of the risk of capital loss, but a measure of the previous ups and downs in value of the Fund. It is based on historical data and may not be a reliable indicator of the Fund's future risk profile. If the Fund has been in operation for less than 5 years, representative history, such as a comparable Share class or index, may have been used to create the indicator.

- The indicator may shift over time and is not a target or guarantee.
- The lowest category does not represent a risk-free investment.
- The Fund is classified as a 3 as over the past 5 years the average amount by which returns varied each year was equal to or above 2% and less than 5%.

#### MATERIAL RISKS RELEVANT TO THE FUND WHICH ARE NOT FULLY CAPTURED BY THE INDICATOR:

**BELOW INVESTMENT GRADE:** Lower rated or unrated securities may have a significantly greater risk of default than investment grade securities, can be more volatile, less liquid, and involve higher transaction costs.

**CAPITAL:** Investment markets are subject to economic, regulatory, market sentiment and political risk which can trigger unexpected capital loss.

**COUNTERPARTY:** The institutions with which the Fund may trade or invest, or to which assets may be entrusted, may fail to meet their obligations which could impact the operational capability or value of your investment.

**CREDIT:** The value of a bond may decline, or the issuer/guarantor may fail to meet payment obligations. Typically lower-rated bonds carry a greater degree of credit risk than higher-rated bonds.

**CURRENCY:** The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility.

**DERIVATIVES:** Specific risks such as operational issues, complexity, and valuation may be linked to the possible use of derivatives.

**HEDGING:** Any hedging strategy using derivatives may not achieve a perfect hedge.

**INTEREST RATES:** The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds.

**LEVERAGE:** The use of leverage can provide more market exposure than the money paid or deposited when the transaction is entered into. Losses may therefore exceed the original amount invested.

**LIQUIDITY:** The Fund may invest in securities that are less liquid and may be more difficult to buy or sell in a timely fashion and/or at fair value.

**OPERATIONAL:** The impact of breakdowns in systems, internal procedures and human error.

**SUSTAINABILITY:** A Sustainability Risk can be defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment. Further information on specific Sustainability Risks can be found in the Fund's prospectus.

A more detailed description of the risk factors that apply to the Fund is set out in the section "Risk Factors" in the Prospectus.
