Xtrackers LPX Private Equity Swap UCITS ETF

Share class: 1C, ISIN: LU0322250712, Security code: DBX1AN, Currency: EUR

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the LPX Major Market® Index (index) which is designed to reflect the performance of the 25 most frequently traded private equity companies. The main business purpose of the companies must be private equity (which involves investing in companies which are not listed on a stock exchange). The private equity companies themselves must be listed on a stock exchange. The private equity companies may be based in any region and may engage in a variety of private equity activities. The

composition of the index is reviewed twice a year and companies are chosen depending on how often and in what volume their shares are traded. To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the index, in order to obtain the return on the index. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the derivatives

used. The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The derivative used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
