XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023

1. General Information

The Company is an investment company with variable capital incorporated on 17 November 2004, authorised and regulated by the Central Bank under the European Communities (Undertakings for Collective Investments in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investments in Transferable Securities) Regulations 2019) (together the “UCITS Regulations”). The Company had no employees during the financial years ended 31 December 2023 and 31 December 2022.

Investment objectives of each Fund may be found in the relevant Fund’s Supplement.

2. Basis of Preparation

The financial statements have been prepared for the financial year ended 31 December 2023. These financial statements have been prepared on a going concern basis with the exception of the Xtrackers EUR Credit 12.5 Swap UCITS ETF which was terminated on the 22 March 2023 and has been prepared on a basis other than going concern.

Statement of compliance

These financial statements have been prepared in accordance with accounting standards generally accepted in Ireland including Financial Reporting Standard (“FRS”) 102; the Financial Reporting Standard applicable in the UK and Republic of Ireland, the provisions of the UCITS Regulations and Irish Statute comprising the Irish Companies Act. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (“FRC”).

The Company has availed of the exemption available to open ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under Section 7 of FRS 102 and is not presenting cash flow statements. Highly liquid investments are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value.

The format and wording of certain line items on the primary statements contains departures from the Guidelines of the Irish Companies Act to reflect this Company’s structure as an Investment Fund.

All references to net assets throughout the documents refers to Net Assets Attributable to Holders of Redeemable Participating Shares unless otherwise stated.

Functional and presentation currency

The financial statements of the individual Funds are prepared in the functional currency of the respective Fund. The functional currency of each Fund is that as disclosed on the primary statements of the respective Fund. The Company has adopted Euro as the presentation currency.

Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign currency closing exchange rate ruling at the Statement of Financial Position date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated at the foreign currency exchange rates ruling at the dates that the values were determined. Foreign currency exchange differences arising on consolidation translation are recognised in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares in “Foreign currency translation” line. Foreign currency exchange differences relating to investments at fair value through profit or loss and derivative financial instruments are included in gains and losses on investments. All other foreign currency exchange differences relating to monetary items, including cash, are presented in the Statement of Comprehensive Income.

Foreign exchange gain and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in fair value. Included in the Statement of Comprehensive Income line item “Net gains/(losses) on investments at fair value through profit or loss during the financial year” are also net foreign exchange gains and losses on monetary financial assets and financial liabilities.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

2. Basis of Preparation cont/d

Critical accounting estimates and judgements

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires the Board of Directors, based on the advice of the Management Company to exercise its judgement in the process of applying the Company's accounting policies. The estimates and associated judgements are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the actual results.

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all year and periods presented in these financial statements.

(a) Financial instruments

(i) Fair Value Measurement, Recognition and Derecognition

The Company has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of sections 11 and 12 of FRS 102.

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

Financial assets classified as loans and receivables are carried at amortised cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising from the redeemable shares issued by the Company are carried at the redemption amount representing the investors' right to a residual interest in the Company's assets.

The Company recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Company. The Company derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Company.

(ii) Categorisation

In accordance with IAS 39 Financial Instruments: Recognition and Measurement the Company has classified its investments as financial assets and financial liabilities at fair value through profit or loss category.

The category of financial assets and financial liabilities at fair value through profit or loss comprises:

- Financial instruments held-for-trading. These include total return swaps, interest rate swaps, exchange-traded funds, futures contracts, forward foreign currency exchange contracts, equities and bonds included as financial assets and financial liabilities at fair value through profit or loss in the Statement of Financial Position. All derivatives in a net receivable position (positive fair value), are reported as financial assets. All derivatives in a net payable position (negative fair value), are reported as financial liabilities.
- Financial instruments designated at fair value through profit or loss upon initial recognition. These include financial assets that are not held for trading purposes and which may be sold.

Financial assets that are classified as loans and receivables include cash and cash equivalents, cash held with brokers and accounts receivables.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

3. Significant accounting policies cont/d

(a) Financial instruments cont/d

(ii) Categorisation cont/d

Financial liabilities that are not at fair value through profit or loss, if any, include accounts payable.

(iii) Fair value measurement principles

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

The fair value of derivatives that are not exchange-traded is estimated at the amount that the Company would receive or pay to terminate the contract at the Statement of Financial Position date taking into account current market conditions (volatility, appropriate yield curve) and the current creditworthiness of the counterparties.

The Company classifies its financial instruments using a fair value measurement that reflects the significance of inputs used in making measurements, as set out in Note 10.

(iv) Total Return Swaps

"Total Return Swap" is the generic name for any non-traditional swap where one party agrees to pay the other the "total return" of a defined underlying reference obligation, usually in return for receiving a stream of LIBOR based cashflows. The total return swap may be applied to any underlying reference obligation but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages.

The total return swaps held by the Company are exposed to fluctuations on the underlying reference obligations. However, in contrast to the typical total return swap there are no periodic payments to the swap counterparty. The total return swaps are recorded as financial assets or financial liabilities at fair value through profit or loss in the Statement of Financial Position.

The fair value of these total return swaps is determined by the Directors based on the mark to market valuation provided by the counterparty. In determining the mark to market valuation, the counterparty makes assumptions that are based on market conditions existing on each Statement of Financial Position date and uses valuation techniques which include the use of comparable recent arm's length transactions, discounted cash flow techniques, option pricing models and other valuation techniques commonly used by market participants.

(v) Cash, cash equivalents and bank overdrafts

Cash comprises current deposits and overdrafts with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Cash and cash equivalents are carried at amortised cost. Bank overdrafts are presented separately in the Statement of Financial Position.

(vi) Cash held with brokers for derivative contracts

Cash is deposited by or on behalf of the Fund for initial margin requirements for futures contracts, forward foreign currency exchange contracts and swaps.

(vii) Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated,

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

3. Significant accounting policies cont/d

(a) Financial instruments cont/d

(vii) Futures Contracts cont/d

at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Portfolio of Investments of each relevant Fund and as appropriate, in the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss.

(viii) Forward Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, gains or losses on open forward foreign currency exchange contracts are included in the financial assets or liabilities at fair value through profit or loss, as appropriate, in the Statement of Financial Position and are shown in the Portfolio of Investments of each relevant Fund.

(b) Bank Interest

All bank interest is recognised in the Statement of Comprehensive Income as it accrues, using the original effective interest rate of the instrument calculated at the acquisition or origination date.

Bank interest includes the amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. Bank interest on debt instruments is accrued using the original effective interest rate and classified to the "Income from investments at fair value through profit or loss" line item within the Statement of Comprehensive Income. Bank interest is recognised on a gross basis and is classified to "Bank interest" in the Statement of Comprehensive Income. Bank interest is recognised on a gross basis, including withholding tax, if any. Bank expense is recognised in the Statement of Comprehensive Income for bank overdraft and all debt instruments using the effective interest method and is classified on the line item "Bank interest and charges".

(c) Expenses

All expenses, including management fees are recognised in the Statement of Comprehensive Income on an accrual basis.

(d) Gains and Losses on Investments

Realised gains and losses on sales of investments are calculated on the average book cost. Realised and unrealised gains and losses on investments arising during the financial year are presented in the Statement of Comprehensive Income.

(e) Taxation

Interest, dividend income and capital gains by the Company may be subject to withholding tax imposed in the country of origin. Investment income is recorded gross of such taxes. Please refer to Note 5 for details.

(f) Participating Redeemable Shares

The Company classifies financial instruments issued as financial liabilities in accordance with the substance of the contractual terms of the instruments. The redeemable shares provide investors with the right to require redemption for cash at a value proportionate to the investor's share in the Company's net assets at each redemption date and also in the event of the Company's liquidation.

The redeemable shares are classified as financial liabilities and are measured at a value proportionate to the investor's share in the Company's net assets at each redemption date.

(g) Distributions

Distributions are recognised in the Statement of Comprehensive Income on the ex-date.

(h) Dividend income

Dividend income is recognised when the rights to receive income is established. Usually this is the ex-dividend date for equity securities. Dividend income from equity securities designed at fair value through profit or loss is recognised on a gross basis in the "Income from investments at fair value through profit or loss" line in the Statement of Comprehensive Income.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

3. Significant accounting policies cont/d

(i) Securities lending income

The Company has appointed Deutsche Bank AG, acting through its Frankfurt head office and its London and New York branches as its securities lending agent. Certain Funds may lend securities through the security lending agent to brokers, dealers and other financial organisations to earn additional income. Income earned from securities lending activities is accounted for on an accruals basis. See the Statement of Comprehensive Income and Note 14 for details.

4. Significant agreements

Management Company

DWS Investment S.A. (the "Management Company") is responsible for providing investment management services and distribution and marketing services to the various Funds (unless otherwise indicated in the relevant Supplement).

The Management Company has been established under the laws of the Grand Duchy of Luxembourg in the form of a "Société Anonyme" on 15 April 1987. The Management Company is registered with the Luxembourg Trade and Companies' Register under number B-25.754. The Management Company is authorised as a UCITS management company under Chapter 15 of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as may be amended from time to time and as an alternative investment fund manager under Chapter 2 of the Luxembourg law of 12 July 2013 relating to alternative investment fund managers.

With the approval of the Company, the Management Company may delegate, under its own supervision and responsibility and at its own expense, any or all of its advisory duties to advisers previously approved by the Company and by the regulatory authorities.

The percentages included in the table below are the maximum Management Company Fee percentages that could be charged as at 31 December 2023 and 31 December 2022.

¹This Fund was terminated on 22 March 2023.

²As of 19 May 2022 until 18 May 2023, there was a fee waiver on the Management Company Fee of this Share Class from 0.15% p.a. to 0.05% p.a. The Management Company Fee returned to the usual charge of "up to 0.15% per annum" since 19 May 2023.

³As of 1 November 2022, there is a fee waiver on the Management Company Fee of this Share Class from 0.07% p.a. to 0.05% p.a. The fee waiver was effective until 31 October 2023.

⁴This Fund was launched on 18 January 2023.

⁵This Fund was launched on 25 January 2023.

⁶This Fund was launched on 31 January 2023.

⁷This Fund was launched on 12 April 2023.

⁸This Fund was launched on 5 July 2023.

⁹This Fund was launched on 13 September 2023.

¹⁰This Fund was launched on 26 September 2023.

The fees due under the Management Company Agreement will accrue daily and be calculated on each Dealing Day and paid each month in arrears. The Management Company will pay out of its fees (and not out of the assets of the Fund) the fees of any Investment Manager. Neither the Management Company nor any Investment Manager will be entitled to be reimbursed out of the assets of the Fund for their respective out-of-pocket expenses. The Management Company was paid fees during the financial year of EUR 51,073,414 (31 December 2022: EUR 50,321,529). The Management Company fees accrued at the financial year end were EUR 9,452,612 (31 December 2022: EUR 7,629,737).

The Investment Managers and Sub-Portfolio Managers

DWS Investment GmbH and DWS Investments UK Limited have been appointed by the Management Company to act as investment managers of the Company (the "Investment Managers") pursuant to the Investment Management Agreements, which may be amended by mutual consent of the relevant parties from time to time.

An Investment Manager may, with the approval of the Management Company and the relevant regulatory authorities but under its own supervision and responsibility, appoint a Sub-Portfolio Manager to provide certain portfolio management and risk management services with respect to a Fund. In particular, the Investment Manager may appoint a Sub-Portfolio Manager to select a Fund's investments.

The Investment Managers, and Sub-Portfolio Managers, details of which can be found in the Prospectus, have been appointed in respect of one or more Funds as specified below:

(i) Direct Investment Funds

Unless otherwise provided in the relevant Supplement, the Management Company sub-delegates the day-to-day investment management with respect to Direct Investment Funds to DWS Investment GmbH. For the avoidance of doubt, the Management Company will retain certain investment management responsibilities, including but not limited to the execution of transactions and the monitoring of compliance with the Investment Restrictions.

DWS Investment GmbH may, from time to time, in accordance with an agreed process, delegate all or part of its investment management responsibilities with respect to one or more Direct Investment Funds to DWS Investments UK Limited and/or DWS Investments Hong Kong Limited (each a "Sub-Portfolio Manager"). DWS Investment GmbH has appointed Nippon Life India Asset Management (Singapore) Pte. Ltd as Sub-Portfolio Manager to provide certain discretionary portfolio management services with respect to Xtrackers India Government Bond UCITS ETF.

(ii) Indirect Investment Funds

Unless otherwise provided in the relevant Supplement, the Management Company sub-delegates the day-to-day investment management with respect to Indirect Investment Funds to DWS Investments UK Limited.

Platform Fee Arrangement

The Company may in respect of each Fund (as specified in the relevant Supplement) enter into an arrangement with DWS Investments UK Limited (the "Platform Fee Arranger"), where the Platform Fee Arranger will, in exchange for a Platform Fee (as defined in the relevant Supplement), pay the Platform Costs from time to time of the relevant Funds. For the avoidance of doubt, the Management Company Fee is charged separately to and is not covered under the Platform Fee. Where applicable, the Platform Fee is calculated on the average daily Net Asset Value per Fund or per Class of Shares or the Initial Issue Price (as will be indicated in the Supplement) and is accrued daily and payable monthly. The Platform Fees paid during the financial year were EUR 67,992,825 (31 December 2022: EUR 62,918,739). The Platform Fees accrued at the financial year end were EUR 12,651,420 (31 December 2022: EUR 9,733,493).

For details of the fees paid to Platform Fee Arranger as at 31 December 2023 and 31 December 2022 please see the table below:

Depositary

The Company has appointed State Street Custodial Services (Ireland) Limited to act as depositary of its assets pursuant to the Depositary Agreement and to provide depositary services to each Fund in accordance with the UCITS regulations. Under the terms of the Depositary Agreement, the Depositary may, however, appoint any person or persons to be the sub-custodian of the assets of the Company. The Depositary fees are paid from the Platform Fee Arrangement.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

4. Significant agreements cont/d

Administrator

The Company has appointed State Street Fund Services (Ireland) Limited to act as Administrator of the Company pursuant to the Administration Agreement. The Administrator is responsible for performing the day to day administration of the Funds including the registrar and transfer agency function and for providing fund accounting for the Fund, including the calculation of the Net Asset Value of the Fund and the Net Asset Value per Share. The Administrator fees are paid out of the Platform Fee Arrangement.

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forward foreign currency exchange contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Similarly custody transaction costs form part of the Total Expense Ratio ("TER") of the Fund but are not distinguishable from the other expenses captured within the TER. Transaction costs on purchases and sales of equities and futures are included in Net gains/(losses) on investments at fair value through profit or loss during the financial year in the Statement of Comprehensive Income for each Fund.

For the financial year ended 31 December 2023, the Company incurred custody and transaction costs on other purchases and sales as follows:

Fund	Transaction costs on purchase and sale of investments	Custody transaction costs

5. Taxation

The Company is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution payments to shareholders or any encashment, redemption or transfer of shares or the ending period for which the investment was held.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or the ending of a "Relevant Period". A "Relevant Period" is an eight year period beginning with the acquisition of the shares by the shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

5. Taxation cont/d

A gain on a chargeable event does not arise in respect of:

- a shareholder who is not an Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company;
- certain exempted Irish tax resident investors who have provided the Company with the necessary signed statutory declarations;
- an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another fund;
- any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland;
- certain exchanges of shares between spouses and former spouses on the occasion of judicial separation and/or divorce;
- an exchange by a shareholder, effected by way of an arm's length bargain where no payment is made to the shareholder of shares in the Company for other shares in the Company.

Capital gains, dividends and interest (if any) received on investment made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

In the absence of an appropriate declaration, the Company will be liable for Irish tax on the occurrence of a chargeable event, and the Company reserves its right to withhold such taxes from the relevant shareholders.

7. Directors' remuneration

The Directors who are not associated with the Management Company or any affiliate will be entitled to remuneration for their services as Directors provided, however that the aggregate emoluments of each such Director shall not exceed EUR 75,000 or such other amount as may be approved by a resolution of the Directors or the Shareholders in general meeting. The three independent Directors receive fixed fees only (for the financial year ended 31 December 2023: EUR 225,000 in aggregate and for the financial year ended 31 December 2022: EUR 221,558 in aggregate) and do not receive variable remuneration. In addition, all of the Directors will be entitled to be reimbursed for their reasonable out of pocket expenses incurred in discharging their duties as Directors. The remuneration for all work carried out by the three independent Directors in respect of the financial year is paid out of the Platform Fee.

8. Fees for the Audit and Fees for Other Services

The remuneration for all work carried out by the statutory audit firm, in respect of the financial year is included in the Platform Fee Payment. Fees paid to PricewaterhouseCoopers in Ireland in respect of the financial year ended 31 December 2023 amounted to EUR 401,880 (exclusive of VAT) (31 December 2022: EUR 319,140 (exclusive of VAT)) for statutory audit work. Other assurance service fees paid to PricewaterhouseCoopers in Ireland for the financial year ended 31 December 2023 were EUR Nil (31 December 2022: EUR Nil). Other non-audit service fees paid to PricewaterhouseCoopers in Ireland for the financial year ended 31 December 2023 were EUR Nil (31 December 2022: EUR Nil). There were no other tax advisory service fees paid to PricewaterhouseCoopers in Ireland by the Company.

PricewaterhouseCoopers network fees for tax compliance and regulatory services for the financial year ended 31 December 2023 were EUR 148,251 (31 December 2022: EUR 234,635).

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

9. Shares in issue

Authorised Share Capital and Subscriber Shares

Subscriber Shares do not entitle the holders to any dividend and on winding up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company.

The redeemable participating shares are classified as liabilities in accordance with Financial Reporting Standard No. 25 "Financial instruments disclosure and presentation" as they are redeemable at the request of the holders. The authorised share capital of the Company is 2 subscriber shares of EUR 1 each and 1,000,000,000,000 shares of no par value initially designated as unclassified shares. The unclassified shares are available for issue as shares. The issue price is payable in full on acceptance. There are no rights of preemption attaching to the shares in the Company.

The redeemable participating shares issued by the Company are freely transferable and are entitled to participate equally in the profits and dividends of the relevant Fund and its assets upon liquidations. These shares, which are of no par value and which must be fully paid up on issue, carry no preferential or preemptive rights and are entitled to one vote each at all meetings of the relevant class of shareholders. All shares of each Fund will rank paripassu. They may be redeemed by the Company at the request of the shareholder.

The number of Participating Shares issued and redeemed during the financial year is set out on the following pages.

10. Financial Instruments and Associated Risks

General Risk Management Process

In accordance with paragraph 34.23 of FRS 102, this note details the way in which the Company manages risks associated with the use of financial instruments.

In pursuing their respective objectives, the Funds hold a number of financial instruments:

1. Fixed interest and equity securities. These are held in accordance with each Fund's objectives.
2. Cash, liquid resources and short term debtors and creditors that arise directly from the Funds' operations.
3. Derivative instruments.

Market risk is managed according to the requirements of the UCITS Regulation, CESR 10/788. Global exposure is monitored under commitment approach (except for one Product - Xtrackers EUR Credit 12.5 Swap UCITS ETF - where VaR approach was used).

Risk can be separated into the following components: market risk, credit risk and liquidity risk. Each type of risk is discussed in turn and qualitative and quantitative analyses are provided where relevant to give the reader an understanding of the risk management methods used by the Management Company and the Board of Directors.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market price. It includes currency risk, interest rate risk and price risk. Market risk arises mainly from uncertainty about future prices of the financial instruments held. It represents the potential loss the Funds might suffer through holding market positions in the face of price movements.

Although the exposure to market price volatility on Xtrackers MSCI GCC Select Swap UCITS ETF is hedged by the swaps entered into, this Fund is still exposed to price fluctuations in the underlying basket of indices on which the swap returns are based. Xtrackers EUR Credit 12.5 Swap UCITS ETF also invested in swap contracts, but the Fund was terminated on 22 March 2023.

The sensitivity of the Funds to movements in market prices was incorporated in the Value at Risk ("VaR") measurement for the terminated Fund Xtrackers EUR Credit 12.5 Swap UCITS ETF; the remainder of the Funds use the commitment approach.

In respect of the Funds using the commitment approach, based on the relative performance of the Funds as compared to their benchmarks over the period from launch to 31 December 2023 and 31 December 2022, assuming that relative performance remained unchanged and with all other variables remaining constant, the impact of a 10% increase in market prices deemed reasonable by management at the year end on the Net Asset Values of the Funds would have been as follows:

¹ The Fund does not track an Index.

A 10% decrease in market prices would have had a similar but opposite effect. 10% impact is deemed reasonable by management. The estimated sensitivities above are for illustrative purposes only and are not intended to be predictive. Actual fluctuations in response to market price changes may differ substantially from the above.

An analysis of price risk sensitivity for Xtrackers EUR Credit 12.5 Swap UCITS ETF, terminated on 22 March 2023, is contained in the VaR table further on in this note.

(i) Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund may invest in financial instruments and enter into transactions in currencies other than its functional currency. Consequently, the Fund is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Fund's assets or liabilities denominated in currencies other than the functional currency.

For a Currency Hedged Share Class, the Sub-Portfolio Manager will seek to hedge the currency of the Currency Hedged Share Class against the currency exposures of the underlying securities in the portfolio which differ to the currency of that Currency Hedged Share Class. The Sub-Portfolio Manager will generally hedge these currency exposures at Share Class level by entering into currency forward exchange contracts.

The Funds may enter into foreign exchange hedging transactions, the aim of which is to protect against adverse currency fluctuations. Such hedging transactions may consist of foreign exchange forward contracts or other types of derivative, as disclosed in the Supplement for the relevant Fund, which reflect a foreign exchange hedging exposure that is regularly adjusted in line with the Regulations. Investors should note that there may be costs associated with the use of foreign exchange hedging transactions which may be borne by the Fund.

The Funds disclosed in the following tables had exposure to currencies other than their functional currency as at 31 December 2023 and 31 December 2022. None of the other Funds had exposure to currencies other than their functional currency as at 31 December 2023 and 31 December 2022.

(ii) Interest Rate Risk

Interest rate risk is the risk that the present fair value or future cash flows of a financial instrument will fluctuate as a result of a change in market interest rates.

As at 31 December 2023, Xtrackers MSCI GCC Select Swap UCITS ETF (31 December 2022: Xtrackers EUR Credit Corporate 12.5 Swap UCITS ETF and Xtrackers MSCI GCC Select Swap UCITS ETF) held total return swap positions which had no direct, material interest rate risk exposure.

The following tables outline the interest rates risk of the Funds which held bonds as at 31 December 2023 and 31 December 2022:

31 December 2023

Fund	Bond's type	Number of items	Coupon	
			Min	Max
Xtrackers USD Corporate Bond UCITS ETF	Corporate	2,803	0.00%	9.63%

Xtrackers USD Corporate Green Bond UCITS ETF	Corporate	241	0.40%	6.75%
Xtrackers ESG EUR High Yield Corporate Bond UCITS ETF	Corporate	220	0.88%	8.50%
Xtrackers ESG USD High Yield Corporate Bond UCITS ETF	Corporate	574	2.20%	11.75%
Xtrackers India Government Bond UCITS ETF	Government	22	5.15%	7.72%

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows. As such, any movement on interest rates of the Fund that holds interest-bearing securities would have an impact on its related NAV. All other instruments which are non-interest bearing will have an immaterial impact on any fluctuations in interest rates. The Company deemed it reasonable to use 2% sensitivity analysis on how much the NAV impact would be, with all other variables held constant.

For further information regarding the range and value of the Funds' investments in interest bearing securities, refer to the respective Portfolio of Investments for each Fund.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. Liquidity risks arise when a particular security is difficult to dispose of. In principle, acquisitions for the Fund must only consist of securities that can be sold again at any time.

Nevertheless, it may be difficult to sell particular securities at the required time during certain phases or in particular exchange segments. There is also the risk that securities traded in a rather tight market segment may be subject to significant price volatility. Liquidity for the total return swaps positions held in Xtrackers MSCI GCC Select UCITS ETF is provided by HSBC Bank, who is the counterparty to these contracts. For any subscription and redemption within these Funds, the notional of the total return swaps are adjusted by swap transactions with the counterparty.

Furthermore per the Prospectus, the Directors are entitled to limit the number of Shares in a Fund repurchased on any Transaction Day to Shares representing 10% of the total Net Asset Value of that Fund on that Transaction Day. In this event, the limitation will apply pro rata so that all Shareholders wishing to have Shares of that Fund repurchased on that Transaction Day realise the same proportion of such Shares. Shares not repurchased, but which would otherwise have been repurchased, will be carried forward for repurchase on the next Transaction Day. If requests for repurchase are so carried forward, the Administrator will inform the Shareholders affected.

As at 31 December 2023, all liabilities of the Funds as per the Statement of Financial Position are payable within one month except for the following Funds which have liabilities ranging from within one month to 1 year or greater:

Xtrackers MSCI AC World ESG Screened UCITS ETF

Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The discretionary investment manager only buys and sells investments through brokers which have been approved. These approved brokers are monitored to determine that they remain acceptable counterparties.

Listed below are the counterparties and banks used by the Funds and their respective long term credit ratings, as issued by S&P's rating agency, as at 31 December 2023 and 31 December 2022:

Counterparty	Credit Rating	
	31 December 2023	31 December 2022
Barclays Bank Ireland	A+	A
BNP Paribas	A+	N/A
Citigroup Global Markets Europe	A+	N/A
Deutsche Bank AG Frankfurt	A	A-
Deutsche Bank AG London	N/A	A-
HSBC Bank	A+	A+
HSBC Continental Europe	A+	A+
Royal Bank of Canada	AA-	AA-
Societe Generale	A	N/A
State Street Bank International	AA-	AA-
UBS AG	A+	N/A

The credit ratings associated with the bond holdings are disclosed in the individual Portfolio of Investments.

In order to reduce its exposure to any counterparty through the use of OTC derivatives or efficient portfolio management techniques or instruments the Funds may adopt cash or non-cash collateral arrangements. For details of collateral held as at 31 December 2023 and 31 December 2022 please refer to Note 14 Efficient Portfolio Management.

Certain Funds may lend securities through the security lending agent to brokers, dealers and other financial organisations to earn additional income. For further details in relation to credit risk associated with such investments please refer to Note 14 Efficient Portfolio Management.

The maximum exposure of the Funds to credit risk is shown by the notional amounts of the derivative contracts disclosed in the Portfolio of Investments.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

10. Financial Instruments and Associated Risks cont/d

Credit Risk cont/d

The exposure of the Funds to credit risk at 31 December 2023 and at 31 December 2022 is shown by the values of futures contracts, forward foreign currency exchange contracts, swap contracts, cash and cash equivalents and cash held with brokers as presented in the Statement of Financial Position and tables below:

The majority of the investments are held by the Depositary at the financial years ended 31 December 2023 and 31 December 2022. Investments are segregated from the assets of the Depositary, with ownership rights remaining with the Funds. The Depositary is responsible for the proper monitoring of the cash flows of the UCITS, and, in particular, for ensuring that investor money and cash belonging to the UCITS is booked correctly on account. Bankruptcy or insolvency of the Depositary may cause the Funds' rights with respect to its investments and cash held by the Depositary to be delayed or limited. Securities are ring-fenced in an insolvency of the custodian. The maximum exposure to this risk is the amount of long investments (excluding derivatives) disclosed on the individual Portfolio of Investments of the relevant Funds.

The exposure in derivatives is disclosed separately in the Portfolio of Investments.

Structuring Risk

Structuring risk relates to the Synthetic ETF Funds only (Xtrackers EUR Credit 12.5 Swap UCITS ETF¹ and Xtrackers MSCI GCC Select Swap UCITS ETF). The Funds track the performance of underlying assets through the use of total return swaps rather than direct investment unlike the other Funds. The replication methods used by the direct investment Funds of the Company are seen as standard by the Board of the Company and thus do not show specific structuring risks. Other risks specific to the Synthetic ETF Funds can be found under Credit Risk of Note 10.

¹) This Fund was terminated on 22 March 2023.

Global Exposure

Specific Instruments

Xtrackers MSCI GCC Select Swap UCITS ETF has invested in swap transactions. Xtrackers EUR Credit 12.5 Swap UCITS ETF also invested in swap transactions, but was terminated on 22 March 2023.

DWS Investment S.A., as the Management Company for the Funds, monitors, measures and manages the investments in and use of financial derivative instruments (“FDIs”) by the Funds.

The controls and systems in place to manage derivative and associated risks are appropriate to their complexity and intended use. A VaR methodology was used for the terminated Fund, Xtrackers EUR Credit 12.5 Swap UCITS ETF, to measure global exposure in the portfolios and to measure the additional risk associated with the use of financial derivative instruments. The process for calculating and monitoring VaR was undertaken by the Management Company for Xtrackers EUR Credit 12.5 Swap UCITS ETF.

The above Funds use the commitment approach to measure global exposure on the portfolios. Global exposure is monitored under commitment approach (except for one Product - Xtrackers EUR Credit 12.5 Swap UCITS ETF, terminated on 22 March 2023 - where VaR approach was used). The process for calculating and monitoring the commitment approach for these Funds is undertaken by the Management Company. The Management Company uses systems and analytical tools to monitor and measure derivative exposure such

Global Exposure cont/d

Specific Instruments cont/d

as Aladdin by BlackRock, Paladyne and proprietary databases as well as spreadsheet applications used in conjunction with industry standard information and pricing sources such as Bloomberg and Reuters to value and monitor derivative positions and ensure compliance with pre-defined hedging and investment parameters.

Xtrackers EUR 12.5 Credit Swap UCITS ETF was limited under an absolute VaR approach. The model utilises a historic VaR model which calculates a daily VaR for the Fund, reported at the 99% level of confidence for a holding period of one month (20 business days). The underlying data set consists of a set of daily observations covering one calendar year (minimum of 250 observations) of all the risk factors deemed to be material to the valuation of assets held in the Funds. The Risk Department of the Management Company is responsible for the setting of limits and parameters, to monitor the risk results and take any necessary corrective action in line with UCITS guidelines.

The relevant risk monitor endeavours to ensure that appropriate controls are implemented and evidenced as being operative at all stages of the investment process, execution controls in the form of investment guidelines documenting Fund mandate(s), investment restrictions laid down by the UCITS Regulations, compliance and audit will, by undertaking periodic reviews, provide additional comfort independent of the fund management function that adequate controls are in place, daily reports generated by operations teams that highlight all financial derivative exposures and cover within given portfolios and portfolio analysts checking designated accounts to ensure that derivative prices, data sets, interest rates and foreign exchange rates feed into the approved derivative exposure and measurement and assessment models are accurate.

OTC derivatives such as swaps and forward foreign currency exchange contracts are governed by internationally recognised master agreements, such as the International Swaps and Derivatives Association ("ISDA") Master Agreement. Swap confirmations are tracked and checked to confirm the terms of the trades are fully and correctly documented. The Management Company or Investment Managers use attorneys who have significant expertise in derivatives use and documentation.

Swap Agreements

Some of the Funds aim to achieve their investment objectives by gaining exposure to the relevant Underlying Assets through the use of swaps. The return of the Fund (after fees and expenses) will reflect the performance of the derivative contracts. A swap involves the exchange by the Fund with another party of their respective commitments to pay or receive cash flows, e.g. an exchange of coupon payments for the return on a particular index or basket of indices.

Swap agreements held at financial year end are presented in relevant Fund's Portfolio of Investments. Investments held at financial year end are representative of the type of investments held during the financial year.

Xtrackers MSCI GCC Select Swap UCITS ETF has invested in swap transactions. Xtrackers EUR Credit 12.5 Swap UCITS ETF also invested in swap transactions, but was terminated on 22 March 2023. The risk exposure of Xtrackers EUR Credit 12.5 Swap UCITS ETF was measured using the VaR methodology. None of the other Funds use VaR. In order to measure the leverage effect, a VaR calculation using either the Relative or Absolute VaR measures will be undertaken, dependant on whether the Fund in question is managed against a specific benchmark. In calculating the VaR the following parameters were used:

- A confidence level of 99%;
- A holding period of 1 month;
- An historical observation period of 250 days;
- The absolute VaR will not be greater than 20% of the Net Asset Value; and
- On the last NAV date before termination, the leverage for Xtrackers EUR Credit 12.5 Swap UCITS ETF was 404.15% (31 December 2022: 421.57%), the average leverage was 402.37% (31 December 2022: 390.62%) with the highest level during the financial year being 427.00% (31 December 2022: 439.83%).

The risk model is based on a historical simulation approach. The risk metrics will be highly dependent on the historical period used in the estimation and how representative this is of potential future risk.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

10. Financial Instruments and Associated Risks cont/d

Global Exposure cont/d

Stress Testing

Independent of the VaR calculation, appropriate stress scenarios are applied to measure any potential major depreciation of the UCITS value as a result of unexpected changes in the risk factors. At a minimum, stress tests are completed monthly.

Back Testing

Actual periodic changes in the value of the portfolio are used to test the VaR model. Frequency of excesses over VaR will be measured against the confidence level. If the frequency of excesses is larger than that implied by the confidence level, subject to some tolerance, then appropriate action will be taken.

The table below indicates the utilization of the portfolio VaR against the Prospectus limit during 2023:

	Holding							
	Period	Mean	Maximum	Minimum	Std. Dev.	Confidence	Fund VaR	Index VaR
Xtrackers EUR Credit								
12.5 Swap UCITS ETF	1 month	49.44%	52.11%	47.34%	1.08%	99.00%	10.11%	n/a

The table below indicates the utilization of the portfolio VaR against the Prospectus limit during 2022:

	Holding							
	Period	Mean	Maximum	Minimum	Std. Dev.	Confidence	Fund VaR	Index VaR
Xtrackers EUR Credit								
12.5 Swap UCITS ETF	1 month	39.46%	54.04%	19.02%	11.48%	99.00%	10.10%	n/a

Fair valuation hierarchy

FRS 102 Section 11.27 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements, using a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy.

The fair value hierarchy has the following levels as defined under FRS 102 Section 34.22:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement was categorised in its entirety was determined on the basis of the lowest level input that was significant to the fair value measurement in its entirety. For this purpose, the significance of an input was assessed against the fair value measurement in its entirety. If a fair value measurement used observable inputs that required significant adjustment based on unobservable inputs, that measurement was a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety required judgement, considering factors specific to the asset or liability. The determination of what constituted "observable" required significant judgement by the Management Company.

The Management Company considered observable data to be that market data that was readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

10. Financial Instruments and Associated Risks cont/d

Fair valuation hierarchy cont/d

As at 31 December 2023 and 31 December 2022 all investments in exchange-traded funds, preferred stocks, rights and futures were classified as Level 1, while all investments in government bonds, corporate bonds, total return swaps and forward foreign currency exchange contracts were classified as Level 2. Furthermore, all investments in equities held as at 31 December 2023 and 31 December 2022 were also classified as Level 1, with the exception of the following investments, that were valued using unobservable inputs, and therefore classified as Level 2 or Level 3.

Investments classified as Level 2:

13. Related party transactions

Related parties are those parties which are part of either the DWS Group or its parent group, the Deutsche Bank Group.

DWS Investment S.A. has been appointed to act as Management Company under the Management Company Agreement and is responsible for providing investment management services, administration services and distribution and marketing services to the various Funds unless otherwise indicated in the relevant Supplement. DWS Investment S.A. is entitled to receive Management Company Fees as further detailed in Notes 4, as a compensation for its services to the Company.

DWS Investment GmbH acts as Investment Manager with respect to Direct Investment Funds and DWS Investments UK Limited acts as Investment Manager with respect to Indirect Investment Funds. DWS Investment GmbH may, from time to time, and in accordance with an agreed process, delegate all or part of their investment management responsibilities with respect to one or more Direct Investment Funds to DWS Investments UK Limited and/or DWS Investments Hong Kong Limited (each a Sub-Portfolio Manager).

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

13. Related party transactions cont/d

The Management Company shall remunerate the Investment Managers out of the Management Company Fee as agreed from time to time between the parties. Each Investment Manager shall remunerate out of the applicable Investment Management Fee any appointed Sub-Portfolio Manager or provider of best execution services, as agreed from time to time between the parties.

DWS Investments UK Limited, as agreed from time to time, has been appointed to provide certain services including, but not limited to, legal, regulatory and tax advice, relationship management, distribution, marketing, assistance in relation to structuring and restructuring and assistance in relation to the registrations of the Company.

Deutsche Bank AG, acting through its Frankfurt head office and its London and New York branches, acts as securities lending agent for securities lending transactions entered into on behalf of the Funds and is entitled to receive fees covering direct or indirect operational costs and fees arising from Securities Lending Transactions. DWS Investments UK Limited is entitled to receive fees arising from Securities Lending Transactions; for details please refer to Note 14 Efficient Portfolio Management.

In the normal course of its operations, each Fund may enter into transactions on securities or other investments with Deutsche Bank AG or other Deutsche Bank AG affiliates.

DWS Investments UK Limited acts as Platform Fee Arranger.

Deutsche Bank AG, acting through its London Branch has been appointed with regards to the position reporting services. Deutsche Bank AG Group and/or DWS Group entities may be involved in distribution activities in relation to the Company Funds.

Please see the Portfolio of Investments of these Funds for more details.

These are related parties by virtue of having either a common investment manager or an Investment Manager who is part of the same ultimate parent group as Deutsche Bank AG. Gains or losses on these investments and any associated investment income, earned by the Funds during the financial year are shown in the Statement of Comprehensive Income.

For details of the fees paid to the Management Company, out of which Investment Manager fees are paid, and the fees paid to the Platform Fee Arranger please refer to Note 4 Significant Arrangements. For details of Directors' fees paid during the financial year please refer to Note 7 Directors' remuneration.

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

13. Related party transactions cont/d

Broker commissions and fees on purchases and sales of securities for which Deutsche Bank AG or an associated entity acted as broker amounted to EUR 67,869 (31 December 2022: EUR 273,754) for the financial year.

14. Efficient Portfolio Management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a Fund and may not be speculative in nature. Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques.

During the financial years ended and as at 31 December 2023 and 31 December 2022, the Company employed techniques or instruments for efficient portfolio management purposes, see details below.

Securities lending agreements may be used by the Funds for efficient portfolio management purposes. Deutsche Bank AG, acting through its Frankfurt head office and its London and New York branches, acts as securities lending agent for securities lending transactions entered into on behalf of the Funds.

During the financial years ended 31 December 2023 and 31 December 2022, the Funds, as disclosed in the tables below, had securities lending agreements in place. The tables detail the fair value of securities on loan and collateral, that can be in form of cash or securities, held at 31 December 2023 and 31 December 2022.

For the financial years ended 31 December 2023 and 31 December 2022, the Funds earned net income as a result of securities lending activities, which is recognised in Securities lending income line in the Statement of Comprehensive Income.

For each Fund, securities lending income is split between the Fund, the securities lending agent and DWS Investments UK Limited in a ratio of 70:15:15, respectively, with all operational costs borne out of the securities lending agent's and DWS Investments UK Limited's share.

15. Cross holdings

As at the Statement of Financial Position date, a number of Funds invested in other Funds of the Company. The impact of these cross-investment transactions have been eliminated from the total column of the Statement of Financial Position, Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

Please refer to the Portfolio of Investments of these Funds on pages 148 to 1033 to view their holdings in the other Funds. The cross holdings have the nominal amounts and market value disclosed in the Portfolio of Investments. Cumulative subscriptions of EUR 8,649,097 (31 December 2022: EUR 46,238,815) and redemptions of EUR 9,116,571 (31 December 2022: EUR 43,595,853) were eliminated from the total column of the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. Cumulative distributions of EUR 193,086 (31 December 2022: EUR 626,626) were paid out of the cross holdings during the financial year.

The following Fund was terminated during the financial year:

Fund	Share Class / ISIN	Termination date
Xtrackers EUR Credit 12.5 Swap UCITS ETF	1C / IE00B3Z66S39	22 March 2023

The Company notified shareholders on 30 January 2023 that the Paying Agent Agreement with Deutsche Bank Aktiengesellschaft would be terminated with effect from 28 February 2023. The notice also informed shareholders that from 1 March 2023, the information agent services for shareholders in Germany are provided by DWS Investment GmbH.

On Friday, 10 March 2023, Silicon Valley Bank (SVB), the US's 16th largest bank, was closed by the California Department of Financial Protection and Innovation which appointed the Federal Deposit Insurance Corporation (FDIC) as the receiver. Signature Bank, a New York financial institution with a big real estate lending business that had recently made a play to win cryptocurrency deposits, closed its doors abruptly on 12 March 2023, after regulators said that keeping the bank open could threaten the stability of the entire financial system. Several Funds of Xtrackers (IE) plc track indices that contained either SVB or Signature Bank securities. Where funds were holding such securities the DWS pricing committee decided to value both assets at \$0.0001 from and inclusive of NAV date 13 March 2023. Index providers valued the securities at 0 at the same time or shortly thereafter. As a result, there was no material impact on the tracking error of the Funds.

The Company notified shareholders on 21 April 2023 that MSCI Limited, in its capacity as Index Administrator of each Reference Index of the Funds set out in the table below, resolved to make certain changes to the index methodology of each Reference Index, effective as of 1 March 2023, by introducing additional screens and exclusion criteria to the environmental, social and governance ("ESG") criteria.

Fund	Reference Index
Xtrackers MSCI AC World ESG Screened UCITS ETF	MSCI ACWI Select ESG Screened Index
Xtrackers MSCI Emerging Markets ESG Screened UCITS ETF	MSCI EM Select ESG Screened Index
Xtrackers MSCI USA ESG Screened UCITS ETF	MSCI USA Select ESG Screened Index
Xtrackers MSCI Japan ESG Screened UCITS ETF	MSCI Japan Select ESG Screened Index
Xtrackers MSCI EMU ESG Screened UCITS ETF	MSCI EMU Select ESG Screened Index
Xtrackers MSCI World ESG Screened UCITS ETF	MSCI World Select ESG Screened Index
Xtrackers MSCI Europe Consumer Discretionary ESG Screened UCITS ETF	MSCI Europe Consumer Discretionary ESG Screened 20-35 Select Index

The Company notified shareholders of Xtrackers Artificial Intelligence and Big Data UCITS ETF and Xtrackers Future Mobility UCITS ETF on 14 June 2023 about changes to the Reference Index of each Fund, effective as of 21 July 2023 (the "Effective Date"). From the Effective Date, the Thematic Data Provider for each Reference Index will change from Yewno Inc. to Nasdaq Inc. (the Index Administrator of the Funds) and the names of each Reference Index will change as set out below:

Fund	Old Reference Index name	New Reference Index name
Xtrackers Artificial Intelligence and Big Data UCITS ETF	Nasdaq Yewno Global Artificial Intelligence and Big Data Index	Nasdaq Global Artificial Intelligence and Big Data Index
Xtrackers Future Mobility UCITS ETF	Nasdaq Yewno Global Future Mobility Index	Nasdaq Global Future Mobility Index

XTRACKERS (IE) PLC

Notes to the Financial Statements for the financial year ended 31 December 2023 cont/d

19. Significant events during the financial year cont/d

The Company notified German shareholders of Xtrackers MSCI GCC Select Swap UCITS ETF and Xtrackers MSCI USA ESG UCITS ETF on 15 June 2023 that due to changes in the German Tax Investment Act (“Investmentsteuergesetz” / “InvStG”) the equity participation targets in the Funds’ Supplements will be amended from the Current Target Thresholds to the New Target Thresholds as listed in the table below, with effect from 15 June 2023.

Fund	Old Target Threshold	New Target Threshold
Xtrackers MSCI GCC Select Swap UCITS ETF	80%	70%
Xtrackers MSCI USA ESG UCITS ETF	90%	75%

On 9 August 2023, the Company informed Shareholders that further to the Securities and Exchange Board of India requirements for Foreign Portfolio Investors (“FPIs”) in relation to disclosures of the details of their beneficial owner(s) (“BO”) and senior managing official(s) (“SMO”) in relation to prevention of money laundering rules which, inter alia, lowered the threshold for identification of BOs from 25% to 10% for company structures, it was imperative that any ultimate BO in any of the Funds of the Company informed the Company as soon as possible, on an ongoing basis, if they held 10% or more of the outstanding Shares of (i) the Company as a whole or (ii) any of the Funds of the Company in order that the necessary disclosures could be made by the Company and enable accounts relating to the custody of Indian securities to be maintained. Shareholders were requested to inform the Company if they were an ultimate BO of 10% or more of shares in the Company as a whole or any of the Funds.

The Company notified shareholders on 21 August 2023 that MSCI Limited, in its capacity as Index Administrator of each Reference Index of the Funds set out in the table below, resolved to make certain changes to the index methodology of each Reference Index, effective as of 1 September 2023, by introducing additional exclusion criteria to the environmental, social and governance (“ESG”) criteria.

Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF	MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index

The Company notified shareholders of Xtrackers S&P 500 Equal Weight ESG UCITS ETF in Germany, France and Austria on 4 September 2023 about a disclosure error that occurred in the French and German translations of the Fund’s supplement where a fee waiver which applied to the 1C share class was incorrectly attributed to the 2C - EUR Hedged share class too. The French and German translations of the Fund’s supplement were rectified, and the wording clarifies that the fee waiver does not apply to the 2C - EUR Hedged Share Class.

The Company notified shareholders on 28 November 2023 that the definitions of NAV Date and Valuation Day would be amended with effect from 1 December 2023. Additionally, the Settlement Date definition was amended and renamed to Settlement Day, also with effect from 1 December 2023.

On 30 November 2023, the Company notified the shareholders in Switzerland of the Share Classes of the Funds listed below that on 7 December 2023 the trading currency of the listing of the Share Classes listed on the SIX Swiss Exchange would change as set out in the table below.

The conflict between Russia and Ukraine marked a dramatic turning point in Europe, which, among other things, is impacting on Europe's security architecture and energy policies in the long term and has caused considerable volatility. This volatility is likely to continue. However, the specific or possible medium-to-long-term effects of the crisis on the economy, individual markets and sectors, as well as the social implications, cannot be conclusively assessed due to the uncertainty at the time of preparing this report. The Management Company is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the respective fund. The Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent.

There were no other significant events during the financial year.

20. Significant events after the financial year end

The following Funds were launched after the financial year end:

Fund	Share Class / ISIN	Launch Date

The Company notified shareholders of Xtrackers MDAX ESG Screened on 16 February 2024 about changes to the Reference Index of the Fund, MDAX ESG Screened Index (the "Reference Index"), made by STOXX Ltd. in its capacity as index administrator of the Fund. From 18 March 2024, the cap on the weight of individual companies within the Reference Index at each quarterly rebalance will increase from 10% to 15%. In addition, from 23 September 2024, should any individual company within the Reference Index reach a weight of 20% intra-quarter, the Reference Index will be rebalanced intra-quarter such that the individual company will be re-weighted to 15%.

The Company notified shareholders in Denmark on 23 February 2024 that the Representative Agreement with Nordea Bank Danmark A/S would be terminated with effect from 31 March 2024. The notice also informed shareholders that from 1 April 2024, the information agent services for shareholders in Denmark will be provided by DWS Investment GmbH.

There were no other significant events after the financial year end.

21. Approval of the financial statements

The financial statements were approved by the Directors on 22 April 2024.

¹ This Share Class was launched on 8 March 2023.

² This Share Class was launched on 11 October 2023.

³ During the year ending 31 December 2023 this Share Class changed its All-In Fee rate. Please see the significant events during the financial period section of the Notes to the Financial Statements of this annual report for further information.

⁴ This Share Class was launched on 12 May 2023.

⁵ For the period between 19 May 2022 and 18 May 2023, there was a fee waiver on the Management Company Fee of this Share Class. As a result, the All-In Fee was also reduced during this period from 0.25% p.a. to 0.15% p.a.

⁶ This Share Class was launched on 24 January 2023.

⁷ For the period between 1 November 2022 and 31 October 2023 inclusive, there was a fee waiver on the Management Company Fee of this Share Class. As a result, the All-In Fee was also reduced during this period from 0.17% p.a. to 0.15% p.a.

⁸ This Share Class was launched on 17 May 2023.

⁹ This Share Class was launched on 18 January 2023.

¹⁰ This Share Class was launched on 25 January 2023.

¹¹ This Share Class was launched on 31 January 2023.

¹² This Share Class was launched on 12 April 2023.

¹³ This Share Class was launched on 5 July 2023.

¹⁴ This Share Class was launched on 13 September 2023.

¹⁵ This Share Class was launched on 26 September 2023.

The TER percentage is presented in the Share Class' currency.

The TER expresses the sum of all fees and incidental costs charged on an ongoing basis to the collective investment scheme's assets (operating expenses) taken retrospectively as a percentage of the net assets, and is in principle calculated as follows according to the Swiss Asset Management Association (AMAS) Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes from 16 May 2008 (dated 5 August 2021):

$$\text{TER \%} = \frac{\text{Total operating expenses in CU}^*}{\text{Average net assets in CU}^*} \times 100$$

* CU = currency units in the accounting currency of the collective investment scheme

¹ This Share Class was terminated on 22 March 2023.

² The Fund does not track an index.

³ For FX hedged share classes: Tracking Difference is defined as the difference between the return of the unhedged share class of this Fund and the unhedged benchmark index. Tracking Error is defined as the volatility of the difference between the return of the unhedged share class of this Fund and the unhedged benchmark index.

⁴ This Share Class was launched on 8 March 2023.

⁵ This Share Class was launched on 11 October 2023.

⁶ This Share Class was launched on 12 May 2023.

⁷ The Tracking Error in 2022 for this Share Class was higher than the anticipated level of Tracking Error, as a result of different pricing valuation levels applied to Russian securities included in the Reference Index of the Sub-Fund by the Index Administrator and by the Sub-Fund following the Russia-Ukraine conflict.

⁸ This Share Class was launched on 24 January 2023.

⁹ This Share Class was launched on 17 May 2023.

¹⁰ This Share Class was launched on 18 January 2023.

¹¹ This Share Class was launched on 25 January 2023.

¹² This Share Class was launched on 31 January 2023.

¹³ This Share Class was launched on 12 April 2023.

E. Annual Report Disclosures (Unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) (“SFTR”) came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Fund’s annual and half-yearly reports published after 13 January 2017 detailing the Fund’s use of securities financing transactions and total return swaps. As a result, additional disclosures have been included in the appendix to the annual report.

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs and total return swaps (TRSs)

Appendix 1 – Remuneration Disclosures (Unaudited)

The Management Company is a subsidiary of DWS Group GmbH & Co. KGaA ("DWS KGaA") and is subject to the regulatory requirements of the Fifth Directive on Undertakings for Collective Investment in Transferable Securities ("UCITS V Directive") as well as the European Securities and Markets Authority's Guidelines on sound remuneration policies ("ESMA Guidelines") with regard to the design of its remuneration system.

Remuneration Policy & Governance

The Management Company is governed by the Group-wide Compensation Policy that DWS KGaA has adopted for itself and all of its subsidiaries ("DWS Group" or only "Group").

In line with the Group structure, committees have been set up to ensure the appropriateness of the compensation system and compliance with regulatory requirements on compensation and are responsible for reviewing it.

As such the DWS compensation committee was tasked by the DWS KGaA Executive Board with developing and designing sustainable compensation principles, making recommendations on overall compensation and ensuring appropriate governance and oversight with regard to compensation and benefits for the Group.

Furthermore, the remuneration committee was established to support the Supervisory Board of DWS KGaA in monitoring the appropriate structure of the remuneration systems for all Group employees. This is done by testing the consistency of the remuneration strategy with the business and risk strategy and taking into account the effects of the remuneration system on the Group-wide risk, capital and liquidity management.

The internal annual review at DWS Group level concluded the design of the remuneration system to be appropriate and no significant irregularities were recognised.

Compensation Structure

Employee compensation consists of fixed and variable compensation.

Fixed compensation remunerates employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role.

Variable compensation takes into account performance at group, divisional and individual level. Variable compensation generally consists of two elements – the "Franchise Component" and the "Individual Component".

The Franchise Component is determined based upon the performance of three Key Performance Indicators ("KPIs") at DWS Group level. For the performance year 2023 these were: Adjusted Cost Income Ratio, Net Flows and ESG metrics.

The individual component of variable compensation takes into account a number of financial and non-financial factors, relativities within the peer group and retention considerations. Variable compensation can be reduced accordingly or cancelled completely in the event of negative performance contributions or misconduct. In principle, it is only granted and paid out if the granting is affordable for the Group. Guaranteed variable compensation is not normally granted to employees. On an exceptional basis, guaranteed variable compensation can be granted to new hires but only during their first year of employment.

The compensation strategy is designed to achieve an appropriate balance between fixed and variable compensation. This helps to align employee compensation with the interests of customers, investors and shareholders, as well as to industry standards. At the same time, it ensures that fixed compensation represents a sufficiently high proportion of total compensation to allow the Group full flexibility in granting variable compensation.

Determination of variable compensation and appropriate risk-adjustment

The total amount of variable compensation is subject to appropriate risk-adjustment measures which include ex-ante and ex-post risk adjustments. The robust methodology is designed to ensure that the determination of variable compensation reflects the Group's risk-adjusted performance as well as the capital and liquidity position.

XTRACKERS (IE) PLC

Appendix 1 – Remuneration Disclosures (Unaudited) cont/d

Determination of variable compensation and appropriate risk-adjustment cont/d

A number of considerations are used in assessing the performance of the business units. Performance is assessed in the context of financial and non-financial targets based on balanced scorecards. The allocation of variable compensation to the infrastructure areas and in particular to the control functions depends on the overall results of the Group, but not on the results of the business areas they oversee.

Principles for determining variable compensation apply at individual employee level which detail the factors and metrics that must be taken into account when making individual variable compensation decisions. These include, for instance, investment performance, client retention, culture considerations, and objective setting and performance assessment based on the “Total Performance’ approach. Furthermore, any control function inputs and disciplinary sanctions and their impact on the variable compensation have to be considered as well.

Sustainable Compensation

Sustainability and sustainability risks are an essential part that determine the variable compensation. Therefore, the remuneration policy is fully in line and consistent with sustainability risks. Hence, DWS Group incentivises behaviour that benefits both interest of clients and the long-term performance of the firm. Relevant sustainability factors are reviewed on a regular basis and incorporated in the design of the compensation system.

Compensation for 2023

The DWS compensation committee has monitored the affordability of variable compensation for 2023 and determined that the Group’s capital and liquidity levels remain above regulatory minimum requirements, and internal risk appetite threshold.

As part of the overall 2023 variable compensation granted in March 2024, the Franchise Component is awarded to eligible employees in line with the assessment of the defined KPIs. The Executive Board recognising the considerable contribution of employees and determined a target achievement rate of 76.25% for 2023.

Identification of Material Risk Takers

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the ESMA Guidelines, the Management Company has identified Material Risk Takers. The identification process was carried out in accordance with the Group’s policies and is based on an assessment of the impact of the following categories of staff on the risk profile of the Management Company or on a fund it manages: (a) Board Members/Senior Management, (b) Portfolio/Investment Managers, (c) Control Functions, (d) Staff heading Administration, Marketing and Human Resources, (e) other individuals (“Risk Takers”) in a significant position of influence, (f) other employees in the same remuneration bracket as other Risk Takers, whose roles have an impact on the risk profile of the Management Company or the Group. At least 40% of the variable compensation for Material Risk Takers is deferred. Additionally, at least 50% of both, the upfront and the deferred proportion, are granted in the Group share-based instruments or fund-linked instruments for Key Investment Professionals. All deferred components are subject to a number of performance conditions and forfeiture provisions which ensure an appropriate ex-post risk adjustment. In case the variable compensation is lower than EUR 50,000, the Material Risk Takers receive their entire variable compensation in cash without any deferral.

XTRACKERS (IE) PLC

Appendix 1 – Remuneration Disclosures (Unaudited) cont/d

Determination of variable compensation and appropriate risk-adjustment cont/d

Aggregate Compensation Information for the Company for 2023¹

Number of employees on an annual average	99
Total Compensation ²	EUR 15,739,813
Fixed Pay	EUR 12,528,700
Variable Compensation	EUR 3,211,113
Thereof: Carried Interest	EUR 0
Total Compensation for Senior Management ³	EUR 1,476,953
Total Compensation for other Material Risk Takers ⁴	EUR 0
Total Compensation for Control Function employees	EUR 2,077,858

¹ In cases where portfolio or risk management activities have been delegated by the Management Company, the compensation data for delegates are not included in the table.

² Considering various elements of remuneration as defined in the ESMA Guidelines which may include monetary payments or benefits (such as cash, shares, options, pension contributions) or none (directly) monetary benefits (such as fringe benefits or special allowances for car, mobile phone, etc.).

³ Senior Management refers to the members of the Management Board of the Management Company, only. Members of the Management Board meet the definition of Managers. Apart from the members of Senior Management, no further managers have been identified.

⁴ Identified Risk Takers with control functions are shown in the line "Control Function employees".

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MDAX ESG Screened UCITS ETF
 Legal entity identifier: 549300UH1JXLUG5LCG03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.91% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MDAX ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MDAX Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Assigned an Institutional Shareholder Services Inc ("ISS ESG") ESG Rating of D- or below;
- Identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti-corruption established in the UN Global Compact and the OECD Guidelines; and/or
- Identified by ISS ESG as having any involvement in controversial weapons; and/or
- Identified by ISS ESG as breaching certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, and military equipment.

The Reference Index also excluded companies which have missing ESG data.

The Reference Index utilised ESG data provided by ISS ESG. ISS ESG provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, human rights, labour standards, corruption and controversial weapons.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	3.14%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	3.14%
	Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	3.14%
	Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	3.14%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	6.16%	3.14%
Exposure to Worst-in-Class issuers	8.36%	3.14%
Controversial Weapons Involvement	6.16%	3.14%
Tobacco involvement	6.16%	3.14%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 27.91% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
DEUTSCHE LUFTHANSA AG	Industrials	6.32%	Germany
FRESENIUS MEDICAL CARE AG	Health Care	5.70%	Germany
DELIVERY HERO	Consumer Discretionary	4.33%	Germany
GEA GROUP AG	Industrials	4.01%	Germany
PUMA	Consumer Discretionary	3.99%	Germany
LEG IMMOBILIEN N	Real Estate	3.26%	Germany
SCOUT24 N	Communication Services	3.18%	Germany
KNORR BREMSE AG	Industrials	2.93%	Germany
NEMETSCHEK	Information Technology	2.83%	Germany
HUGO BOSS N AG	Consumer Discretionary	2.73%	Germany
AIXTRON	Information Technology	2.71%	Germany
CARL ZEISS MEDITEC AG	Health Care	2.64%	Germany
EVONIK INDUSTRIES AG	Materials	2.64%	Germany
HELLOFRESH	Consumer Staples	2.56%	Germany
BECHTLE AG	Information Technology	2.47%	Germany

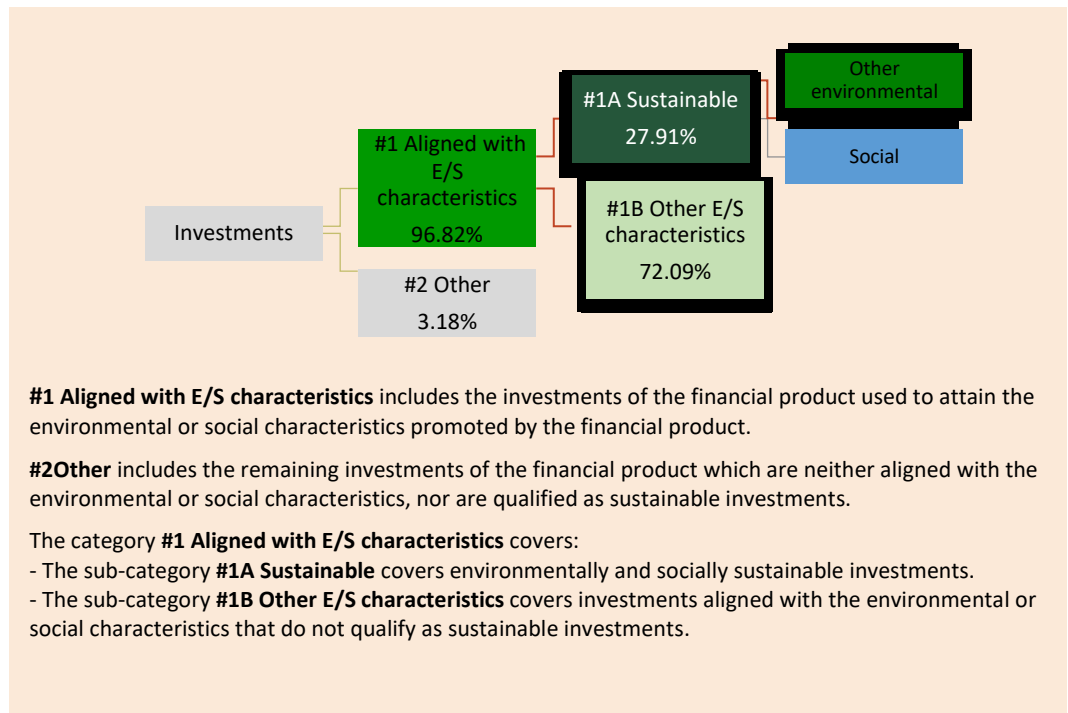

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 96.82% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.91% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

3.18% of the investments were not aligned with these characteristics (#2 Other).

● *In which economic sectors were the investments made?*

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Industrials	23.42%
Materials	13.19%
Information Technology	13.09%
Communication Services	12.55%
Health Care	12.11%
Consumer Discretionary	11.43%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Real Estate	6.97%
Consumer Staples	3.15%
Financials	2.72%
Utilities	1.32%
Other / Unmapped	0.04%
Energy	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- ***What was the share of investments made in transitional and enabling activities?***

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 27.91% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 27.91% in total.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included (i) securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a substantial number of, the constituents of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MDAX ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

- **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of medium-capitalisation segment of companies traded on the Frankfurt Stock Exchange which follow large-capitalisation companies included in the DAX® index with regard to market capitalisation or companies that are not eligible for inclusion in the DAX® index because they don’t fulfil the DAX® profitability requirements. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Assigned an ISS ESG Rating of D- or below;
- Identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti-corruption established in the UN Global Compact and the OECD Guidelines;
- Identified by ISS ESG as having any involvement in controversial weapons; and/or
- Identified by ISS ESG as breaching certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, and military equipment.

The Reference Index also excludes companies which have missing ESG data.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	3.14%	3.14%
Exposure to Worst-in-Class issuers	3.14%	3.14%
Controversial Weapons Involvement	3.14%	3.14%
Tobacco involvement	3.14%	3.14%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	6.05%	6.26%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	6.05%	6.52%

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 19.93% of sustainable investments (as at 31.12.2023) <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index, or unrelated transferable securities or other eligible assets. The Reference Index selected companies from the MSCI AC World Index (the "Parent Index") that met certain minimum

Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.08%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.12%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.07%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.07%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.53%	0.08%
Exposure to Worst-in-Class issuers	1.07%	0.12%
Controversial Weapons Involvement	0.53%	0.07%
Tobacco involvement	0.53%	0.07%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 19.93% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
APPLE INC	Information Technology	5.05%	United States
MICROSOFT CORP	Information Technology	4.13%	United States
AMAZON COM INC	Consumer Discretionary	2.09%	United States
NVIDIA CORP	Information Technology	1.77%	United States
ALPHABET INC CLASS A	Communication Services	1.29%	United States
TESLA INC	Consumer Discretionary	1.21%	United States
ALPHABET INC CLASS C	Communication Services	1.18%	United States
UNITEDHEALTH GROUP INC	Health Care	0.82%	United States
BERKSHIRE HATHAWAY INC CLASS B	Financials	0.78%	United States
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	0.77%	Taiwan
JPMORGAN CHASE	Financials	0.77%	United States
JOHNSON & JOHNSON	Health Care	0.71%	United States
ELI LILLY	Health Care	0.69%	United States
VISA INC CLASS A	Financials	0.68%	United States
BROADCOM INC	Information Technology	0.64%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

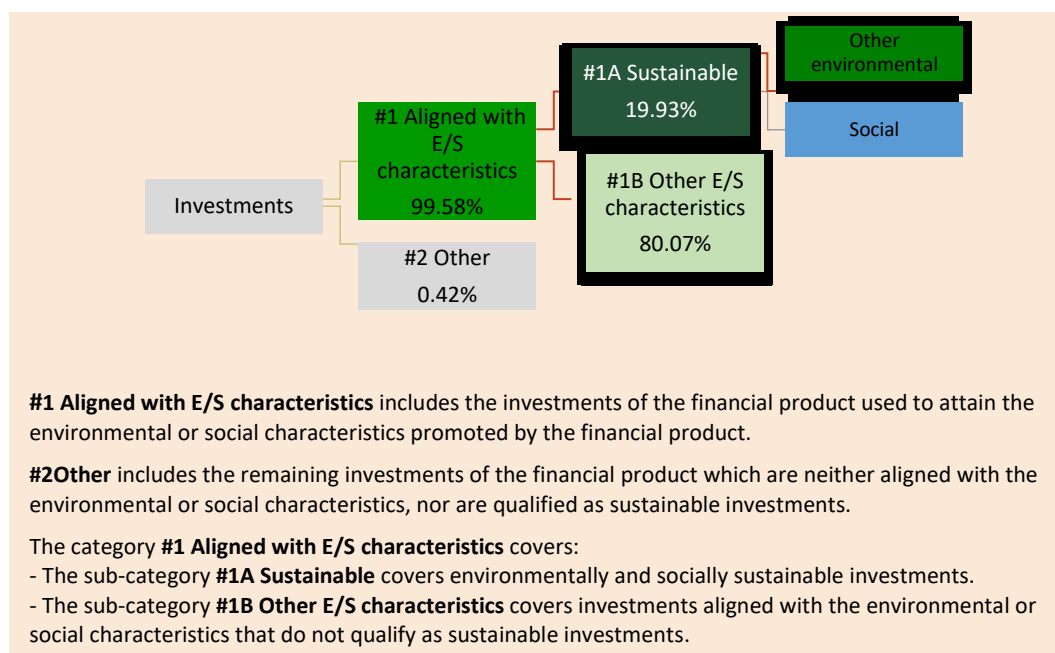

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.58% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 19.93% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.42% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	25.23%
Financials	17.28%
Health Care	12.30%
Consumer Discretionary	11.94%
Industrials	9.71%
Communication Services	6.86%
Consumer Staples	4.85%
Materials	4.02%
Energy	3.15%
Real Estate	2.59%
Utilities	1.77%
Other / Unmapped	0.30%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

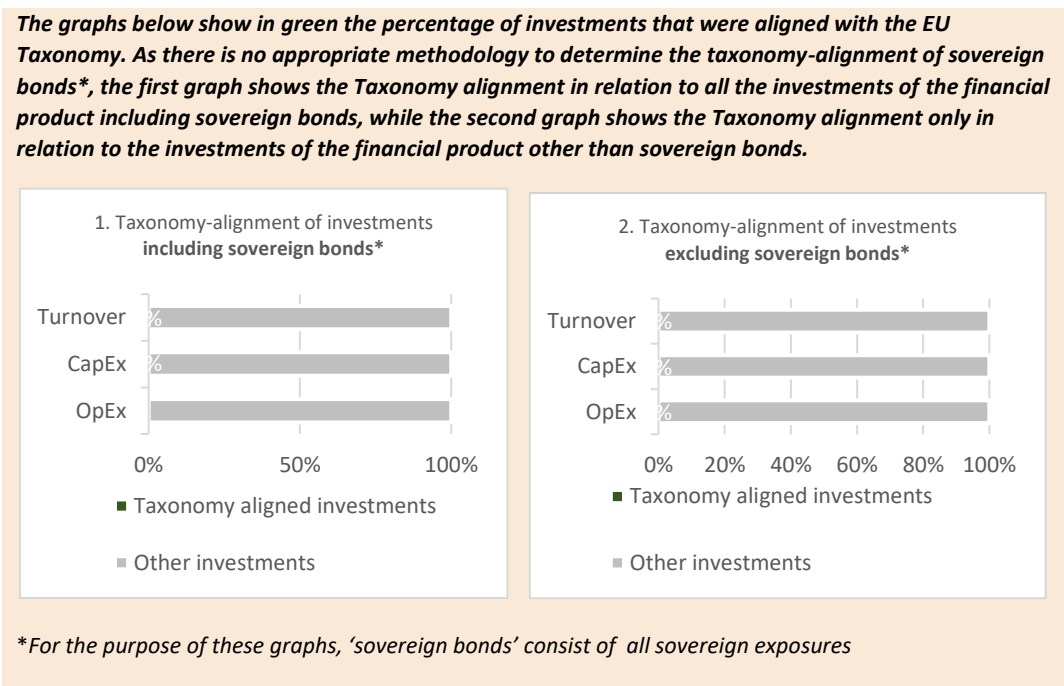

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 19.93% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 19.93% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index. Any

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

unrelated transferable securities held by the financial product were similar to the securities comprised in the Reference Index.

The financial product entered into securities lending transactions for efficient portfolio management purposes. Where the financial product entered into securities lending transactions during the period, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate developed market ESG equity index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI ACWI Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed and emerging market countries. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index,

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.08%	0.09%
Exposure to Worst-in-Class issuers	0.12%	0.14%
Controversial Weapons Involvement	0.07%	0.09%
Tobacco involvement	0.07%	0.09%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	19.40%	19.46%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	19.40%	18.06%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Emerging Markets ESG Screened UCITS ETF
 Legal entity identifier: 549300Z2SIL2X411X235

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.86% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EM Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index, or unrelated transferable securities or other eligible assets. The Reference Index selected companies from the MSCI Emerging Markets Index (the "Parent Index") that met certain minimum

Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following three components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.54%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	1.03%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.54%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.54%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.43%	0.54%
Exposure to Worst-in-Class issuers	0.48%	1.03%
Controversial Weapons Involvement	0.39%	0.54%
Tobacco involvement	0.39%	0.54%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 11.86% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but were not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	7.06%	Taiwan
TENCENT HOLDINGS LTD	Communication Services	4.35%	China
SAMSUNG ELECTRONICS LTD	Information Technology	4.13%	Korea (South), Republic of

AL RAJHI BANK	Financials	0.63%	Saudi Arabia
JD.COM CLASS A INC	Consumer Discretionary	0.62%	China
TATA CONSULTANCY SERVICES LTD	Information Technology	0.61%	India

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

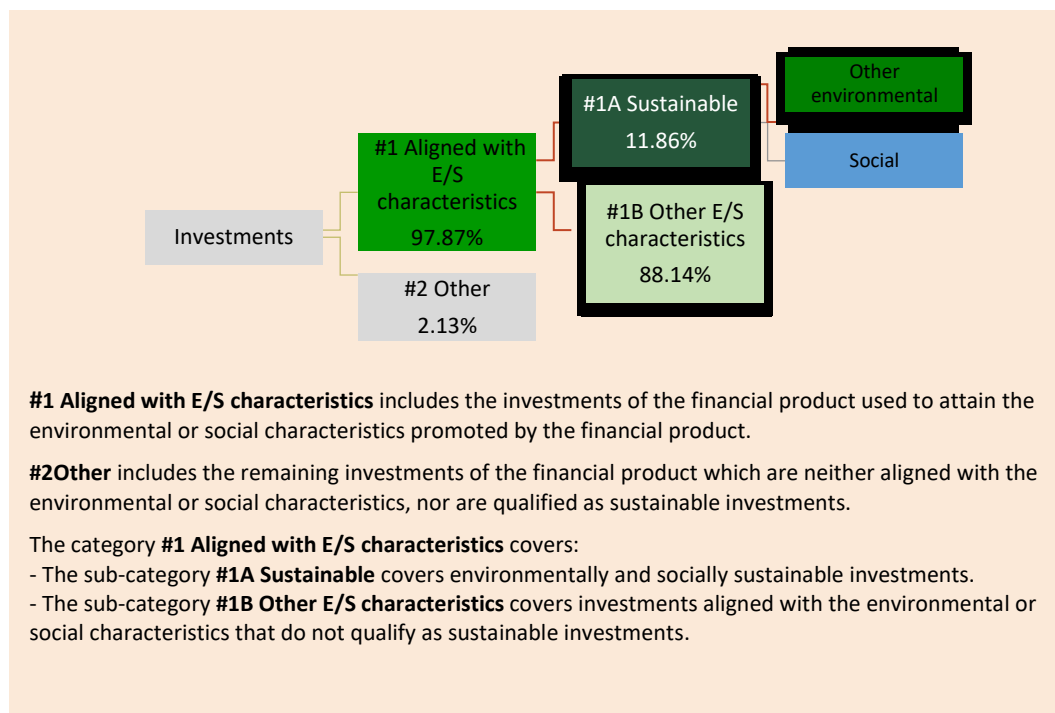

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 97.87% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 11.86% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

2.13% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	23.71%
Information Technology	23.30%
Consumer Discretionary	13.48%
Communication Services	9.45%
Materials	6.17%
Consumer Staples	5.80%
Industrials	5.52%
Energy	4.62%
Health Care	3.61%
Real Estate	1.70%
Utilities	1.53%
Other / Unmapped	1.10%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's

assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 11.86% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 11.86% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index. Any unrelated transferable securities held by the financial product were similar to the securities comprised in the Reference Index.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI EM Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in emerging markets. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.54%	0.55%
Exposure to Worst-in-Class issuers	1.03%	1.04%
Controversial Weapons Involvement	0.54%	0.54%
Tobacco involvement	0.54%	0.54%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	3.30%	3.55%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	3.30%	3.63%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI USA ESG Screened UCITS ETF
 Legal entity identifier: 5493001R2VWIV9D4XH46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.23% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI USA Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by

excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.04%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.04%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.04%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.04%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.41%	0.04%
Exposure to Worst-in-Class issuers	1.29%	0.04%
Controversial Weapons Involvement	0.41%	0.04%
Tobacco involvement	0.41%	0.04%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 21.23% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
APPLE INC	Information Technology	8.15%	United States
MICROSOFT CORP	Information Technology	6.66%	United States
AMAZON COM INC	Consumer Discretionary	3.37%	United States
NVIDIA CORP	Information Technology	2.86%	United States
ALPHABET INC CLASS A	Communication Services	2.10%	United States
TESLA INC	Consumer Discretionary	1.95%	United States
ALPHABET INC CLASS C	Communication Services	1.89%	United States
UNITEDHEALTH GROUP INC	Health Care	1.32%	United States
BERKSHIRE HATHAWAY INC CLASS B	Financials	1.26%	United States
JPMORGAN CHASE	Financials	1.23%	United States
JOHNSON & JOHNSON	Health Care	1.14%	United States
ELI LILLY	Health Care	1.11%	United States
VISA INC CLASS A	Financials	1.10%	United States
BROADCOM INC	Information Technology	1.04%	United States
MASTERCARD INC CLASS A	Financials	0.96%	United States

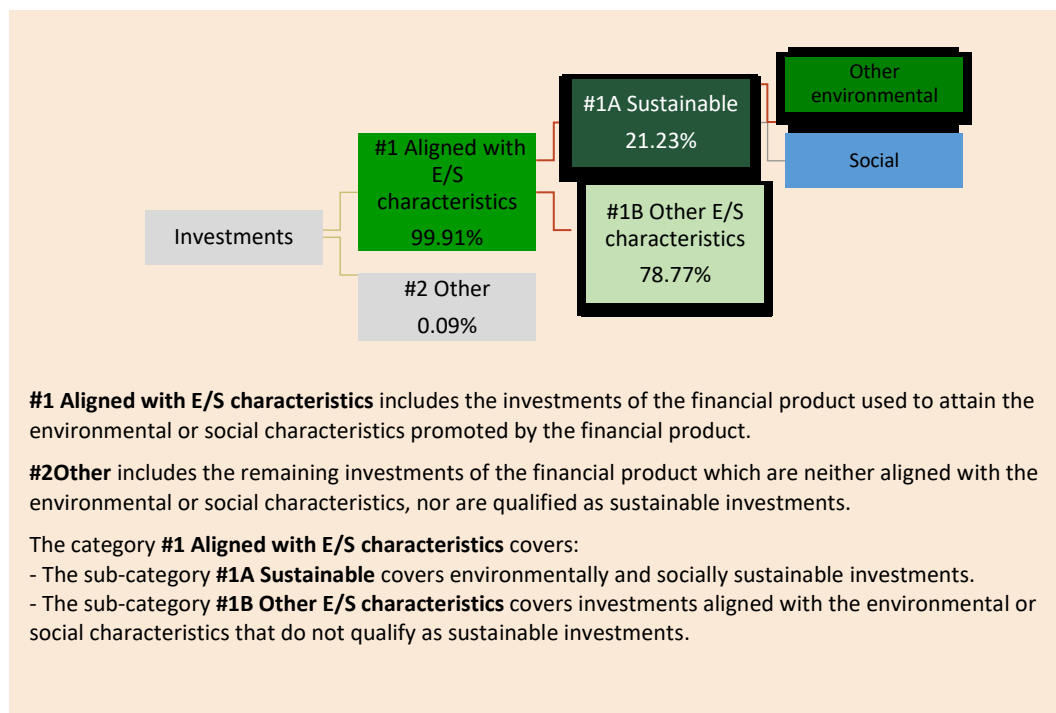

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.91% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 21.23% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.09% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	32.42%
Financials	14.06%
Health Care	13.76%
Consumer Discretionary	12.06%
Industrials	8.05%
Communication Services	7.48%
Consumer Staples	3.46%
Real Estate	2.84%
Materials	2.50%
Energy	2.08%
Utilities	1.25%
Other / Unmapped	0.05%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 21.23% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 21.23% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI USA Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.04%	0.03%
Exposure to Worst-in-Class issuers	0.04%	0.03%
Controversial Weapons Involvement	0.04%	0.03%
Tobacco involvement	0.04%	0.03%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	28.92%	28.67%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	28.92%	26.49%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Japan ESG Screened UCITS ETF
 Legal entity identifier: 549300DIT7F25Z1MYN06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.07% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Japan Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI Japan Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by

excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.00%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 15.07% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but were not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
TOYOTA MOTOR CORP	Consumer Discretionary	5.39%	Japan
SONY GROUP CORP	Consumer Discretionary	3.45%	Japan
MITSUBISHI UFJ FINANCIAL GROUP INC	Financials	2.72%	Japan
KEYENCE CORP	Information Technology	2.63%	Japan
TOKYO ELECTRON LTD	Information Technology	2.03%	Japan
SHIN ETSU CHEMICAL LTD	Materials	1.90%	Japan
HITACHI LTD	Industrials	1.80%	Japan
SUMITOMO MITSUI FINANCIAL GROUP IN	Financials	1.77%	Japan
DAIICHI SANKYO LTD	Health Care	1.71%	Japan
MITSUBISHI CORP	Industrials	1.64%	Japan
TAKEDA PHARMACEUTICAL LTD	Health Care	1.48%	Japan
HONDA MOTOR LTD	Consumer Discretionary	1.45%	Japan
MITSUI LTD	Industrials	1.45%	Japan
RECRUIT HOLDINGS LTD	Industrials	1.45%	Japan
KDDI CORP	Communication Services	1.45%	Japan

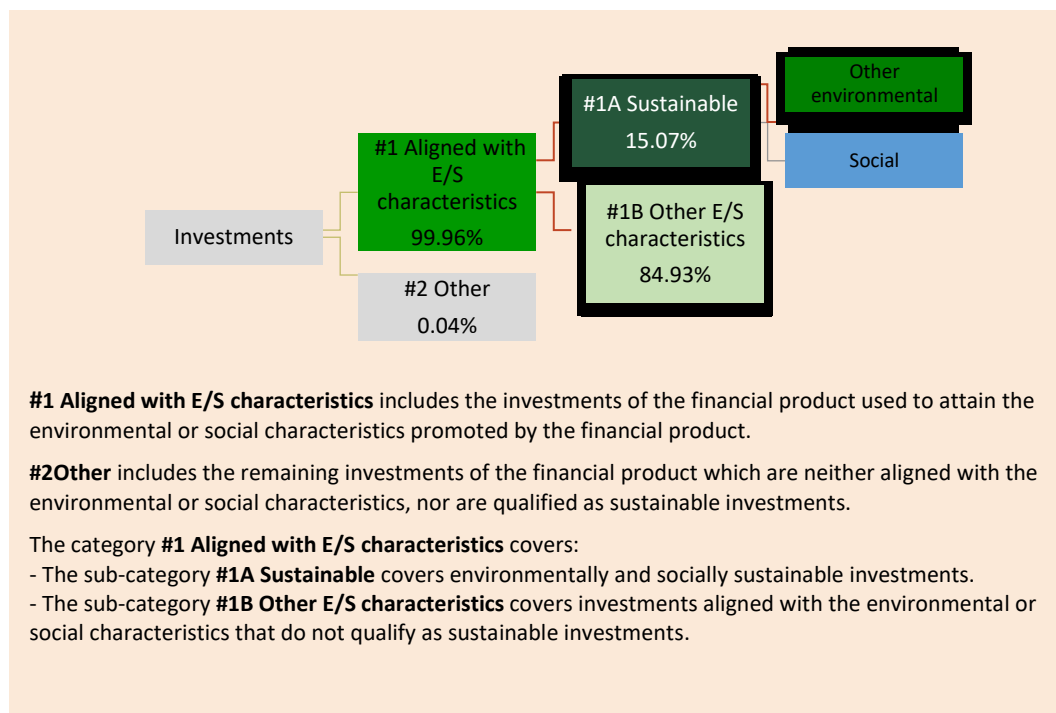

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.96% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 15.07% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.04% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Industrials	21.45%
Consumer Discretionary	19.59%
Information Technology	15.34%
Financials	12.97%
Health Care	8.76%
Communication Services	7.59%
Materials	5.03%
Consumer Staples	5.00%
Real Estate	3.43%
Utilities	0.48%
Energy	0.33%
Other / Unmapped	0.04%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 15.07% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 15.07% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

The financial product entered into securities lending transactions for efficient portfolio management purposes. Where the financial product entered into securities lending transactions during the period, the collateral received in relation to such transactions

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate developed market ESG equity index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI Japan Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	27.59%	27.76%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	27.59%	28.56%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers ESG USD Emerging Markets Bond Quality Weighted UCITS ETF
 Legal entity identifier: 549300BQBF21JCBVKV46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to offer a targeted coverage of the USD denominated emerging market sovereign bonds universe with adjusted weights, by allocating higher

weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings.

The weighting methodology aimed to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores were utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalised country weights such that they added up to 100% and ranked countries which were still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assessed a country's exposure to and management of environmental, social and governance risks and explained how these factors might impact the long-term sustainability of its economy. The factors which measured a country's exposure to and management of ESG risks included but were not limited to: efficiency of resource utilisation, performance in relation to socio-economic factors, financial management, corruption control, political stability. These factors took into account a wide range of underlying data points, covering sub-factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness. By providing a long-term view on sustainability the ratings aimed to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries were excluded until the cumulative market value weight of such exclusions reached a minimum 20% threshold (effectively a "best-in-universe" approach). The remaining eligible country weights were then normalised again so that the cumulative weightings in the Reference Index added up to 100%.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Country Environment Pillar Score	The weighted average of the financial product's portfolio's market value sovereign environmental risk score, assessing issuers' overall performance on environmental risk factors as measured by MSCI.	5.41
Country Social Pillar Score	The weighted average of the financial product's portfolio's market value sovereign social risk score, assessing issuers' overall performance on social risk factors as measured by MSCI.	5.60
Country Governance Pillar Score	The weighted average of the financial product's portfolio's market value sovereign governance risk score, assessing issuers' overall performance on governance risk factors as measured by MSCI.	5.35

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Country Environment Pillar Score	5.66	5.41
Country Social Pillar Score	5.66	5.60
Country Governance Pillar Score	5.40	5.35

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A – The financial product did not intend to make sustainable investments and invested solely into sovereign debt, therefore the financial product did not invest in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2(17) of SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that issuers follow good governance practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

N/A – Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, the financial product did not invest in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

N/A – Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, indicators for adverse impacts on sustainability factors were not taken into account for the purposes of determining sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

N/A – Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, the financial product did not invest in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Investee countries subject to social violations (no. 16).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
URUGUAY (ORIENTAL REPUBLIC OF)	Government Bonds	1.38%	Uruguay
QATAR (STATE OF) RegS	Government Bonds	1.27%	Qatar

COLOMBIA REPUBLIC OF (GOVERNMENT)	Government Bonds	0.73%	Colombia
BRAZIL FEDERATIVE REPUBLIC OF (GOV	Government Bonds	0.73%	Brazil
QATAR (STATE OF) RegS	Government Bonds	0.72%	Qatar

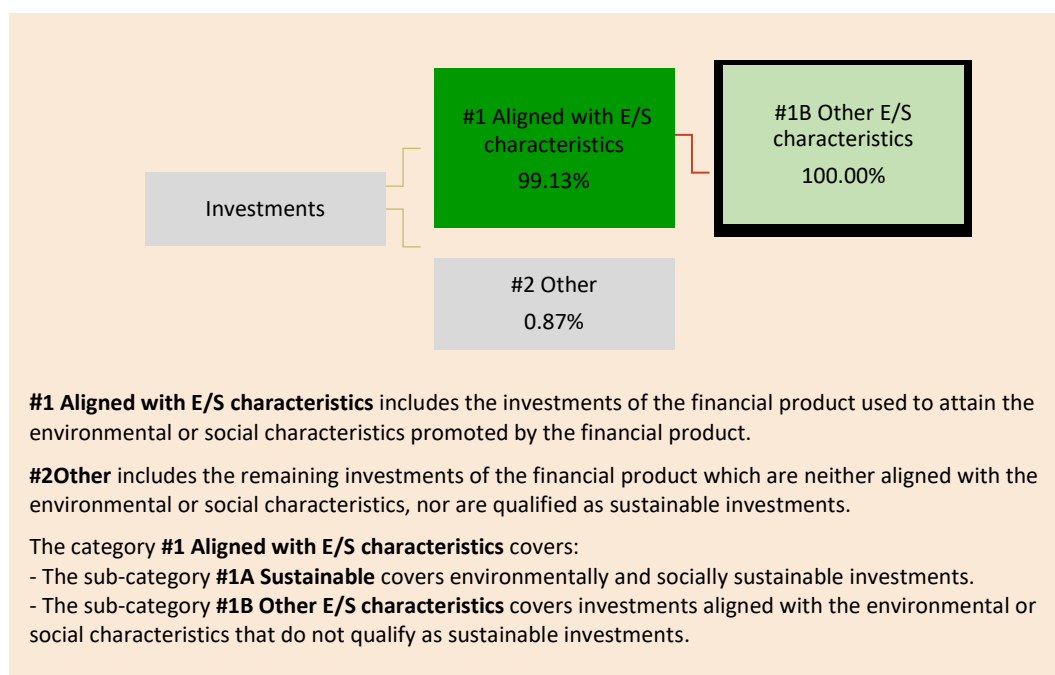

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

As at 31 December 2023, this financial product invested 99.13% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics).

0.87% of the investments were not aligned with these characteristics (#2 Other).

● **In which economic sectors were the investments made?**

The table below summarises the security type of investments of the financial product as at 31 December 2023.

Security Type	Financial Product's Assets
Government Bonds	99.13%
Other / Unmapped	0.87%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not make an allocation to sustainable economic activities that contribute to an environmental objective.

What was the share of socially sustainable investments?

The financial product did not make an allocation to sustainable economic activities that contribute to a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by adjusting weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio mainly comprised of fixed rate USD denominated government bonds issued by emerging market countries that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● *How does the reference benchmark differ from a broad market index?*

The Reference Index differs from a broad market index representing the performance of USD denominated sovereign bonds issued by emerging markets by adjusting weights, allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings.

The weighting methodology aims to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores are utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalises country weights such that they add up to 100% and ranks countries which are still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assesses a country's exposure to and management of environmental, social and governance risks and explain how these factors might impact the longterm sustainability of its economy. The factors which measure a country's exposure to and management of ESG risks include but are not limited to: efficiency of resource utilisation, performance in relation to socio-economic factors, financial management, corruption control, political stability. These factors take into account a wide range of underlying data points, covering sub-factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness. By providing a long-term view on sustainability the ratings aim to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries will be excluded until the cumulative market value weight of such exclusions reaches a minimum 20% threshold (effectively a "best-in-universe" approach). The remaining eligible country weights are then normalised again so that the cumulative weightings in the Reference Index add up to 100%.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Country Environment Pillar Score	5.41	5.41
Country Social Pillar Score	5.60	5.60
Country Governance Pillar Score	5.35	5.35

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	7.80%	8.32%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	7.80%	9.11%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI EMU ESG Screened UCITS ETF
 Legal entity identifier: 549300KF3LBYJA2KD428

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.38% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI EMU Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by

excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.00%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.51%	0.00%
Exposure to Worst-in-Class issuers	0.51%	0.00%
Controversial Weapons Involvement	0.51%	0.00%
Tobacco involvement	0.51%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 16.38% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but were not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	5.77%	Netherlands
LVMH	Consumer Discretionary	4.96%	France
TOTALENERGIES	Energy	3.08%	France
SIEMENS N AG	Industrials	3.01%	Germany
SAP	Information Technology	2.98%	Germany
SANOFI SA	Health Care	2.56%	France
SCHNEIDER ELECTRIC	Industrials	2.33%	France
LOREAL SA	Consumer Staples	2.31%	France
ALLIANZ	Financials	2.00%	Germany
LAIR LIQUIDE SOCIETE ANONYME POUR	Materials	1.97%	France
IBERDROLA SA	Utilities	1.57%	Spain
DEUTSCHE TELEKOM N AG	Communication Services	1.55%	Germany
VINCI SA	Industrials	1.48%	France
BNP PARIBAS SA	Financials	1.42%	France
HERMES INTERNATIONAL	Consumer Discretionary	1.35%	France

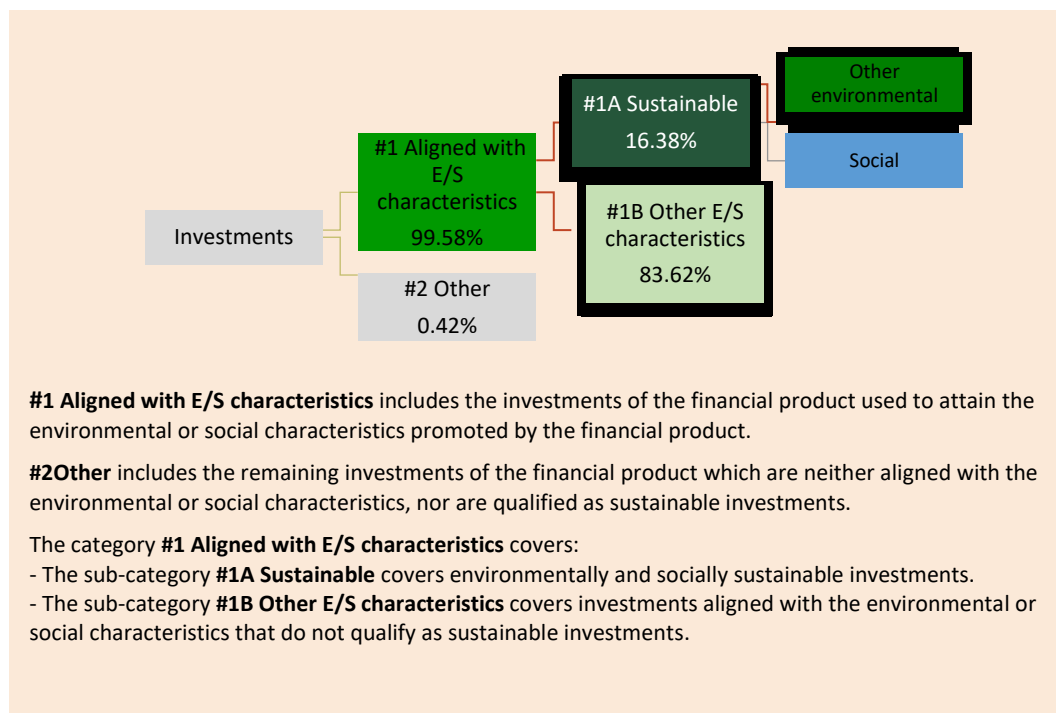

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.58% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 16.38% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.42% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	19.25%
Consumer Discretionary	15.97%
Industrials	15.78%
Information Technology	13.53%
Consumer Staples	7.59%
Health Care	6.61%
Utilities	5.81%
Materials	4.84%
Energy	4.58%
Communication Services	4.48%
Real Estate	1.14%
Other / Unmapped	0.42%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 16.38% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 16.38% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI EMU Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	20.27%	19.83%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	20.27%	18.78%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Bond Short Duration SRI PAB UCITS ETF
 Legal entity identifier: 549300QIFH7Y0VUSB550

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.77% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI USD Corporate SRI 0-5 Years PAB Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of the investment grade, USD-denominated, short-duration corporate bond market, excluding bonds which did not fulfil specific ESG

(environmental, social, and governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg USD Corporate 0-5 Years Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

- Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
- Securities that were unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company's ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

● *How did the sustainability indicators perform?*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Total GHG Emissions	The financial product's portfolio's weighted average of its issuers' total GHG emissions (Scopes 1, 2 and 3) as determined by MSCI.	22,636,573.21
Exposure to Fossil Fuels	The percentage of financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	2.06%
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.34%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.34%

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Total GHG Emissions	33,291,738.90	22,636,573.21
Exposure to Fossil Fuels	1.93%	2.06%
Exposure to Very Severe Controversies	0.38%	0.34%
Exposure to Worst-in-Class issuers	0.38%	0.34%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 20.77% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
CVS HEALTH CORP	Health Care	0.46%	United States
VISA INC	Financials	0.38%	United States
AMGEN INC	Health Care	0.38%	United States
DELL INTERNATIONAL LLC	Industrials	0.37%	United States
MICROSOFT CORPORATION	Information Technology	0.36%	United States
ABBVIE INC	Health Care	0.35%	United States
MICROSOFT CORPORATION	Information Technology	0.34%	United States
ABBVIE INC	Health Care	0.34%	United States
ABBVIE INC	Health Care	0.33%	United States
VERIZON COMMUNICATIONS INC	Communication Services	0.33%	United States
COMCAST CORPORATION	Communication Services	0.31%	United States
PFIZER INC	Health Care	0.30%	Singapore
MICROSOFT CORP	Information Technology	0.29%	United States
INTERNATIONAL BUSINESS MACHINES CO	Information Technology	0.28%	United States
DEUTSCHE MANAGED DOLLAR FUND	Other / Unmapped	0.27%	Ireland

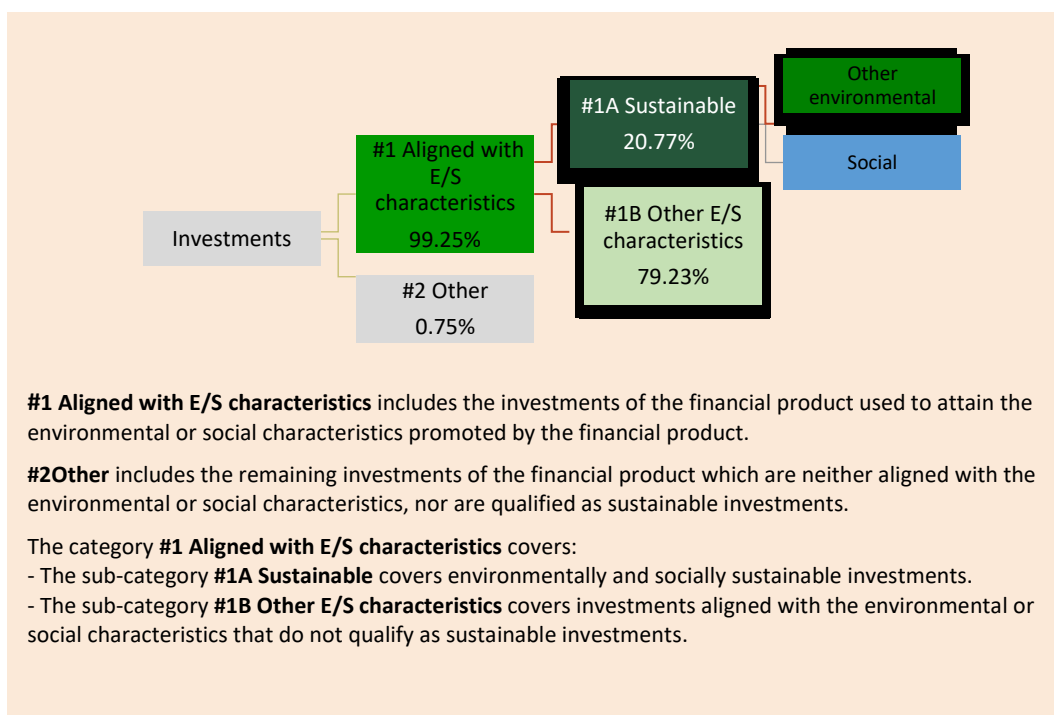

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.25% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 20.77% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.75% of the investments were not aligned with these characteristics (#2 Other).

● *In which economic sectors were the investments made?*

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	44.50%
Health Care	17.41%
Information Technology	11.21%
Communication Services	8.45%
Consumer Discretionary	6.00%
Industrials	4.91%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Consumer Staples	4.34%
Real Estate	1.68%
Materials	0.85%
Other / Unmapped	0.40%
Utilities	0.25%
Energy	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- ***What was the share of investments made in transitional and enabling activities?***

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 20.77% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 20.77% in total.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Bloomberg MSCI Euro Corporate Sustainable and SRI 0-5 Year PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● *How does the reference benchmark differ from a broad market index?*

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

- Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
- Securities that are unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Total GHG Emissions	22,636,573.21	22,699,098.00
Exposure to Fossil Fuels	2.06%	2.14%
Exposure to Very Severe Controversies	0.34%	0.36%
Exposure to Worst-in-Class issuers	0.34%	0.36%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	5.80%	6.00%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	5.80%	6.07%

Msci Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI World ESG Screened UCITS ETF
 Legal entity identifier: 5493000MMCBYY20QMC86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.49% of sustainable investments (as at 31.12.2023) <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Select ESG Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index, or unrelated transferable securities or other eligible assets. The Reference Index selected companies from the MSCI World Index (the "Parent Index") that met certain minimum

Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● *How did the sustainability indicators perform?*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.03%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.03%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.03%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.03%

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.57%	0.03%
Exposure to Worst-in-Class issuers	1.16%	0.03%
Controversial Weapons Involvement	0.57%	0.03%
Tobacco involvement	0.57%	0.03%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 20.49% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but were not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
APPLE INC	Information Technology	5.25%	United States
MICROSOFT CORP	Information Technology	4.29%	United States
AMAZON COM INC	Consumer Discretionary	2.31%	United States
NVIDIA CORP	Information Technology	1.85%	United States

ELI LILLY	Health Care	0.74%	United States
VISA INC CLASS A	Financials	0.73%	United States
COSTCO WHOLESALE CORP	Consumer Staples	0.70%	United States
EXXON MOBIL CORP	Energy	0.70%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

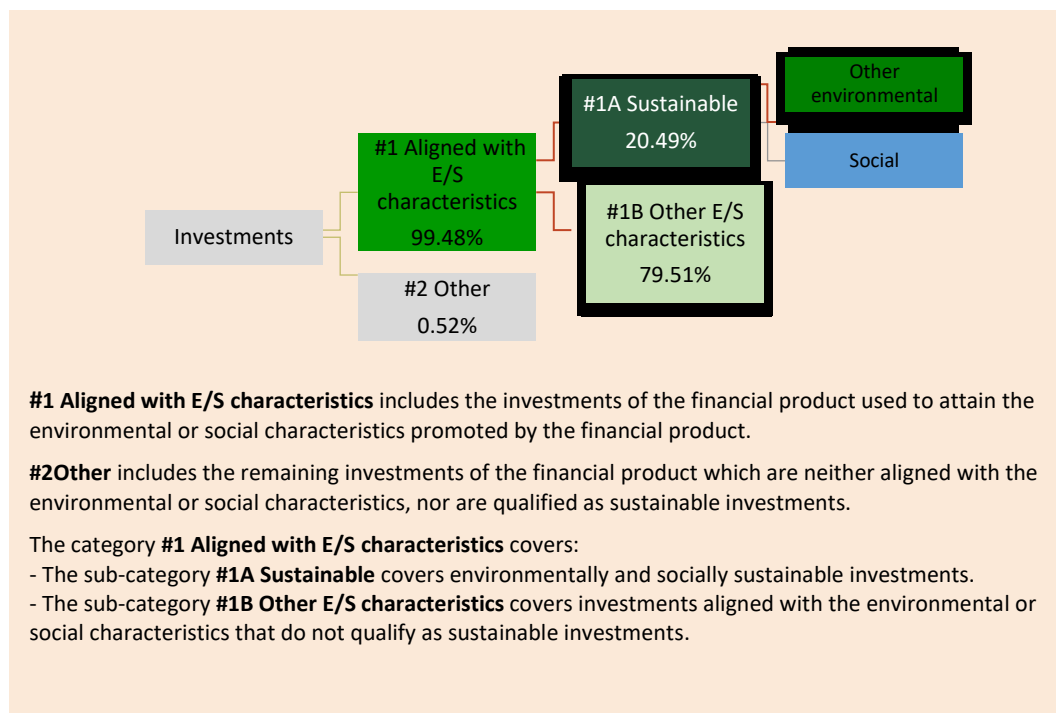

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.48% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 20.49% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.52% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	23.77%
Financials	16.08%
Health Care	13.02%
Consumer Discretionary	11.64%
Industrials	10.23%
Communication Services	6.56%
Consumer Staples	6.05%
Materials	3.86%
Energy	3.63%
Real Estate	2.83%
Utilities	1.84%
Other / Unmapped	0.49%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 20.49% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 20.49% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index. Any unrelated transferable securities held by the financial product were similar to the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI World Select ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and mid-cap companies across 23 developed markets countries. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.03%	0.03%
Exposure to Worst-in-Class issuers	0.03%	0.03%
Controversial Weapons Involvement	0.03%	0.03%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Japan ESG UCITS ETF
 Legal entity identifier: 549300VT3CD217Z7Q476

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.38% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Japan Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The constituents of the Reference Index had

comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI Japan Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	664.88
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	0.00%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Greenhouse Gas Intensity	579.56	664.88
Exposure to Fossil Fuels	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 16.38% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	6.53%	Japan
TOKYO ELECTRON LTD	Information Technology	3.83%	Japan
SHIN ETSU CHEMICAL LTD	Materials	3.60%	Japan
HITACHI LTD	Industrials	3.40%	Japan
DAIICHI SANKYO LTD	Health Care	3.26%	Japan
KDDI CORP	Communication Services	2.75%	Japan

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

RECRUIT HOLDINGS LTD	Industrials	2.74%	Japan
NINTENDO LTD	Communication Services	2.70%	Japan
DAIKIN INDUSTRIES LTD	Industrials	2.64%	Japan
SUMITOMO MITSUI FINANCIAL GROUP IN	Financials	2.51%	Japan
FAST RETAILING LTD	Consumer Discretionary	2.37%	Japan
HOYA CORP	Health Care	2.34%	Japan
ORIENTAL LAND LTD	Consumer Discretionary	2.21%	Japan
SOFTBANK CORP	Communication Services	1.92%	Japan
TOKIO MARINE HOLDINGS INC	Financials	1.78%	Japan

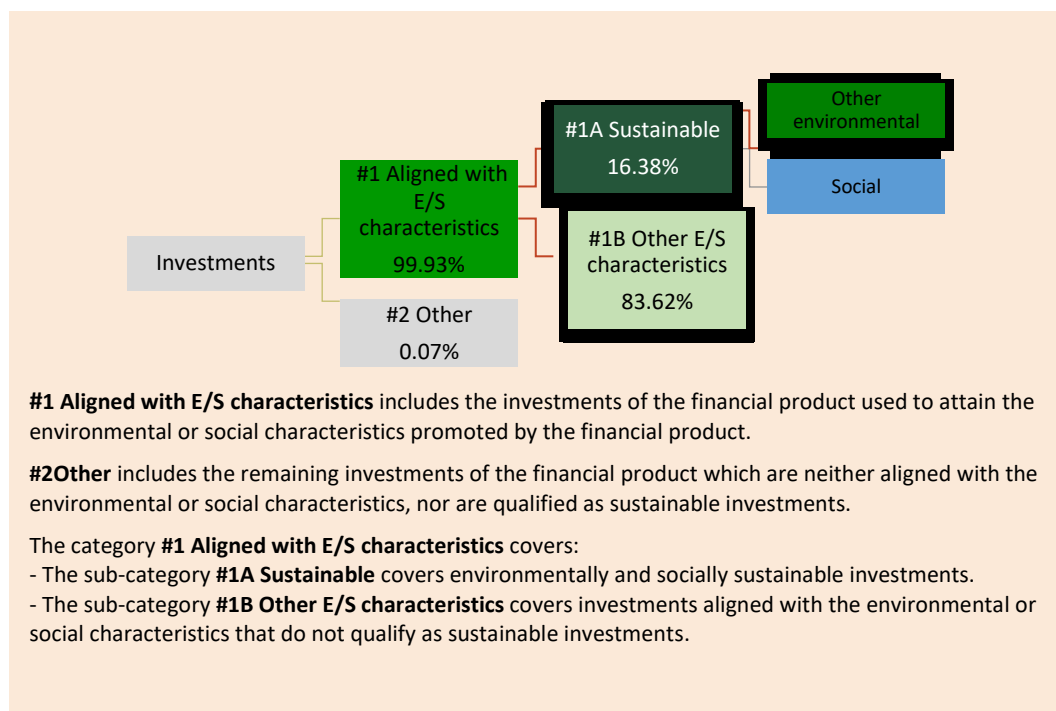

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 99.93% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 16.38% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.07% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Industrials	20.17%
Consumer Discretionary	16.97%
Information Technology	15.63%
Financials	11.92%
Health Care	9.88%
Materials	8.01%
Communication Services	7.87%
Consumer Staples	5.91%
Real Estate	3.56%
Other / Unmapped	0.07%
Utilities	0.00%
Energy	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 16.38% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 16.38% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate the Reference Index by buying all, or a substantial number of, the constituents of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI Japan Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Greenhouse Gas Intensity	664.88	664.88
Exposure to Fossil Fuels	0.00%	0.00%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	18.27%	18.50%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	18.27%	20.32%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI World ESG UCITS ETF
 Legal entity identifier: 549300KBPMH7CRUHUV62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.55% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in global developed markets. The constituents of the

Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI World Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.02%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.02%
	Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.02%
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	466.89
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	0.90%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.50%	0.02%
Exposure to Worst-in-Class issuers	0.50%	0.02%
Controversial Weapons Involvement	0.50%	0.02%
Greenhouse Gas Intensity	474.10	466.89
Exposure to Fossil Fuels	1.59%	0.90%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 23.55% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	8.96%	United States
NVIDIA CORP	Information Technology	3.94%	United States
ALPHABET INC CLASS A	Communication Services	2.88%	United States
TESLA INC	Consumer Discretionary	2.68%	United States
ALPHABET INC CLASS C	Communication Services	2.60%	United States
JOHNSON & JOHNSON	Health Care	1.56%	United States

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

ELI LILLY	Health Care	1.53%	United States
VISA INC CLASS A	Financials	1.51%	United States
MASTERCARD INC CLASS A	Financials	1.32%	United States
HOME DEPOT INC	Consumer Discretionary	1.24%	United States
NOVO NORDISK CLASS B	Health Care	1.14%	Denmark
ASML HOLDING NV	Information Technology	1.09%	Netherlands
MERCK & CO INC	Health Care	1.08%	United States
ADOBE INC	Information Technology	0.89%	United States
SALESFORCE INC	Information Technology	0.85%	United States

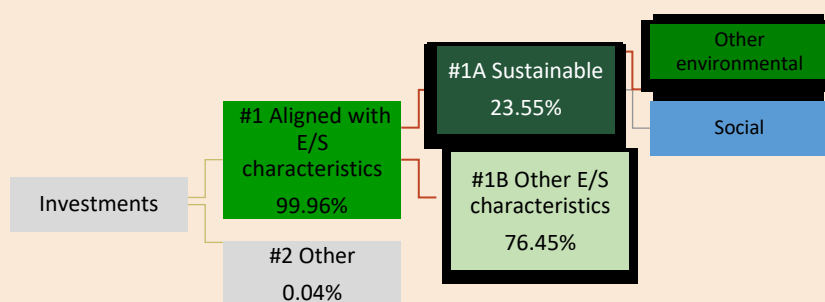

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.96% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 23.55% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.04% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	26.18%
Financials	16.59%
Health Care	13.70%
Industrials	11.83%
Consumer Discretionary	11.54%
Communication Services	9.35%
Materials	3.73%
Consumer Staples	3.40%
Real Estate	2.81%
Utilities	0.68%
Energy	0.17%
Other / Unmapped	0.02%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 23.55% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 23.55% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI World Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global developed markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.02%	0.02%
Exposure to Worst-in-Class issuers	0.02%	0.02%
Controversial Weapons Involvement	0.02%	0.02%
Greenhouse Gas Intensity	466.89	466.93
Exposure to Fossil Fuels	0.90%	0.90%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	26.77%	26.73%

● *How did this financial product perform compared with the broad market index?*

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	26.77%	23.79%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Europe ESG UCITS ETF
 Legal entity identifier: 549300I5MYV9MCPQD952

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.14% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Europe Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The

constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI Europe Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.11%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.11%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.11%
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	554.06
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	1.69%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.20%	0.11%
Exposure to Worst-in-Class issuers	0.20%	0.11%
Controversial Weapons Involvement	0.20%	0.11%
Greenhouse Gas Intensity	527.08	554.06
Exposure to Fossil Fuels	1.23%	1.69%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 28.14% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
NOVO NORDISK CLASS B	Health Care	6.60%	Denmark
ASML HOLDING NV	Information Technology	6.26%	Netherlands
ASTRAZENECA PLC	Health Care	4.85%	United Kingdom
NOVARTIS AG	Health Care	3.57%	Switzerland
HSBC HOLDINGS PLC	Financials	3.44%	United Kingdom
LOREAL SA	Consumer Staples	2.49%	France
SCHNEIDER ELECTRIC	Industrials	2.20%	France
BNP PARIBAS SA	Financials	1.56%	France
RELX PLC	Industrials	1.50%	United Kingdom

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

HERMES INTERNATIONAL	Consumer Discretionary	1.46%	France
ABB LTD	Industrials	1.38%	Switzerland
AXA SA	Financials	1.27%	France
ZURICH INSURANCE GROUP AG	Financials	1.24%	Switzerland
PROSUS NV	Consumer Discretionary	1.19%	Netherlands
RECKITT BENCKISER GROUP PLC	Consumer Staples	1.18%	United Kingdom

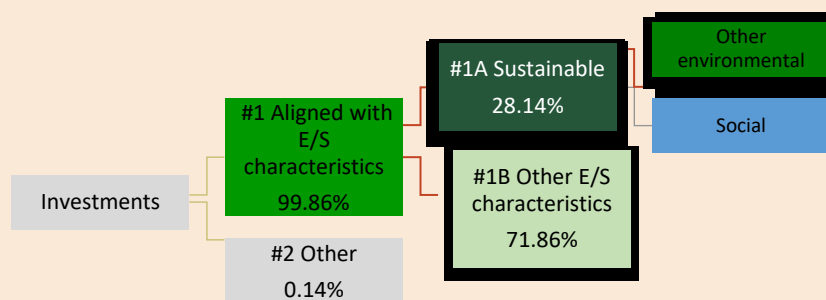

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 99.86% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.14% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.14% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	20.02%
Health Care	19.09%
Industrials	18.35%
Consumer Discretionary	11.77%
Information Technology	9.31%
Consumer Staples	8.16%
Materials	7.10%
Communication Services	3.48%
Utilities	1.52%
Real Estate	1.19%
Other / Unmapped	0.03%
Energy	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 28.14% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 28.14% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI Europe Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.11%	0.11%
Exposure to Worst-in-Class issuers	0.11%	0.11%
Controversial Weapons Involvement	0.11%	0.11%
Greenhouse Gas Intensity	554.06	554.04
Exposure to Fossil Fuels	1.69%	1.69%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	17.10%	17.02%

● *How did this financial product perform compared with the broad market index?*

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	17.10%	15.83%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI USA ESG UCITS ETF
 Legal entity identifier: 549300GV7ND6DPBVN624

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.16% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The constituents of the Reference Index had

comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI USA Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
	Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	410.85
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	0.65%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.33%	0.00%
Exposure to Worst-in-Class issuers	0.33%	0.00%
Controversial Weapons Involvement	0.33%	0.00%
Greenhouse Gas Intensity	431.16	410.85
Exposure to Fossil Fuels	1.34%	0.65%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 24.16% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	11.01%	United States
NVIDIA CORP	Information Technology	5.66%	United States
ALPHABET INC CLASS A	Communication Services	4.15%	United States
TESLA INC	Consumer Discretionary	3.85%	United States
ALPHABET INC CLASS C	Communication Services	3.74%	United States
JOHNSON & JOHNSON	Health Care	2.25%	United States

ELI LILLY	Health Care	2.20%	United States
VISA INC CLASS A	Financials	2.18%	United States
MASTERCARD INC CLASS A	Financials	1.89%	United States
HOME DEPOT INC	Consumer Discretionary	1.79%	United States
MERCK & CO INC	Health Care	1.56%	United States
ADOBE INC	Information Technology	1.28%	United States
SALESFORCE INC	Information Technology	1.22%	United States
MCDONALDS CORP	Consumer Discretionary	1.18%	United States
ACCENTURE PLC CLASS A	Information Technology	1.11%	Ireland

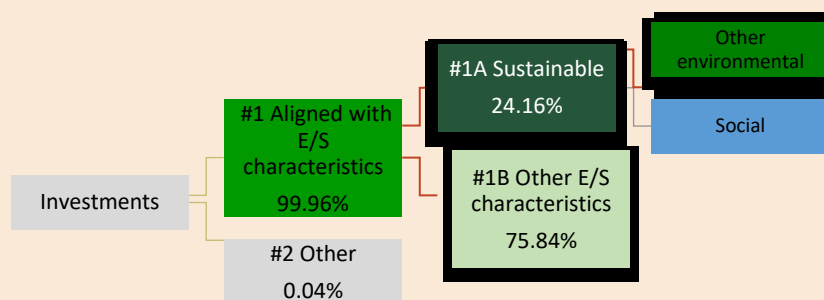

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.96% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 24.16% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.04% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	31.09%
Financials	14.00%
Health Care	13.90%
Consumer Discretionary	11.98%
Communication Services	11.48%
Industrials	9.73%
Real Estate	2.82%
Consumer Staples	2.11%
Materials	2.10%
Utilities	0.53%
Energy	0.22%
Other / Unmapped	0.04%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 24.16% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 24.16% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI USA Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Greenhouse Gas Intensity	410.85	410.82
Exposure to Fossil Fuels	0.65%	0.65%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	30.29%	30.12%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	30.29%	26.49%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Artificial Intelligence and Big Data UCITS ETF
 Legal entity identifier: 254900X8OXFNVMRD9308

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.47% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Artificial Intelligence and Big Data Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics (“Sustainalytics”), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website <https://www.sustainalytics.com/esg-ratings>.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

- ESG Risk Score of at least 40;
- Non-compliance of the United Nations Global Compact Principles; and
- Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product’s portfolio’s market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
Exposure to Worst-in-Class issuers	The percentage of the financial product’s portfolio’s market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.00%
Controversial Weapons Involvement	The percentage of the financial product’s portfolio’s market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
Tobacco involvement	The percentage of the financial product’s portfolio’s market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.00%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	3.59%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 11.47% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	6.36%	United States
META PLATFORMS INC CLASS A	Communication Services	5.90%	United States
AMAZON COM INC	Consumer Discretionary	4.60%	United States
ALPHABET INC CLASS A	Communication Services	4.53%	United States
SALESFORCE INC	Information Technology	4.50%	United States
MICROSOFT CORP	Information Technology	4.36%	United States
APPLE INC	Information Technology	4.32%	United States
SAMSUNG ELECTRONICS LTD	Information Technology	4.15%	Korea (South), Republic of
ACCENTURE PLC CLASS A	Information Technology	3.86%	Ireland
ADOBE INC	Information Technology	3.81%	United States
ADVANCED MICRO DEVICES INC	Information Technology	3.80%	United States
CISCO SYSTEMS INC	Information Technology	3.72%	United States
BANK OF AMERICA CORP	Financials	3.42%	United States
ORACLE CORP	Information Technology	2.88%	United States
INTEL CORPORATION CORP	Information Technology	2.82%	United States

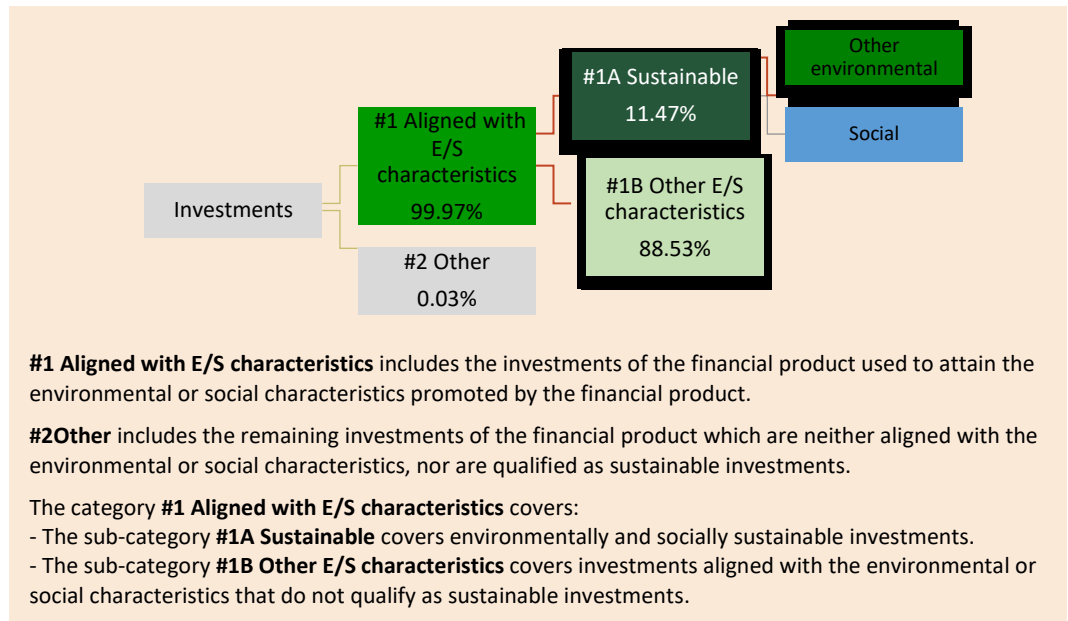

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.97% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 11.47% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.03% of the investments were not aligned with these characteristics (#2 Other).

● *In which economic sectors were the investments made?*

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	72.54%
Communication Services	14.93%
Financials	5.83%
Consumer Discretionary	4.88%
Industrials	1.80%
Other / Unmapped	0.03%
Utilities	0.00%
Real Estate	0.00%
Materials	0.00%
Health Care	0.00%
Energy	0.00%
Consumer Staples	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 11.47% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 11.47% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Nasdaq Global Artificial Intelligence and Big Data Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in artificial intelligence; robotics; automotive innovation; healthcare innovation; new energy & environment; internet of things; and data computing & processing. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website <https://www.sustainalytics.com/esg-ratings>.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

- ESG Risk Score of at least 40;
- Non-compliance of the United Nations Global Compact Principles; and
- Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	67.52%	67.99%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	67.52%	29.46%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Future Mobility UCITS ETF
 Legal entity identifier: 254900BN65IWB0RK9A45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18.02% of sustainable investments (as at 31.12.2023) <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Future Mobility Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics (“Sustainalytics”), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website <https://www.sustainalytics.com/esg-ratings>.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

- ESG Risk Score of at least 40;
- Non-compliance of the United Nations Global Compact Principles; and
- Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product’s portfolio’s market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.09%
Exposure to Worst-in-Class issuers	The percentage of the financial product’s portfolio’s market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	1.34%
Controversial Weapons Involvement	The percentage of the financial product’s portfolio’s market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.09%
Tobacco involvement	The percentage of the financial product’s portfolio’s market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.09%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	6.09%	0.09%
Exposure to Worst-in-Class issuers	4.21%	1.34%
Controversial Weapons Involvement	0.24%	0.09%
Tobacco involvement	0.24%	0.09%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 18.02% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	6.54%	United States
META PLATFORMS INC CLASS A	Communication Services	6.08%	United States
TESLA INC	Consumer Discretionary	5.39%	United States
ADVANCED MICRO DEVICES INC	Information Technology	5.23%	United States
INTEL CORPORATION CORP	Information Technology	4.98%	United States
TOYOTA MOTOR CORP	Consumer Discretionary	4.41%	Japan
BYD LTD H	Consumer Discretionary	4.00%	China
VERIZON COMMUNICATIONS INC	Communication Services	3.76%	United States
VOLKSWAGEN AG	Consumer Discretionary	3.60%	Germany
HITACHI LTD	Industrials	2.84%	Japan
HONDA MOTOR LTD	Consumer Discretionary	2.68%	Japan
FORD MOTOR	Consumer Discretionary	2.56%	United States
ALPHABET INC CLASS A	Communication Services	2.50%	United States
QUALCOMM INC	Information Technology	2.36%	United States
MERCEDES-BENZ GROUP N AG	Consumer Discretionary	2.35%	Germany

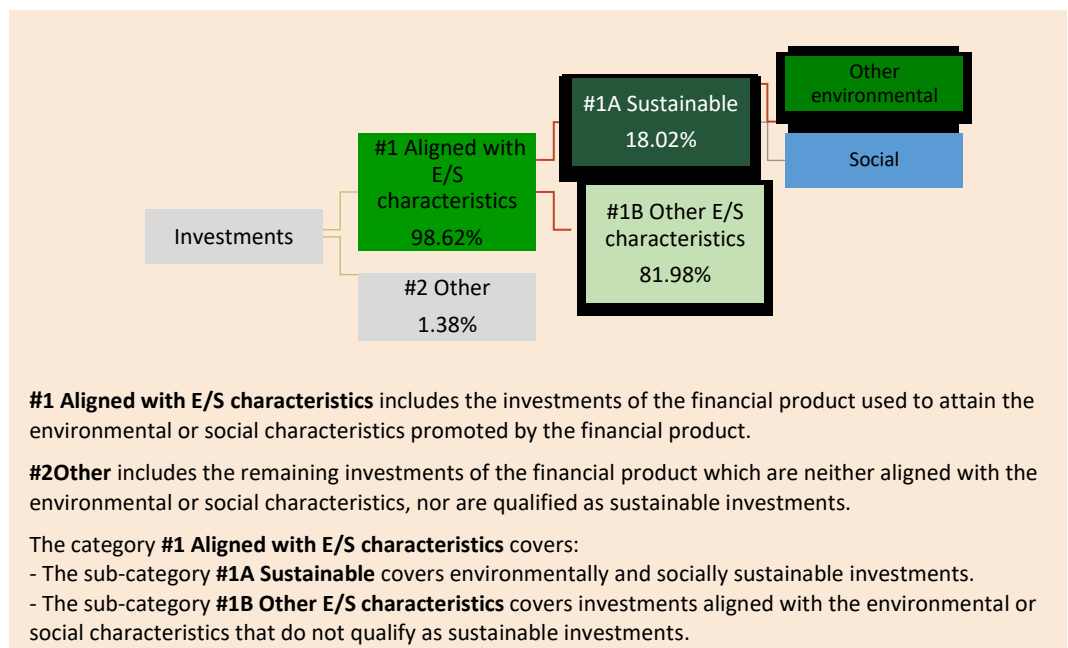

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 98.62% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 18.02% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.38% of the investments were not aligned with these characteristics (#2 Other).

● *In which economic sectors were the investments made?*

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Consumer Discretionary	37.87%
Information Technology	33.06%
Communication Services	15.31%
Industrials	8.64%
Materials	5.09%
Other / Unmapped	0.04%
Utilities	0.00%
Real Estate	0.00%
Health Care	0.00%
Financials	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Energy	0.00%
Consumer Staples	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 18.02% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 18.02% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included (i) securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Nasdaq Global Future Mobility Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in future mobility, for example: autonomous vehicles (i.e. driverless cars), 3D graphics, electric vehicles, hybrid vehicles and the technology and supply chain behind this, such as electric batteries and lithium batteries. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics (“Sustainalytics”), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website <https://www.sustainalytics.com/esg-ratings>.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

- ESG Risk Score of at least 40;
- Non-compliance of the United Nations Global Compact Principles; and
- Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.09%	0.09%
Exposure to Worst-in-Class issuers	1.34%	1.34%
Controversial Weapons Involvement	0.09%	0.09%
Tobacco involvement	0.09%	0.09%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	50.46%	50.75%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	50.46%	29.46%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Emerging Markets ESG UCITS ETF
 Legal entity identifier: 54930068DSSGNFYVR85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.49% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EM Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in

global emerging markets. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI Emerging Markets Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.47%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.46%
	Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.46%
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	633.32
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	2.63%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.46%	0.47%
Exposure to Worst-in-Class issuers	0.46%	0.46%
Controversial Weapons Involvement	0.46%	0.46%
Greenhouse Gas Intensity	629.97	633.32
Exposure to Fossil Fuels	5.03%	2.63%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 15.49% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	11.71%	Taiwan
TENCENT HOLDINGS LTD	Communication Services	8.74%	China
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	5.78%	China
MEITUAN	Consumer Discretionary	2.46%	China
CHINA CONSTRUCTION BANK CORP H	Financials	1.95%	China
INFOSYS LTD	Information Technology	1.91%	India
MEDIATEK INC	Information Technology	1.30%	Taiwan

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

TATA CONSULTANCY SERVICES LTD	Information Technology	1.26%	India

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.18% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 15.49% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.82% of the investments were not aligned with these characteristics (#2 Other).

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	25.40%
Information Technology	21.06%
Communication Services	17.04%
Consumer Discretionary	14.74%
Consumer Staples	5.32%
Materials	4.80%
Health Care	3.83%
Industrials	3.56%
Utilities	1.77%
Real Estate	1.62%
Energy	0.50%
Other / Unmapped	0.35%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 15.49% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 15.49% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a representation of, the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI EM Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global emerging markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.47%	0.47%
Exposure to Worst-in-Class issuers	0.46%	0.46%
Controversial Weapons Involvement	0.46%	0.46%
Greenhouse Gas Intensity	633.32	633.39
Exposure to Fossil Fuels	2.63%	2.64%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	4.26%	4.63%

● *How did this financial product perform compared with the broad market index?*

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	4.26%	9.83%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Bond SRI PAB UCITS ETF
 Legal entity identifier: 254900YQ6CUXP95AXP64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.39% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of fixed-rate, investment grade, US Dollar denominated corporate bonds, excluding bonds which did not fulfil specific ESG

(environmental, social, and governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg USD Liquid Investment Grade Corporate Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

- Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
- Securities that were unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company's ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

● *How did the sustainability indicators perform?*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2022)
Total GHG Emissions	The financial product's portfolio's weighted average of its issuers' total GHG emissions (Scopes 1, 2 and 3) as determined by MSCI.	22,243,239.00
Exposure to Fossil Fuels	The percentage of financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	2.65%
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.44%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.44%

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Total GHG Emissions	32,012,446.72	22,243,239.00
Exposure to Fossil Fuels	2.84%	2.65%
Exposure to Very Severe Controversies	0.63%	0.44%
Exposure to Worst-in-Class issuers	0.63%	0.44%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 25.39% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
DEUTSCHE MANAGED DOLLAR FUND	Other / Unmapped	0.46%	Ireland

ABBVIE INC	Health Care	0.19%	United States
AT&T INC	Communication Services	0.19%	United States

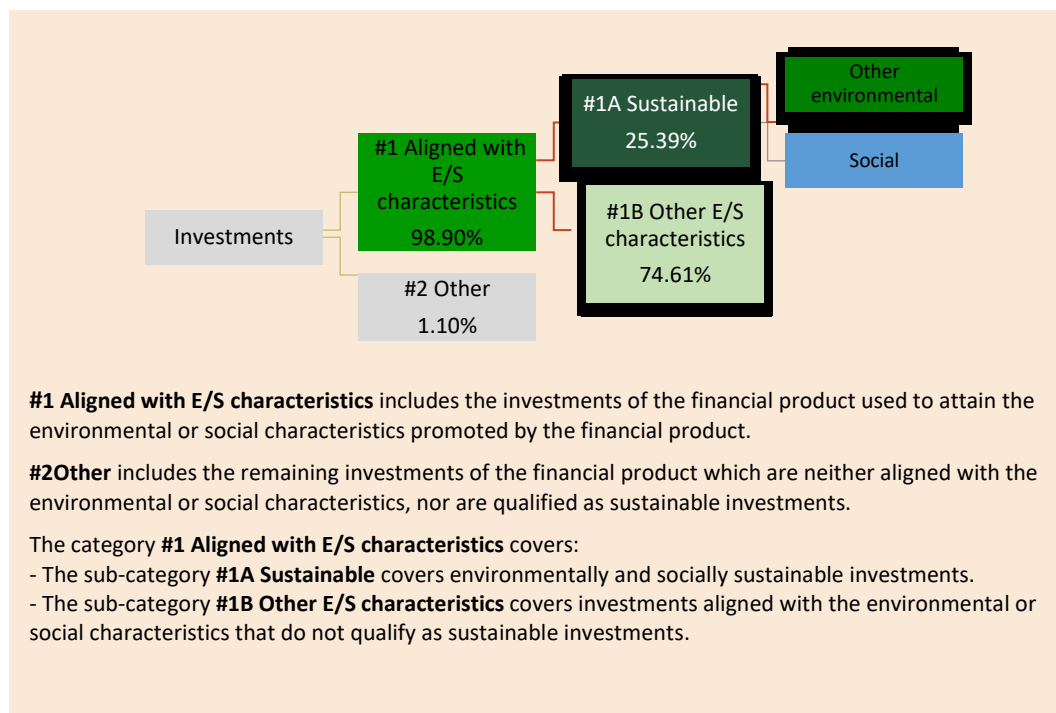

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

As at 31 December 2023, this financial product invested 98.90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.39% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.10% of the investments were not aligned with these characteristics (#2 Other).

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	34.10%
Health Care	21.08%
Communication Services	13.74%
Information Technology	11.52%
Consumer Discretionary	7.01%
Industrials	4.95%
Consumer Staples	3.35%
Real Estate	2.08%
Materials	1.17%
Other / Unmapped	0.66%
Utilities	0.34%
Energy	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 25.39% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 25.39% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Investment Policy" which means that the financial product aimed to track, before fees and expenses, the performance of the Reference Index that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

- Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
- Securities that are unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Total GHG Emissions	22,243,239.00	22,273,194.88
Exposure to Fossil Fuels	2.65%	2.68%
Exposure to Very Severe Controversies	0.44%	0.44%
Exposure to Worst-in-Class issuers	0.44%	0.44%

How did this financial product perform compared with the reference benchmark?

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	9.14%	9.32%

How did this financial product perform compared with the broad market index?

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	9.14%	9.01%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI EMU ESG UCITS ETF
 Legal entity identifier: 254900OARN1CRQB14D27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.74% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU Low Carbon SRI Leaders Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European

Economic and Monetary Union. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI EMU Index (the “Parent Index”).

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves were explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the Environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
	Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, Landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.	589.03
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	3.16%

● **...and compared to previous periods?**

Indicator (as Described Above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.44%	0.00%
Exposure to Worst-in-Class issuers	0.44%	0.00%
Controversial Weapons Involvement	0.44%	0.00%
Greenhouse Gas Intensity	590.93	589.03
Exposure to Fossil Fuels	1.85%	3.16%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 12.74% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm (“DNSH”) thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product’s Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	10.39%	Netherlands
LOREAL SA	Consumer Staples	5.74%	France
SCHNEIDER ELECTRIC	Industrials	5.07%	France
BNP PARIBAS SA	Financials	3.61%	France
HERMES INTERNATIONAL	Consumer Discretionary	3.36%	France
AXA SA	Financials	2.94%	France
PROSUS NV	Consumer Discretionary	2.73%	Netherlands

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

ING GROEP NV	Financials	2.55%	Netherlands
DEUTSCHE POST AG	Industrials	2.41%	Germany
INDUSTRIA DE DISEÑO TEXTIL INDITEX	Consumer Discretionary	2.18%	Spain
MUENCHENER RUECKVERSICHERUNGS-GESE	Financials	2.17%	Germany
KERING SA	Consumer Discretionary	2.03%	France
DEUTSCHE BOERSE AG	Financials	1.88%	Germany
BMW AG	Consumer Discretionary	1.86%	Germany
WOLTERS KLUWER NV	Industrials	1.72%	Netherlands

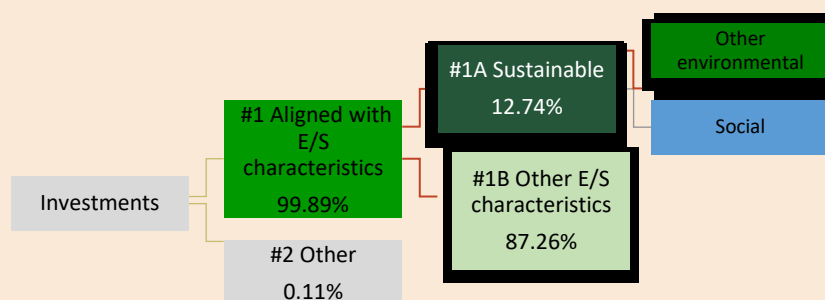

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 99.89% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 12.74% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.11% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	20.82%
Consumer Discretionary	20.16%
Industrials	16.77%
Information Technology	15.07%
Consumer Staples	12.42%
Materials	6.25%
Communication Services	3.20%
Real Estate	2.10%
Utilities	2.06%
Health Care	1.05%
Other / Unmapped	0.11%
Energy	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 12.74% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 12.74% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI EMU Low Carbon SRI Leaders Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. Companies with any involvement in controversial weapons, nuclear weapons, unconventional oil & gas, thermal coal or with any fossil fuel reserves are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Greenhouse Gas Intensity	589.03	589.07
Exposure to Fossil Fuels	3.16%	3.15%

- **How did this financial product perform compared with the reference benchmark?**

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	18.49%	18.15%

- **How did this financial product perform compared with the broad market index?**

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	18.49%	18.78%

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers EUR Corporate Green Bond UCITS ETF
 Legal entity identifier: 2549007L0TWXK1EJB707

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: 99.38% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective:	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The financial product had sustainable investment as its objective and qualified as a financial product subject to Article 9(1) SFDR by tracking the Bloomberg MSCI EUR Corporate and Agency Green Bond Index (the “Reference Index”). The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of Euro

denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index included fixed income securities that met specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds met the green bond eligibility criteria. The universe of potential constituents was independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a “green bond” and were therefore eligible for inclusion in the Reference Index. These eligibility criteria reflected themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and required commitments about a bond’s:

- Stated use of proceeds: For bonds to have been eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product’s Supplement to the Prospectus included; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to have been eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must have been disclosed in the bond’s prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds still qualified for inclusion in the Reference Index, even if all principles were not satisfied. Such acceptance was assessed by MSCI ESG Research LLC and included as a minimum conformity with principle one of the 2014 green bond principals, “stated use of proceeds”, as described above.

The Reference Index also applied an ESG screening approach where all of the issuers which breached the following ESG standards, amongst others, were excluded:

- Were associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Were assigned an MSCI ESG Rating of 'CCC';
- Derived certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Were assigned an MSCI ESG Controversies Score of 0 (red flag).

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Green Bond Exposure	<p>The percentage of the financial product’s portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements:</p> <ul style="list-style-type: none"> (i) CBI Certified Green Bond: These are issued either based on issuer’s own green bond principles or CBI green bond principles and is also certified by CBI as a green. (ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria. (iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles. 	99.38%
	Exposure to Very Severe Controversies	The percentage of the financial product’s portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.35%
	Exposure to Worst-in-Class issuers	The percentage of the financial product’s portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.35%
	Controversial Weapons Involvement	The percentage of the financial product’s portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.35%

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Green Bond Exposure	98.98%	99.38%
Exposure to Very Severe Controversies	0.46%	0.35%
Exposure to Worst-in-Class Issuers	0.46%	0.35%
Controversial Weapons Involvement	0.46%	0.35%

● *How did the sustainable investments not cause significant harm to any sustainable investment objective?*

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
SOCIETE DU GRAND PARIS MTN RegS	Other / Unmapped	0.69%	France
ELECTRICITE DE FRANCE SA RegS	Utilities	0.59%	France

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 99.38% of its net assets in investments that were aligned with the sustainable investments with an environmental objective.

0.62% of the investments were not aligned with these characteristics (#2 Not sustainable).

● In which economic sectors were the investments made?

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	44.77%
Utilities	27.39%
Other / Unmapped	8.58%
Real Estate	6.83%
Industrials	6.82%
Consumer Discretionary	5.27%
Materials	0.20%
Information Technology	0.14%
Communication Services	0.00%
Health Care	0.00%
Energy	0.00%
Consumer Staples	0.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

(EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2023, the share of sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy was 99.38%.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Reference Index took into account sustainability factors in line with the sustainable investment objective by representing the performance of Euro-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which met certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds would exclusively and formally be applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, EUR-denominated green bonds, that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI EUR Corporate and Agency Green Bond Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● *How did the reference benchmark differ from a broad market index?*

The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaptation;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Green Bond Exposure	99.38%	99.46%
Exposure to Very Severe Controversies	0.35%	0.31%
Exposure to Worst-in-Class issuers	0.35%	0.31%
Controversial Weapons Involvement	0.35%	0.31%

● ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	8.07%	8.34%

● ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	8.07%	7.54%

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Green Bond UCITS ETF
 Legal entity identifier: 2549001CWO1OWBWUGJ52

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: 97.39% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective:	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The financial product had sustainable investment as its objective and qualified as a financial product subject to Article 9(1) SFDR by tracking the Bloomberg MSCI USD Corporate and Agency Green Bond Index (the "Reference Index"). The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of USD

denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index included fixed income securities that met specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds met the green bond eligibility criteria. The universe of potential constituents was independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a “green bond” and were therefore eligible for inclusion in the Reference Index. These eligibility criteria reflected themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and required commitments about a bond’s:

- Stated use of proceeds: For bonds to have been eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product’s Supplement to the Prospectus included; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to have been eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must have been disclosed in the bond’s prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds still qualified for inclusion in the Reference Index, even if all principles were not satisfied. Such acceptance was assessed by MSCI ESG Research LLC and included as a minimum conformity with principle one of the 2014 green bond principals, “stated use of proceeds”, as described above.

The Reference Index also applied an ESG screening approach where all of the issuers which breached the following ESG standards, amongst others, were excluded:

- Were associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Were assigned an MSCI ESG Rating of 'CCC';
- Derived certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Were assigned an MSCI ESG Controversies Score of 0 (red flag).

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Green Bond Exposure	<p>The percentage of the financial product’s portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements:</p> <ul style="list-style-type: none"> (i) CBI Certified Green Bond: These are issued either based on issuer’s own green bond principles or CBI green bond principles and is also certified by CBI as a green. (ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria. (iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles. 	97.78%
	Exposure to Very Severe Controversies	The percentage of the financial product’s portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	6.67% ¹
	Exposure to Worst-in-Class Issuers	The percentage of the financial product’s portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	7.04% ¹
	Controversial Weapons Involvement	The percentage of the financial product’s portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	6.67% ¹

¹ The percentage of the financial product’s portfolio’s market value exposed to such indicators is predominantly driven by agency-issued securities which conform with equivalent government indicators, where applicable, but for which no data was available for the corporate issuer-related indicators listed above.

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Green Bond Exposure	97.69%	97.78%
Exposure to Very Severe Controversies	1.64%	6.67%
Exposure to Worst-in-Class Issuers	1.64%	7.04%
Controversial Weapons Involvement	1.64%	6.67%

● *How did the sustainable investments not cause significant harm to any sustainable investment objective?*

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
GACI FIRST INVESTMENT CO MTN RegS	Financials	1.30%	Cayman Islands
BANK OF AMERICA CORP MTN	Financials	1.26%	United States
GACI FIRST INVESTMENT CO MTN RegS	Financials	1.15%	Cayman Islands
DEUTSCHE MANAGED DOLLAR FUND	Other / Unmapped	1.04%	Ireland
GACI FIRST INVESTMENT CO MTN RegS	Financials	1.02%	Cayman Islands

AIRPORT AUTHORITY HONG KONG 144A	Other / Unmapped	0.70%	Hong Kong
MTR CORP LTD MTN RegS	Industrials	0.69%	Hong Kong

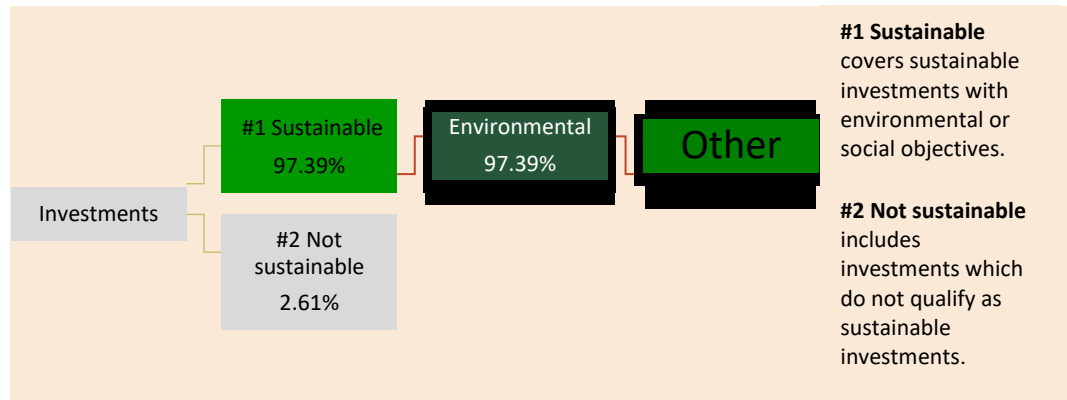

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 97.39% of its net assets in investments that were aligned with the sustainable investments with an environmental objective.

2.61% of the investments were not aligned with these characteristics (#2 Not sustainable).

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	39.26%
Utilities	25.79%
Real Estate	14.58%
Consumer Discretionary	6.26%
Industrials	5.34%
Communication Services	3.12%
Other / Unmapped	2.80%
Materials	1.67%
Information Technology	1.18%
Health Care	0.00%
Energy	0.00%
Consumer Staples	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation

(EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy²?**

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2023, the share of sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy was 97.39%.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2023. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Reference Index took into account sustainability factors in line with the sustainable investment objective by representing the performance of USD-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which met certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds would exclusively and formally be applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, USD-denominated green bonds, that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI USD Corporate and Agency Green Bond Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How did the reference benchmark differ from a broad market index?***

The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaptation;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Green Bond Exposure	97.78%	98.14%
Exposure to Very Severe Controversies	6.67%	6.62%
Exposure to Worst-in-Class Issuers	7.04%	6.99%
Controversial Weapons Involvement	6.67%	6.62%

● ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	6.74%	7.03%

● ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	6.74%	9.43%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Europe Consumer Discretionary ESG Screened UCITS ETF
 Legal entity identifier: 254900MKLKWEVZDZ3H63

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.21% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Europe Consumer Discretionary ESG Screened 20-35 Select Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI Europe Consumer Discretionary Index (the "Parent Index") that met certain minimum

Environmental, Social and Governance (“ESG”) standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

- Were unrated by MSCI ESG Research
- Were assigned an MSCI ESG Rating of CCC
- Had any involvement in controversial weapons
- Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

● *How did the sustainability indicators perform?*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.00%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.00%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.00%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.00%

● *...and compared to previous periods?*

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%
Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 4.21% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but were not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
LVMH	Consumer Discretionary	23.98%	France
HERMES INTERNATIONAL	Consumer Discretionary	6.54%	France
MERCEDES-BENZ GROUP N AG	Consumer Discretionary	6.13%	Germany
PROSUS NV	Consumer Discretionary	5.30%	Netherlands
COMPASS GROUP PLC	Consumer Discretionary	4.63%	United Kingdom
INDUSTRIA DE DISENO TEXTIL INDITEX	Consumer Discretionary	4.26%	Spain
KERING SA	Consumer Discretionary	3.96%	France
FERRARI NV	Consumer Discretionary	3.95%	Netherlands
BMW AG	Consumer Discretionary	3.62%	Germany
FLUTTER ENTERTAINMENT PLC	Consumer Discretionary	3.20%	Ireland
ADIDAS N AG	Consumer Discretionary	3.09%	Germany
AMADEUS IT GROUP SA	Consumer Discretionary	2.41%	Spain
EVOLUTION	Consumer Discretionary	2.23%	Sweden
COMPAGNIE GENERALE DES ETABLISSEME	Consumer Discretionary	2.20%	France
STELLANTIS NV	Consumer Discretionary	1.91%	Netherlands

What was the proportion of sustainability-related investments?

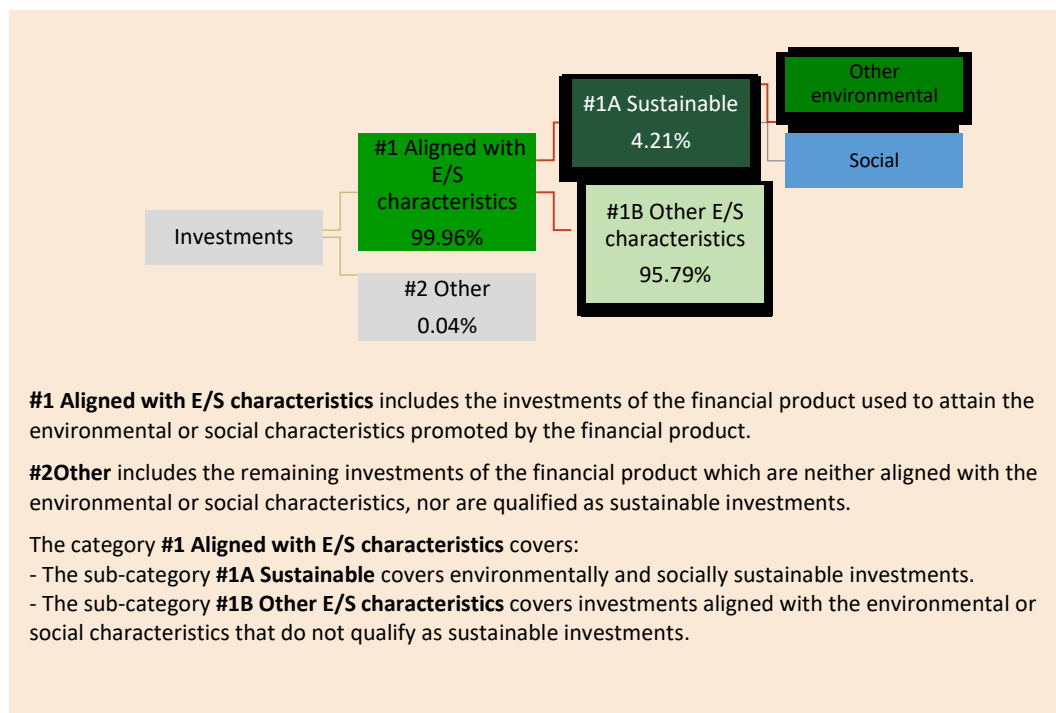

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.96% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 4.21% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.04% of the investments were not aligned with these characteristics (#2 Other).

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Consumer Discretionary	99.96%
Other / Unmapped	0.04%
Communication Services	0.00%
Utilities	0.00%
Real Estate	0.00%
Materials	0.00%
Information Technology	0.00%
Industrials	0.00%
Health Care	0.00%
Financials	0.00%
Energy	0.00%
Consumer Staples	0.00%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

N/A - There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 4.21% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 4.21% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other" included secured/unsecured deposits (cash) as at 31 December 2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the MSCI Europe Consumer Discretionary ESG Screened 20-35 Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation securities across developed markets countries in Europe, which are classified in the Consumer Discretionary sector as per the Global Industry Classification Standard (GICS®). The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Exposure to Very Severe Controversies	0.00%	0.00%

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Exposure to Worst-in-Class issuers	0.00%	0.00%
Controversial Weapons Involvement	0.00%	0.00%
Tobacco involvement	0.00%	0.00%

● ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	16.78%	16.64%

● ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	16.78%	15.89%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers EMU Net Zero Pathway Paris Aligned UCITS ETF
 Legal entity identifier: 254900YFWZKFQI5JGH16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.32% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies across developed market countries in the

European Economic and Monetary Union which were selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Eurozone Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on <https://www.iigcc.org> and <https://parisalignedinvestment.org>.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal (“SDG”) linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

- Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
- Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
- Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:
 - Coal mining and power generation;
 - Fossil fuel production, servicing, exploration, distribution, or power generation;
 - Oil sands production;
 - Civilian firearms distribution;
 - Tobacco related products; and
 - Military weapons;
- Were assigned an ISS ESG rating of D- or below; and
- Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

- Science-based targets relating to reducing carbon emissions;
- Climate disclosure standards; and
- Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	689.20
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.12%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.54%
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by MSCI, or for which no data was available.	2.24%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Greenhouse Gas Intensity	738.30	689.20
Exposure to Very Severe Controversies	1.69%	1.12%
Exposure to Worst-in-Class issuers	0.68%	0.54%
Exposure to Fossil Fuels	1.56%	2.24%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 19.32% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Activities negatively affecting biodiversity-sensitive areas (no. 7);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Activities negatively affecting biodiversity-sensitive areas (no. 7);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	6.90%	Netherlands
LVMH	Consumer Discretionary	5.52%	France
SAP	Information Technology	3.27%	Germany
SIEMENS N AG	Industrials	2.91%	Germany

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

SANOFI SA	Health Care	2.74%	France
LOREAL SA	Consumer Staples	2.35%	France
SCHNEIDER ELECTRIC	Industrials	2.14%	France
LAIR LIQUIDE SOCIETE ANONYME POUR	Materials	2.01%	France
ALLIANZ	Financials	1.95%	Germany
HERMES INTERNATIONAL	Consumer Discretionary	1.54%	France
DEUTSCHE TELEKOM N AG	Communication Services	1.51%	Germany
BNP PARIBAS SA	Financials	1.43%	France
MERCEDES-BENZ GROUP N AG	Consumer Discretionary	1.35%	Germany
BANCO SANTANDER SA	Financials	1.28%	Spain
ESSILORLUXOTTICA SA	Health Care	1.27%	France

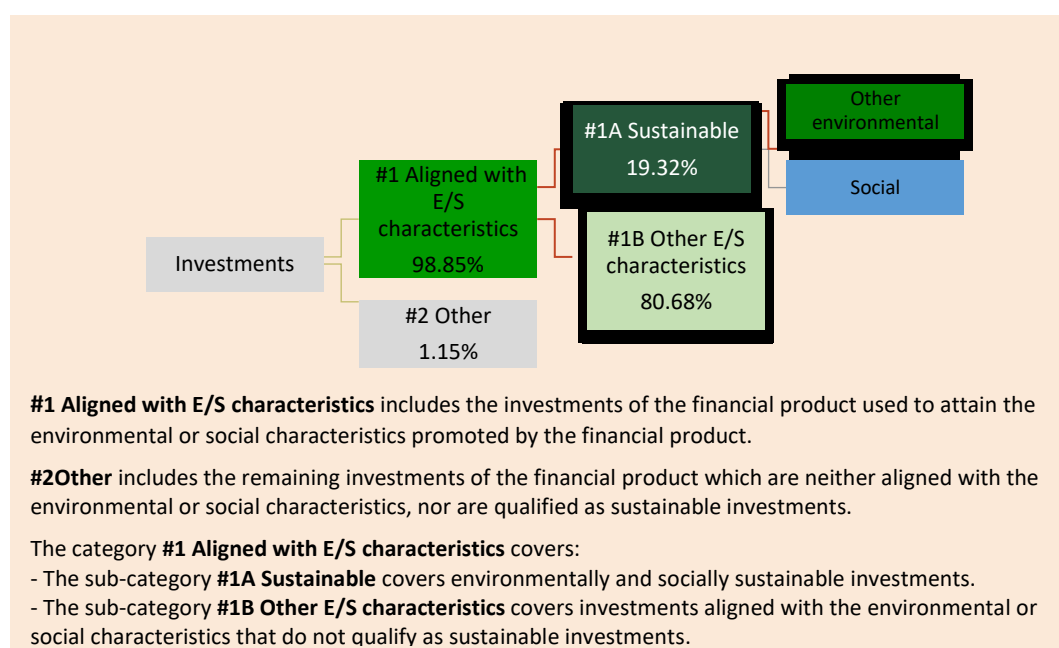

What was the proportion of sustainability-related investments?

● What was the asset allocation?

As at 31 December 2023, this financial product invested 98.85% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 19.32% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.15% of the investments were not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Financials	18.85%
Consumer Discretionary	18.60%
Information Technology	15.88%
Industrials	12.28%
Health Care	10.79%
Consumer Staples	8.39%
Materials	7.00%
Communication Services	3.97%
Utilities	3.01%
Real Estate	1.20%
Other / Unmapped	0.03%
Energy	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 19.32% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 19.32% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included (i) securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● ***How does the reference benchmark differ from a broad market index?***

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets in the European Economic and Monetary Union, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on <https://www.iigcc.org> and <https://parisalignedinvestment.org>.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

- Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
- Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
- Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
 - Coal mining and power generation;
 - Fossil fuel production, servicing, exploration, distribution, or power generation;
 - Oil sands production;
 - Civilian firearms distribution;

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Tobacco related products; and
- Military weapons;
- Are assigned an ISS ESG rating of D- or below; and
- Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

- Science-based targets relating to reducing carbon emissions;
- Climate disclosure standards; and
- Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Greenhouse Gas Intensity	689.20	689.27
Exposure to Very Severe Controversies	1.12%	1.13%
Exposure to Worst-in-Class issuers	0.54%	0.54%
Exposure to Fossil Fuels	2.24%	2.25%

● *How did this financial product perform compared with the reference benchmark?*

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	19.72%	19.32%

● *How did this financial product perform compared with the broad market index?*

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	19.72%	17.54%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers World Net Zero Pathway Paris Aligned UCITS ETF
 Legal entity identifier: 254900HPXE8UO093JP04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.85% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Developed Markets Net Zero Pathway Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies across global developed markets which were selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB")

standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on <https://www.iigcc.org> and <https://parisalignedinvestment.org>.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal (“SDG”) linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

- Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
- Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
- Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:
 - Coal mining and power generation;
 - Fossil fuel production, servicing, exploration, distribution, or power generation;
 - Oil sands production;
 - Civilian firearms distribution;
 - Tobacco related products; and
 - Military weapons;
- Were assigned an ISS ESG rating of D- or below; and
- Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

- Science-based targets relating to reducing carbon emissions;
- Climate disclosure standards; and
- Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.	Indicator	Description	Performance (as at 31.12.2023)
	Greenhouse Gas Intensity	The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	523.53
	Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.38%
	Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.49%
	Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by MSCI, or for which no data was available.	2.60%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Greenhouse Gas Intensity	577.64	523.53
Exposure to Very Severe Controversies	0.95%	0.38%
Exposure to Worst-in-Class issuers	1.50%	0.49%
Exposure to Fossil Fuels	2.52%	2.60%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 22.85% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable

investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Activities negatively affecting biodiversity-sensitive areas (no. 7);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Activities negatively affecting biodiversity-sensitive areas (no. 7);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2023 through 31.12.2023

Largest investments	Sector	% Assets	Country
APPLE INC	Information Technology	6.89%	United States
MICROSOFT CORP	Information Technology	5.92%	United States
NVIDIA CORP	Information Technology	1.96%	United States

UNITEDHEALTH GROUP INC	Health Care	0.84%	United States
ELI LILLY	Health Care	0.79%	United States
JPMORGAN CHASE	Financials	0.78%	United States
JOHNSON & JOHNSON	Health Care	0.78%	United States
VISA INC CLASS A	Financials	0.71%	United States
BROADCOM INC	Information Technology	0.67%	United States
PROCTER & GAMBLE	Consumer Staples	0.67%	United States

MASTERCARD INC CLASS A	Financials	0.61%	United States
NESTLE SA	Consumer Staples	0.61%	Switzerland

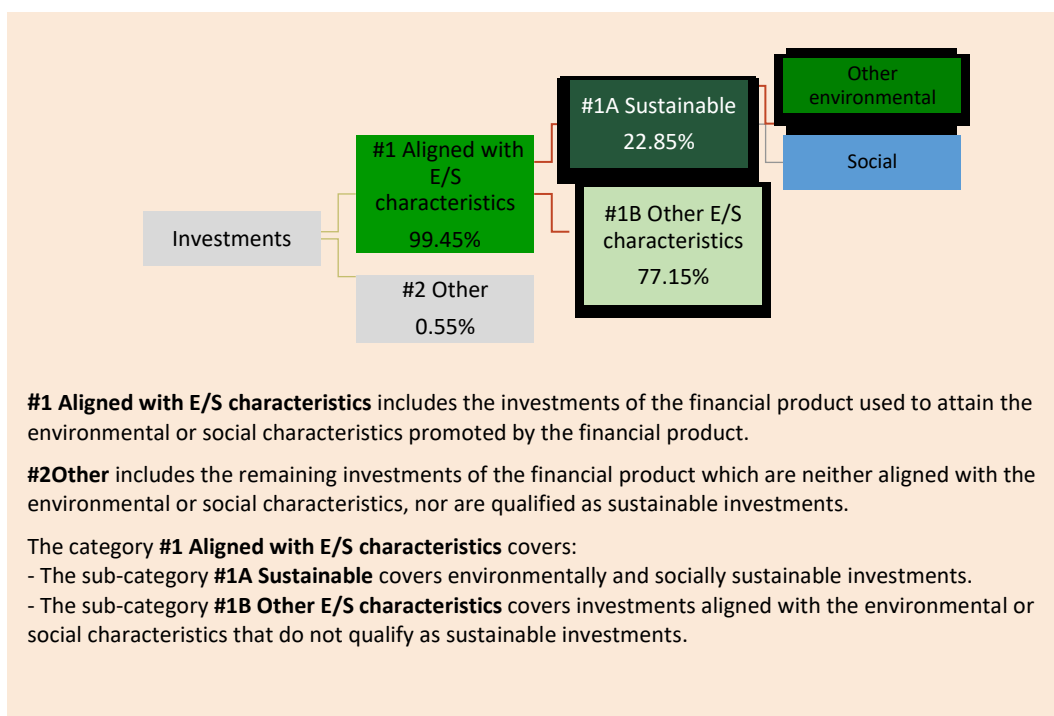

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

As at 31 December 2023, this financial product invested 99.45% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.85% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.55% of the investments were not aligned with these characteristics (#2 Other).

● *In which economic sectors were the investments made?*

The table below summarises the GICS sector investments of the financial product as at 31 December 2023.

Sector (GICS)	Financial Product's Assets
Information Technology	27.51%
Health Care	15.38%
Financials	14.34%

Industrials	9.31%
Consumer Discretionary	8.72%
Communication Services	7.62%
Consumer Staples	6.75%
Real Estate	4.81%
Materials	4.19%
Utilities	1.30%
Other / Unmapped	0.06%
Energy	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A –There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- **What was the share of investments made in transitional and enabling activities?**

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 22.85% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2023 the share of environmentally and socially sustainable investments was 22.85% in total.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2023. It also included (i) securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit <https://funds.dws.com/en-lu/about-us/corporate-governance/>.

How did this financial product perform compared to the reference benchmark?

The financial product has designated the Solactive ISS ESG Developed Markets Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Change on their Net Zero Investment Framework which can be found on <https://www.iigcc.org> and <https://parisalignedinvestment.org>.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

- Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
- Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
- Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
 - Coal mining and power generation;
 - Fossil fuel production, servicing, exploration, distribution, or power generation;
 - Oil sands production;
 - Civilian firearms distribution;
 - Tobacco related products; and
 - Military weapons;
- Are assigned an ISS ESG rating of D- or below; and
- Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

- Science-based targets relating to reducing carbon emissions;
- Climate disclosure standards; and
- Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the

carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2023)	Performance of the benchmark (as at 31.12.2023)
Greenhouse Gas Intensity	523.53	523.19
Exposure to Very Severe Controversies	0.38%	0.38%
Exposure to Worst-in-Class issuers	0.49%	0.49%
Exposure to Fossil Fuels	2.60%	2.61%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2023 to 31.12.2023)	24.22%	24.22%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2023 to 31.12.2023)	24.22%	21.72%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers ESG EUR High Yield Corporate Bond UCITS ETF
 Legal entity identifier: 254900JCYVIMXES6K908

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.83% of sustainable investments (as at 31.12.2023)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI Euro High Yield Sustainable and SRI Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of high yield, Euro denominated corporate bonds

that met specific maturity, credit quality, liquidity, and environmental, social and governance (“ESG”) criteria.

The Reference Index excluded bonds which did not fulfil specific ESG criteria. In particular, bonds were excluded from the Reference Index due to the following ESG considerations:

- Bonds rated below BB by MSCI ESG Research. MSCI ESG Ratings are designed to help identify the ESG risks and opportunities of investments. Companies were rated on a 7-point ‘AAA’ to ‘CCC’ scale according to their exposure to industry-specific ESG risks and their ability to manage those risks relative to peers.
- Issuers with a “red” MSCI ESG Controversies score (less than 1). MSCI ESG Controversies scores measures a company’s involvement in notable ESG controversies related to the company’s operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. Each Controversy was attributed a 0-10 score and a flag colour depending on the severity of its ESG impact.
- Issuers that were classified by MSCI in their MSCI ESG Business Involvement Screening Research (“BISR”) as breaching certain thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, nuclear power, civilian firearms, military weapons, and energy production from thermal coal, nuclear power or natural gas based power generation. BISR aims to enable institutional investors to manage ESG standards and restrictions.
- Issuers with any involvement in controversial weapons, nuclear weapons, or with any fossil fuel reserves.

The MSCI ESG Ratings, MSCI ESG Controversies scores and BISR were sourced from MSCI ESG Research LLC.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the “Relevant Threshold”) were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

Issuers with an MSCI ESG Rating of BBB or higher were weighted in the Reference Index at 100% weight by market value while the weight of bonds from issuers with an MSCI ESG Rating of BB were weighted in the Reference Index at a 50% weight by market value.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.44%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.44%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.44%
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.44%

● **...and compared to previous periods?**

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)
Exposure to Very Severe Controversies	0.94%	0.44%
Exposure to Worst-in-Class issuers	0.94%	0.44%
Controversial Weapons Involvement	0.94%	0.44%
Tobacco involvement	0.94%	0.44%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2023 19.83% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to

reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.
