Xtrackers DAX ESG Screened UCITS ETF

Share class: 1D, ISIN: LU0838782315, Security code: DBX0NH, Currency: EUR

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the DAX ESG Screened Index (index). The index is based on the DAX® Index (Parent Index), which is designed to reflect the performance of the shares of large capitalisation companies traded on the Frankfurt Stock Exchange. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and must meet certain environmental, social and governance (ESG) standards. The index excludes companies from the Parent Index, which: (i) are assigned an ISS ESG Rating of D- or below; (ii) are identified as 'Red' by ISS ESG in their Norms Based Screening; (iii) have any involvement in controversial weapons; (iv) are classified by ISS ESG as breaching certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, and military equipment; and/or (v) have missing ESG data. The remaining securities are then weighted by their free-

float adjusted market capitalisation with the weight of each component in the index capped at 10%. The index is administered by STOXX Ltd. The index is calculated on a total return net basis, which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on a quarterly basis. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The fund may also engage in secured lending of its investments to certain eligible third parties subject to certain ESG criteria to generate additional income to offset the costs of the fund. The currency of the fund is EUR. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The

value of your investment may go down as well as up. The fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and Institutional Shareholder Services Inc. (ISS ESG) for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
