What is this product?**Type**

The Product is a share of the Sub-fund Wellington Multi-Asset Total Return Income Fund (the "Fund") which is part of the Wellington Management Funds (Ireland) plc (the "Umbrella Fund"), an open-ended investment company with variable capital and segregated liability between Funds incorporated with registered number 267944 and is authorised in Ireland as a UCITS pursuant to the Regulations.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period, but the Management Company, with the approval of the Depositary, is entitled to give notice of the Umbrella Fund's dissolution at any time. In the event that the Management Company considers that changes in the political, economic, military, regulatory or business environments, or reductions in the scale of a Fund's total net assets compromise the effective management of a Fund, then the Management Company is empowered to liquidate the Fund at any time.

Objectives

The Fund seeks a combination of long-term total returns with a regular income and to actively manage downside risk.

The Fund will be actively managed, investing in a broad array of global assets such as equities, government bonds, investment grade and high yield credit (such as corporate bonds) to support its aim to declare dividend income between 4%-8%, of its Net Asset Value in USD terms, per year. The Investment Manager believes that a consistent income combined with long term capital growth can be achieved through the active management of assets and market exposures within a disciplined risk control framework.

The Investment Manager focuses on four key areas when constructing the portfolio: diversification, differentiated implementation, dynamic asset allocation, and disciplined risk management.

The Fund seeks to invest in a diverse set of global asset classes. These allocations are actively managed to try and enhance returns, with a key focus on higher quality and more liquid assets.

The Fund will also seek to navigate evolving markets and opportunities via dynamic asset allocation, whilst a disciplined multi-layered risk management approach will aim to limit losses in the case of market weakness.

The Fund may invest, either directly or via derivatives, in shares and other securities with equity characteristics, comprising preferred stock, warrants, rights, depositary receipts, and convertible securities; bonds (fixed or floating rate)

issued by government, agency, supranational or corporate issuers; mortgage and other asset-backed securities and may also hold cash and cash equivalents in multiple currencies without restriction.

Derivatives will be used to hedge (manage) risk and/or volatility and for investment purposes (such as gaining exposure to a security, to create leverage and/or a short position, efficient asset allocation). Derivatives will form a significant part of the strategy and will impact performance.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The Fund will seek to support certain environmental, social and governance (ESG) characteristics by ensuring that at least 65% of the Fund's net asset will be invested in companies with an ESG Rating 1-3, using an internal rating scale of 1-5, where 1 is the highest rating.

This Share class will, via derivatives, seek to provide similar performance to the Fund in its base currency by limiting the impact of the movement of exchange rates between the currency of the Share class and the base currency of the Fund.

Income policy

Any income allocated to the Share class from the Fund is reinvested.

Dealing Frequency

Shares can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.

Intended retail Investor

The Fund is intended for basic retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors in the Fund should be aware that, as set out in the Fund's Distribution Policy, dividends may be declared out of the capital of the Fund.

Depositary

State Street Custodial Services (Ireland) Limited.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 3 out of 7 which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		20,000 SGD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	9,870 SGD	10,610 SGD
	Average return each year	-50.65%	-11.91%
Unfavourable	What you might get back after costs	16,580 SGD	18,680 SGD
	Average return each year	-17.10%	-1.36%
Moderate	What you might get back after costs	21,200 SGD	26,560 SGD
	Average return each year	6.00%	5.84%
Favourable	What you might get back after costs	25,060 SGD	31,740 SGD
	Average return each year	25.30%	9.68%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2021 and 2024.

Moderate scenario: This type of scenario occurred for an investment using a suitable benchmark between 2017 and 2022.

Favourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2016 and 2021.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the 5 year holding period we have assumed the product performs as shown in the moderate scenario
- 20,000.00 SGD

	If you exit after 1 year	If you exit after 5 years
Total costs	108 SGD	685 SGD
Annual cost impact (*)	0.5%	0.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.3 % before costs and 5.8 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.
