

Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers MSCI World Swap UCITS ETF

Share class: 1D, ISIN: LU2263803533, Security code: DBX0RG, Currency: USD

The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the MSCI Total Return Net World Index (index) which is designed to reflect the performance of the listed shares of certain companies from various developed countries. The companies making up the index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the index depends on its relative size. The index is calculated on a total return net basis which means that all dividends

and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. To achieve the aim, the fund will buy shares and/or invest in cash deposits and enter into financial contracts (derivatives) with one or more swap counterparties relating to the shares and the index, in order to obtain the return on the index. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the shares and/or cash deposits and the performance of the derivatives used. The

fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The derivative used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
