

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers II USD Emerging Markets Bond UCITS ETF

Share class: 1C - EUR Hedged, ISIN: LU0321462953, Security code: DBX0AV, Currency: EUR

a sub-fund of Xtrackers II. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the FTSE Emerging Markets USD Government and Government-Related Bond Select Index (index), while seeking to minimise foreign currency fluctuations at share class level. The index aims to reflect the performance of both investment-grade and high-yield US Dollar denominated debt issued by governments, regional governments and government related entities, domiciled in emerging market countries. For debt securities to be included in the index they must meet specific criteria, including minimum credit ratings of debt security issuers. Issuers must be from countries classified as emerging markets and securities issued must be denominated in US Dollars. The index is calculated on a total return basis, which means that amounts equivalent to interest payments are reinvested in the index. The index is administered by FTSE Fixed Income LLC and reviewed

and rebalanced monthly. To achieve the aim, the fund will i) attempt to replicate the index by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the fund's assets and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The index provides a notional exposure to the value and/or return of certain bonds, which may fall. This may

result in your investment suffering a loss. Markets in those bonds may at times become volatile or illiquid. This means that ordinary trading activity may occasionally be disrupted or impossible. The index may be affected, and your investment may suffer a consequent loss. The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. The fund may use derivatives to i) try to manage its investments more efficiently; and ii) try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. The fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations than investment grade bonds. This may affect the value of your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.40 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.00 %

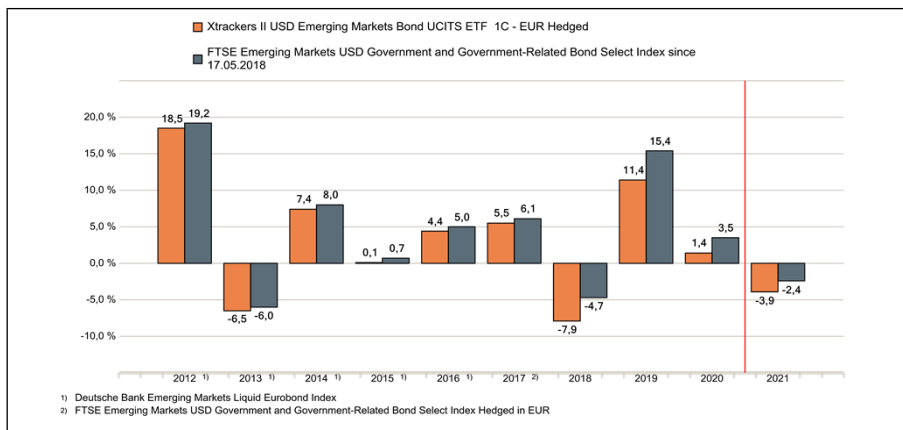

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2021. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated gross revenue. The remaining 30% will be allocated to the management company, out of which it (i) retains 5% of such 30% (that is 1.5% of the overall gross revenues generated from such transactions) for its own coordination and oversight tasks, (ii) pays the direct costs to external service providers, and (iii) pays such revenues as remain following payment of (i) and (ii) to the Investment Manager for supporting the management company in initiating, preparing and implementing securities lending transactions, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C - EUR Hedged share class of Xtrackers II USD Emerging Markets Bond UCITS ETF were deducted during the calculation. The 1C - EUR Hedged share class of Xtrackers II USD Emerging Markets Bond UCITS ETF was launched in 2008.

As of 17 May 2018 the share class changed its benchmark index to the FTSE Emerging Markets USD Government and Government-Related Bond Select Index. The investment objectives of the share class are unchanged and it continues to hedge currency risk. The index performance shown for 2018 is based solely on the performance of the FTSE Emerging Markets USD Government and Government-Related Bond Select Index. The 2017 reference period shows a combined performance of the FTSE Emerging Markets USD Government and Government-Related Bond Select Index, Currency- Hedged in EUR (from 7 November 2017 until 31 December 2017) and the Deutsche Bank Emerging Markets Liquid Eurobond Index (from 1 January 2017 until 6 November 2017). The index performance for the 2009-2016 reference period shows the performance of the Deutsche Bank Emerging Markets Liquid Eurobond Index.
